We Wish Everyone A Happy New Year!

Annual Farm Bureau Membership Drive Begins Jan. 3

WILLIAMS TO SPEAK AT KICK-OFF DINNER

Farm Bureau Membership Drive Begins

Larry Williams, manager of the Iowa Life Insurance company, will speak at the Kickoff meeting in Hancock county on January 3, 1947, it was announced by Jack Dethmers, president of the Farm Bureau

Williams started the Country Life Insurance company for the Illinois Farm Bureau 19 years ago and was manager for nine years He managed the sale of Auto and Fire insurance in Illinois as well as the Life In-

LARRY WILLIAMS

surance company Williams rebuilt the Indiana Insurance program and put it on a paying basis for the Farm Bureau in that state.

The latest achievment of the Iowa Life Insurance company is a record of 44 millions of business in 20 months Williams knows Farm Bureau and speaks from a background of Farm Bureau experience and as a pioneer in services of a cooperative nature for farmers.

This meeting will be held at Garner High School Other features will be accordian music. Mr Jack Dethmers, who is president, will preside at the meeting

The annual membership drive begins Jan 4 and runs through Jan 10th

New Sugar Stamp Good For 5 Pounds First Of January

The OPA has announced that spare stamp No 53 will become good for five pounds of sugar beginning January 1 The new ration will expire April 30

Although no assurance could be given at this time, the OPA indicated that it may be possible to add an addtional sugar ration before the expiration of the four-months period The new sugar crop gives promise of being sufficiently large to permit an additional ration of five pounds per person in 1947

Legion And Auxiliary Meets January 7th

The Klemme American Legion and Auxiliary will meet at the hall on Tuesday evening, January 7th at 8:00 o'clock Mr and Mrs. J. C. Thomas and Mr and Mrs. Geo. Cosgriff are on the serving committee.

Former Pastor's Wife Died

Mrs A B Gedye, wife of Rev. Gedye, a former pastor of the Klemme English Methodist Church, died at her home at Williams, Iowa. Funeral services were held Friday afternoon.

403 FARMERS TO GET CLINTON OATS IN '47

Will Be Allotted 14 Bu. For Spring Planting

C J Wille, chairman of the Hancock county Seed Distribution Committee announces that 403 Hancock County Farmers will get a 14 bushel allotments of Clinton oats seed for 1947 planting Each 1946 grower has a revised list of names of applicants. He will notify each applicant when he is ready to distribute the oats No applicant should go to the grower until he gets his notice from the grower A large number of names had to be taken from one grower and shifted to a different grower

The following will give the amount of oats produced the amount each grower is keeping and the amount each grower has for distribution or sale

Elmer Engstrom produced 1486 bushels is keeping 743 bushels and has 743 bushels for distribution E G Gaskill produced 1195 bushels is keeping 549 bushels and has 646 bushels to distribute Werner Schlawin produced 1220 bushels is keeping 200 bushels and has 1020 bushels to distribute Jerry Psotka produced 1204 bushels and is keeping 300 bushels and has 904 bushels to distribute L. S Fisher produced 1150 bushels and is keeping 575 bushels and has 575 bushels to distribute Henry Swanson produced 920 bushels and is keeping 400 bushels and has 520 bushels to distribute Fern Huling produced 1688 bushels and has 1400 bushels to distribute

Each applicant should take sacks enough for his 14 bushels allotment when he goes to the grower for his oats Be sure to wait until the grower notifies you he is ready to distribute the oats.

The 109 acres of Clinton oats grown in 1946 in Hancock yielded an average of 81 bushels of clean seed per acre.

A Letter From The Patets

San Fernando, Calif

Dear Friends·

Just to let you know we arrived safe and sound in California Had a very nice trip, no trouble, had a nice warm clean cabin every night and never drove at night, just during the day

I am not in love with Mo Oklahoma, Texas, New Mexico, or Arizona Such country, all you see is desert, Indians and Mexican huts, but they make some nice things. They live so far apart I don't think they know their neighbors.

We have a nice place to live and are enjoying the winter. The weather is nice We have a lemon and orange tree in the yard, roses and geraniums are blooming.

Have met some very nice people here Took in the Bazaar and Church supper We have been to Glendale which is a very large city, we have relatives there. After Christmas we are going to many places sight-seeing

Have seen Mr and Mrs. Harvey and Wm. Stille. Milo and family are fine and the baby is growing. Prices are about the same here, Emil is fine

Mr and Mrs. E. H. Patet

SANTA CLAUS CAME TO TOWN TUESDAY

Had Treats For All The Boys And Girls

The Main Street of Klemme was swarming with boys and girls Tuesday afternoon who came to see Santa Claus and get treats which he handed out for the Civic Club, who sponsored his appearance in Klemme Santa had a lot of fun talking to the little boys and girls and getting a line on what they wanted for Xmas It was one of the biggest crowds of children in town at one time for many months and Santa and the Civic Club were well pleased with the big turn-out.

Family Dinner Held At Carl Swanson Home

Mr and Mrs Carl Swanson, who live on their farm northwest of Britt, entertained the following to dinner on Christmas day Mr and Mrs. John Etchen and Betty, Leonard Swanson and family, Roy Swanson and family, Orville Bridges and family; Mary and Albert Swanson, all of Klemme, and Mr and Mrs Carl Loefler of Belmond

HANCOCK UNIT ELECTS BLUE CROSS OFFICERS

At a meeting of the Hancock Health Improvement association the following officers were re-elected to serve the coming year President, V A Cook, vice president, Jack Dethmers; secretary-treasurer, Ada Wille. The Hancock County Health Improvement association was organized in March, 1946 A total of 176 are now enjoying the protection of the blue cross

Post-Christmas Day Dinner At Carol Brager's

Mr and Mrs Carol Brager entertained at a post-Christmas day dinner on Friday evening the following Mr and Mrs. Will Kraus, Mr and Mrs Will Riemer and Lola, Mr and Mrs Ben Riemer, Mr and Mrs. Geo Kern and daughter, Mr and Mrs. Emil Blumer; Mr and Mrs. Emil Beier and Mr and Mrs Merlin Neuberger

Klemme Soldier Home From Germany

T-5 Paul Barz, son of Mr. and Mrs Herman Barz, arrived last week from overseas service in Germany He is now on terminal leave and will receive his honorable discharge from the army soon

Supervisors To Take Inventory At County Home

Hancock county supervisors will take the annual inventory at the Hancock county home December 30 Mr and Mrs. Herman Paul are steward and matron at the home

Seaman Don Nixt is home with his parents, Mr and Mrs. Clarence Marth on a 29 day furlough.

HELLO, FOLKS!

Mr. and Mrs. Harold Kothenbeutel are the parents of a 9 lbs. 1 oz. baby girl born to them on Monday, December 23 at the Garner nursing home.

SOYBEAN ACREAGE LIKELY TO CHANGE

Comparative Yield to Corn Will Be Big Factor In Determining Area

Iowa farmers can be expected to juggle the current acreage ratio of corn to soybeans as soon as the fat and oil supply catches up with the hangover of wartime demands. The logical way will be to reduce the acreage in some counties, holding it the same in some and even increasing it slightly in others.

This is the opinion of A. G. Norman, recently of the Iowa State College agronomy staff, followng a survey of soybean yields in Iowa counties.

While part of the decision on what happens to soybean planting in the Hawkeye state depends on the relative price of corn and soybeans, Norman points out that it will be profitable to grow soybeans mainly where the yields are high and where they are high, too, with respect to corn

High Yielding Areas

High and low yields of corn and high and low yields of soybeans do not necessarily go together, Norman points out. For instance, the high soybean yielding counties are in southeast and east-central Iowa Yet these are not always the high corn yielding counties.

On that basis, Norman says the logical trend in future soybean production will be for northern Iowa farms to reduce their bean acreages more than in the central counties. If the state acreage is in the neighborhood of 1 million or higher, however, the bulk of the beans still will have to be produced in the north-central and east-central areas

Areas for Increase

In southeastern counties where bean yields always have been high and high in relation to corn, farmers may not want to cut their soybean acreages. And in one or two south-central counties where soybean yields have been good compared with corn, farmers may find it profitable to grow even more beans, especially on some of the more level land.

Farmers in south - central Iowa counties along the Missouri line and in the next tier of counties probably will keep growing about the same bean acreage because the yield is high enough compaired to corn in most of the counties.

Norman says the northern tier of counties may make the greatest reduction in soybeans, because the seasons are too short and cool for growing the present highest yielding varieties. Better adapted varieties, however, have been found and others are being developed to fit northern Iowa and southern Minnesota.

Miss Clara Koehler Pre-Christmas Bride

Mr and Mrs. Harry Koehler, who reside five miles northeast of Klemme, announce the marriage of their daughter, Clara to Dale D Sherrill, son of Mr and Mrs. Elmer Sherrill of Waterloo, which took place in a double ring candlelight ceremony at St. John's Lutheran Church north of Ventura on Saturday, December 21st with the Rev Mr Wolfram officiating

Matron of honor at the ceremony was Mrs John Eggena, aunt of the bride Bridesmaids were her sister, Miss Rosella Koehler, and her sister-in-law, Mrs Wayne Gifford Flower girls were the bride's sister, Karen Koehler and her cousin, Ellen Elaine Eggena. Nicky, 2 year old brother of the bride, was ring bearer Ross Sherrill, brother of the groom, was best-man.

The bride wore a gown of heavy satin with long train and her veil was an an heirloom which had been worn at the marriage of her mother and her aunts. She carried a bouquet of red roses centered around a corsage of pink roses and baby breath.

Mrs. Eggena wore a deep rose formal. Miss Rosella Koehler wore a light blue formal and Mrs. Gifford wore a gold formal. All wore corsages of mixed flowers.

Mrs. Koehler and Mrs. Sherrill, the mothers, both wore black dresses with corsages of red roses.

Nuptial music was provided by Miss Mildred McNancen, of Waterloo, a college friend of the bride, who sang, "At Dawning," and the "Lord's Prayer." Duane Koehler, brother of the bride sang "I Would Be True"

MRS. DALE SHERRILL

Ninety-five guests attended the reception and dinner held at the Ventura Consolidated school following the ceremony. Pastel colors were used in carrying out the decorations.

The bride is a graduate of the Klemme high school in the class of 1943 She taught in California and recently graduated from Iowa State Teachers College. Mr Sherrill is a graduate of the Waterloo high school and attended college 2 years when he was called into the army and served two years He is now attending college at Mt. Vernon where the couple will be at home after a honeymoon trip to Chicago.

BASKETBALL GAME HERE FRIDAY EVE

BRITT EAGLES PLAY HERE FRIDAY NIGHT, JAN. 3

The Britt Eagles high school basket ball team will come to Klemme this Friday night for a double-header at 7 30 o'clock.

In an earlier season game the Shamrocks nosed out the Eagles on their home floor in a game that was close from start to finish

The Eagles are coming to avenge that defeat and this should be one of the best games of the season

PERFECT "CRIB" HAND

C H Payne, Clarion, recently held the perfect cribbage hand 4 fives and jack of spades The "perfect hand" came after 30 years of trying for it, which gives non-cribbage players an idea of what a perfect hand means.

Iowa Centennial Year Came To A Close Saturday

IOWA TRAPPING SEASON ENDS JAN. 10

Season Is Still Open On Trapping Muskrat

The Iowa trapping season on all protected fur bearers except muskrat closes January 10th, the state conservation commission said Thursday in reminding trappers who wish to ship furs out of the state that must obtain a permit to do so.

Trappers may hold furs 10 days after the end of the open season without permit, but to hold them longer they must obtain a permit. Both outside shipping permits and permits to hold furs may be obtained free by writing the state conservation commission.

Any trappers still holding muskrat furs should obtain permits immediately, as the muskrat season closed Dec 10, the commission warned

Relatives Gathered At T. Blank Home

Mr. and Mrs Tom Blank entertained the following for dinner Christmas day Mrs. Agnes Ahrenkiel of Goodell, Mr and Mrs. T. C Ahrenkiel and son Robert of Hubbard, Iowa, Mr and Mrs. Fred Blank, Fredrick and Gracka; Mr Henry Falb of West Bend; Mr and Mrs W C Usher and sons Worthie and Carroll of Rowan, and Mr and Mrs. Conrad Quandt of Klemme.

Former Klemme Folks Enjoy Vacation In Chicago

Mr. and Mrs. Wm Meyer of near Miller, accompanied by their son-in-law and daughter, Mr. and Mrs Bert Johnson of near Kanawha, returned home the day before Christmas from a trip to Illinois. At Lexington they visited with Mrs Meyer's mother, Mrs. Ada McKee They also visited with relatives at Bloomington and Chicago.

Mr and Mrs. Meyer raised over 1,600 turkeys this past year They have rented their land for the next year and will devote all of their time to raising more turkeys and feeding out some of their young livestock

W. S. C. S. Will Meet Thursday January 2nd

The W S C S of the Klemme Methodist Church will meet on Thursday, January 2nd with the new officers in charge of the program. The ladies will work on a quilt and a pot luck lunch will be served.

Smaller Marketings

The eary movement of the spring pig crop means that marketings in the next few months will be considerably smaller than usual These early marketings will be offset to some extent, however, by farmers who delay sales until 1947 for income tax reasons.

Part of the movement of hogs during October and November went into cold storage Storage holdings of pork and lard usually decrease in October, but stocks of pork this year increased. The strong storage demand results from the prospect of a short pork supply next summer.

The removal of ceilings on soybeans has put an end to the barter and exchange method of selling the crop.

IOWA WAS 100 YEARS OLD SATURDAY

Admitted To Union On December 28, 1846

Last Saturday was the one-hundredth birthday of Iowa as a state

Admission of Iowa into the union on December 28, 1846 was commemorated Saturday in the senate chamber of Old Captial on the State University of Iowa campus at Iowa City.

To Present Play

University students presented a play dealing with the inauguration of Ansel Briggs, Iowa's first state governor, and with other historical events of 1846

The play was written by Dean Shuffman, a university student. It was directed by Dr. H. Clay Harshbarger, university professor of speech and radio.

Gov Robert D. Blue went to Iowa City for the ceremony. He was the principal speaker on the program in the senate chamber

Senate Program

The senate chamber program started at 11:00 a. m. A luncheon was held in the Jefferson hotel at 12 30 p m.

The centennial commission urged all Iowa churches to build their services for Sunday, December 29, around the centennial theme.

Christmas Dinner At The Montgomery Home

Mr and Mrs. Clarence Bachman and family; Mr. and Mrs. Carl Nettifee; Dorothy Meyer, and Mr and Mrs. Harry Welker of Clear Lake were dinner guests Christmas day at the Clifford Montgomery home. In the evening Mr and Mrs. Carl Finders and Jerry were supper guests.

Masonic Lodge Will Install New Officers January 9th

Installation ceremonies will be held at the Masonic Lodge in Garner on the evening of Jan. 9th which will be followed by a lunch. The newly elected officers to be installed are Walt Edelen, worshipful master, Vern Pringle, senior warden, W. F Pavey of Klemme, junior warden, C G Waterman of Klemme, treasurer, F E Morrow, Secretary

Here's One For Ripley!

Thursday evening Lee Ridder brought an electric bulb to the Times office which had been purchased in Garner the day before Christmas in 1914. It was a 40-candle power Mazda tungsten bulb Lee recalls that he used it in the clothes closet of his parents home for over sixteen years Now that he and his family have moved into the old home, his son Denny is using the same bulb in his closet. The bulb lights up brilliantly and seems to be as new.

Lee remembers that he went to Garner for his father, the late F H Ridder, the day before Christmas to get bulbs for some new fixtures. Lee made the trip by train and bought the electric light bulbs from Harry Kellog, who was then manager of the old Garner electric light plant.

CROSS TOWN
By Roland Coe

"This guy is always givin' me hot stock market tips. Last week I could have lost about 5,000 bucks!"

BOBBY SOX
By Marty Links

"But you weren't engaged BEFORE lunch!"

Just Too Late!

The station agent from the small western town was making his first trip to New York City. He was interested in seeing the seals in Central park and the skyline, but the great moment of the visit was to be his appointment with the lawyer for his railroad whose offices were in the Empire State building.

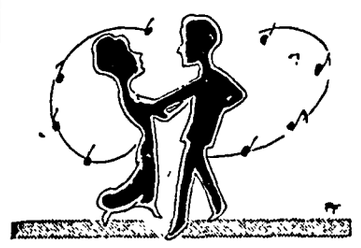
The lawyer was a big man and a busy one and he could not help being a little surprised when the agent did not arrive for the interview. It was not until nearly two hours later that a faint knock was heard on the door, and the little agent limped in.

"What a climb," he gasped as he collapsed into a chair. "Eighty flights of stairs."

"Good heavens, man," exclaimed the lawyer, "why didn't you take the elevator?"

"Well, I planned to," said the agent, "but it pulled out just as I got there."

HOW TO FLATTER



Albert—You dance wonderfully well.

Bertha—I wish I could say the same thing about you.

Albert—You could if you would lie like I do.

Neglecting Business

An old New Hampshire storekeeper was breathing his last, and a sorrowful family surrounded his bed of pain. "Is Ma here?" he asked wearily. "Yes, Zeke," she replied. "And my oldest son?" "Yes," "And the other five boys?" "Yes." "And the girls?" "Yes Zeke."

The failing patriarch struggled to a sitting position "What's the big idea?" he shouted. "Who's tending the store?"

Some Other Snake

The first time the musical instrument called "the Serpent" was used at a London concert over which the composer Handel presided, he was so much surprised at the coarseness of its tones that he called out sharply. "Vat de devil is dat?"

On being informed it was the Serpent, he replied: "It never can be de serpent vat seduced Eve."

Quick Thinking

Mr. and Mrs. Boggs were out looking at the shops. Suddenly the Mrs. stopped dead outside a milliner's window.

"Oh, George," she said presently, "I've been thinking that . . . er . . . this hat of mine is . . . er . . . becoming. . . ."

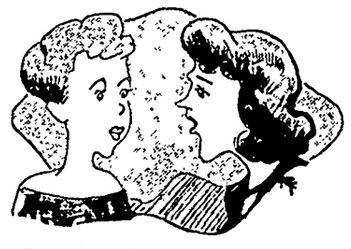
"So it is," replied her husband, taking her arm and walking on, "so it is Janet, very becoming."

Playing Safe

A lovesick but suspicious sailor bought name stationery for his girl with her name and address imprinted thereon. "Will that be all?" asked the salesgirl.

"No, just to make sure, you'd better print on each sheet 'Dear Herbert.'"

TIME STANDS STILL



Ann—I've decided that I won't be married until I'm 25.

Doris—And I've decided not to be 25 until I'm married.

Delayed Somewhere

A doctor asked his woman patient her age. "I never tell anyone my age," she answered coyly. "But as a matter of fact, I've just reached 21."

"Indeed," said the doctor. "What detained you?"

Demonstration

A seasick sailor was leaning over the rail. The captain, standing nearby, said sternly, "You can't be sick here."

The sailor regarded the captain a minute, then said, sadly, "Watch."

Use It Right Over

He—The bank has returned your check.

She—Isn't that just wonderful! What shall we buy with it this time?

Intangible Assets

"Hello, Tom, off for a vacation?"

"No, I've just come back."

"Feel any change?"

"Not a blame cent."

Nothing to It

Graduate—I'm indebted to you, sir, for all I know.

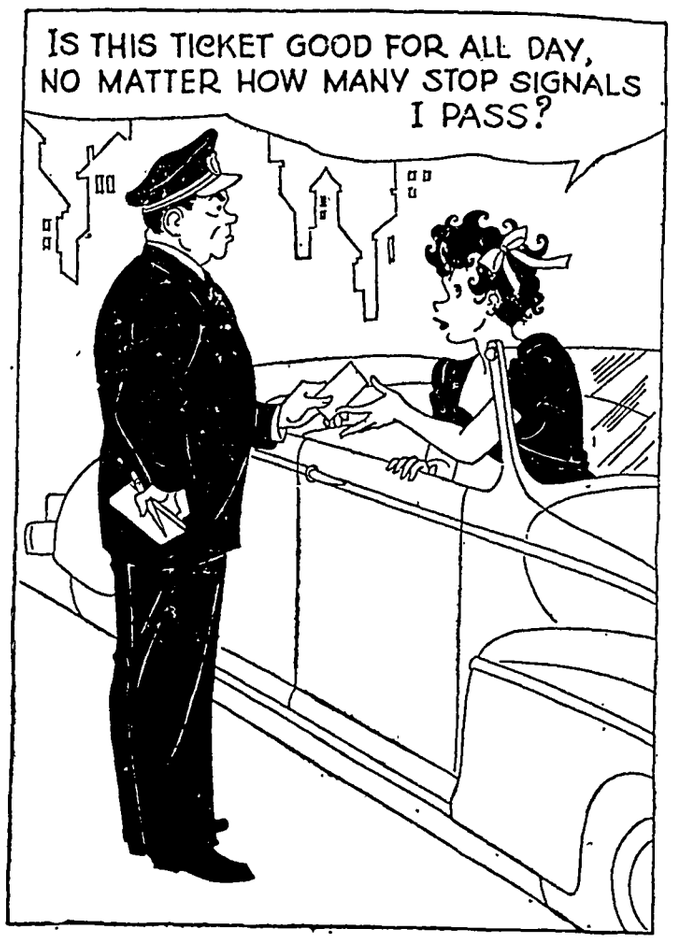
Professor — Oh, don't mention such a mere trifle.

Elusive Mate

Woman—A husband like yours must have been hard to find.

Neighbor—He still is when I want him.

MOPSY by GLADYS PARKER



LAUGHING STOCK By Frank Adams

"Poor old Briggs . . . He can't get started in the morning until he's had his coffee"

Next In Line

Mother—Here, Paul, are some nice toys your brother isn't using any more, and they're just as good as new.

Paul (weary of his brother's hand-me-downs)—Ma, will I have to marry his widow when he dies?

Real Hardships

Two mountaineers were complaining about the cold. "Nearest I ever came to freezing to death in my life was holding the lantern while my wife cut kindling!" said one.

The Safest Place

An ambitious city man, who wished to start a new venture in the country, asks an agricultural adviser, "Where is the best place to keep goats?" "In front of you, my boy!" replied the agriculturist.

Good Record

Traveler—Don't you cut yourself pretty often with this straight-edged razor?

Mountaineer—Naw, I been shaving nigh on to five years now and I ain't cut myself either time.

THE WORD MADE FLESH

LESSON TEXT—John 1 1 18

MEMORY SELECTION—No man hath seen God at any time, the only begotten Son, which is in the bosom of the Father he hath declared him.—John 1 18.

A new year always carries with it a deep sense of responsibility and at the same time a thrill of expectancy.

That is why we need to begin this new year—and continue it—in the study of God's Word, so that we may know his will You will find it to be a joy and blessing to you, not only as you study it by yourself, but also in the fellowship of those in the Sunday school and church.

Our lessons for the next three months are of unusual interest, for they take up the Gospel of John which was "written, that ye might believe that Jesus is the Christ, the Son of God; and that believing ye might have life through his name" (John 20.31).

Jesus Christ is here presented as the Word (Logos), and he is indeed the living Word come to reveal God to us.

I. The Living Word Is the Light of Men (vv. 1-5).

Men ask questions about Christ. They want to know whether he is to be regarded as a good man and a great leader, or must we recognize him as being God?

The answer is here. He "was" in the beginning (Gen. 1:1), which means that he pre-existed from all eternity, and he "was God" even as he was "with God." This eternal, living, divine Word was the "express image" of God (Heb. 1:3), and so perfectly revealed the Father (v. 18)

He is the Creator (v 3) and giver of life both natural and spiritual.

This eternal Word became (as he was) the light of men. He came to shine into the darkness of a sinful world with the only light of redemption. We say again, "This is the Lord!"

II. The Living Word Is a Divider of Men (vv 6-13).

The darkness of sin was so deep, and still is so deep that the glorious light of God is not received with gladness, nor accepted at all. We see that in the close of verse 5

Now the question comes, Does it make any difference how a man regards Jesus Christ?

The answer is clear. You must decide what you will do with him. You cannot avoid that decision or evade that light which shines. You must either accept or reject, and a failure to accept is a rejection

God has witnesses to the Light. John was such a witness and he, like all true witnesses for Christ, directed attention to him. John's great testimony was just a lesser light to point men to the true Light. That true Light is shed abroad for all men (v. 9).

As they face Christ, men divide into two groups. His own people, and his own creation rejected him when he came (v. 11). How utterly tragic! And yet the same thing goes on today Men hear the gospel, are made acquainted with Christ and his claims, yet fail to accept his proffered salvation, and are eternally lost (John 3:19; Eph. 2 1).

But, thank God, there are those who receive him (v. 12), and to them he gives the power, the right or authority, to be the sons of God

This change is expressly declared to be (1) not by reason of family or heredity—"not of blood", (2) not by natural instinct or development —not "of the will of the flesh"; and (3) not by human volition or by man's will power—not "of the will of man."

III. The Living Word Is a Revealer of God (vv 14-18).

The eternal Word, the Lord Jesus Christ, laid aside his place of honor in heaven, came to earth and took upon himself our flesh that he might redeem us from sin What infinite condescension, what unfathomable love!

He dwelt among men and showed forth the grace and truth of God, for he was full of these heavenly attributes. But it was in his giving of himself as Redeemer and Saviour of mankind that he fully revealed God in all his gracious love for us.

Notice the antithesis here. "Law" is set over against "grace"; "given" stands in contrast with "came," and "Moses" with "Jesus Christ."

The law was a schoolmaster to bring us to Christ (Gal. 3:24), but it could not save anyone; but grace —oh, it is by grace that we are saved (Eph. 2:8).

Moses was God's honored servant, but Jesus was the Son in the household (Heb. 3:5, 6). It was this Son of God who came to reveal the Father and to declare his grace in salvation.

The law was sent through a messenger, but no messenger, no matter how great or worthy, would do to bring the gospel of the grace of God. That message of "grace and truth came by Jesus Christ" (v. 17).

Sportlight by Grantland Rice

THIS has been an odd and unguessable season in college football, outside of Army and Notre Dame, but its greatest mystery moves in the direction of the Rose Bowl, the Pacific Coast conference and the Big Nine. Here we have something that passes all understanding It was perhaps a trifle foolish in the first place to think that the Big Nine would pass up the $100,000 or more it could collect from the coming Rose Bowl game and give Army its proper chance to meet the wishes of both U C L.A., Southern California, the entire west coast and practically 100 per cent of this country's football lovers.

Grantland Rice

The Big Nine's only interest was in $100,000. This can be understood in a great game that is getting to be more and more commercial, with sportsmanship now a mere sideline. The Big Nine is not alone in this commercial angle, although it is one of the leaders. But what we can't understand is how the Pacific Coast conference suddenly turned and passed over the Rose Bowl to Big Nine control. For many years the Rose Bowl delegation has been trying to get the Big Nine in line.

A Sudden Change

Year after year the Big Nine or the Big Ten has handed the Pacific Coast conference the dead eye and the frozen hand. It has completely ignored the Far West. Apparently the Big Nine, awaking suddenly to $100,000 revenue which had been going to southern teams, most of them also commercialized, had a startling change of heart. The Big Nine has decided to shut off this revenue from southern teams in the honest belief that such teams were using this important cash to "take care" of players, many of them from the Midwest.

But the mystery is this—why should the Pacific Coast conference suddenly decide to turn over the running of the Rose Bowl to the Big Nine, after so many years of backhanded action? Why should the strong Pacific Coast turn yellow? Every one who follows football knows that Army should have been the only possible selection—a great team, playing its final game, keen to go—the team both U.C.L.A. and Southern California wanted.

With this chance to regain its bowl leadership, why should the Pacific Coast conference suddenly decide to make this just another intersectional game, secondary once more to the Sugar Bowl as far as class and general interest go?

The Major Mystery

But this isn't the most baffling point of the five-year arrangement. In the future the Pacific Coast conference will enter its Far West champion. The Big Nine will play its champion the first year but, if this champion repeats, another team will be named. This may be the second or third Big Nine entry It won't be a champion who repeats. And later on the Big Nine will select the opponent to face the Pacific Coast conference champion—from the Midwest or from the East—or from anywhere else This gives the Big Nine control of the Rose Bowl game, a game the Pacific Coast conference started and developed and placed on top. The Big Nine, hostile to the South's system of paying or recruiting football players, hostile to the South's financial benefit from bowl games, now becomes the South's greatest benefactor From now on the Sugar Bowl, the Cotton Bowl and the Orange Bowl will benefit considerably from the recent Rose Bowl action.

The Biggest Thrills

This has been a sporting season, now moving swiftly into ancient history, that has known more than its share of ups and downs, of dull spots and of thrills, of brilliancy and second rate effort.

But, it still has given us sport thrills that will hang on in memory

A few of these in the order of their appearance were:

Assault's great stretch run in the Kentucky Derby, the opening shot for the Triple Crown.

Two others came in the solitary, but solid, punch that Tami Mauriello threw at Joe Louis, in the first few seconds of their meeting, and the melodramatic melee between defending champion, Tony Zale, and challenger, Rocky Graziano, in their middleweight brawl, a super production in its fashion.

Then there was the final game of the last world series where, in the closing two innings of the seventh contest, the Cardinals and the Red Sox with slim Harry Brecheen called on for the third stand, put on a show that came near tearing the human pulse out by the roots.

The two final thrills belonged to the last two football games I saw: The Pennsylvania-Cornell contest and the Army-Navy game. In each case the underdog, given from 25 to 30 points the worst of it, battered and beaten, came from far back to steal the show.

Torch in Hand of Vulcan Statue Warns Motorists

A new method of reminding motorists to drive carefully is an electric torch that is being installed in the upraised hand of the giant statue of Vulcan in Birmingham, Ala For 24 hours after a fatal traffic accident, the light will glow red instead of its normal green.

How To Relieve Bronchitis

Creomulsion relieves promptly because it goes right to the seat of the trouble to help loosen and expel germ laden phlegm, and aid nature to soothe and heal raw, tender, inflamed bronchial mucous membranes. Tell your druggist to sell you a bottle of Creomulsion with the understanding you must like the way it quickly allays the cough or you are to have your money back.

HEAD COLD

● Rub in Ben-Gay for gently warming, soothing, speedy relief from cold discomfort! Ben-Gay contains up to 2½ times more of those famous pain-relieving ingredients known to every doctor—methyl salicylate and menthol—than five other widely offered rub-ins. Insist on *genuine* Ben-Gay, the original Baume Analgésique. It acts fast!

Also for Pain due to RHEUMATISM, MUSCLE ACHE, and STRAINS. Ask for Mild Ben-Gay for Children.

QUICK... RUB IN **Ben-Gay**

FOR 1947

NEW YEAR'S bells are ringing—ringing out the old, ringing in the new.

We look forward hopefully, with you, to the future, and wish you all the blessing the bright New Year can bring.

•

DR. W. F. MISSMAN
Physcian & Surgeon

THE SEASON'S GREETINGS

Again we say Happy New Year to our friends and patrons. May 1947 bring you more health, happiness and prosperity than you have ever before enjoyed.

*

QUANDT'S CAFE

Mr. & Mrs. Conrad Quandt

It was hope that sent the Spanish galleons plowing through uncharted seas . . . hope that kept them on their course until they sailed between the Virginia capes. It is hope that "springs eternal in the human breast," hope that gives to New Year its magnificent spirit and the will to do.

Hopes are stronger than wishes. We hope for you the fulfillment of all you plan for today, the best twelve-month that Father Time has ever meted out to you. And for right now, the happiest of New Years.

NEW YEAR will put on his show at the midnight hour, as always in the past. As the show-boat disappears round the bend in the river and we get back into the old routine we hope for you that there was more to it than the fleeting joys of the New Year holiday, that "something has been added"—something of permanent stature— will really make a big difference to you.

Hancock County Cooperative Oil Association

AROUND IOWA

14,200 RATS

The rat population of Guthrie Center was estimated recently at 14,200. Unable to get a Pied Piper, the Guthraians planned a one-night rat extermination campaign, feeding the rats horsemeat and ANTU.

TALL CORN STORY

Allen Bull, Guthrie county farmer, has claimed a yield of 438 bushels of corn from 3 and 3-4 acre field, a yield of approximately 110 bushels per acre. The corn was planted April 24 on spring-plowed ground and cultivated twice.

RAN OVER FOX

Clifford Janzen of Newburg has introduced a new sport, fox hunting by automobile. When the fox ran dow the road ahead of Janzen's car, he turned his spotlight on the critter and succeeded in running over it.

RECALLS METEOR

Postville residents are puzzled by a recent phenomenon which shattered windows and may have been a falling meteor. Hugh Shepherd of Postville recalls that a meteor fell near Postville 50 years ago, landing on the Henry Weihe farm sotuh of Postville

CAUGHT ON THE WING

A group of pheasant hunters from Hinton were out in the field. Clarence Lebcke fired a shot at a pheasant overhead, apparently frightening the bird, and as it swooped low to the ground, another hunter, Joe Levins, reached up and caught it by one wing

HURT BY CORNPICKER

Werner Gode, Whittemore a farmer, was caught in a corn picker recently and stripped of all his clothing from the waist down No bones were broken, but he was shaken up and bruised in the sudden disrobing.

DEER NEAR VILLISCA

Passengers in a bus near Villisca had their journey halted momentarily recently, when a big buck deer crossed the road. Unafraid, the deer made such a leisurely crossing that the bus had to stop.

ARM IN WRINGER

Lyle, young son of Mr. and Mrs. Donald Finnell, of Hamberg, stuck his finger into a clothswringer recently. His curiosity was soon satisfied. Fortunately the wringer tripped, after drawing his arm in up to the elbow, and he was not seriously injured.

DRIVER LUCKY

Sol Winston, New York fur buyer, will long remember a recent trip to Iowa Cruising along near Osceola, he had to pull over suddenly to miss another car and his auto rolled over several times. He was not hurt, except for bruises. Driver of the offending car did not even stop

STOLE CAFE

Burglars in Otumwa food market did not take the time to blow open the safe They removed safe and all and blew it open at their convenience in Memorial park It contained $3,000.

CRANKCASE EXPLODED

While working on an automobile at Seymour, Harbert Cook narrowly escaped serious injury when gasoline fumes in the crankcase exploded, blowing the cap off of a breather pipe into Mr Cook's face, and temporarly blinding him with cylinder oil. A few stitches were necessary.

BABY ESCAPED

The two year old son of Mr. and Mrs Lowell Wilson of Clarinda escaped serious injury recenty, when the blankets of his baby buggy caught fire from a heater in the Wilson home. The blaze was discovered right away and except the effects of heat and smoke, the youngster appeared to be okay.

THOUGHTFUL THIEF

When Donald Finnell of Hamburg went to start his corn picker one morning last week, he found a note on the steering wheel, "Do not use tractor; the radiator has been drained." The thief stole the anti-freeze was thoughtful enough to leave the note so that no harm would be done to the engine.

NARROW ESCAPE

Six Cascade young men, five of them just back from the war, found the hazards of our peacetime highways worse than the war recently. Their car struck loose gravel and went over an embankment, turning over six times. None wer seriously hurt.

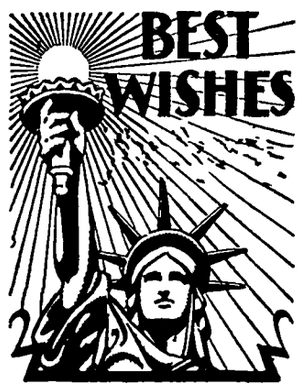
BACK TO FOXHOLES

Most soldiers now on duty thought the day of foxholes was over. But in the Marianas, Pfc. Roland Eskov advised his parents, Mr. and Mrs. Hans Eskov of Kimballtown, that during a recent hurricane the men sought safety in foxholes when the roofs of their barracks were ripped off in the wind.

CORN POISONED

14-month old Lorretta Ann Achembach, of near Tabor, died recently of botulinus poisoning after eating some of the contents of a can of corn, home-canned, which had spoiled. Mrs. Achembach had noticed that the corn did not "look right," which had opened one can. While she was examining the remaining cans Loretta Ann got into the spoiled corn. It was impossible to determine if she had eaten any and she seemed to be alright until the next morning. 35 adult chickens, who ate some of the spoiled corn, also died.

Women are not as strong as men physically, but they can put a lid on a fruit jar so tight that it takes a man 20 minutes to get it off.



FOR 1947

* Freedom of Opportunity is an American heritage. It was this, more than all else that made America great.

We hope that 1947 will offer each of you more abundant means of turning "the American way" to better account—that each day will bring you more and richer blessing.

DR. D. P. ANDERSON
Veterinarian

HOMEWARD BOUND

Mrs. Pauline Miller, of Grundy Center, took some chickens to market in Reinbeck recently. In opening the coop, she permitted one chicken to make its escape. Some time afterward she returned to her car, parked about two blocks away, and found the missing chicken perched on it, ready to make the trip back home.

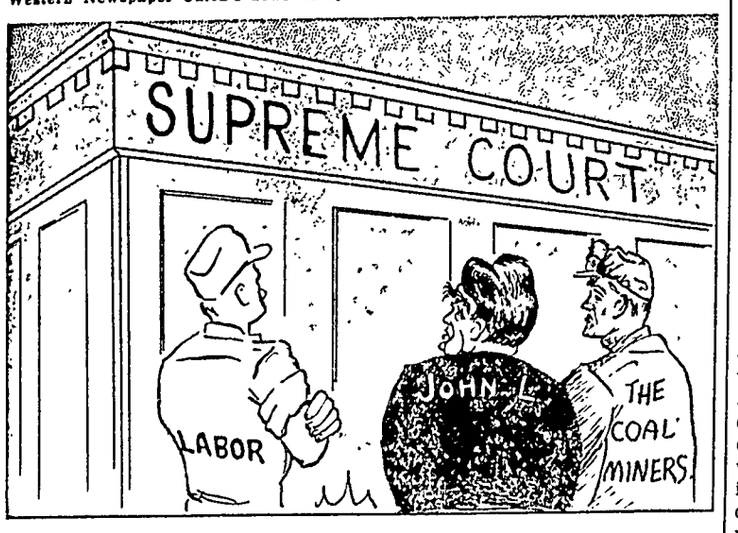
WEEKLY NEWS ANALYSIS

Packers Sign Wage Agreements; Grant Carriers Rate Relief; Labor Awaits High Court Decree

Released by Western Newspaper Union

(EDITOR'S NOTE: When opinions are expressed in these columns, they are those of Western Newspaper Union's news analysis and not necessarily of this newspaper.)



LABOR:
Packer Peace

Meat conditions continued to look rosy for the American housewife with the AFL and CIO packinghouse unions coming to terms with the big packers on new contracts without resorting to costly strikes.

The AFL Amalgamated Meat Cutters and Butchers Workmen set the pattern for peace in the industry by agreeing with Swift on a 7½ cent an hour wage increase, higher pay for night work, a better vacation plan, pay for eight holidays and reduction of geographical wage differentials Including all benefits, the total hourly increase amounts to 12 cents.

Not to be outdone, the CIO United Packinghouse Workers of America then signed with Cudahy for an average wage increase of 15 cents, extra night pay, a sick leave plan, compensation for eight holidays and elimination of geographical wage differentials At the same time, the CIO union also reached agreement with the Tobin Packing company of Fort Dodge, Iowa, on a new contract providing for guaranteed employment of 52 weeks.

Sue for Back Pay

As a result of a Supreme court decision of last June 10 decreeing that employees of the Mount Clemens Potters company were entitled to compensation under the fair labor standards act of 1938 for walking to their jobs on plant property, American industry faced the prospect of being forced to shell out hundreds of millions of dollars of back pay.

Wasting no time in taking advantage of the court ruling, the CIO United Steelworkers and CIO Auto Workers filed suits in the Cleveland, Ohio, federal court for back pay for 180,000 union members The Steelworkers asked 56 million dollars for 148,000 employees of Republic Steel company and 38 million dollars for 30,000 workers of American Steel and Wire The Auto Workers seek 12½ million dollars for 2,000 employees of Ohio Crankshaft company.

At least one employer, faced with the prospect of being forced to pay help for time spent in reaching their jobs in the plant, settled with the union Dow Chemical company of Midland, Mich , agreed to pay 1,200 employees of John L. Lewis' UMW's District 50 a total of $4,656,000

FREIGHT RATES:
Grant Boost

Interstate Commerce commission was unanimous in granting rail and water carriers an average 17 6 per cent freight rate increase and permitting railroads to maintain a 10 per cent passenger fare boost.

Noting that wage costs alone since 1941 have mounted by $1,382,000,000 annually, ICC declared that the new rates were necessary (1) for maintenance and development of the transport system to meet national needs, and (2) to assure the movement of a high volume of traffic efficiently.

Rates on commodities other than those especially treated were increased by 20 per cent under the ICC order while tariffs on agricultural products and livestock (except fruits and vegetables) were boosted 15 per cent. Maximum increases were allowed on many items to maintain the competitive balance between different regions.

SUPREME COURT:
Weighty Decision

In calling off the costly soft-coal strike, John L. Lewis of the United Mine Workers was content to leave determination of the issue to the U. S. Supreme court. Said John L.: "The Supreme court is, and we believe will ever be, the protector of American liberties and the rightful privileges of individual citizens."

Having agreed to consider the case directly from the federal district court, the high tribunal set January 14 as the date for government and defense arguments. Upon the final decision not only rested whether the heavy fines against the UMW and Lewis would stick but, more importantly, whether government-operated industries could prevent workers from striking

Legally, the issue boiled down to this: Could government operation of an industry be considered essential to the running of the government? As the ruling power, the government said all its actions were necessary; on the other hand, the UMW said the running of coal mines was not within governmental province.

BRITAIN:
Royal Romance

Great Britain, which takes its royalty seriously, was bubbling all over with the latest regal romance, this one involving Prince Philip of Greece and Princess Elizabeth.

Long rumored, the engagement of the royal couple loomed as more and more of a possibility as the British press continued to build up the handsome, blond prince. Much ado was made of his application for British citizenship. Steamed up over the ballyhoo, bobby-soxers joined otherwise staid Britishers in believing the match was "super."

While the prince and princess made a fitting couple, the rumored romance was not without its political implications. Such a royal marriage would bind Britain more closely to Greece, which occupies a strategic position in the eastern Mediterranean and presently is a diplomatic battleground between Britain and Russia in the fight for control of the Near East.

Princess Elizabeth and Prince Philip shown as they attend reception in London.

FOREIGN MINISTERS:
Germany Next

Having cleaned up the Balkan peace pacts, the foreign ministers of the Big Four agreed to undertake the thorny issue of a German treaty in Moscow next March.

The decision came as the U. S. and Britain determined to unify their two occupation zones to speed up the economic recovery of western Germany and trim their relief burdens, and continental Europe, once dependent upon the Reich for essential supplies, continued to lag in reconstruction.

U. S. consent to conduct the parley in Moscow was forthcoming only after Russian Foreign Commissar Molotov promised Secretary of State Byrnes that newsmen would be given both freedom and facilities for reporting the meeting. Byrnes insisted that newsmen had not been afforded suitable accommodations during the last confab in the Soviet capital.

Whooping Cough Takes Surprising Toll

Whooping cough kills more children each year than infantile paralysis and scarlet fever combined and many hundreds of unnecessary deaths occur annually because of exposure of children to this dangerous disease, according to a health warning from Northwestern National Life Insurance company.

In 1944 the United States Public Health service recorded 1,878 deaths from whooping cough, compared to 1,361 deaths from polio and 422 deaths from scarlet fever. Preliminary figures for 1945 show 1,726 deaths from whooping cough, compared with 1,189 from polio and 349 from scarlet fever.

The number of cases of whooping cough climbs steadily throughout the winter months, reaching a high in March or April, it was said.

U. N.:
Slap Franco

Even as 300,000 Spaniards assembled before the national palace in Madrid to hear Generalissimo Franco lash "foreign interference," the United Nations political and security committee, meeting at Lake Success, N. Y., adopted a resolution for the withdrawal of all members' ambassadors from Spain.

Remaining obdurate in its contention that no drastic action should be taken against Spain but the Spanish people should be given every opportunity for holding free elections, the U. S. abstained from voting on the resolution. As it was, the resolution was mild enough, since the countries agreed to leave other diplomatic representatives in Spain to conduct business as usual. Effect of the action was to snub Franco on the direct government level.

Fiery Spaniards plastered fiery placards against "foreign interference" in Madrid in the demonstrations against world condemnation against the Franco regime In addressing the throngs, Franco declared. The Spanish government was a matter of concern to the Spanish people alone; Spain had demonstrated its peaceful intentions by remaining neutral through World War II; Spain showed its willingness to further prosperity by being willing to deal commercially with other nations.

'Big Train' Passes On

Another of baseball's greats passed into Valhalla with the death of Walter Johnson, 59, acclaimed by many as the greatest pitcher who ever toed the rubber.

Famed for his blinding speed, Johnson blazed a trail of glory during his 21-year playing career with the Washington Senators. Known as the "Big Train," he won 413 games and lost 280; set the modern strike-out record of 3,497, topping the 200 mark for seven consecutive seasons; hurled 2 no-hitters, and 114 shutouts

Big Train

But statistics do not tell the true story of Johnson's greatness. Indicative of his prowess and strength, he blanked the New York Yankees three times in four days in 1910. In 1911, he struck out four men in one inning after his catcher had allowed one batter to reach base when he dropped a third strike. In 1912, he pitched 56 straight scoreless innings.

ROCKET PLANE:
Beautiful!

Stepping out of the Bell XS-1 after taking the rocket plane up to 35,000 feet and running it at 550 miles per hour, test pilot Chalmers Goodlin, 23, exclaimed gleefully:

"The plane, the engine — in fact, everything about the flight — was beautiful. It was all very quiet, with absolutely no noise at all in the cockpit, no sensation of the roar of an engine."

Fueled with ethyl alcohol mixed with oxygen, the XS-1 is designed for a speed of 1,700 m.p.h , but Goodlin held it down to 550 m.p.h. in the preliminary test. Built for speedy, high altitude flying, the plane measures only 31 feet in length and has a wing span of 28 feet.

Army acceptance of the craft is conditioned upon its ability to travel at 80 per cent of the speed of sound, which ranges from 660 m.p.h. to 763 m.p.h., depending upon temperature and altitude. In hitting it up at 550 m.p.h., Goodlin achieved a speed of 75 per cent.

NEAR EAST:
Bluff Reds

Russia drew a pass in the diplomatic poker game in the Near East as Iran, Greece and Turkey, backed by the Anglo-American powers, rebuffed leftist jockeyings for advantage in Iran and Greece.

In a bold maneuver to test the extent of Russian determination to dominate oil-rich northern Iran, government forces marched into Azerbaijan province ostensibly to guarantee free parliamentary elections. At first, Communist leaders threatened civil war if the government troops continued their march, but suddenly backtracked when the Nationalists called their bluff.

Guerrillas seeking to establish themselves in northeastern Greece also were left holding the bag when. Greek regulars routed 1,000 leftists at Corymbos and the remnants were wiped out by Turkish troops when they fled across the nearby border. Communist - dominated Bulgaria was implicated in the scuffle, Greek government sources claiming that the guerrillas were provisioned by Bulgars and some of the wounded carried back into that country.

MINERS:

As John L. Lewis maneuvered for shorter hours and higher pay for his United Mine Workers an industry spokesman asserted that the miner draws more money than auto, steel and oil workmen.

Declaring that conditions in the mines have changed in recent years, Wilfred Sykes, president of Inland Steel company, averred that while miners were paid for a 54-hour week they actually dug coal only 35 to 42 hours, being compensated for lunch time and travel pay.

HIGHLY HAZARDOUS

Attack Launched Against Accidents on Home Front

WNU Features

"There's no place like home"—especially when it comes to danger. Home accidents kill one person every 15 minutes and injure someone every six and a half seconds. Injuries alone from mishaps at home reach 4,800,000 a year, according to the National Safety council. Approximately 130,000 of these leave permanent marks ranging from simple burns to serious cripplings. Yet the home accident rate climbs higher every year.

Why? The answer, according to the safety council, is that when people are at home they unconsciously feel safer from accidents When completely relaxed, they are off guard This attitude makes them more vulnerable, accounting for the difficulty in preventing home accidents.

Warfare against the menace of home accidents is being carried on along many fronts. Safety councils, insurance companies and government agencies are conducting broad educational campaigns to make people aware of the home front hazard.

Effective attacks against the "enemy within" are being launched by a number of manufacturers of home appliances and devices that ordinarily cause home accidents when carelessly used or abused. Safety is being blueprinted into the design and engineering of a growing number of mechanical gadgets going into the house.

A cordless electric iron combining safety with convenience eliminates the fire hazard to the ironing board. A luminite switch plate which automatically turns on when regular room lights are turned off eliminates the need for groping while trying to locate light switches and prevents stumbles over furniture in dark rooms.

A new knife rack that hangs on the wall replaces the clutter of cutlery found in the usual kitchen drawer A new portable electric room heater with non-radiant coils prevents burn or shock To guard against falls in slippery tubs or on tile floors, a new bath mat has a vacuum grip.

Housewives no longer will be prone to fall off kitchen stools, a new variety of step-stool having a hinged top which automatically remains at a right angle to the upper step, preventing the user from stepping too far forward.

Rural Youngsters Will Raise Dogs For Army Corps

Rural youngsters will play an important role in a plan to raise dogs for purchase by the army, according to an announcement released by the Army Dog Association, Inc., a nonprofit organization that helps the army obtain animals for the K-9 corps.

At present the project calls for boys and girls living within the farm area bordering New York's metropolitan area—New Jersey, northeastern Pennsylvania, the lower Hudson valley and Long Island—to bring up the animals. The area restriction is imposed because of the need for periodic inspections to make certain the puppies are receiving the early care essential to developing sturdy adult dogs.

While participation in the program is not necessarily limited to teen-agers, it is believed that both as a patriotic project and one involving experience in an interesting phase of animal husbandry, the plan of raising puppies until they are old enough to be enlisted in the army will appeal especially to members of the Boy Scouts, Four-H clubs and other youngsters.

On the basis of performance under all climatic conditions, the army has decided to limit its dog force for the time being to German shepherds. The services of dogs in the recent war convinced the army that the K-9 corps should have a place in its permanent establishment.

Cowhands Snort at High Falutin' Hunt

PHOENIX, ARIZ.—None of this pink coated, high falutin' fox chasing for Arizona cattlemen, who traditionally like their shooting straight and their hunting strictly western.

Disgusting snorts in regard to "fancy pink clothes" and "dudes" are emanating from a new organization created here—the Arizona Old-Time Cow Hands' Anti-High-Toned Fox Hunting association.

It all started when cattlemen read about plans for an English style fox hunt at Tucson.

"Ridiculous," snorted John Edward Dalton, president of the new group. "I sure never thought anyone would get himself all rigged up in fancy pink clothes and go chasing a little fox around this Arizona country."

Psychologist Gives 'Dull' Boy a Break

LINCOLN, NEB. — Although he may hover in one grade for several years, the so-called large, backward boy may be brighter than many of the classmates who jibe at him. Authority for the statement is Dr. D A. Worcester, director of University of Nebraska educational psychology clinic.

The psychologist, who has tested more than 6,000 children during the last 10 years, says: "Many children are labeled 'dull' in our public schools because of remediable defects." He lists the most common of these as speech, hearing and sight deficiencies and certain mental blocks.

Mirror Trap Makes Monkeys of Monkeys

CHICAGO.—Monkeys made monkeys out of themselves when they succumbed to a trap designed by Brookfield zoo attendants to lure them into winter quarters. The trap, which saved a lot of vocabulary and footwork, consisted of a two-compartment box furnished with mirrors and a banana. The monkeys, fascinated by either, entered the box and were trapped!

"Off We Go" AVIATION NOTES

AIRPORT CHATTER

Eighty-nine planes brought 260 members of Elks lodges from all parts of Wisconsin to Milwaukee on the first of a series of breakfast flights. Despite gusty cross winds, all 89 planes landed without a mishap and, after the meeting, took off in 28 minutes. A more extensive breakfast flight is planned next summer. . . . First feeder airline in Washington state, connecting Walla Walla and Seattle through Kennewick, will go into operation in January with new twin-engined D18C Beechcraft transports The airline will be operated by Inland Airways, Inc., with Perry Cole, army air force veteran, as president. . Organization of the Iowa chapter of the American Association of Airport Executives was perfected at a two-day aviation clinic in Des Moines Walter Betsworth, manager of the Sioux City airport, was named temporary president of the group, which has a potential membership of 40. Principal value of the group will be to act as a clearing house for ideas on airport operating problems. . . . When Virgil B. Day Jr. made a forced landing in his light sports plane during a touch football game on the Kearney, N J , oval, the football players came to his rescue The players found the trouble—a plugged gas line—fixed it and helped Day take off Then they resumed their game. . . . Reports show that during the past year 52,850 acres of farm crops in the state of Washington were treated with dust or spray spread by planes for control of insect pests or diseases.

* * *

Victor G. Carlson, flying farmer of Cherokee, Ia., believes the time will come when there will be a plane on every Iowa farm. He has found his plane practical and a great time saver in operating three separate farms totaling 900 acres. The Carlsons are a flying family, with exception of Mrs. Carlson, who has taken only one ride in a plane. Carlson's son, Don, 19, also has a private flying license and two others members of the family, Helen, 17, and Jack, 16, are taking instruction.

'HIGH JUMP' WINGS . . . A crew member of the Mount Olympus, flagship of the navy's "Operation High Jump" expedition to the Antarctic, is shown in cold weather clothing as he gets into a ski-equipped plane aboard the flagship.

* * *

ADOPTS SYMBOLS

To speed off-loading of air cargo, TWA has instituted a system of stenciling packages with distinctive symbols representing destination points. Some of the identifications being used are the Statue of Liberty for New York, the sphinx for Cairo, "the loop," nickname of its business section, for Chicago, the automobile for Detroit, the capitol dome for Washington, the Colosseum for Rome, the fleur-de-lis for Paris, the elephant for Bombay and a snake charmer for Calcutta.

The Washington MERRY-GO-ROUND

DREW PEARSON

ARMY CANCER CURE

WASHINGTON. — Walter Reed General hospital has made some excellent progress in treating cancer, but it's kept such a hush-hush secret that the doctor in charge of cancer research, Lieut. Col. Milton Freedman, is about to be kicked upstairs because of a news leak.

It so happens that the amount of cancer in the army is high—so much so that the number of cases is kept secret. But one whole wing at Walter Reed hospital is devoted to cancer, and Dr. Freedman made so much progress that various editors got wind of what was happening and tried to print the story.

At this point, Surgeon Gen. Norman Kirk stepped in. It was made clear that medical corps policy did not permit mentioning the name of any hospital specialist. Only the surgeon general's office could be mentioned in connection with cancer research.

The cancer specialists didn't particularly mind this policy. But as an aftermath of this, Kirk wants Freedman kicked upstairs to an administrative post, where he would shuffle papers instead of practicing medicine. This Freedman refuses to do.

Meanwhile, doctors criticize Kirk for continuing his wartime policy of wasting medics During the war he corralled 40 per cent of the nation's physicians, then let many of them spend about three months sitting idle for every month they devoted to medical practice. Some had so much free time, they even organized softball teams to keep themselves occupied. Many would have stayed on in the army, but were fed up with the regimentation of the surgeon general's office

* * *

NORTH CAROLINA YANKEE

When administration friends approached Max Gardner, former governor of North Carolina, about being U. S. ambassador to the Court of St. James, Gardner replied:

"I've been bowin' and scrapin' to North Carolinians all my life, and in my old age I'll be darned if I want to be bowin' to anyone else now."

However, at this difficult period, with British labor kicking over the traces against the British alliance with right - swinging, Republican-bent USA, Gardner will make about the best possible choice for American ambassador—whether he puts on knee breeches or not

State department officials already have warned Gardner that he will have to hire a valet —which will go against the new ambassador's homespun humility. He also will live in Barbara Hutton's ornate former palace, surrounded by about 25 acres of park, featuring a swimming pool in the basement, gold bathroom fixtures and iron bars, worked by pushbuttons, that slide over the windows at night.

But, despite all the folderol, if the British are wise they will know that this astute but humble North Carolina Yankee at the Court of St. James represents the backbone of the USA from the grass roots up, and can speak simply but wholeheartedly for it.

FRIEND OF VETERANS

One interesting thing to watch in the new GOP congress is whether the Republicans carry out the La Follette-Monroney congressional reorganization bill.

Already the whisper is going around capitol cloakrooms that the Republicans will take the increased salary and pension benefits derived from the reorganization bill, but throw overboard provisions for increasing congressional efficiency Already some Republicans are maneuvering to prevent consolidation of overlapping committees in order to preserve for themselves cushy chairmanships and extra money for clerical hire.

In this connection one important backstage battle is aimed at preventing motherly GOP Congresswoman Edith Nourse Rogers of Massachusetts from becoming chairman of the veterans committee Mrs. Rogers has been a tireless worker for the veteran and, as ranking Republican on the veterans committee, she automatically should become its chairman. However, because of her long running feud with rootin' tootin' John Rankin of Mississippi, several Republicans and Democrats are conspiring to have her passed over.

Fair-minded Joe Martin, the prospective new speaker, has promised Mrs. Rogers that she will get the job, but despite this, the sub-rosa wire-pulling against her continues. If she is passed over, however, Capitol Hill is sure to witness a veterans' march of protest.

* * *

CAPITAL CHAFF

So much surplus American war materiel has been sent to the Chinese Nationalists—in clearing off our Pacific islands—that the Chinese are looking for American businessmen to serve as brokers to resell to South America. . . . President Truman has authorized Secretary Byrnes to ask the Republican congress to appropriate 400 million dollars for relief work in Austria, Greece and Italy during 1947. There will be no American money available for relief in Soviet-dominated countries.

egon 15 areas will be in op- in national forests. At Tim- 63 miles from Portland, is ne of the nation's longest ski , offering ski slopes until y. The race starts at a 10,000-foot level and finishes at 7,000 feet near the head of a mile-long ski lift.

At mid-winter the snow is from 8 to 20 feet deep, averaging about 12 feet, with a temperature around 24 degrees. Generous sunshine often permits skiing in shorts.

Few places in America offer such marvelous skiing opportunities as Alta, famous resort in Little Cottonwood canyon of the Wasatch mountains near Salt Lake City. Runs vary from a half mile to two miles for all classes of skiers, plus slalom courses and practice slopes.

Brighton in nearby Big Cottonwood canyon is a year-around mountain resort. Near here is Ecker hill, where world record leaps have been made by skiing stars of international fame

Many Sports Areas.

Colorado's majestic mountain ranges abound with winter sports sites. Among the leading skiing resorts is Aspen, where the ski runs range in elevation from 7,900 to 11,500 feet. Roch run, the outstanding run for experts, is 9,750 feet with a 2,700-foot drop.

Berthoud pass, where local interests are expending considerable money in development of sport facilities. Grand Mesa and Glenwood Springs are other Colorado spots luring an increasing number of winter sport enthusiasts.

Long known as a dude ranch country, Wyoming now is coming into the forefront as a skiers' paradise in winter Jackson Hole in the scenic Teton country just south of Yellowstone park is among the most popular spots

Skiers may drive by automobile up the Teton Pass road and ski down numerous runs six to seven miles long with drops ranging from 1,000 to 3,200 feet.

Casper mountain, nine miles from Casper, and Tepee lodge in the remote Big Horns near Sheridan also are being recognized by sport fans because of their great natural advantages.

Montana boasts of Red Lodge, elevation 12,610 feet, where there are 30 acres of practice slopes, ski lifts, downhill, cross country and slalom runs.

Unique Nevada Site.

With a typical western setting above the desert, Mount Charleston, Nev., only an hour's drive from Las Vegas, provides a unique site for winter sports.

More than 60 winter sports areas are found in the High Sierras of California, a state where winter sports fans abound. Among the state's best known resorts are Lake Arrowhead, Big Bear and Big Pines, all in Southern California, Yosemite National park, and the Donner Pass region.

Winter sports, however, are not confined to the Far West. Nature has endowed Minnesota, Wisconsin and upper Michigan with the topography and weather necessary to make them among the best winter sports areas in the nation.

The "regular run" of sports enthusiasts from the Midwest will head for Wisconsin and Michigan's upper peninsula, which offers all winter sports, including long ski runs, toboggan slides, towering ski jumps, ice skating and ice boating.

Plan Annual Carnival.

For spectator pleasure, one of the best winter sports programs is presented every February at the Winter Carnival in St. Paul, Minn., when the entire city takes on the air of a northern Mardi Gras.

In the New England states, too, there is a revival of interest in winter sports Special ski trains to White mountain resorts are being resumed this winter.

With expanded airline schedules and increasing use of air transportation to winter sports areas, many fans will invade the Canadian Rockies area this winter Most popular sites there are in the Banff area and Jasper National park.

Oyster Blast Tops Freak Mishaps

WASHINGTON.—Home accidents took a new turn here when an oyster exploded. The housewife, who was cooking the oyster in deep fat, suffered second degree burns on the hands and face in the freak accident, a Red Cross survey reveals.

In another unusual mishap, a man suffered throat injuries when he fell with a pipe in his mouth. Doctors removed a small hatpin from the lung of a 3-year-old boy, another child swallowed a pencil clip and a 3-months-old baby suffered a fractured skull when its carriage rolled off a porch.

The superstitiously inclined claimed new impetus for their beliefs after a hammer, hanging on the rung of a ladder, fell and struck a man on the head.

In another home accident, a woman was burned when she poured melted fat into a furnace.

Statistics compiled by the Red Cross home accident survey show an increase in accidents and deaths this year over 1945.

vard Observatory Sets Centennial

Since then it has become the central clearing house for all astronomical information on this continent.

Beginning in 1880, the observatory has photographed huge sections of the sky each night. As a result it has a collection of photograph plates numbering more than 500,000, which enables astronomers to check the stellar activities which have occurred during any clear evening of the past 66 years.

Aged Woman Relies On Old Fire Recipe

VIROQUA, WIS.—When a chimney fire broke out at the home of Viroqua's oldest resident, the coolest person on the scene was the occupant, Mrs. Lucy Grubb, who will be 101 next February 15. "All you need to do is put a little salt on the fire," she told the bustling firemen. But the firemen, who were of another generation, insisted on resorting to chemicals.

3 MINUTE FICTION

HOLLYWOOD HALO

By Dorothy M. Peper

WNU Features.

He was back in his room. The movie had been good. In fact, the movie had been very good. But now, alone again, he felt a little sad.

On the table before him stood a silver-framed photograph—her picture, with her autograph. He was going to write her a letter. He started out the way they do in movies and books—chewing the top of the fountain pen, writing a few lines, wadding up sheet after sheet. . . .

Finally, after a struggle, he plunged ahead:

"Dear Gloria:

"I saw your new picture, 'Hollywood Halo,' at the Carthay Circle tonight. You were as sweet and beautiful as ever. But then, I guess it's just natural for me to think you're tops!

"You'll be surprised, I reckon, when you open your fan mail tomorrow, and in it find this. Maybe you will think that I'm a little silly. But I'm not. The trouble is adults think kids don't have any sense. But a guy who's 14 knows plenty. Especially what he likes and wants

"Well, what I like more than all the world is you—and what I want most is to have you all to myself. I love you more than life, and I'm proud of your success. (I read that last sentence in a book But I mean

"I saw your new picture. You were as sweet, as beautiful as ever."

it, and it is the truth.) I'd like to be the one to give you everything you want in life. But I wouldn't want you to belong to anyone else. Maybe that is selfish. But you'll understand, I hope.

"You were wonderful in the picture, tonight. Especially, the scene in which you did that dance when you came out in that long, blue dress. You know what I did, Gloria? I closed my eyes and pretended I was the one there with you, whirling you about. And the part where you were in the roadster, going real fast—I pretended I was the driver and you were at my side. Your hair blew back away from your face, and you were laughing. I love to hear you laugh!

"I wish you were here right now, instead of your photograph. I wish you would come in right now through the doorway, and sit on the side of the bed, and talk. I can just imagine how you'd look. Maybe you'd wear the robe you wore in the picture—I think you called the color 'chartroose.' And slippers to match, with white fur trim at the top. And your hair would be loose around your shoulders, and all soft and golden around your face. Oh, Gloria, you're so beautiful! You make me feel so proud!

"In the picture, you cried—and even if I did know it wasn't real, I couldn't help feeling sad.

"The part of the picture I liked best was when you put on a white apron, to cook a dinner for guests—you didn't know much about it, but you were bound you would do it or bust. That part was natural and real. That's why I liked it so much. You seemed just like yourself, and so little and helpless and cute.

"I pretended you were going to cook hamburgers, and it was Saturday night, and we didn't have a single guest—just you and me—and you didn't have to go back to the studio for a whole month!

"Oh, Gloria! Wouldn't it be wonderful? I love you so much! Maybe it's best you aren't here, and I can write all this—I'm afraid I could never get it said if it had to come out in talk!

"Even if you can't be just mine, I want you to be happy and to have your success. But don't forget I love you,

Your own Johnny.

"P. S. I heard you tell someone the other night that it took a lot more than make-up to hide a 14-year-old son. I know you love me, though—I'm sure I could tell if it was pretend.

"But I wish it didn't matter so much for people to know I'm your son. I wish you could just stay home and cook hamburgers. I wish I could stop calling you Gloria, and just call you Mom."

GOOD SAMARITANS . . . Designed to flash pages of books and magazines from a film controlled by a gadget held in the patient's hands, a ceiling projection machine brings many happy hours to this bedridden navy veteran, a patient in the Portland (Ore.) Veterans' hospital. The machine was presented by Camp Fire Girls.

IN THESE UNITED STATES

New Reading Device Designed To Aid Handicapped Veterans

WNU Features

"Button, button"—not "who has the button" but who pushes it—is the question which was answered recently when one of the first ceiling projection reading machines to be used in this country was presented to the Veterans' hospital in Portland, Ore. Three groups of Portland Camp Fire Girls donated the machine for use of hospitalized disabled servicemen.

First patient to test out this novel reading machine, which projects book pages from a 35-millimeter film, was Eddie Hall, 21, navy overseas veteran from Medford, Ore

"Ah, this is even easier reading than if I were able to hold a book in my hands," Hall exclaimed as he pushed the control buttons which flashed written pages on the ceiling. Hall, who must remain flat on his back, is just one of many patients whose battle for health will be made easier by the innovation

The ceiling projection machine, a device weighing about nine pounds and occupying 18 square inches of space, flashes pages of books and magazines on the ceiling from a film controlled by buttons on a gadget held in the patient's hands.

This small gadget, built of aluminum, can rest lightly in the hand. Buttons are manipulated easily enough so that persons not having the use of their hands can turn the pages merely by placing the gadget on the chest and pressing with the chin.

Three Groups Combine.

The machine was purchased at a cost of $100 by Camp Fire's three age groups, the Blue Birds, Camp Fire Girls and Horizon clubbers The money was raised in a variety of ways, ranging from sale of community papers to tapping the organization's earned funds.

Films for books cost from $1 50 to $3. Most books require only one roll of film. A few run higher, with the Bible topping them all with four rolls required.

Hospital authorities predict the machine will be a boon to bedridden patients Already a national magazine has agreed to supply films of its monthly publications to hospitals having the projector.

Although the reading device is an innovation, it is no novelty for Camp Fire Girls to provide gifts and service to hospitalized veterans and other shut-ins During the war and extending into the postwar period, Camp Fire Girls had an outstanding record of service to the USO, Red Cross, Community chests, hospitals and other civic organizations.

In Trenton, N J , a group of Horizon clubbers, Camp Fire's senior group, worked as teacher aides to "bedside students" — handicapped children who are unable to attend school.

When the Catholic Youth organization on Staten Island, N Y., sponsored a swimming class for physically handicapped children, help was recruited from Camp Fire's Horizon club girls

In Cleveland, Ohio, 11-year-old Loretta Rukowski has spent more than 700 days in a hospital bed. Seriously burned in an accident almost two years ago, Loretta has undergone repeated blood transfusions. Her long siege has been made brighter through the friendly efforts of a group of Camp Fire's Blue Birds, who have sent her many gifts and messages.

In making arrangements for a crippled children's clinic in Crookston, Minn., the directors realized that many assistants would be needed to assist in handling large numbers of patients. Camp Fire Girls offered their services and helped fill out clinical histories, acted as pages, got the children ready for examination and served refreshments

Occupants of the Old Ladies' home in Atlanta, Ga , have enjoyed many happy hours of entertainment supplied by Atlanta's Blue Birds. These "young fry" of Camp Fire fill the home with songs and music as part of their regular program to aid shut-ins

These are just a few examples of Camp Fire Girls cooperation with others and their willingness to assume responsibilities and carry them out. For more than 360,000 members of this organization govern themselves by the law of the Camp Fire Girls—the third part of which is "Give Service!"

Ready for Grave

CHICHESTER, N. H. — Taking cognizance of the car shortage, the town of Chichester offered for sale an 1863 model hearse, complete with interchangeable wheels and sled runners. It had been locked in a shed for many years

NEW TEACHING METHOD . . . Nine little deaf children are being instructed by Ruth McConnell in the new method of helping them overcome their unfortunate handicap and live more normal home lives. A microphone is used at the Philadelphia school so children with vestiges of hearing can hear the sounds.

Oregonians Seek Hidden Indian Blood

PORTLAND, ORE. — Countless Oregonians are scurrying around to see if they haven't some Indian blood in their veins.

Incentive is the decision by the United States Supreme court awarding about 15 million dollars to four Indian tribes of Oregon for land the paleface took away from the red man without even bothering to make a down payment.

The problem now is to determine just who is an Indian.

"We usually have considered in cases like this that anyone having one-fourth or more Indian blood is an Indian," said Morgan Pryse, regional director for Indian affairs in the Portland area.

"Undoubtedly," he added, "we will discover a lot of quarter-blood Indians who never had mentioned their heritage before."

Each Indian will get an average of $10,000 under the court ruling.

$6,000,000 Film

The most expensive motion picture ever made was "Wilson," released in 1944, whose production and advertising amounted to more than $6,000,000, says Collier's.

The cost was due largely to many spectacular scenes, one being the 1912 Democratic convention in which the lighting consumed enough power to service a city the size of Lansing, Mich.

A Point to That

"Doctor," said the wild-eyed patient, as he rose from the steps of his farm homestead and rushed down to meet the doctor's car, "I'm in a deuce of a pickle. Don't know where to turn for relief. You've got to help me."

"What's the trouble?" asked the doctor.

"The ghosts of my departed relatives come and perch on the tops of the fence posts all round the orchard," replied the patient. "Every night it's the same old round—they just sit there, waiting, waiting, waiting. What can I do to get rid of them?"

"Why, that's simple. Just sharpen the tops of the posts," the doctor prescribed, as he drove off.

Kidneys Must Work Well-

For You To Feel Well

24 hours every day, 7 days every week, never stopping, the kidneys filter waste matter from the blood.

If more people were aware of how the kidneys must constantly remove surplus fluid, excess acids and other waste matter that cannot stay in the blood without injury to health, there would be better understanding of *why* the whole system is upset when kidneys fail to function properly.

Burning, scanty or too frequent urination sometimes warns that something is wrong. You may suffer nagging backache, headaches, dizziness, rheumatic pains, getting up at nights, swelling.

Why not try *Doan's Pills*? You will be using a medicine recommended the country over. *Doan's* stimulate the function of the kidneys and help them to flush out poisonous waste from the blood. They contain nothing harmful. Get *Doan's* today. Use with confidence. At all drug stores.

DOAN'S PILLS

Gas on Stomach

Relieved in 5 minutes or double your money back

When excess stomach acid causes painful, suffocating gas, sour stomach and heartburn, doctors usually prescribe the fastest-acting medicines known for symptomatic relief—medicines like those in Bell-ans Tablets. No laxative. Bell-ans brings comfort in a jiffy or double your money back on return of bottle to us. 25c at all druggists.

STRONG HUSKY YOUNGSTERS thanks to this HIGH ENERGY TONIC

Many doctors recommend good-tasting Scott's Emulsion because it's rich in *natural* A&D Vitamins and energy-building oil children need for proper growth, strong bones, sound teeth, sturdy bodies. *Helps build up resistance to colds too* if diet is A&D deficient. Buy Scott's *today!* All druggists.

SCOTT'S EMULSION YEAR-ROUND TONIC

Happy New Year
TO EVERYBODY

* • *

This year we will celebrate New Year happy in the knowledge that one more year has been added to our long record of service to the people of this community.

Tooting our own horn a bit, you say? Well, yes, if you insist, but we just wanted to remind you.

Have a good time, enjoy the holiday to the utmost, and—a very Happy New Year to you!

HEALTH·HAPPINESS·PROSPERITY

When Grandpa Was a Boy

he spent most of a Saturday going to town and back in a buggy. We can pretty nearly span the continent in that time now.

The horse and buggy are gone; the rail fence is gone, but human nature is still much the same. In these days, as in those, friendships count in business.

We are proud of our long list of friends on this New Year . . . a list that has been growing steadily with the years—and want to express this word of thanks as we send you our New Year greetings.

HAPPY NEW YEAR

NEW YEAR'S

Is one of those rare occasions when our thoughts turn from the more material things of life to the nobler, more beautiful ones . . . . To our loved ones and our personal friends . . . To our business friends and customers . . . To the happiness we can bestow rather than that which is bestowed upon us. We realize that were it not for good will and friendly feelings of people like you, we would not have been privileged to enjoy the happiness which has been ours this year. As an expression, therefore, of our genuine appreciation of good will, we extend to you our most sincere good wishes for a Happy New Year.

CLEOLA BOLLER PRE-CHRISTMAS BRIDE

Mrs. Marvin Lackore

Miss Cleola Ann Boller, daughter of Mr and Mrs. E. Boller of Goodell, and Marvin K. Lackore of Hayfield were united in marriage, Dec. 23, 1946, at the parsonage of the Methodist church at Troy, Kans., with the Rev Clarence Harden, pastor of the church officiating.

The couple were attended by Mr and Mrs. Darwin Boller of Troy, brother and sister-in-law of the bride. The bride has lived at Goodell until now; and graduating from the Goodell high school. The bridegroom is a graduate of the Hayfield high school and was very active in athletics and music.

He was trumpeter for the Malek accordian band for several years and is at present a student at Upper Iowa university at Fayette where he received a scholarship in music. He will complete this semester of college work. The couple plan to make their home near Hayfield.

Jean Barkema Marries Arnett Ostendorf

MRS. A. OSTENDORF
Russell Photo

Miss Jean Barkema of Belmond, daughter of Hauko Barkema of Klemme, became the bride of Arnett Ostendorf, son of Mr and Mrs. Harry Ostendorf of Goodell, December 27 in the Belmond Methodist church. Rev William Patterson, minister, conducted the ceremony.

Matron of honor was the bride's sister, Mrs. Ed Stadtlander of Klemme. Bridesmaids were the Misses Harriet Ostendorf of Goodell and Joan Pals of Belmond. Gene Ostendorf of Goodell acted as best man. Robert Ostendorf and Merven Barkema, both of Goodell, and William Obreght of Thornton were ushers. Miss Lelia Faye Riggs was pianist and Mrs. Leland Lieuwen, the soloist.

Following the wedding a reception was held in the church parlors, where Mrs. Leo Barkema of Goodell and Mrs. Harvey Barkema of Klemme, were hostesses.

Immediately after the reception the bride and bridegroom left for a short wedding trip.

Mrs. Helps Will Entertain Study Group

The Study Group of the Methodist Church will meet at the home of Mrs. Henry Helps on Thursday afternoon, January 9th with Mrs. Geo. Schoenwetter as co-hostess.

Miss Julia Bell Holiday Bride In Church Ceremony Here

GOLDEN WEDDING IS OBSERVED BY GASTS

Mr. and Mrs. W. C. A. Gast, Garner, celebrated their golden wedding anniversary Dec. 23. Mr Gast and Clara C. Sampson were married Dec 23, 1896, at the home of the bride's parents at Colesburg with the Rev. Otto Niderhuth, pastor of the Methodist church, officiating.

They moved to their farm in Liberty township, where their son-in-law and daughter, Mr. and Mrs. K. A Schultz now live.

A dinner was served at the home of Mr. and Mrs Gast and open house was held from 3 until 8 p. m. A program was arranged by Mr. and Mrs. K. A. Schultz during the dinner hour.

A program was presented as follows: Darlene Schultz, a granddaughter, played a march. Rev A. W. Gauger lead in prayer, Mrs. K. A. Schultz read a golden wedding poem, Rev F C Griewe sang the "Holy City" accompanied by Darlene Schultz. Geo. F. Gast gave a short talk, Mrs. Ralph Janssen gave the history of the bride and groom, Mrs Emma Goll gave a talk. Rev. A. G. Gauger addressed the honorees with appropriate words. Benedicition was given and the doxology was sung.

Out of town guests were: Geo. F Gast, Bedtrami, Minn,. Mrs. Emma Goll, Mrs. Donald Wessel and son, Garlyn of Manchester, Mrs. Geo Fluhrer and Arlene, Charles City, Mrs. Tillie Ingersol, Algona, Mrs. Jennie Sampson, Forest Park, Ill., Mrs Annie Wille, Klemme, Rev. A W Gauger and Mrs. Gauger, Mason City The Rev. Gauegr was present when Mr. and Mrs. Gast celebrated their 25th wedding anniversary.

Gifts, letters and cards were received by Mr. and Mrs. Gast in honor of their anniversary.

Mrs Annie Wille, Mrs. Emma Goll and Mrs. F. C Griewe were the bride's attendants 50 years ago and they were all present at the dinner.

Mr and Mrs. Gast have been members of the Methodist church for more than 50 years. They farmed for some 28 years and then moved to Garner.

PAUL HOWDESHELL PASSED AWAY

Paul 37, the only son of Rev. and Mrs. Howdeshell, former Klemme pastor, fell while skating on Lake St. Clair, nead Detroit, Mich. late in the afternoon of January 1st, striking his head on the ice which caused a concussion. Later a brain hemorage developed, and Paul passed away before morning.

Funeral and interment were in Mount Clemens, Mich. near his home in Detroit, Mich.

Rev and Mrs. Howdeshell wish to very kindly thank every one who has so thoughtfully sent in beautiful messages of sympathy.

BIRTHDAY DINNER

Dinner guests Sunday at the Ed. Becker home were Mrs. Louise Josten; Anna and Rosa Becker; Eugene Haberkamp; Mr. and Mrs. Fred Becker; Mr. and Mrs. Alfred Josten and Rosemary; Mr. and Mrs. Edmund Josten and Donna Lou; Mr. and Mrs. Cecil Katter; Mr. and Mrs. Duane Josten. The dinner was in honor of Ed's birthday.

Christmas Eve Party

Mr and Mrs. Fred Etchen entertained to supper on Christmas eve Mr. and Mrs. Kenneth Johnson and children; Mr. and Mrs. Rhine Schlawin and Virgil; Mr and Mrs. Glenn Schlawin and Mrs. Edna Thada. After supper 500 was played with Mr. and Mrs. Glenn Schlawin winning high scores, and Mrs. Kenneth Johnson and Virgil Schlawin winning second high.

JULIA BELL BRIDE OF LLOYD GORDON

Ceremony Performed At Reformed Church

Mr. and Mrs. Fred Bell announce the marriage of their daughter, Julia Jane to Lloyd Gordon, son of Mr and Mrs. Clarence Gordan of Alexander, which took place in a double ring ceremony at the Evangelical Reformed church in Klemme on December 29th with Rev. Calvin Grosshuesch officiating.

Miss Ruth Bell, only sister of the bride served as bridesmaid, and Maynard Beyer, a close friend of the groom served as bestman

The bride wore a white wool jersey dress with a corsage of red roses centered around a white gardenia.

Ruth wore a blue wool jersey dress with a corsage of red roses and white mums.

The groom and his bestman both wore blue pinstripe suits with white butonnieres.

Nuptial music was provided by Miss Elizabeth Goll who played "Always" and "I Love You Truly" preceeding the ceremony. Miss Goll also played the wedding march.

Mrs. Bell and Mrs. Gordon both wore blue dresses with corsages of red roses.

Immediately following the ceremony a wedding dinner was served at the home of the brides parents with only the immediate relatives present.

The bride is a graduate of the Klemme high school with the class of 1943 Since graduation Julia has been working in Klemme Mr. Gordon is a graduate of Rowan high school. Since graduating Lloyd has been assisting his father on their farm near Rowan; where the couple will be at home following a trip to Chicago.

A large number of relatives and friends attended a reception in honor of Mr. and Mrs. Gordon Sunday, January 5th, at the Community Hall.

Family Re-Union Held New Year's Day At Church

A family re-union was held on New Year's day with a dinner at the Methodist Church honoring Mr George Gast of Beltrami, Minnesota who is here on a visit.

The various families brought baskets of food for the big dinner which was followed by a program. All enjoyed visiting and talking over "the good old days."

Those present included, besides Geo. Gast were as follows:

Mr. and Mrs. W C. A. Gast of Garner; Mr and Mrs. Kenneth Schultz and Darlene; Mr. and Mrs Herman Gast; Mr. and Mrs Kenneth Gast and Roger of Miller; Mr. and Mrs Kenneth Zwald and children; Mr. and Mrs. Jim Fredin; Mr. and Mrs. Ronald Gibbs; Mrs Clara Stille; Mrs. Elmer Schaefer and daughter; Mrs. Irven Blank; Mr and Mrs. Quentin Stille and family; Mr. and Mrs. George Stille and family of Goodell; Mr and Mrs. Virgil Stille and Donna; Mr. and Mrs Cecil Bridges and sons; Mr. and Mrs Ralph Janssen of Iowa Falls; Mr. and Mrs. Elmer Beier and family; Mrs. Hazel Gast and son Walter; Mr. and Mrs. Emil Beier; Rev. and Mrs. H. E. Harvey and LaNell; Mr. and Mrs. Chet Stille and daughters; and Mr. Roy Stille of Garner.

Mr. and Mrs. A. Jurgenson Announce Engagement of Their Daughter, Veletta

Mr. and Mrs. Alfred Jurgenson of Garner, announce the engagement of their daughter, Veletta P. to Melvin O. Schlei of Klemme. Veletta is employed at the office of the county treasurer and Melvin is farming near Klemme. Marriage plans are indefinite.

RED CROSS UNIT NAMES OFFICERS

Tmpleton Chairman of Chapter At Garner

G. W. Templeton, Garner attorney, was elected chairman of the Garner chapter of the American Red Cross at the annual meeting in the Red Cross rooms. He will succeed Fred C. Missal, who served as chapter chairman the past year.

Other officers elected wre Vola Lawhorn, Klemme, vice-chairman; County Recorder Fern Peck Katter, secretary, W L Baggs, treasurer; Jennie E Pritchard, Mrs. W G Williams H. L. Ollenburg, Mrs. Ed Steil and Mrs. C. E. Barns directors

Reports of the committees were read. Mrs W G Williams Red Cross drive chairman, reported approximately $5,300 collected in 1946 against a quota of $3,500.

Chairman Templeton announced that he would make his committee appointments immediately after the first of the year

BRITT NIPS KLEMME

The Britt cage team nipped the Shamrocks 36-35 here Friday evening in a non-conference game Dean Nedved tossed in a free throw in the final 30 seconds of the play to put the game on ice for Britt which had a 23-21 advantage at intermission Dean Jacobs led the Klemme attack with 12 points and Harvey counted 14 for Britt. The Britt 2nd team won 44-30.

EXTEND CONTRACT

Hancock couty supervisors extended the contract with Clarence Stone for the construction of the drainage district No. 138, to Sept 1, 1947. The contract date formerly expired Dec 1, 1946 Poor working conditions and shortage of materials was the reason given for the extension.

LARGE CROWD AT FARM BUREAU MEET

Two Hundred Hear Larry Williams At Kick-Off Meeting

Two hundred Hancock County farm people heard Larry Williams give an inspiring message on the benefits of being a Farm Bureau member and the general all out effort of the Farm Bureau to represent farmers in the State and National affaires. Mr. Williams pointed out that the Farm Bureau is in a strong position because it has the interst of other people at heart and want only a fair deal for farmers. The leaders of Farm Bureau know that no group can take advantage of the other groups without causing a disastrous bust-up in the county's economy.

Mr Williams urged the membership workers to explain the Farm Bureau program throroughly and most farmers will want to become a part of the organization He emphasized that the Farm Bureau is run by locally elected representatives, who follow the resolution and policies set forth by the local members The Farm Bureau program included education, legislation, and service.

C F Jackson, county organization director, explained the organization part of the membership drive and the quotas for the individual townships and the county quota of 1450 members for 1947.

Paul Henderson, county extension director, spoke briefly on the county extension service program, and the value of the local leadership of this program.

Back To School

Klemme school opened again Monday morning with a full attendance after teachers and students returned to their books after a two week's holiday vacation

Supervisors Held First Meeting Friday, Jan. 2

HANCOCK ASSESSORS HELD MEETING

Given Instuctions And Supplies For '47

Hancock county assessors reelected C. A. Frisbie, Garner assessor, president of the Hancock County Assessors' association at the annual meeting at the courthouse Tuesday Ole G Peterson, veteran Britt assessor of 44 years' continuous service was re-elected secretary

The assessors received their instructions and supplies for the 1947 personal property assessment. Despite sub-zero weather 23 of the 24 assessors in the county were present at the meeting.

The Hancock county officials were hosts to the assessors at a noon luncheon in the basement of the courthouse

Roy Schaefer Heard From Prisoner Of War

When Roy Schaefer was employed by the Government hemp plant at Britt during the war, at one time he had charge of some twenty German prisoners of war from the Algona prisoner camp. Roy was able to carry on a conversation with the men, whom he said were a fine group of men and were not in sympathy with Hitler. A few days before Christmas Roy received a card from one of the prisoners, Aloys Pickenbrock, mailed from Prisoner War Camp No. 186, Great Britain, where Mr Pickenbrocker was evidently located.

Will Spend Three Months In California

Mr. and Mrs. Herman Priebe left via train from Ames Tuesday morning for Los Angeles, California where they will spend the next three months of the winter at the home of Mr. and Mrs. Ing. Lauritsen.

Heating System At Bank Went On Vacation

The employees at the First National Bank were working under difficulties Saturday and are not too comfortable yet as result of the hot water heating plant furnace springing an unrepairable leak.

Two oil burning stoves were set up; one in the banking room and the other in the back room. Stove pipes had to be run out of a window for the stove in the banking room. Right back to the "good old" days.

Klemme Farmer Killed On Highway Monday Evening

GREIMAN—ANDERSON

MRS. BERNARD GREIMAN
—Russell photo

Mr and Mrs Bernard Greiman are at home on a farm southwest of Garner following a short wedding trip Their marriage took place Dec 20 in the Ellington Prairie Lutheran church, the Rev Chester A Olesson officiating. The bride was Miss Carrie Anderson, daughter of Elmer Anderson of Ventura, and the bridegroom is the son of Mr. and Mrs. H. A. Greiman of Garner

The bride was given in marriage by her father and was attended by Mrs. Edwin Furness of Lake Mills, her cousin matron of honor, and Miss Marjorie Greiman of Omaha,, sister of the bridegroom bridesmaid Judith Ann Anderson, niece of the bride, was the flowergirl and Ronald Anderson, nephew of the bride, was ringbearer.

The bridegroom was attended by Richard Greiman, his brother, and Bert Anderson, brother of the bride Ushers were Gaylord Holm, Merle Hall, Donald Greiman and Edwin Weaver Miss Darlene Brager sang, accompanied by Miss Dorothy Holm, cousin of the bride.

A reception for 100 guests followed the ceremony. Mr Greiman was discharged from the army on Dec. 5. He served 15 months overseas. The bride has been employed in Clear Lake the past year.

Showed Colored Slides

Sunday afternoon visitors at the Ralph Elder home were Mr. and Mrs. E. G Ell of Belmond; Mr. and Mrs. Ben Katter; Mr and Mrs. Duane Katter and son; Dr. and Mrs W. F Missman; Mr and Mrs. P M. Wilson; John Waddingham and family; Mr. and Mrs. R. A. Jorgenson and Judy Jorgenson; and Mr. and Mrs. Lyle Liebendorfer of Mason City.

Mr and Mrs. C. R. Elder and family of Ames were present and Mr Elder showed a large number of very interesting colored pictures he had taken in Guatamala, Central America while in that country last summer on a special mission from Iowa State College.

Another group saw the slides Saturday evening. Mr. Elder also brought along some blankets and hand woven cloth, hand wrought silver necklace and bracelet and other sovenirs which were very beautiful and made by the Indians in Guatamala.

FREAK MISHAP

Mr. and Mrs. Joseph Arduser of Washington had a narrow escape in Williamsburg recently. They drove through an underpass just as a train was passing overhead. A piece of the rail or similar heavy piece of metal was dislodged by the train and came hurtling down trough the windshield of the Arduser car, shearing off the rear-view mirror. It struck directly between the Ardusers, injuring neither except for flying glass.

HERMAN AX KILLED NEAR HOME IN AUTO COLLISION

Died Few Hours Later In Mason City Hospital

Herman Ax, 65, farmer residing on Highway 69 2½ miles north of Klemme, died at Mercy Hospital, Mason City about midnight Monday from injuries suffered in an auto-truck collission on the highway near his home Monday evening about 7:30 o'clock.

Mr Ax was coming out of the driveway of his farm driving a 1934 Chevrolet truck when he collided with a 1939 Ford V-8 driven by Walter Gast, 18, who lives 4 miles east of Garner.

L. M. Brower, who investigated the accident told a Times reporter that both men were alone in their vehicles and that there was no witnesses to the accident as far as he was able to learn.

A Klemme doctor was summoned to the accident scene who gave the victims attention and then took them to the hospital. Gast is in a serious condition and suffered a double fracture of one knee and other injuries.

Funeral Services Friday

Funeral services for Mr. Ax will be held Friday afternoon at 2:00 o'clock at the Peace Reformed Church in Ell Township.

DROWNED IN TANK

Celia Leck, 24 of near Bennett, was found drowned in a stock tank on the Henry Reimer farm recently Miss Leck was injured in an auto accident in 1940 and had not been in good health since. Officials ascribed the death to suicide.

FLEW LOW

A pleasure flight of Keith Gabbriel and Walter Anderson, Rockwell City, ended in death for both near there last week, when their aircraft plunged into the ground. They had flown low over a field to wave to a friend, and the motor failed to respond when they attempted to gain altitude.

HELLO, FOLKS!

Rev. and Mrs. Ruben Grosshouesch of Melbourne are the parents of a 9 lbs. 9 oz. baby girl born January 2nd, 1947 at the Marshalltown hospital. This event makes Rev. and Mrs. Calvin Grosshuesch grandparents.

Mr and Mrs. Dale Greiman are the parents of a baby son, Stanly Edward, born January 2nd at the Garner Nursing Home.

A baby girl, weight 7 lbs., was born to Mr. and Mrs. Rollie Kilgore, of Des Moines at the Mercy hospital there on January 3rd. Mrs. Kilgore is the former Shirley Johnson of Klemme, daughter of Mr. and Mrs. P. W. "Happy" Johnson of Dakota City.

Mr and Mrs. Eugene Kluckhohn are the parents of a 9 lbs. 3 oz. baby boy born to them on January 7th at the Garner Nursing Home. They also have a little girl, Shannon in their family.

Radio Breakfast Programs Of History

(King Henry VIII and Anne Boleyn.)

Anne—Good morning, Henry.

Henry — Good morning, dear. Where's my bicarbonate?

Anne—Oh, come now, it isn't time for that commercial yet.

Henry (studying the script)—Ah, what a lovely morning. Isn't it wonderful just to be alive?

Anne (with a shudder)—I'll bet that's what you say to all your wives!"

—•—

Henry—Let's start off with the weather. It's clear and warm here in the castle, with possible storms by afternoon.

Anne—With you, honey, life is one storm after another. What's the official temperature from the weather bureau?

Henry—Have you forgotten? The weather man gave me the wrong thermometer reading at yesterday's breakfast and I had him executed.

Anne—Aren't you a little hasty with your executions?

Henry—Coming from a wife of mine it is a natural question, sweet, but by my troth I shall decline to answer. By the way, did you notice that stunning girl at the new pageant last night?

Anne—Every time you see Jane Seymour at an opening you ask me that.

Henry (humming)—If you see Seymour like I see Seymour. . . .

Anne — No singing commercial, please!

Henry—Oh, come on, let's eat! How are my dozen eggs on beef coming? And remember 12 slices of buttered toast will do for breakfast today. I'm not myself.

Anne—Aren't food prices awful, Henry. I paid four shillings for that roast stag you had for lunch yesterday, and that was with the feet off.

Henry—Were the feet off? I didn't notice. Here's where a commercial comes in. Is your appetite weak? Are you finicky at the table? Take Squeeper's Stomach Bitters — the ones in the green bottle and you will have the appetite of a king.

Anne—Come, Henry, don't exaggerate.

—•—

Henry—Anne, my dear, you have a very pretty neck. And that's the cue for another commercial.

Anne—The secret of a pretty neck, I hope you all know, is Perth's Tissue Builder, the Cream of Royalty. A woman who uses this need never worry about her neck.

Henry—That's what you think!

Anne—Always joking, aren't you, Henry?

Henry—Am I?

Anne—I certainly hope so. Let's get off the subject of necks.

—•—

Henry—By the way, why aren't our canaries twittering this morning?

Anne—You know very well why. You ate their bird seed. Dear me, you eat everything

Henry—Odds bodkins, you are getting flip. Stick to the script.

Anne—Oh, Henry!

Henry—Go ahead with the puff, but if I catch the fellow who named that candy bar after me I'll send him to the Tower. He'll pay for it with his head.

Anne—You're always making people pay with their heads. Do you think it funny?

Henry—You'll find out. And now, folks, it's time for our guest star.

•—•

Anne—Who are our guest stars today, Henry?

Henry—Two charming girls, Anne of Cleves and Catherine Howard.

Anne—Over my dead body!

Henry—Okay, if that's the way you want it!

• • •

HOPE

My husband hates the jukebox so
That lately he's been praying
That there will come a quarter slot
To keep the thing from playing.

—Alice B. Matheny.

• • •

Patter and Platters

Ted Husing is now a disc jockey and we suppose his life has become a matter of disca and data.

—•—

Husing gets $250,000 a year in his new job with the musical records. Obviously it all depends on the extent of the "turnover."

—•—

Incidentally, since Bing Crosby is trying to get Wednesday known as Bingday, how about Ted asking that every day be known as Plattersday?

• • •

TABLE TALK

To dine out at the
Homes of friends
Is much against my wishes—
Some guy suggests,
When dinner ends:
"And now let's do
the dishes."

—Pier.

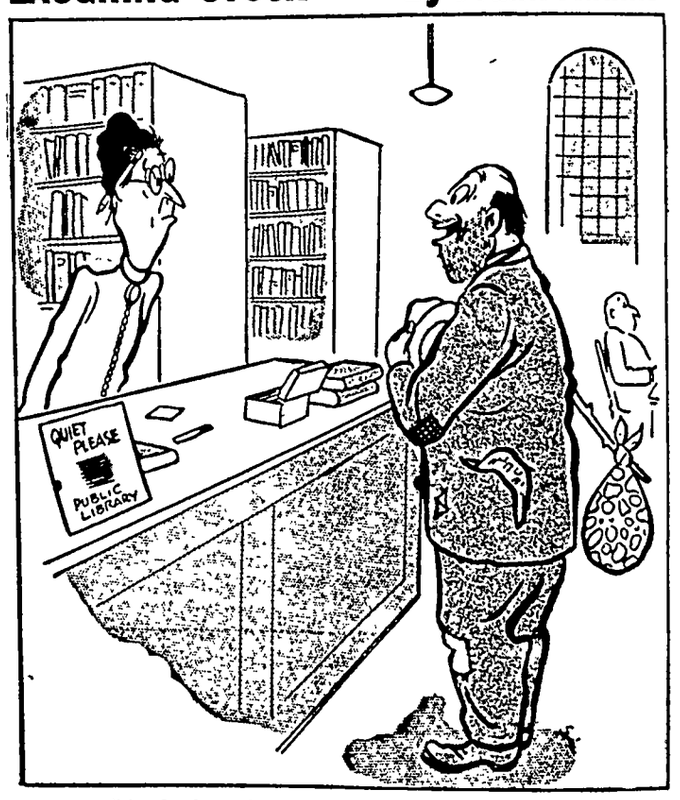
• • •

Wilson W. Wyatt has resigned as federal housing chief. Leaving the White House roof in a time of such an acute roof shortage is our idea of conspicuous courage.

Jags — Best Laughs of the Week

MOPSY — by Gladys Parker

LAUGHING STOCK — By Frank Adams



"I'm looking for something inspirational."

HUSH MONEY

Mrs. Jones—They say it cost the Newrich's a thousand dollars to have their family tree looked up.

Mr. Jones—In a way, yes—it cost them a hundred to have it looked up and nine hundred to have it hushed up.

Vicious Circle

"Well, Harry, what are you doing these days?" asked the long-absent friend.

"Advertising," Harry replied with a wry smile. "Still engaged in perpetual motion."

"Perpetual motion?"

"Yes, I make my money writing advertisements for women's stores; and then my wife and daughters read the advertisements and I have to give them the money so they can buy the things I advertise."

The Same Ending

Two bums were sitting on the bench in the state house grounds. . . . "Ah, me!" lamented the first, "I'm a man who never took advice from anybody."

"Shake, brother," answered the other. "Look at me! I'm the guy who took everybody's advice."

EASY TO SATISFY

Nit—I've got to buy my girl a birthday present. What'll I get her?

Wit—Does she like you?

Nit—Oh, yes.

Wit—If she likes you, she'll like anything.

Life Is Fleeting

Sorority Girl—I'm turning in early as I don't feel well.

Roommate—I hope you'll feel better tomorrow.

Sorority Girl—Oh, I guess I'll live, but there's no use doing any studying tonight unless I'm sure."

That's Different

"I'm writing to Bill—he's serving on an island in the Pacific."

"Which island?"

"Alcatraz."

Like a Mare's Nest?

The city cousin, age 6, was entranced by all he saw on the farm. On an exploring expedition early in the morning, he came upon several empty milk bottles in the barn.

"Look, cousin Willie!" he shouted. "I found the cow's nest!"

By EDWARD EMERINE
WNU Features

"Chust look at dis! It's coal!"

John Peter Salley, one of an exploring party, had picked up what seemed to be another rock, and found it to be bituminous coal. Today West Virginia, with its 585 mines, often is referred to as the "coal bin of America."

When William Tompkins used natural gas as fuel to evaporate water from brine in 1841, he became one of the first men in the United States to use gas for industrial uses. West Virginia's natural gas production in 1944 was 213 billion cubic feet.

In 1797 Elisha Brooks began extracting salt for commercial purposes from a brine spring in Kanawha valley near the present site of Charleston. Other West Virginia salt works have been operating for more than 100 years.

Develop New Industries.

As early as 1790 a furnace was built by Peter Tarr of Kings Creek, near the present site of Weirton, now one of the biggest steel producing cities in America. Cannon balls made here were used by Commodore Perry's fleet in the Battle of Lake Erie in 1813.

Michael J. Owens, son of a coal miner, invented a bottle-making machine in 1903 and started a new epoch in that industry. West Virginia produced, in prewar years, glass, china and pottery valued at 50 million dollars annually.

Mifflin Marsh made stogies and sold them to passengers on Ohio river boats in 1840 M. Marsh & Son, Wheeling, is reputed to be the largest stogie manufacturer in the United States.

And back in 1915, when World War I cut off the German supply of playing marbles, Akro Agate was founded at Clarksburg, and today one concern makes over half of the world's glass marbles.

But lest West Virginia's industrial achievements blind us to her other claims to fame and distinction, let us look farther than bituminous coal production, natural gas, petroleum, chemicals, salt, stone, hardwood timber, steel and iron manufacture, textiles, glass, pottery, ceramics and others. There is also the romantic and historic West Virginia. And there is the mountainous and scenic West Virginia which has become one of the nation's greatest recreational areas.

CHIEF EXECUTIVE . . . Clarence Watson Meadows was elected the 22nd governor of West Virginia in 1944. A former lawyer, he had served as state attorney general and judge of the 10th judicial circuit court before his election. He is a native of Beckley, W. Va., where he was born February 11, 1904.

The first white men went into what is now West Virginia as early as 1719, and a few years later cabins were being built. After 1735, South Branch valley began to fill up with the overflow from Shenandoah valley and from Pennsylvania and Maryland. Settlers were of several nationalities — and the composition of the people of West Virginia always has been different from that of the country east of the mountains.

Story of Controversy.

West Virginians heartily supported the Revolution and sent troops to help New England and the Middle Colonies, but the history of western Virginia before 1801 is a story of controversy with eastern Virginia. Socially, politically and economically, the two sections were unlike from the very beginning. Western Virginia was democratic while eastern Virginia was aristocratic. The idea of separation was foremost long before the Civil war.

When war broke out between the states in 1861, there were bound to be repercussions through the entire state. Eastern Virginia was the heart of the Confederacy. Western Virginia was opposed to secession. The long desired separation was effected, not with the Civil war as a cause, but rather as an opportunity. On December 31, 1862, the congress of the United States gave its consent to admit West Virginia as a state, and the next spring, on April 20, 1863, President Lincoln issued his proclamation. West Virginia became the 35th state of the union two months later.

Many Historic Shrines.

Three states and two rivers meet at historic Harpers Ferry where John Brown's anti-slavery raid was staged. Blackwater falls, Seneca rocks, Pinnacle rock, the burial mounds at Moundsville, the state capitol building, the historic shrines — all are interesting and worthwhile.

From mountain tops to blue grass farms, the agricultural side of West Virginia is a revelation. Anyone must marvel at the agriculture and fruit that are produced in a state that ranks among the first in industry. Prize beef and bituminous coal? Yes, anything is possible in West Virginia.

Gen. "Stonewall" Jackson was born at Clarksburg, and West Virginia also gave the nation John W. Davis, Pearl S. Buck and Ann Jarvis. In case you've forgotten, it was Ann Jarvis who in 1907 asked a group of Philadelphia friends to wear white carnations on the first anniversary of her mother's death —and thereby founded Mother's Day.

State of Contrasts.

The state's northwestern border is the Ohio river, the aquatic highway that opened the West. But the Monongahela and the Kanawha rivers are important too. West Virginia's elevations range from 240 to 4,860 feet above sea level, with the highest average elevation of any state east of the Rockies. Yes, it's a mountainous state, but every wooded hill, every shady nook and every sparkling stream belongs to just such a state. About 60 per cent of the state's area is covered by forest, with trees ranging from spruce in the highlands to prickly pear cactus and other semi-desert plants in the lowlands.

Scenery, wildlife and extensive, semi-primitive areas combine to lure vacationists to West Virginia's two vast national forests, the Monongahela and the George Washington. The state also has 15 state parks and seven state forests.

Fishing, hunting, hiking, riding, swimming, golf, tennis, boating—well, what do you want for recreation? And what is your trade, what are your business ambitions, your specifications for success? And what of your "dream" home where nature is loveliest? Perhaps the answers are—in West Virginia!

THE PANHANDLE STATE . . . Surrounding the map of West Virginia are typical scenes of the state: (1) Blackwater falls; (2) the administration building at Babcock state park; (3) a modern coal tipple; (4) New River canyon, and (5) apple growing.

Eastern Panhandle Is Favorite Spot for Vacationers

Old-timers used to talk about "this neck of the woods," and West Virginia's Eastern Panhandle may have the answer to how the expression started. Back in the wilderness days, the area was called "The Northern Neck of Virginia."

Eastern Panhandle retains a flavor all its own. Gouging into Maryland and Virginia as it does, it partakes of the traditions of both those states and remains somewhat different, if not apart, from the main area of West Virginia.

In 1776, the village of Martinsburg had "30 houses" and the community was building "a courthouse of no inconsiderable size and elegance." Today Martinsburg is the industrial center of the Eastern Panhandle.

West Virginia's Eastern Panhandle has as its main attractions Cacapon state park, old homes of the Washington family in Colonial days, Berkeley springs, and large apple and peach orchards.

Harper's Ferry, historic center at junction of the Potomac and Shenandoah, is the state's oldest town.

The Eastern Panhandle is only 52 miles from Washington, 73 miles from Baltimore, and 261 miles from New York. It is one of the favorite spots for week-end and vacation trips from metropolitan areas.

THE AUTHORITY OF JESUS

LESSON TEXT—John 2:1-16.
MEMORY SELECTION — Whatsoever he saith unto you, do it.—John 2.5.

The witness of John concerning Jesus as the Son of God had been attested by the divine knowledge of Jesus and his personal call to his disciples. Now the time had come for him to declare his authority as God by an overt act which all men could see and understand.

It is interesting to note that for this, the first of his miracles, he chose a festive occasion in the home. He had been invited to be a guest at a wedding (v. 2). Those who ask him to be present at their marriage may confidently expect him to be present and to add greatly to the real joy of the occasion.

The authority of our Lord shows here in three different ways:

I. He Commands (vv. 1-8).

He was neither host nor was he the one charged with responsibility for the serving, but when the time came for him to do his mighty act the servants were ready to obey that admonition of his mother and do what he said.

Mary may have had some responsibility for serving the guests. Why then had she not looked to the supply of wine? Apparently she who knew of what had taken place at the baptism of Jesus and immediately after, and having in her heart the memory of what occurred at his birth (Luke 2:14), thought it time for him to do some great miracle.

He was indeed ready to do so, but in his own way. "What is that to thee?" in verse 4 really carries the meaning: "This is a matter which I must care for in my own way," and he did.

We do well to seek grace to be like the servants who did what the Lord commanded, even though it did not seem to be a sensible solution to fill the jars with water. Obedience without hesitation and without question is the price of blessing!

II. He Creates (vv. 9-11).

The act of creation was already done, but now the fact came to light. He had changed the water into wine, the juice of the grape. This was not a case of adding something or diluting the remaining wine. Here the water, as he decreed it even without the use of a spoken word, was no longer there, but the best of wine.

Jesus was and is the Creator. He was present at the beginning of all things (note the "let us" in Gen. 1:26), and it is declared that "by him were all things created" (Col. 1:16, 17). In fact, "without him was not anything made" (John 1:3).

What he created was good, so good in fact, that the one in charge of the feast remarked about it. The Lord never does anything by halves, nor in a careless or defective way. He made a great quantity of wine (probably more than 100 gallons) and it was of the greatest excellency.

Some would read verse 10 as though our Lord were here helping along a drunken wedding party, but of course that is not true. The steward was simply recognizing the ordinary rule of serving whereby one uses the best one has until there is no more like it, then takes the inferior provision. To use this verse to excuse drunkenness is only possible for those "eager to mar, if by means they could, the image of perfect holiness which offends and rebukes them" (Trench, quoted by Lenski).

III. He Controls (vv. 12-16).

After a few days with his family and his disciples, he went down to Jerusalem for the great feast of the Passover. There he found his Father's house being misused and defiled. His holy indignation kindled, he spoke and acted with authority as he drove these "racketeers" out of the temple.

People like to hear about a God of love, one who knows their weakness, and is kind toward their infirmities. But we must not forget that God shows his love by a great and holy hatred of sin, and a desire to deliver us from that sin. This means that he must and will deal in drastic fashion with those who persist in their sin.

This is a majestic picture. The Son of God and Son of Man steps into the center of this unholy traffic and with mighty, holy indignation (not anger) drives it out.

Why did these men who were so deeply intrenched and so eager to make money flee before the wrath of a lone man? It was only because they recognized divine authority. He has a right to control men, for he is God.

It is not a mere matter of reform, for here he was cleansing the temple, the very heart of the life of the Jewish people. He dealt with a present situation to establish an eternal principle.

We cannot help but admire this magnificent Jesus, but the question comes to us today, Has he been given his proper authority over and in our lives?

The Broadway Express:

Memos of a Midnighter: Neighbors say J. L. Lewis doesn't have his Virginia house painted because union painters ask too much money! . . . Fritz Kuhn, who was booted out of here, now is running a shoe store in Germany. . . . Senator Mead is leading prospect for the likker czar post. . . . Your Slip Is Showing Dept.: Editor & Publisher found this headline in a San Antonio paper: "Dirty White House Widows Shock First Sightseers." . . . Hotel managers reveal that the last thing a suicide (in a hotel) does is shave, bathe, put on clean underlinen, etc. Women fix their nails and apply lip rouge. . . . Beginning of the End Dept.: When a woman looks more at the glass on the bar than the one on the wall.

Manhattan Murals: The kerrickter who (every morning) goes into the 49th and 6th cafeteria and shaves himself at the table while his coffee cools. . . . The movie marquee on 8th, which advertises this appropriate double-feature: "Down Missouri Way" and "Flying Nowhere." . . . The elderly dandy in the 57th street automat. He sits near the window and watches the crowds go by—while his chauffeur outside in his limousine watches him. . . . The big card game in the balcony of a 42nd street movie joynt. . . . The car on Fifth avenue (with Georgia license C 27767) with this painted all over it: "Peace Is Love, Justice and Brotherhood Put Into Practice!" (Oh, go practice it in Ga.)

Sallies in Our Alley: Encyclopaedia Britannica makes no mention at all of Santa Claus or of St. Nicholas—the cynics. . . . Stop wasting your time kidding soap operas. The Hooper survey reveals that 9 out of 10 are the "most popular daytime" programs. . . . Vince Curran claims the way Leo Durocher's going—Leo the Wolf is becoming just as famous out in H'wood as Leo the Lion. . . . When songstress Patti Clayton (a rabid Dodger fan) heard about Durocher's new inspiration (Laraine Day), Patti asked only one question: "Can she pitch?" . . . Is that loud argument backstage between Fred March and Ruth Gordon over billing? You mean even when they've been in the lights for decades they still take billing that seriously? . . . The League of N. Y. Theaters has asked a major mag's critic to come to openings sober.

New York Story: In 1941 Broadway welcomed a new "sucker." . . . A Texas oilman. . . . He was 65 years young — full of wim, wigor, witality and woo-woo. . . . In a year and a half he squandered over $400,000 backing flops that had more turkey in them than you often find in some costly Broadway sandwiches. . . . Anyhow, he was enjoying himself—having the time of his life. . . . He was very different from most "angels" who back shows. . . . The money was his. . . . He didn't promote it with big talk. . . . He was not a tout or bookie who invaded Broadway to "take" chumps by staging one flop after the other. . . . This man was Big Time. . . . Not a nickel belonged to anyone but B. S. Which are his initials. . . . He just loved being around show folks—to help them get along. . . . Well, here comes the punch line. . . . One of the show gals he befriended got serious and married him. . . . And they stay home most of the time counting his rich and wise investments, instead of empty champagne bottles.

Add Inflation Items: Silk shirts at Leighton's are advertised at only $28.50! . . . Peter Lind Hayes reports the cost of living in Movietown has gone up $3 a quart. . . . Plenty of mink coats are showing up for sale in those thrift shops. Wassamatta, lady, ain't Daaadddy got enough loot left? . . . It's amazing but the ballet (long in the red) is making money while dance bands and dance halls are limping and dying. . . . Some of New York's night spots are so close to closing that employees phone in first and inquire: "Are we open tonight?" . . . People wouldn't miss most of these joints anyhow. . . . A. Jolson said to have dropped over $600,000 on recent stock market toboggans. . . . Legit matinees were the worst in five years, according to ticket specs.

Winchellebrities: Mrs. George Washington Kavanaugh (the walking mint) dining in style with her pair of diamond-studded chopstix. . . Estelita, the Embassy Clubeaut, featuring earrings — one gold-lettered "Yes" — the other "Nope." . . Jose Ferrer—actor-director-producer. Best known for his decency to hopeful young newcomers. . . . Wrong Way Doug Corrigan is with Royal Air service and will fly cargo planes. . . . Ray Bolger (slimmer than Thinatra) fighting the wind near his B'way hit.

SEWING CIRCLE PATTERNS

Dainty Yoked Frock for Tots

Puffed Sleeves for Tot

AN ADORABLE little yoked frock for a mite of one to six. She'll adore the dainty puffed sleeves and full swinging skirt, and see what a pretty trim the colorful ric rac makes. Panties to match. Makes easy sewing for mother, too.

* * *

Pattern No. 8996 comes in sizes 1, 2, 3, 4, 5 and 6 years. Size 2, dress, 1⅝ yards of 35 or 39-inch; panties, ⅝ yard; 4 yards ric rac.

The Fall and Winter Issue of FASHION will delight you with its wealth of ideas for every home sewer. Styles by top-flight designers, farm frocks, easy to make fashions, free crocheting directions, free pattern printed inside the book. Price 25 cents.

HANCOCK COUNTY BOARD PROCEEDINGS

4TH ADJOURNED NOVEMBER MEETING

Garner, Iowa
December 17, 1946

The Hancock County, Iowa, Board of Supervisors met in session on above caption date pursuant to adjournment with F J Schoun Penn Eckels, and John Chambers, present.

The minutes of the last meeting were read and approved as read

On motion ond second the bonds of Walter W Wolwood, assessor, Concrete Products Corporation, Contractors, Roy I Schaefer Contractor and C. E Proctor, Justice of the Peace.

Supervisor John Chambers is appointed a commitee to investigate and cause repaids to be made on DD No. 70 main and DD No. 26, Lateral No. 8

Non-resident notice is hereby ordered served on Bertha M Reisetter of Hardin County and Minnie M Sturkey of Linn County, and Donald Kiefer and family of Cerro Gordo County

In the matter of a cleanout of the main open ditch in DD No. 10 petitioned for by W A Kirchgatter et al

WHEREAS Wm Henschen was heretofore appointed engineer to make an investigation survey and report on the necessity of said cleanout and

WHEREAS said Wm Henschen did file his report on November 25, District No 10 Hancock County mends that said repair be made as prayed in the prayer of the petitioners and that the cost of such repair would be less than 10 per cent of the original cost of construction of said district and that the benefits to be derived will be greater than the cost thereof

BE AND IT IS THEREFORE RESOLVED by the Board of Supervisors of Hancock County Iowa, acting for and in behalf of Drainage District No 10 Hancock County Iowa, that the report of the engineer be and the same is hereby approved and letting on the construction of said cleanout is hereby ordered to be held at the court house in Garner Iowa, at 2 o'clock P M on the 10th day of March A D, 1947

The county auditor be and he is hereby ordered to publish a notice of such letting in the Britt News Tribune, a newspaper published in Britt Iowa, which notice shall state the approximate amount and kind of work to be done, the date for commencement and completion and that the Board reserves the right to waive technicalities and to reject any or all bids.

The foregoing resolution was offered and read by Supervisor Schoun who moved its adoption was seconded by Supervisor Chambers whereupon the chairman placed the motion of its adoption and upon roll call the vote thereon is F J Schoun Penn Eckels and John Chambers aye, Nays None

In the matter of a cleanout of the open ditch in Hancock County Drainage District No 26 petitioned for by H H Stewart et al

WHEREAS Wm Henschen was heretofore appointed engineer to make an investigation survey and report on the necessity and reasibility of said cleaout and

WHEREAS said Wm Henschen did report on November 26 A D 1946 which report recommends that cleanout and repair be made as prayed in the prayer of the petitioners and that cost of such repair will be less than 10 percent of the original cost of said district and that the benefits to be derived will be greater than the cost thereof

BE AND IT IS THEREFORE RESOLVED by the Board of Supervisors, acting for and in behalf of Drainage District No 26 Hancock County, Iowa, that the report of the engineer be and the same is hereby approved and a letting on said cleanout is hereby ordered to be and the same is hereby approved and a letting on said cleanout is hereby ordered to be held at the courthouse in Garner Iowa, at 2 30 P M on the 10th day of March A D, 1947

The county auditor be and he is hereby director to cause notice of said letting to be published in the Kanawha Reporter a newspaper published at Kanawha Iowa, which notice shall state the approximate amount and kind of work to be done the date for commencement and completion and that the bord reserves the right to waive technicalities and to reject any or all bids.

The foregoing resolution was offered and read by Supervisor John Chambers who moved its adoptaion was seconded by Supervisor Schoun whereupon the chairman placed the motion of its adoption and upon the vote Penn Eckels J J Schoun Penn Eckels and John Chambers aye Nays None whereupon the chairman declared the resolution duly adopted

WHEREAS there are outstanding warrants and deficits in Hancock 1, 2, 13 15 26 34 35 and 41 of Hancock County Drainage District No 3 and 4 and in laterals 4 8 12 16 19, and 22 of Hancock County Drainage District No 1 and 2 and lateral 6B of drainage district No 9 and the main on drainage district No 7, section 5

WHEREAS such deficits and outstanding warrants were created by money expanded for minor repairs and are less than 10 per cent of the original costs of such laterals and districts and it is deemed for the best interest of the taxpayers in said districts that levies be made at this time to reimburse said districts for such minor repairs and deficits

BE AND IT IS THEREFORE RESOLVED by the Board of Supervisors of Hancock County Iowa acting for and in behalf of the laterals and districts listed in the preamble hereof, that there be and is hereby levied the sum set opposite each Lateral and main as follows.

Drainage District 3 and 4	
Lateral No. 1	$900 00

NEW LABOR-SAVERS FOR FARM WITH ELECTRICTY

For the Iowa farmer who has electricity, the New Year is one of the most promising from the standpoint of new equipment to make farm life easier, says Harold Beatty, Iowa State College agricultural engineer.

In pointing to some of the nw electrical equipment for the farm, Beaty cites a new electrically heated drinking fountain for livestock as especially promising.

The fountain is designed to replace the old stock tank and can be installed anywhere in the farmlot. Wateris supplied to the fountain from an automatic water system, also operated electrically. The fountain consists of a 12-inch cylinder about 4 feet long. The upper end is fitted with a drinking cup and is thermostatically heated. The fountain can be buried at any desired depth for the livestock it will serve, including cattle, sheep or hogs.

Another development is an ultraviolet milk can sterilizer with lights which gve off bacteria-killing rays. Beaty says a lamp of less than 25 watts is claimed to reduce the bacterial count in a washed milk can by 96 percent in 1 minute.

Another dairy improvement is a dairy ventilation control unit which operates motor-driven fans. The control unit keeps the humidity in the barn at a constant level.

Other new things in store for the energized farm include a new variable speed motor drive for small motors. It will permit one motor to do a lot of different jobs on the farm. Then there's special grain loading and unloading equipment designed to replace the scoop shovel: silage unloaders.

Many of these and other new items are still in the development stage and need further testing, Beaty says. But the work is significant of the trend toward saving time on the farm and removing the drudgery from farm life.

COUNTY NURSE GIVES REPORT

The Hancock County Nursing Service is developing fast. New activities are constantly being found to fill the nurse's day.

An immunization program in the Klemme schools in November was accomplished. We know that diptheria and smallpox are diseases of the past only when we have the preventive treatment for them, over 90 percent are protected.

A very satisfying part of the nurse's work is that time spent with expectant mothers, interpreting the doctor's instructions for the care and helping prepare for the new baby. Supervision of children from the start of their lives helps prevent and correct many physical defects that may go neglected until later when they have been the cause of further problems.

The nurse is visiting all of the rural and town schools this year. Note is taken of the environmental conditions in the schoolroom, that is—drinking and washing facilities and the lighting. We have been water sampling the rural schools. Of 45 samples, 17 were unsafe for drinking. Anyone interested in having their drinking water tested, notify the nurse or phone 350 Garner. A check is made on the child's eyesight, hearing, dental condition and any other health problems brought to the teacher's attention in her daily contact with the children. Home visits are made to call to the attenton of the parents a condition that appears exist.

A first aid class was held with the eighth grade group at Garner The nurse talked with 4-H groups on what a good physical examination is. The meetings held included talks to clubs and church groups to publicize the nursing program further and movies were shown to school children on health. The nurse had time allotted her over KGLO to further acquaint people with her work.

Several people have called to have the nurse demonstrate care to someone sick in the home. Feel free to call upon the nurse for health guidance or information.

101 visits were made to homes and 21 patients visited the county nurse.

A Times Want Ad wil sell it.

FARMERS MUST FILE RETURNS BY JAN. 15

Internal revenue officials point out that all farmers who took in $500 or more during 1946 must file a return with the collector of internal revenue and pay the tax by Jan. 15.

The Jan. 15 declaration may be (1) an estimate of the net income for 1946 or (2) the final return. In case only an estimate is filed, the farmer must file a return by March 15.

Taxpayers already are receiving through the mail those old friends, forms 1040F and 1040. The former is used to list a report of the farm operations for the year. The latter combines the farm taxable returns with other income and on it the amount of tax due is calculated.

Farmers may report their business operations on either a cash or an accrual basis. However, permission must be obtained from the collector of internal revenue to change from one to the other. Since most farmers have filed returns in previous years, they will follow the same method as in the past.

In general, gross farm income reported on a cash basis includes all cash received during the year from sales of farm products, whether produced during the year or held over from a previous crop season. It does not include products sold for which payment has not yet been received, nor does it include the changes in values of livestock and crops on hand.

The cash expenses include all allowable business expenditures paid in cash during the year, but does not take in expenses incurred but not paid.

In reporting on an accrual basis, the farmer credits his business with the crops, livetock and other farm products on hand Dec 31 plus all cash receipts for the year and all accounts receivable for goods sold but which are not paid for at the end of the year.

He debits his business account by the amount of the inventory of crops, livestock and other products on hand on Jan. 1 plus expenses paid for or incurred and not paid for during the taxable year.

The difference between these credits and debits comprise the gross farm income as calculated on the accrual basis.

In addition to actual cash expenses, farmers are entitled to charge off depreciation on farm buildings (except the dwelling), farm improvements such as the fences, tile drains, etc., machinery or other farm equipment of a permanent nature.

In reporting on an accrual basis, farmers may charge depreciation on work, breeding and dairy stock, either purchased or raised. On a cash basis depreciation is allowable only on such stock that has been purchased.

There is no set rate for depreciation The best way to figure it is to estimate the number of years the property will last and divide the per cent of the original value that can safely be charged off

Starting last year taxpayers were allowed, under certain conditions, to consider the sale dairy, breeding and work stock as a sale of capital assets. That meant that only 50 per cent of the gain on such transactions was taxable in most cases.

This year the bureau of internal revenue has ruled that such sales will be considered sales of capital assets only if they meet the following conditions.

1. The animals must have been owned for more than 6 months.

2. The sale must have reduced the normal size of the herd or made room for replacements to change the quality or breed of the herd.

In addition to reporting his own income, any farmer who paid $500 or more to any worker must report such payments to the bureau of internal revenue on Forms 1096 and 1099. Such workers should also be advised that they must file an income tax return.

This year a good many farmers will have an accounting of the sale of the farm to make on their income tax return. Because that involves complicated calculation it is highly advisable to seek the aid of an internal revenue official or a competent tax expert.

Doctor: "Well there's a fire across the alley and I didn't want you to wake up and think the operation was a failure."

LIBERTY BUSY BEES MEET

The Liberty Busy Bees met at the home of Mrs. Aaron Stromer, Friday, December 27, 1946.

The meeting was called to order by the president, Margorie Bredlow. Roll call was answered by 10 members. There were 7 visitors.

The rest of the meeting was devoted to the Christmas party, and the girls exchanged gifts. There were two grab bags, one for the mothers and one for the smaller sisters.

Home furnishing programs for 1946-1947 were handed out to all the 4-H girls by Mrs. Stromer.

The girls had to draw a sketch of their room. For the next meeting we are to measure our rooms etc. and make a picture according to the measurements.

For entertainment we all sang Christmas songs and lunch was served by the hostess.

The next meeting is to be held at the home of Beverly Haberkamp, January 18, 1947.

SMOTHERED

In Gaza last week, a customer came to the Stiles elevator about five p. m. and asked for for some green corn. Keith Stiles, 45, went out into the elevator to get the purchase. When he did not return, the customer and Mr. Stiles brother, Fred went out to the elevator and found him buried under an avalanche of the green corn. Efforts to revive him proved futile.

A USDA report says that the food outlook is rather bright.

1947 MARCH OF DIMES

STAGES IT'S FUND APPEAL FROM

January 15-30

NEVER GREATER NEED FOR FUNDS SAYS CAMPAIGN CHAIRMAN URGING FULL SUPPORT

The 1947 March of Dimes annual fund raising drive of the National foundation for infantile parlysis which sparkplugs the never ceasng battle with polio, will be held January 15 to 30th it was announced today by Mr. Roy L. McMillin, Chairman of the March of Dimes Campaign committee.

The need for funds Mr. McMillin said has never been greater, since the nation has just emerged from one of the worst epidemic of polio in the history of the National foundation for Infantil paralysis, founded in 1938 to spearhead and Co-ordinate the battle against this disease.

Need For Money

The National Foundation also spent Millions of dollars during 1946 in medical research to trace the causes of infantile paralysis and it will continue to do so until that cause is discovered and conquered.

Hancock County has been hit very hard during the past year and they have not been able to return the money borrowed last year to pay for their cases of polio. They will be forced to borrow again unless we get behind this campaign and send in the dollars.

We are mailing out a letter to each one of you with a return envelope for your return check or cash. Do not put this aside, take care of it the day it comes if possible and see that we go over the top in our drive to raise the cash.

Polio "Insurance"

Remember that who ever you are or what ever your station in life, it will be our aim to take care of the expense of the case if Polio hits in your family. This is cheap insurance.

Your letter will arrive soon. See that it is returned.

WEEKLY NEWS ANALYSIS

CIO Girds for New Wage Drive; U.N. Closes Meet in Harmony; More Rental Units Planned

Released by Western Newspaper Union

(EDITOR'S NOTE: When opinions are expressed in these columns, they are those of Western Newspaper Union's news analysis and not necessarily of this newspaper.)

Elected to head interim French government, 74-year-old Leon Blum receives traditional embrace from Vincent Auriol, president of national assembly.

LABOR:
New Wage Pattern

Hardly had the hub-bub occasioned by the CIO's adoption of Economist Robert Nathan's formula for higher wages within current prices died down than United Automobile Workers hit for a pay boost of 23½ cents an hour to compensate for rising living costs in 1946.

Robert Nathan

Gist of Nathan's report, to be used as a basis for CIO wage demands in coming months, is that record earnings allow industry to jack up pay appreciably while maintaining existing price levels. Although Nathan said that the unions should negotiate new scales with different companies and industries on the basis of their abilities to pay, he averred that the manufacturing industry can grant a 21 per cent boost without raising prices and still make double the profits of the 1936-'39 period.

In view of the high earnings of industry and the gradual transformation of a seller's into a buyer's market, business leaders will hesitate before adding additional wage increases onto prices, Nathan said.

UAW Demands

In subscribing to Nathan's theory that industry can hike wages without boosting prices, UAW Chieftain Walter Reuther declared that corporation profits are running at a rate of 15 billion dollars a year in comparison with 10 billion during the war and 5 billion in the prewar period.

While business profits have been rising, consumer purchasing power has been diminishing, Reuther said. During 1946, living costs have climbed another 18 per cent, necessitating the 23½ cents an hour wage raise for the 900,000 UAW members to maintain their "take-home" pay. At present, the average wage in the industry is $1 33 an hour.

Reuther's claim of big business profits was challenged by major producers, who charged that this year's costly strikes and shortages of materials adversely affected earnings.

FRANCE:
Blum Comes Back

Leon Blum, whose Popular Front government in the middle '30's threw France into a turmoil, returned to head the new French interim government as the compromise choice of the left and right parties of the nation.

Though Blum's Socialist party commands only 100 seats in the 600 odd national assembly, the dominant Communist and Popular Republican parties agreed on his leadership after failure to work out a satisfactory deal between themselves for sharing the government. Ranting over the failure of achieving a coalition cabinet, Communist Representative Duclos accused the rightist Popular Republicans of "renewing the class struggle."

Reversing his liberal policies, which led to a wave of sitdown strikes and the bitter opposition of capital in the '30's, Blum announced that he would work for stringent economies during his brief term before a permanent government is formed. He also reiterated French demands for internationalization of the Ruhr and Rhineland.

RELIGION:
Donations Lag

Although the U. S. public's church donations have scored a new high by passing the billion-dollar-a-year mark, they still trail behind consumer outlays for movie and theater tickets, amount to one-third of the nation's annual bill for tobacco, and one-eighth of its outlay for alcoholic beverages, according to Northwestern National Life Insurance company.

U. N.:
Meets Test

Having "met the test" of resolving major issues and differences, to quote U S. Delegate Warren Austin, the United Nations general assembly adjourned until next September with this record of accomplishments:

—Acceptance of an $8,500,000 gift from John D. Rockefeller Jr. for purchase of a 17-acre site in Manhattan for a permanent U. N. home.

—Adoption of a resolution instructing the security council to devise a system of international disarmament to be presented to member countries in treaty form.

—Approval of trusteeships for eight former League of Nations mandated territories and formation of a U. N trusteeship committee to which administering powers will report.

—Admission of Sweden, Afghanistan, Iceland and Siam to the U. N.

—Establishment of the International Refugee organization to resettle and repatriate 1,000,000 displaced persons.

HOUSING:
New Emphasis

In line with findings that most home-seekers are looking for rental rather than purchasable dwellings, the administration's new housing program places emphasis upon construction of rental property.

To encourage rental construction, Federal Housing administration will extend the amortization period for such projects beyond the usual 28 years, and work out arrangements for adjusting loans to protect owners from losses in the event of unstable economic conditions.

Whereas a maximum of $80 a month was set on rental of individual units under the veterans' emergency housing program, rentals now will be limited to an average of $80 for a building.

With the principal demand for more dwellings, any person will be permitted to build a house, thus making an apartment or old building available. Vets will continue to get first crack at homes put up for sale or rent, however.

Because of the increasing production of building materials coupled with the curb on nonresidential construction, materials priorities no longer will be needed.

Though non-residential construction will continue to be restricted, permission to build stores, schools, churches and other facilities will be granted to accommodate new neighborhoods.

MILITARY:
Unify Commands

With plans for a unified command temporarily shelved by navy opposition, the services agreed to the wartime practice of naming a single chieftain for each strategic world area to increase the efficiency of operations and avoid the confusion of Pearl Harbor.

Under the setup, the theater commander is responsible directly to the joint chiefs of staff in Washington. Subordinate army and navy officers remain at the head of their respective units. Strategic air forces not assigned to theater commanders are at the disposal of the chiefs of staff.

General of the Army Douglas MacArthur heads the Far Eastern theater comprising Japan, Korea, the Philippines, Mariannas, Bonins and Ryukyus. Other area commanders include:

PACIFIC: Adm. John H. Towers.

ALASKAN: Maj. Gen. H. A. Craig.

ATLANTIC FLEET: Adm. Marc Mitscher.

CARIBBEAN: Lt. Gen. Willis D. Crittenberger.

EUROPE: Gen. Joseph T. McNarney.

FOOD:
Full Tables

After counting the bountiful yields of 1946 farm production, the department of agriculture told Americans that they would eat well again in 1947.

By intensive tillage of substantially smaller acreage than prevailed in the '20's, farmers produced record crops of wheat, corn, rice, potatoes, soybeans, tobacco and garden vegetables; near record yields of grapes, peanuts and oats, and better than average harvests of sweet apricots, sugar cane, sugar beets, dry peas, sorghum and hay.

If Americans will have plentiful supplies of cereals, vegetables and fruits, they also are promised a full table of meat. The department reported record numbers of cattle on feed in grain belt feedlots.

Production Pattern

The department's final estimate of 1946 farm output suggested the shifting pattern of production within the past decade.

While such old American agricultural standbys as wheat, corn, potatoes and tobacco showed appreciable increases in 1946 over the 1935-'44 average, rye was down to 18,685,000 bushels from 42,356,000, and cotton dropped to 8,482,000 bales from 12,553,000.

Because of changing needs, emphasis was placed on other crops. To make up for a drop in imports, rice production was boosted to 71,520,000 bushels from the 10-year average of 55,257,000; to meet the demands for industrial and edible oils, soybean yields jumped to 196,725,000 bushels from 103,457,000, and peanut output soared to 2,075,880,000 pounds from 1,587,964,000; and as part of the program to raise nutritional standards, the harvest of dry peas increased to 6,926,000 bags from 4,580,000.

SPORT:
Gambling Menace

In the early 1800's, American youth held up the statesman as a tin god; in the late 1800's, it was the empire builder, and since the early 1900's, it has been the athlete.

Most touching example of the faith that the average American boy put in his athletic hero involved the young kid who clutched at "Shoeless Joe" Jackson's sleeve when that great outfielder emerged from questioning over his part in the Black Sox baseball scandal of 1919. With tears in his eyes, the kid pleaded: "Say it isn't so, Joe, say it isn't so."

Unfortunately, Joe couldn't, but fortunately, had any kid been waiting outside Mayor O'Dwyer's mansion in New York on the morning of December 15, Frankie Filchock and Merle Hapes of the New York football Giants would have been able

Playing the game on the level, Frankie Filchock (with ball) leads Giant attack against Bears.

to say so. By turning down alleged bribes from a gambling front, the two grid stars saved pro football from disgrace.

Efforts of the gamblers to get the two Giants to throw the pro championship game to the Chicago Bears marked the first known attempt by the "easy-money" boys to corrupt pro football and lessen the risk of their heavy wagering.

INDIA:
Troubles, Troubles

Mother India, long sorrowing for freedom, could see nothing but trouble ahead as she planned the achievement of her independence after centuries of British domination.

For freedom seemed to mean different things to the powerful political factions within the country: To the majority Congress party chiefly embracing the Hindus, independence represented a unified nation; to the minority Moslem league, it stood for "pakistan" or self-rule of Mohammedan provinces.

While the wily British professed their desire for a free India, they looked on apprehensively as Hindus and Moslems locked horns. Attending the constituent assembly being held in New Delhi to frame a constitution for the new India, the usually mild and compromising Hindu Leader Nehru breathed fire: The Moslem league was reactionary and the British may favor "pakistan" to divide India, he said, but the Hindus were determined to solve their own problems.

TOURIST TRADE:
Booming Again

Total tourist expenditures this year will exceed the six billion dollars of 1940 despite limited production of automobiles, a study of the tourist trade by American Road Builders' association reveals.

The season just closed saw travel-hungry Americans taking to the highways. Up to September 30, a record number of 21,682,782 tourists had visited the 27 parks and 142 other areas operated by National Park service.

Washington Digest

Constructive GOP Congress Depends on Party Harmony

By BAUKHAGE

News Analyst and Commentator.

WNU Service, 1616 Eye Street, N.W., Washington, D. C.

WASHINGTON. — Now that the senate has settled its first problem —naming of the committee chairmen — the next big question is whether the Republicans are going to be able to develop a leadership able to ride herd and establish the party discipline necessary for iron-handed control. The Republican majority is very slim and there are a number of restive members who will be as hard to get into the corral, come roll-call time, as the "sons of the wild jackasses" used to be.

Baukhage

It isn't the lack of a leader so much as a surplus of them that worries Republican politicos — that and the danger that the leaders may start leading in different directions.

Another factor not calculated to further unity is the flock of presidential bees crawling all over the inside of the capitol dome. In his December poll, Gallup listed four senators as possibilities in the following order: Vandenberg, 9 per cent; Bricker 8 per cent; Taft, 2 per cent, and Saltonstall, 1 per cent. These are small figures compared to the poll's 52 per cent granted Governor Dewey of New York, or Minnesota's ex-Governor Stassen's 17 per cent, the two leading Gallup's list. But that doesn't mean the candidates think that way about it. Nobody is placing bets yet. As the veteran Republican National Committeeman Clarence Buddington Kelland said:

"I don't think you are going to see the matter jell at all until Ohio decides whether it is backing Taft or Bricker. When that decision is made, the lineup will come fast."

Gallup predicted that Eisenhower's star would rise higher and thus whip the hopeful senators to added zeal.

Lapel buttons labeled "Draft Ike" are already out. Under whose banner Eisenhower would be drafted it is not stated, but it is generally conceded his personal leanings would be more Republican than Democratic.

Neither Vandenberg nor Saltonstall's friends have begun to fight, and at this writing neither one has even indicated publicly he is in the running.

More distressing to the men who have to make the upper house members hew to the Republican line is the old problem of the so-called progressive element. Some people are predicting that there may be more harmony in the next session among the minority, so widely split last time, than among the majority with its swollen ranks. Some Republicans are worrying lest they be divided to the extent that their power will be considerably reduced.

Senator Works For His State

Many people fail to realize the many factors which contribute to individualism in the senate. In the first place, each senator is, and so considers himself, an ambassador from a state — it is his business to serve that state to the best of his ability and his ability can be greatly supplemented by the prestige he acquires. Indeed, prestige, if acquired by nothing but seniority can go a long way toward making up for lack of ability.

But it is not mere personal ambition which drives a senator to work for individual prominence—it is a part of his job to strengthen the sovereignty of the sovereign state he represents.

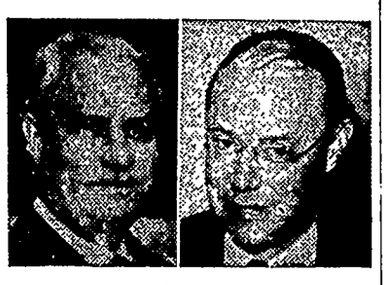
Another thing which often forces a senator to walk alone or as part of a small group is sectionalism—not a hidebound attitude either, but the demand that he truly represent the interests of his community, even if those interests conflict with those of other parts of the country. The ancient antagonism of West-versus-East has never quite died. It was only a little over three decades ago that the 17th amendment was passed which authorized the popular election of senators. This was accomplished largely through the influence of western and southern states which had already, by means of state primaries or other subterfuge, managed to take the choice of senators out of the hands of the state legislatures.

The Republicans benefited by the failure of the Democrats to maintain a West-South alliance, but they now suffer in turn from other sectional and ideological cleavages. I heard one man remark the other day that two recent speeches, one by Senator Morse, Republican of Oregon, and the other by Senator Byrd, Democrat of Virginia, each expressed views much more in line with the opposite party's than with their own organizations. There are many other similar anomalies in the 80th congress, as there were in the last session.

The belief that the extreme conservatives will be in the saddle ready to ride rough-shod over any liberal move is not generally supported. True — history has shown that the American people can stand just so much reform at a time. But on the other hand they have seldom been willing to sacrifice past social gains. Consequently, when the Republicans have been swept into office after periods like the Wilson "New Freedom," they have been very chary of repealing laws which were passed, in answer to a demand for new privileges for the many.

Nation Clings To Old Reforms

Harold Laski, the British left-wing labor leader, would have us believe that there is a "return to reaction" in America. He says in a recent article under that title that "in abandoning the Roosevelt heritage Mr. Truman made the shaping of the postwar economic policy of America the concern of business and not of congress." Mr. Truman would be the first to deny that he deserted the New Deal heritage whether he was personally inclined



Senators Bricker (left), Taft: Hold Presidential Key

to support all of its tenets or not. And I can see the hackles of congress rise, even on the leftish side, at the suggestion that "the initiative was returning to the hands" of National Manufacturers' association.

Mr. Truman was removed by the election from a number of restraints and pressures from groups which favored courses he personally disliked but he has not been party to any move to sacrifice past "social gains," and I cannot see congress allowing the few reactionaries in either party or in the house or senate to set back the clock.

As the Beards point out in their "Basic History of the United States," the Republicans despite their landslide victory over Wilson in 1920 did not or could not, "stamp out the spirit of progressive or radical insurgency, old in American tradition and yet ever new in its application to changing conditions."

Harding's "normalcy" and Coolidge's conservatism temporarily did end our internationalism. But their next choice was Herbert Hoover, who had been speaking with continual concern over conditions affecting the less privileged. In 1923, for example, he had called on the insurance companies to study unemployment insurance; he had endorsed an amendment abolishing child labor; he had frightened the reactionaries to death when he proposed the inheritance tax to "redistribute overswollen fortunes."

Going further back into history, we note that after three successive victories, the Republicans, even when they had majorities in both houses, did not repeal so-called "reform" measures passed up to 1900. When they returned to power in 1921, although attempts were made to do so, such measures as the income and inheritance taxes were not abolished, or reduced to an empty gesture Yesterday's radical is tomorrow's conservative.

BARBS . . . *by Baukhage*

It is said 30 per cent of the people have had mumps without knowing. What a shame that their best friends didn't tell them!

* * *

A prize heifer being auctioned off in the ballroom of the Congress hotel in Chicago for $1,300 fell down and had to be slid back to her pen. Many a lady might have fallen for that.

The nation spent over a half billion dollars on candy during the first 10 months of this year. Now the reducing will begin again.

* * *

How are our children going to get the laugh from our modern bathing girls that we do from the gay ninety bathers? Let's hope we leave more to their sense of humor than we have to their imagination.

The Washington MERRY-GO-ROUND

DREW PEARSON

STALIN'S HEALTH

WASHINGTON.—Diplomatic dispatches from Moscow indicate definitely that Marshal Stalin's health has had another setback. He suffered a heart attack some time in November and now is resting in the Crimea.

This fact has been made the subject of an official report to the state department.

This last heart attack is the second suffered by the man who has ruled Russia so long. Last winter he also had to go to the Crimea to recuperate from an illness. Stalin is now 67 years old, but has crammed more diversified life and hardship into those years than any other world leader.

Stalin was imprisoned and exiled to Siberia eight times, and the years have taken their toll. He was not play-acting when he held up Churchill and Truman by staying in bed one day at Potsdam.

It is generally expected that Foreign Minister Molotov will succeed Stalin.

* * *

THE REAL-ESTATE LOBBY

Next major lobbying drive in Washington will be against rent controls, only control measure which survived President Truman's sweeping OPA decontrol order.

The President has decided to eliminate OPA completely, and has on his desk an executive order transferring rent control to the department of commerce.

The real-estate lobbyists know they can't get even a Republican congress to repeal rent control. So they've decided on a new tactic. The lobby is drawing up a bill which would transfer rent control from the federal government to the states.

This will be advanced as a "states' rights" and "economy" measure. The result, however, will be the same.

Twelve states now have no rent control, and in other states most control laws are elastic.

* * *

LAME DUCKS PLAY INDIANS

Twice in recent weeks, President Truman has been visited by congressmen who asked him to appoint friends on the new Indian claims commission. Sen. Joe O'Mahoney of Wyoming urged the appointment of Louis O'Marr, attorney general of Wyoming, while Representative Bill Stigler of Oklahoma brought along his candidate—Justice Earl Welch of the Oklahoma Supreme court, who is part Chickasaw himself.

The President made no commitment beyond saying he intends to announce the make-up of the new commission soon.

He did apologize to Stigler, however, for the delay in making the appointments.

What Truman did not explain was that he also had been urged to wait to see whether any worthy Democrats, defeated in the election, might want the job. The names of lameduck congressman Will Robinson of Utah, an excellent man, and Jed Johnson of Oklahoma, who lost out on a chance to be a custom court judge, now have been suggested.

The commission is one which will require a topflight staff, since it will have to pass judgment on all Indian claims which have not gone into the courts. There is absolutely no statutory limit on the age of the claims—which means that if an Indian tribe wants to claim that it has legal right to the entire territory of the State of Utah, the commission may have to hear the argument.

* * *

NEXT GOP CONVENTION

Although the Republican national convention is two years off, several cities already are pressing GOP moguls for the privilege of helping nominate the man they figure will be the next president of the U. S.

Rep. George Bender, Ohio congressman-at-large and head of the Cleveland Republican committee, appeared before the national committee to propose Cleveland as the convention site.

As soon as Bender proposed Cleveland for the convention site, Committeeman Werner Schroeder of Illinois asked, "Isn't it true that Ohio has a couple of candidates for the nomination? Don't you think it might be better to meet on neutral territory?"

"Is there a state that doesn't have a candidate?" asked Bender. "If you're going to rule out states with candidates, about the only place we could hold the 1948 GOP convention is Miami."

* * *

POSTMASTER JIM MEAD?

The White House is afraid that if Bob Hannegan resigns both as postmaster general and Democratic national chairman the Republican senate may refuse to confirm anyone who is to serve in both jobs. One man the senate would confirm, however, is Sen. Jim Mead of New York, who lost out in his bid for governor of New York. The senate rarely questions the appointment of any senator or former senator to an official post. Moreover, Mead is considered a postal authority.

11—Fighting rages in northern Greece; guerrilla forces driven into Turkey by regulars.
16—United Nations assembly adjourns after choosing New York as permanent home; disarmament recommendations main achievement.

1946 RECONVERSION YEAR

NEWS BEHIND THE NEWS

By PAUL MALLON

Released by Western Newspaper Union.

'CHANGE' IN RUSSIAN POLICY MEANT TO DECEIVE WORLD

WASHINGTON. — It is strange and unpleasant to be required by the facts to report that the relatively congenial international conferences in New York did not bring a victory for the foreign policy of the United States—or even progress or advancement toward it. This country, frankly, lost ground, particularly in Latin America, which we must hold to sustain our doctrine, and in France, Italy, the Balkans, even Britain. Everywhere, except in Japan, China and this country, we gave political footage to one single political opposition force — Communism. Elsewhere around the periphery of this world, Communism is today much stronger than when the New York international meetings convened.

The American public may not fully understand this yet because the progress made at the conference was in superficialities, while the advances made by Communism are basic. But the delegates appear to understand it. Some authorities who have heard the debates first hand have been dismayed at the plane upon which they are conducted—a wandering plane of ideals wholly torn loose from bedrock.

WANTS HER OWN WAY ALWAYS

On disarmament, for instance, Russia has changed position repeatedly, finally embracing ideal disarmament, but refused to let anyone know the size of the Russian army. On picking a site, Russia switched from New York to Geneva and back to New York. She would not go to San Francisco because it was too far to go for peace, although actually it is closer to Russia than New York. On paying the cost of this peace organization, Russia got a committee to favor her paying only six per cent, while we pay half the whole peace bill. While saying she would not use a veto on disarmament, in effect she used it immediately in reference to the Russian army and to the choice of a site. In the site case she said if her wishes were not followed she would withdraw and not attend U. N. The meetings were all like that, as if sincerity were wholly lacking, as if her politicians were playing in shallow tactics which were not real.

Look around the world for the real answers. Russia has asked us for a loan of a billion dollars directly or indirectly, but it is the only nation in the world which has not said anything about settlement on the 10 billion dollars of lend-lease material already given her. We cannot find out even what she used, or what she has which could be returned, or what repayment she could make in kind as the agreement provided. About those things she says nothing at all but she wants a billion dollars more. It does not make sense, unless Stalin is simply taking us for a fool, and acting as a man does with a genial fool.

ILLUSORY ACCOMPLISHMENTS

On the surface we have gained five peace treaties with five little countries in Europe, but not yet with Germany, Austria or Japan; a disarmament agreement "in principle" which seems to be only a delusive Russian game in diplomatic tactics; a ludicrous budget proposal, an attempt by Russia to force the United States to place the permanent conference site where Russian pipelines are deepest and largest.

Measured against these accomplishments are the advances of Communism around the world while this congenial nullity was being effected. An underground Communist campaign has swept Latin America, noticeably heading its advancements in the Chilean labor unions. In Europe Communism has broken the Socialist opposition to bits, strengthening itself by elections in the Balkans and by closer delusive management of Tito and its satellites. In France it won plurality representation in the assembly with the parties of liberty. In Italy it is winning city elections and has broken the Socialist stand against it, gaining Socialist cooperation. In Britain it has driven a deep wedge. A Communist move to get at Spain through its colonies has been detected as being well financed.

All these things and more have been accomplished by Communism against the spirit of freedom and democracy in the world while the superficial congenial era was being raised in New York. It is almost as if we had forgotten Communism is a movement for world revolution and had decided to give in to it. But the fact that it is making great strides in its world revolution is obvious and available for all to see even in official quarters—while we are not. They are not mine but the plain facts of the world, observable, checkable, true.

BIRTHDAY DINNER

Mr. and Mrs. Emil Beier entained the following at a din- Sunday in honor of Mrs. D. Anderson's birthday: Dr. and s. D. P. Anderson and Neva; . and Mrs. Benn Coobs.

ANNOUNCE ENGAGEMENT

County Auditor and Mrs. Fred C. Missal of Garner, announce the engagement of their daughter, Dorothy A., to Dean S. Kloock, son of Mr. and Mrs. O. J. Kloock of Garner. Miss Missal, a graduate of Garner high school, is a junior at Luther college in Decorah. Mr. Kloock is a graduate of Garner high school and is attending college at Ames. He will complete a course in dairy plant management early in the spring.

TRAPS 159 FOX

Hugh Walker of Oskaloosa is in the number one fox trapper reported to the State Conservation Commission to date. Walker started trapping October 1, and in two and one-half months has trapped a total of 159 of the wily foxes in Mahaska and Keokuk counties. This "century" trapper has received $3.00 bounty on each fox and the pelts averaged better than $2.$$. Walker trapped 123 foxes last season.

OUTLOOK FOR HOG PRICES BRIGHTER

Farmers Plan Only 6 Percent Increase In Sows For Spring Farrow

While the 1947 Iowa farm goal calls for an 18 percent increase in the number of sows to farrow this spring, farmers over the state indicated in Dec. that they would farrow only 9 percent more sows than last spring.

According to Francis Kutish, Iowa State College farm economist, the December survey of farrowing intentions conducted by the United States Department of Agriculture showed that the farmers in Iowa and in other parts of the country did not intend to raise as many pigs as some forecasters had thought they would.

Below Goals Set

The survey showed that for the country as a whole farmers planned only a 6 percent increase in number of sows to farrow. This would mean a 1947 spring pig crop only slightly larger than the 1946 crop.

While there is a good chance that farmers will farrow more sows than indicated in December, production probably will fall short of the state and national goals, Kutish poined out.

Prospects for hog prices during next winter are improved if the spring pig crop turnes out no larger, or only slightly larger, than the survey indicates.

Hancock Dairy Herd Improvement Association Report

John Ward, Supervisor of the Hancock D. H. I. A. reports 22 herds on test with 365 cows; 270 cows are in milk and 95 dry. The average production per cow for the 365 herd was 647 pounds of milk and 23.3 pounds of butterfat.

305 lactation records completed during December; Fern Huling had 2 Holstein cows reported one with 282 days in milk with 13,175 pounds of milk and 447 pounds of butterfat; the other 305 days in milk with 9319 pounds of milk and 304 pounds of butterfat; Huling Bros. reported 2 Holstein cows both were in milk 305 days, one with 13,921 pounds of milk and 424 pounds of butterfat, the other with 12,050 pounds of milk and 426 pounds of butterfat. Albert Abele & Sons one Holstein cow in milk 261 days with 11,251 pounds of milk and 33.3 pounds of butterfat. Floyd Friedow one Holstein cow in milk 304 days with 10,765 pounds of milk and 343 pounds of butterfa.

Relatives Attend Funeral Services for Mrs. Meckstroth

Funeral services for Mrs. Fred Meckstroth, of Garner, were held Sunday afternoon at Steamboat Rock, Iowa, where burial also took place. Mrs. Meckstroth died following an operation last week.

Those who attended the funeral were Mr. and Mrs. Herman Gast; George Gast; Mrs. Clara Stille; Mrs. Ronald Gibbs; and Mr.and Mrs. James Fredin, all of Klemme; Loren Gast; Mrs. Kenneth Zwald and Mrs. Kenneth Schultz, of Liberty; Mr. and Mrs. Kenneth Gast of Miller; Mr. and Mrs. W. C. A. Gast and Mrs. Hazel Gast of Garner.

The obituary will be printed in The Times next week.

Miscellaneous Shower Held At Thornton

Mrs. Gerald Buss of Thornton was honored at a miscellaneous shower at the Lutheran Church Monday evening. The evening was spent informally and Mrs. Buss received many nice gifts from her friends.

Those from this vicinity who attended were Mrs. Ed. Becker, Mrs. Edgar Buss and Mrs. Dwight Helps.

Thanks for sending in your news. Phone or send it in.

BASKET BALL GAME DATE CHANGED

The game with the Ventura Vikings here has been postponed from Saturday, January 18 to Monday, Jan. 20th. The game will be played on the Klemme floor.

FINISHED CATTLE SHOULD BE MOVED

Farmers with better grades of cattle on feed probably will want to top out their feed lots as fast as they have cattle ready for market, believe Iowa State College farm economist.

Reports from the Bureau of Agricultural Economist indicate that the next 9 months probably will see the largest number of cattle in history going to market for that period. The upper grades of cattle normally weaken in price as spring approaches.

The economists point out that we have virtually no Good and Choice grades on the market now. Present margins encourage feeding to a high degree of finish, and corn is plentiful to do the job.

But as more grain-finished cattle come to market, the top of the cattle market will be pulled down. Upper grades of cattle probably will show more than the normal seasonal price drop on a percentage base between now and next sprng.

At the same time, lower grades of cattle which usually show price strength between now and spring may not show the normal percentage price advance, but prices of these grades are not likely to weaken.

EARLY SPRING?

Last week Henry Ward reported that he saw a flock of [illegible] over his farm south of Klemme. This could be an [illegible] f an early spring, or the [illegible] were trying to get away fr[illegible] the bad snow storms in the south!

Several Farmers Moved This Week To New Locations

A few farmers are getting an early start on the spring moving this year The for part of the week saw a few changes around Klemme.

Melvin R. Schaefer and family moved off of the Mrs. Larson farm south of Klemme to one of the Cashman farms southwest of Klemme.

Mr and Mrs. Franklyn Buseman, who lived on the Cashman farm moved to the Melvin Schlei farm west of Klemme.

Jim Larson and family who lived on the Schlei farm, moved to the John Larson farm which they will operate this coming year as Mr Larson is retiring from active farm work. They will live in a tenant house on his father's farm.

Verner Lau, who returned home some months ago from overseas, has rented the land at the Mrs. Larson farm where Schaefer was located. Eugene Kluckhohn and family have rented the house on the farm and will live there this coming year.

BROKE FINGER

At Montezuma recently, Frank Dederus dropped a stove poker. That was all right, except that his little finger stuck in the "ring" and was broken.

Rural Young Couples Plan Year Of Fun And Activities

Hancock County Rural Young Married Group To Meet Jan. 17

The Hancock County Rural Young Married group will hold their first discussion meeting in the I00F Hall in Britt, Friday nite, January 17th. The discussion leader Herb Howell, Iowa State College Farm Management Specialist. Mr. Howell will discuss the subject, "This Business of Farming" and the outlook for 1947 and 1948.

Every young married farm couple is invited to attend. The meeting will start with a pot luck lunch at 7:30 p m. The couples that have attended previous meetings are urged to bring new couples to this meeting. The committee has set up meetings, dances, card parties, and picnics for 1947. This is a well rounded program and the dicussions are all important to young farm couples.

GOODELL WOMAN GIVEN BULBS FROM HOLLAND

Mrs. Bill Sheriff, Sr., Goodell, received a box of various flower bulbs from the B. Kleiger family in Holland. The Kleigers and Sheriffs became friends by letters and packages of clothing which the latter sent for relief.

AVERY SUNBEAMS MET

A 4H meeting was held at Betty Ann and Pauline Kramers home January 11. Six members answered roll call by a New Year resolution for "Better chuch programs this year.' '

A talk, convenient and interesting groups of furniture for a girls bedroom, was given by Betty Lacey.

Mrs. Arnold gave us a discussion on some main facts of home furnishings. She also gave a picture study on Peace and Plenty by George Inness.

Another picture study was given by Lillian Wille on Age of Innocence by Sir Joshua Reynolds.

The belated Christmas gift exchange took place at this time due to the stormy weather Dec. 29 when it was to be held.

HEALTH IMPROVEMENT ASSOCIATION LEADERS MEET AT DES MOINES

V A Cook, President of the Hancock County Improvement Association Adala Wille, Sec., and P[illegible] Henderson, County Ex[illegible] Director, attended a one [illegible] on January 7th [illegible] Kirkwood Hotel in Des [illegible] plans for community [illegible]nent Seventy leading [illegible] central Iowa counties [illegible]ntatives from the [illegible] College Extension [illegible] Medical Service and [illegible] Plan were in [illegible]

[illegible]ssed as to how [illegible] ment Associ[illegible] and the Farm Bureau Women's Committee in the health projects they have outlined for the year, such as T B x-ray, immunization, county health nurse, etc. Procedures for advancing the prepayment plans for Medical and Surgical services in addition to Blue Cross were discussed. Ways in which services for the local hospitals such as auxiliaries and the various kinds of assistance that can be given by the H. I A.s were suggested. The H. I. A. leaders present expressed the opinion that these associations should get back of the Nurse Recruitment, both the national and the Iowa state program which is now in progress and help to interest girls in the nursing professions.

There are 85,000 rural persons who enjoy the protection of Blue Cross hospitalization through the local Blue Cross Plan in which more than 350,000 Iowans are covered. Opportunity to enroll in the prepayment Medical and Surgical Plans have been extented to the rural residents of Dallas, Hancock, Scott, and Wright counties. This is in combination with Blue Cross. Other counties will have this same opportunity where sufficient interest is evidenced.

Funeral Services Held Friday For H. Ax, Accident Victim

FARMERS PLAN TO DUST SEED OATS

Treatment Especially Needed This Year Because of Disease Danger

Donald Coe, Iowa State College plant disease specialist, said this week that Iowa farmers are making plans to treat their seed oats before seeding time next spring.

The oat blight disease, Helminthosporium, which appeared in many parts of Iowa last year, has made farmers more aware than ever of the need for seed treatment. Treating the seed will protect the crop during the crucial seedling period when blight often does the damage.

Need Old Varieties

Treatment will be especially important next year on seed of the Tama, Boone and Control oats, which are susceptible to the blight. While Clinton and Benton oats are resistant to the disease, there will not be enough seed for all farmers next year. Marion also is resistant, but the supplies of it are limited.

Many farmers have said they would rather use treated seed of the older varieties than pay the extremely high prices being asked for some varieties being advertised as "Clinton-type" or "sister oats to Clinton"

Coe says that this seems like sound judgment. While some of the varieties being sold commercially did originate at Iowa State College, the seeds not certified and the farmer would be assuming a risk in addition to paying a high price.

Treatment Good Always

Seed treatment, Coe points out is a sound practice every year Nearly all commercial hybred producers treat corn seed as a protection for their farmer customers, and tests have shown that treated seed will outyield untreated by an average of 2 bushels per acre over a period of years. With oats, a farmer must have his own seed treated, but the increase in yield over untreated seed will average as much as 4 bushels higher

Coe says that farmers who ask about the seed treatment for oats are advised to use New Improved Ceresan. The treatment can be made any time from now until spring and should be done at least 24 hours before seeding Many farmers will want to get the job out of the way this winter so that planting won't be delayed next spring

The seed can be treated on the farm or at the local grain elevator or seed house where treating equipment is available Instruction on home treating can be obtained from the extension director's office.

Purchased Mrs. Frank Carpenter House In Klemme

Dr. D. P. Anderson purchased the former Mrs. Frank Carpenter house in northwest Klemme which was offered for sale by the county. The house is being modernized and when finished will be occupied by Paul Haefner and family.

ENGAGEMENT TOLD

Mrs. William Ziesmer of Garner, announces the engagement of her daughter, Doris L., to Dean L. Goll, of Liberty township. Wedding plans are indefinite.

He is a student at Waldorf college in Forest City, where he is taking a liberal arts course. He served several years in the army air corps and saw action in Italy.

Miss Ziesmer is a graduate of Garner high school and is employed as a deputy in the office of the county auditor, Fred C. Missal.

FUNERAL SERVICES HELD AT THE PEACE REFORMED CHURCH

Had Lived All Of His Life On Farm North Of Klemme

Funeral services for Herman Ax, 64, Klemme farmer, were held Friday afternoon at the Peace Reformed Church of Ell township with the Rev. R. D. Stuebbe conducting the services. The Wellemeyer Funeral Service of Klemme was in charge of arrangements.

Mr. Ax was buried in the Peace Cemetery near the church and was carried to his final resting place beside his parents, Mr. and Mrs. Fredrick Ax. Casket bearers were his relatives and neighbors: Kermit Sandersfeld, Sylvanus Wacker, Paul Stromer, Richard Ax, Victor Hueneman and Fred Goll.

Mr. Ax died at a Mason City hospital last week Monday night following injuries received in an auto-truck collision near his home.

OBITUARY

Herman Henry Ax was born June 11, 1882, on a farm a half mile south of the Peace Reformed Church in Ell Township, Hancock County, Iowa. He was the sixth of a family of eight children born to his parents, Fredrick Carl and Christine Ax.

At the age of six weeks Herman Ax was baptized in the Peace Reformed Church by Rev. Fredrick Moseback. He later attended religious instruction and became a member of this church by confirmation on April 8, 1898, during the pastorate of Rev. G. Gattermann. His memory verse was "Be Thou Strong Therefore and Show Thyself a Man."

Herman Ax lived on the same farm all of his life. During his childhood years he completed his rural school education and assisted his father with the farm work His father died in 1929, and his mother passed on to her reward three years later.

Since then for many years Herman Ax and his sister, Emma, have continued to operate the farm and make it their home.

As a boy and man, Herman Ax nas been a farmer—growing the crops, feeding livestock, raising horses, etc.—for a period of half a century.

His end came suddenly on Monday evening, January 6th, 1947 His truck stalled as he was driving onto the pavement from his farm lane, and before he could get it started again an automobile collided with his truck causing him fatal injuries.

He reached the age of 64 years, and 26 days, and leaves of his immediate family: One brother, William Ax, Klemme, Iowa.

Three sisters:

Anna, Mrs. Ferd Wacker, Garner, Iowa.

Minnie, Mrs. Carl Sanderfeld, Thornton, Iowa.

Miss Emma Ax, Garner, Iowa.

And many more distant relatives and friends.

Klemme People Injured In Auto Accident In Kentucky

Klemme friends of Mr. and Mrs. J. W. "Bil" Johnson have learned that the Johnsons were in an accident at Henderson, Kentucky on their way to Florida to spend the winter.

The Johnsons were pulling a house trailer behind their car when they were involved in an accident that completely wrecked their trailer. Mrs. Johnson was injured and had to spend a few days in the hospital before they were able to continue their journey. We understand Mr. Johnson was injured but slightly and that their car was not badly damaged. Details were unavailable.

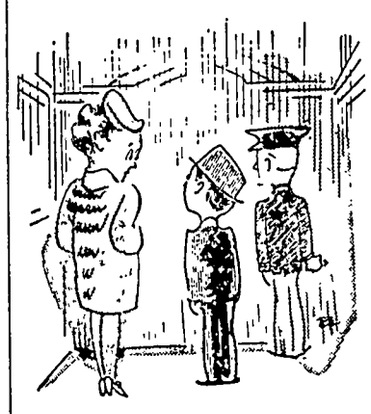
Scotch Solution

Despite the whimsey of "Peter Pan," author Barrie was of stern Scottish practicality and thrift. A plain little secretary had typed the manuscript of his play, and Charles Frohman thought it would be a nice gesture to present her with two orchestra seats for the first night. But the girl said she had no dress good enough to wear on such a grand occasion.

Touched by her dilemma, Frohman repeated her plaint to Sir James and proposed that they outfit her with more suitable apparel. Barrie was touched, too.

"Oh, the poor child!" he said. "But we'll fix that — we'll give her seats in the gallery!"

THAT STOPPED HER



Will Rogers was fond of spinning this quip to illustrate adroit diplomacy: An errand boy at a Hollywood studio entered an elevator and forgot to remove his hat. The only other passenger was a fussy, middle-aged actress, and she asked him: "Don't you take off your hat to ladies?"

The retort diplomatic was: "Only to old ones, ma'am."

Just a Warmup

The excited farm hand raced up to the owner of the farm.

"Hiram," he cried breathlessly, "the bull's got loose and he's chasin' yer wife all over the pasture! Happened 'bout 20 minutes ago."

The farmer threw down his pail. "Why, you fool!" he bellowed. "Why did you wait this long before tellin' me?"

The farm hand looked surprised. "What's the matter?" he inquired. "Is your wife short-winded?"

Alibi Ready

"Jones," remarked a neighbor, "I understand that boy of yours is learning a trade. Do you think he'll work at it?"

"No," was the candid reply, "I don't think he will. He's just learning it so that when he is idle he will be able to tell people what kind of work he is out of."

DECEPTIVE

Johnny came rushing in one afternoon and told his father that he had just seen two lions and a tiger fighting in the street. After several futile attempts to get Johnny to change the story, his father finally said, "Johnny, you are lying. I want you to kneel, tell God your story, and ask him to forgive you."

When the boy had finished, his father asked him what God had said.

"He said, 'That's all right, Johnny,'" the youngster replied, "'those big dogs had me fooled at first, too.'"

Retort

Jean—My father said he didn't like women that drive from the back seat.

Gordon—What did your mother say to that?

Jean—She said back-seat drivers were no worse than men who cook from the dining-room table.

Comment Censored

"Now, then, what should a polite little boy say to a lady who has given him a nickel for carrying her grip?"

"I'm too polite to say it, madam."

Like Joseph's Coat

Visitor—What a glorious painting! I wish I could take those lovely colors home with me.

Artist—You will—you're sitting on my paint box.

Unfair to Dobbin

Foreman—So you want to quit us. Don't the wages suit you?

Pat—The wages are all right, but I feel guilty for cheating a horse out of a job.

Logical

Teacher—In which of his battles was King Gustavus Adolphus of Sweden slain?

Pupil—I'm pretty sure it was the last one.

The Longer Road

Rookie—How far is it to camp?

Sergeant—About 10 miles as the crow flies.

Rookie—How far if the crow had to carry a pack and rifle?

Ain't It So?

COUNTLESS people will not live to encounter the troubles they fear.

Weighty opinions are never derived from featherheads.

Figures will not lie nearly as much as some fellows who use them.

It is usually when your hand are doing nothing that time hangs heavy on them.

A lot of people are willing to try anything once — provided that it isn't anything sensible.

When saving for old age, be sure to lay up a few pleasant thoughts.

U. N. Is Offered a Home

New York will fight to hold U. N. if it takes Rockefeller's last nickel. John D. offered an $8,500,000 six-block water-front site to keep the United Nations in the big city. Aladdin has stepped into the picture in U. N.'s housing crisis. The only question is whether there is anybody in the United Nations who can veto a lamp.

—•—

From Flushing Meadow to a Rockefeller center in one blueprint is quite a travelogue. One minute U. N. seemed like a forlorn G. I. searching for an unoccupied Quonset. The next minute he was having six blocks of New York's choice real estate handed him on a gold platter. NO cover charge.

—•—

If there were long months when Miss United Nations thought New York was cold to her, she now must realize she is being suddenly pursued with $8,500,000 worth of love and six blocks of unmortgaged passion.

—•—

Pa Knickerbocker might have let her go to California, but to pass up Gothem for Philadelphia . . . never!

—•—

Pa knew that a city that could hold as many five-star attractions as it had always been able to hold would look cheap getting a rejection slip from an organization with a global audience.

—•—

The proposed site has many advantages. It is located where the diplomats may see a poor-house from one window, East Side life from another, the very heart of New York from another and some society residential sectors from another. If the view doesn't give them a democratic intermingling of scenic effects, characters and types of living, nothing will.

—•—

The rich, the poor, the middle classes, the "haves and the have nots"; the limousine and the subway sets, the people who have the veto and the people who merely have the corner delicatessen and Grogan's bar . . . they're all visible there on a clear day.

—•—

The six-block area now is mostly the habitat of meat packers and slaughterers and is known as the beef zone. There are those who insist U. N. possession won't change that name.

—•—

Any day you can stand in this zone and hear the doomed sheep bah-h-ing as they are led to slaughter. We commend the sound to some of the more selfish and obstreperous figures in U N.

—•—

Personally we are not too sure about a super peace center in the heart of Manhattan as a brotherly love influence. It seems to us that the world organization needs an atmosphere of calm, leisure and dignity rather than one of speed, traffic jams, general jostling and high-pressure chaos. We would say it would do better with a background less like big business and card-index efficiency and more like Bethlehem and starry night.

—•—

Men engaged in the greatest job of history, the bringing of peace and the brotherhood of man to a blitzed and baffled globe need something more than express elevators, 38 floors of de luxe offices, special lighting, adjacency to the subway and an opportunity to lunch at the Busy Bee cafe between debates.

—•—

Still a home is a home and it's nothing to sneeze at. And as Grant said, "Let us love peace"—every eight million dollars will help.

* * *

GOING UP!

The U. N. on a winter's day
Fled the meadow, sweet with hay;
So swiftly was the lady's pace
She found a home near Beekman place.

—•—

The U. N. subcommittee's enthusiasm for the Rockefeller offer of a home is so hilarious that it may be called "Hooray-dio City."

—•—

On the other hand if those scraps between United Nations' diplomats keep up, the headquarters may have to be tagged "Sock-A-Feller Center."

* * *

MESSAGE FROM

PETTIGREW THE PENGUIN

dear sir colon all i hope is that with the united nations functioning in a great skyscraper center the dove of peace doesn't get caught in a revolving door period yours comma pettigrew the penguin.

—•—

We assume names for the new U. N. center will be desired, and the first that come to mind include Amity Arms and Concord Towers.

3 MINUTE FICTION

INVITATION TO DEATH

By Yale Roe

WNU Features.

I had made a date with my former college roommate, Ted Lawson, for seven o'clock; a date for dinner, and for death.

As Ted lit a cigarette I first noticed how gray his hair had become But it was 20 years since our graduation day when I had last seen him The passing of time had changed us both but did not dull my memory of that day.

After the graduation exercises I had started looking for Ted. I had known him for a year but lately he seemed to be acting strangely. He was uneasy when with me and it was not long before I knew why.

Suddenly I caught a glimpse of his curly black hair in the crowd. Making my way towards Ted I saw Susan, my fiance, with him. Susan and I were going to be married as soon as I found a job.

"Congratulations, Ted!" I clasped his hand.

"Thanks," he said quietly. "Same to you."

As I put my arm around Suan and leaned over to kiss her, she averted her head and stepped back. It was then that I sensed that something was wrong. Stunned, I heard

I ordered a drink but sat for hours without touching it.

her tell me that she was in love with Ted, that she had been seeing him secretly for weeks. From a conglomeration of bemuddled thoughts I could realize only one thing; that it was all over.

Ted married Susan the following week. They moved to Rhode Island where they lived for only a year before Susan became ill. Within a few days she died; the doctors said it was pneumonia. Perhaps it was poetic justice. Perhaps neither of us was worthy of her.

I had never thought of myself as one who would someday commit murder But with every passing day, month and year my hatred towards Ted Lawson grew until my wrath developed into a frenzy. But my revenge would not be complete if I too would have to die Consequently, I had long thought out my perfect crime. Over a period of 20 years an act such as murder could be planned most carefully.

Actually it was very simple. About five years ago, while out of Illinois I had bought a medicine which was poison if taken internally. The effects had all the symptoms of a seizure. I had bided my time for many years so it was nothing to wait another few years until the moment of opportunity would arrive.

The bus boy cleared our dinner dishes from the table. As the waiter approached with our coffee I realized that the time for my revenge was finally upon me.

Then I noticed a blond woman of about 30 shuffle past our table swinging her hips in time to the music. Ted looked up and smiled. His eyes followed her across the room. This was my chance but I had to act quickly. With the agility of a cat I shot my arm towards Ted's cup and the deed was done. The drops of poison floated around in the cream and then sunk to the bottom of the cup.

After we had finished our desserts and coffee we sat for a while smoking and talking. Suddenly Ted burst out laughing. His whole burly frame shook with laughter until I could not stand it any longer. "What is it? What is it?" I found myself shouting.

He said, "You know, I'm a heel. Why it's really funny. When you went to buy your cigarettes, I got suspicious of you. I guess it was because I was always afraid you would do something to me for marrying Susan." He laughed some more.

"Suspicious. What do you mean?" I asked.

"I don't honestly know," he answered. But suddenly I began to wonder if after all these years you would hate me and if you would try to harm me. So I switched our coffees. You know, like they do in the movies. But heck, you couldn't hurt a fly. That's funny, isn't it?"

The volume of his laugh seemed to swell in my ears. I rose slowly from my chair and walked toward the door. Somewhere in the back of my mind I heard Ted calling me but it did not matter. I knew that now nothing would ever matter.

Improved Uniform International SUNDAY SCHOOL LESSON

By HAROLD L. LUNDQUIST, D. D. Of The Moody Bible Institute of Chicago. Released by Western Newspaper Union.

Lesson for January 19

Lesson subjects and Scripture texts selected and copyrighted by International Council of Religious Education; used by permission.

JESUS INTERVIEWED BY NICODEMUS

LESSON TEXT—John 3:1-11, 16, 17.
MEMORY SELECTION—Except a man be born again, he cannot see the kingdom of God.—John 3 3.

How does one become a Christian? This was the question of Nicodemus, and it is the question in the hearts and minds of thousands in every generation. The answer is clear and definite.

The only entrance into the Christian life is by the door of the new birth. Regeneration is the act of God whereby the divine nature is imparted to the believing sinner and he becomes the child of God. He who has not entered by this way has not entered at all. He is still dead in trespasses and sins, without God and without hope (Eph 2:1, 12).

The Pharisees who looked for the coming of the Messiah as a secular conqueror wondered at this new spiritual leader. It was probably as much on their behalf as his own that Nicodemus came to inquire of Jesus. In answering his questions Jesus reveals the necessity, the nature, and the method of regeneration.

I. The New Birth—a Necessity (vv. 1-7).

Our Lord's visitor was a man of distinction and standing in the community, but Jesus was not unduly impressed by the dignity and high station of his visitor, nor by the visitor's courteous aknowledgment of his own position as a great teacher. With decisive boldness Jesus declares that this man, a cultured and distinguished ruler of the Jews, must be born again, if he is to see the kingdom of God.

God is no respecter of persons. The doctor of divinity must be born again just as much as the illiterate fisherman. D. L. Moody once said that he was thankful it was to such a man as Nicodemus that Jesus presented the necessity of the new birth, or men would have said that only the down-and-outer needed to be saved.

Two reasons are given by our Lord for the "must" of verse 7: (1) The kingdom of God is a spiritual kingdom and cannot be entered by way of our human nature; and (2) "that which is born of the flesh is flesh" and is radically and essentially bad. To learn why that is true read Jeremiah 13:23 and Galatians 5:19-21.

Scripture on this point is almost diametrically opposed to much of the teachings in our schools and colleges. But God's Word is right; let us follow it.

II. The New Birth—a Mystery (vv. 8-11).

God has graciously revealed to us "all things that pertain unto life and godliness, through the knowledge" of Christ (II Pet. 1:3). But it is true—and we say quite appropriately true — that he has some things hidden in his own blessed counsels. We know the experience of the new birth. We see the blessed results of regeneration. But what actually takes place is a divine mystery, not fathomable by human reason. Those who insist that all spiritual truth be put through the little norm of their intelligence will never understand it or receive its blessing (I Cor 2 14).

The striking illustration of the life-giving and energizing wind used by our Lord is most illuminating. Wind is unseen, but the results of its movement are evident. Even so the spiritual rebirth of men is an enigma to the worldly man, but even he can see its results in godly living.

We know that regeneration is not only a possibility, but an actuality, a fact; in truth, the greatest of all facts.

III. The New Birth—a Reality (vv. 16, 17).

Just as there was healing and life in a look at the uplifted serpent in the wilderness (Num. 21:8), so there is life for a look at the Crucified One. Faith receives God's perfect provision for sin.

Verse 16 may well be regarded as the greatest sentence in the greatest Book in the world. It presents the whole plan of salvation—its source, its ground, its recipients, its condition, and its result.

This glorious salvation is for all men—"whosoever"—but some reject it. Notice that God does not condemn them. Their own evil works and desires condemn them (vv. 17-20). God in his grace is ready and willing to save, but men love "darkness rather than light," for their works are evil.

Our tender, loving heavenly Father has no desire to condemn anyone. The man or woman who falls under his condemnation of sin does so by choice. God's desire is that all should be saved.

Will you, unbeliever who reads these lines, respond now to his gracious invitation?

"GAY GADGETS"

Associated Newspapers—WNU Features

By NANCY PEPPER

THEY GO TO YOUR HEAD

We're referring to the new "conversation" scarfs that everyone will drool over when you wear them to school. They're all in the neckwear or Teen Gadgeteria departments of your favorite stores right now. And, if they don't make you give those dishtowels you've been shrouding yourself in back to mother, you're not the Dinah Mites we think you are.

Slanguage Scarf—Your scarf wardrobe wouldn't be complete without the Hubba Hubba square, patterned all over with your favorite jabberwocky, right out of our Tricks for Teens column, too.

City Slickers — All the famous street corners of New York are drawn into the pattern of this scarf, with a border of girls' heads all around It should make a splash on Main street.

When Were You Born? — On account of there's a birthstone scarf for every month, complete with the proper jewel and the flower that goes with it worked right into the pattern. That's one way of reminding him about your birthday.

You Name It — There's one scarf patterned all over with boys' names —and we hope you find his name among them. There's another with the names of colleges written all over it. They both make good reading when you tie them over your hair.

* * *

Trixie Teen Says—

Don't overdo this dating business. Confine your twosomes and foursomes to weekends and keep out of circulation on weekday nights. Popularity is a fine thing—but just see what too much of it does to your favorite songs. The more popular they are, the more everybody sings them and plays them on the juke box—the quicker they're apt to die. Don't try to do all your dating at once, and you'll keep your top rating much longer on the Hit Parade with all the nicest boys in town.

Ruffled Peplum

Pink satin brocade in a picturesquely simple style is fashioned by New York modistes. The ruffled peplum dips in back.

Minute Make-Ups
By GABRIELLE

"Stay as Sweet as You Are"! Pour cologne into your last rinse when shampooing. Sprinkle sachet into your shoulder pads. Dip little cotton balls in perfume and wear them in your "bra." Tuck sachet pads under your pillow. Sprinkle your hairbrush with cologne!

Ledger Syndicate.—WNU Features.

Laugh and Drive Gloom Away

Pull It

Mechanic — The trouble with your car, Miss, is that you have a short circuit in your wiring.

Miss—Can you lengthen it just a little, while I wait?

Love making hasn't changed much in 2,500 years. Greek maidens used to sit and listen to a lyre all evening too.

He Knew the Answer

She—Do you know why I refused you?

He—I can't think.

She—That's right.

"How like his father he is!" she exclaimed when she first saw the new baby. Then added: "But what does it matter as long as he is healthy!"

ASK ME ANOTHER?

A quiz with answers offering information on various subjects

The Questions

1. Who was the first Roman emperor to protect Christians and become one of them?
2. What is the method of enameling metal or porcelain called?
3. A farmer signed the Declaration of Independence. Who was he?
4. When the Rubicon is mentioned, you think of what?
5. How was Mary, queen of Scots, dressed when she went to the scaffold for execution?
6. When a cat's eyes become slits in a strong light, which way do the slits extend, vertically or horizontally?
7. How many departments of government were represented in Washington's cabinet?

The Answers

1. Constantine (the Great).
2. Cloisonne.
3. John Hart (New Jersey).
4. A river.
5. In brilliant scarlet.
6. Vertically.
7. Five: state, treasury, war, post office and judicial.

Practical Instruction For the Home Nurse

B. C Berge, Attorney
Dated December 31, 1946.
IRENE SCHONEMAN,
Clerk District Court.
(Publish Jan 8-15-22, 1947)

TRACTOR HITCH

Dave Shook, farmer near Greene, got tired of fooling around with the usual type of tractor hitch. He invented one of his own which can be operated without leaving the seat of the tractor. His son completed a hitch in four seconds the first time he tried it.

Kindergarten News

—Miss Seim, Teacher

Carroll Priebe entered Kindergarten on Monday. We are all glad to have him. We now have seventeen children in our room.

We have nine new story books for our library.

First And Second Grade News

—Miss Halfwassen, Teacher.

The first grade A class have started reading in their new Readers called, "A Home For Sandy."

The second grade have started their new Readers called, "More Friends and Neighbors."

Gordon Johnson had a birthday and treated the pupils to frost sticks.

Those receiving a 100 in Spelling in second grade for the week are:

Eva Thieman
Martin Brinkman
Barbara Thompson
Jimmy Karsjens
Berleen Bridges
Robert Larson
Fonda Beier
Janice Stokesbary
Beverly Christiance
Sharleen Swanson
Gary Baack
Ronald Trampel

Those receiving a 100 in their Spelling in first grade for the week are:

Roslie Rosendahl
Linda Swalve
Jeanne Barz
Gordon Johnson
Larry Ulrich
Joan Christie
Joyce Lassahn
Sondra Medin
Marcella Nuehring
Diana Masterson

Jimmy Karsjens had a birthday Friday and treated us all to frost sticks.

COUNCIL PROCEEDINGS

Klemme Iowa
December 9 1016

The Town Council met in regular session in the Council Room with Mayor Keraus and all members present

The minutes of the previous meeting were read and approved

On motion the following bills were allowed

Central States Electric Co., November and December light and power	$ 151 02
Lewis Radio Shop, fuses	31
John Heginger, mowing weeds	2.50
Kluckhohn & Sons, Supplies	2.08
W F Pavey, labor	3 00
Hancock Co. Coop. Oil Association, gasoline	36 91
Klemme Coop. Grain Co., coal	13 55
State Bank, Fort Dodge Interest	3 50
Klemme Times, printing	6 14
Sears Roebuck, Tire	9 35
Employers Mutual Casualty Co., Balance Insurance Premium	29.36
Geo Buseman Salary and killing 2 dogs	158 90

Motion made and seconded to approve Geo Buseman Marshall and Commissioner at $140 00 per month, and to also approve bond as furnished

Bill for Municipal League dues for coming year not approved.

A committee from the Civic Club met with the Council in the interests of the Community Building being made more of a community project and plans toward that end will be made in the near future.

Meeting adjourned.

A J. KUDJE Clerk

KLEMME HIGH SCHOOL

The year 1946 is finished and tucked away in the past, and we are living in a new year and a glorious year. Many little things have happened this past year that would be much better forgotten. Life is too short to remember things like that, and they hinder us from doing our best. Since we are not always agreeable and pleasant as we should be, we wonder how the teachers can always be so cheerful and willing to help us with our problems which we present to them. So, we as students of Klemme High are looking with eagerness at the New Year, and what it has in store for us. However, we know 1947 will be a happier year if we start it with the proper attitude of mind. Let's see what we can do as students.

New Year's resolution have been made, some broken, while others didn't bother to make any, but let's all resolve to learn something new each day, see something new in others, and do something which will be valuable to ourselves and to others. This, I am sure, we all can do, and will try to do

As for the Seniors, this is our last year of being together with all of our school chums and teachers. After this we will meet new people, and have jobs, or go to other schools, but I am sure none of us will forget our good old school days.

With basketball tournements, baseball games, music contests, parties, commencement, and school work, it looks like Klemme High will have a very interesting, eventful New Year.

W. S. C. S. Party Held At The Kudje Home Tuesday

The new and old executive board members of the Methodist W. S. C. S. held a party at the Art Kudje home Tuesday afternoon. Devotions were in charge of Mrs. R. W. Elder and Mrs. D. P. Anderson and Mrs. Vern Bisom had charge of games.

The officers served a nice lunch.

Third And Fourth Grade

After a two weeks Christmas vacation we are all back at our studies again.

Raymond Jennings who previously attended school in Estherville has entered our school in the Third Grade.

Dick Dulmes and Margaret Haefner were the only ones who received perfect spelling papers in their respective grades.

Margaret Haefner and Lois Heginger treated our room on Monday and Thursday of this week as it was their birthday.

JOLLY WORKERS CLUB MET

The Jolly Workers Club met at the home of Mrs. Mildred Gruis, January 11th. 13 members were present and Mrs. Mac Fuller was a visitor.

Mrs. Pearson is the new President and Mrs. Boelman, sec. and treas. for the new year. Irene Waddingham was in charge of the program.

After the business meeting and program was over a nice lunch was served by Mrs. Gruis with Edith Kramer as co-hostess.

The February meeting will be at the Ruth Trampel home with Bessie Marshall as co-hostess.

Fifth And Sixth Grade

We were sorry to have Beverly Sabek and Richard Bock absent part of last week. We will take our Basic Skills test this week.

Friday afternoon JoAnn Burgess showed us some dirt from Atlanta, Georgia. We were surprised to see how red it was in comparison to our Iowa soil.

Shamrocks Annex Two More

Ball Games To String

Coach Patterson's Shamrocks added two more games to their list of wins by drubbing the Kanawha Bulldogs there Friday night.

The game Tuesday night was a thriller and was a very close all the way. The Shamrocks were behind with two minutes left to play when they forged ahead to win 31 to 27. Jacobs and Carolus led the Shamrock offense. Scoring on the Vagabonds was evenly divided.

In a curtain riser the "Kid Game" between the two teams made up of 6th, 7th and 8th graders and the 5th grade and the Freshmen, with the former winning 12 to 20. The big crowd enjoyed the comedy in this game and would like to see more of them.

Wedding ring—A matrimonial tourniquet designed to stop circulation.

GIRL SCOUT NEWS

On the evening of January 9, we held our weekly meeting at the Sumner Trumbell home.

We elected new officers as follows: patrol leader; Maxine Barz, assistant; Iris Schaeffer, Sec. and Treas.; Sharon Bridges, Scribe; Charlotte Nuehring.

We worked on our health badge and homemaking badge.

Scribe, Iris Schaefer

WEEKLY NEWS ANALYSIS

Claims for Back Travel Pay Pass ½ Billion; Farm Chiefs Call for Protective Tariff

Released by Western Newspaper Union

(EDITOR'S NOTE: When opinions are expressed in these columns, they are those of Western Newspaper Union's news analysis and not necessarily of this newspaper.)

PORTAL TO PORTAL:
Claims Mount

As union claims against industry for back pay for walking to the job or preparing for work on company property mounted to over half a billion, tax experts opined that Uncle Sam may have to bear the burden of the settlements if the firms are permitted to obtain tax credits for such disbursements.

Although John L. Lewis first pointed up the question of so-called "portal to portal" pay for miners traveling to the coal faces underground, the principle was given industry-wide implications with the Supreme court's decision upholding such compensation retroactive to 1938 for employees of the Mount Clemens, Mich., Pottery company.

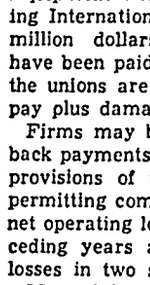
The Supreme court verdict was followed by a rush of the major CIO unions for such retroactive back pay, with the United Farm Equipment and Metal Workers suing International Harvester for 100 million dollars. Since employees have been paid for a 40 hour week, the unions are asking for overtime pay plus damages.

Firms may be able to charge off back payments to Uncle Sam under provisions of the income tax law permitting companies to carry back net operating losses into the two preceding years and also apply such losses in two succeeding years.

Meanwhile, the U S. Chamber of Commerce polled its membership on congressional amendment of the fair labor standards act of 1938 under which portal to portal pay has been based. The chamber proposed (1) observance of custom, practice or agreement in different localities or industries as to working rules, (2) provision for relief for unwitting violation of the law, and (3) permission of companies and unions to make compromise settlements.

GEORGIA:
Gubernatorial Mix-Up

Ability of the late Gene Talmadge's following to muster full strength when the general assembly convenes was to determine Georgia's next governor.



Gov. Arnall

"Old Gene" himself was scheduled to take office January 14 before his death intervened, creating a situation unparalleled in Georgia's history. Because neither the new or old state constitutions provided for such a contingency, adherents of Gov. Ellis Arnall and "Old Gene" jockeyed for the position.

While Governor Arnall disavowed any intention of taking advantage of the uncertain legal situation to remain in office, he proposed to retain his post until the new pro-Arnall lieutenant governor is sworn in, when he will resign in his favor.

H. Talmadge

Anxious to obtain the gubernatorial seat, however, "Old Gene's" followers hoped to muster sufficient strength to declare the post vacant at the election canvass when the assembly convened, then name his son, Herman, governor Although only "Old Gene's" name was on the ballot at the last election, his son received a number of write-in votes to provide for just such a contingency as occurred. Thus, the legislature could turn to Herman as the nominal choice of the people.

TARIFF:
Seek Protection

Historically for free trade, the deep south reversed its position in petitioning President Truman and Federal Trade commission for a strong protective tariff for American agriculture.

Signed in behalf of the elected commissioners of agriculture of Alabama, Arkansas, Florida, Georgia, Kentucky, Louisiana, Mississippi, South Carolina, North Carolina, Texas, Tennessee and Virginia, the petition reached Mr. Truman as the government prepared for renegotiation of existing rates in reciprocal trade treaties drawn under the act of 1934 and subsequent extensions.

Declaring that industrially undeveloped nations could pay for American manufactured goods only with agricultural products, the commissioners warned against subjecting U. S. farmers to a flood of foreign commodities and reducing their living standards to a subsistence level. Calling for a trade program fitted into the American economy, the commissioners advocated the exchange of such exportable products as wheat, lard and cotton for rubber, coffee, tea and bananas.

Wisely, the commissioners' petition was national rather than sectional in its nature. Although professing concern for the future of cotton in competition with foreign rayon, nylon and other artificial fibers made in reconverted armament plants, the commissioners also warned that a further lowering of tariff rates would adversely affect cattle, oleomargarine, butter, cheese, fish, eggs, grains, potatoes, peanuts and vegetables.

Dramatically pointing up the effect of cheap foreign competition on American products, the commissioners declared that whereas white and sweet potato starches had been used for the adhesives on the back of stamps and the flaps of envelopes, the adhesive on the stamp bearing the petition was made of imported cassava roots.

Men of Mars . . . .

At Johnsville, Pa., naval air technicians develop deadly guided missiles of future warfare. Photo shows scientists testing ship-to-shore weapon designed for pin-point bombing at 100 miles. Traveling hundreds of miles an hour, missiles are directed to target through television, radar, radio or devices sensitive to sound, heat and magnetism.

ITALY:
Postwar Troubles

Despite substantial assistance from the U. S , Italy has been treading a rocky road to postwar recovery.

Italy's troubles are not all economic, although shortages of foodstuffs and widespread unemployment resulting from industrial stagnation have contributed to the political turmoil. The left and the right are pulling against themselves for political advantage and a rising wave of anticlerical propaganda threatens the traditional spiritual unity of the people

On the economic front, Italy is short of wheat, and spaghetti and macaroni rations have been cut in half. Pig iron production is down to 28 per cent of the prewar level; textile fabrics, 56 per cent, chemicals, 66 per cent; mechanical goods, 76 per cent; cotton thread, 88 per cent. Imports are almost three times exports.

Helping Hand

Since Uncle Sam has dealt generously with Italy, it is looking confidently for more assistance from the U S. Thus far, the U. S. has agreed to compensate Italy for supporting American invasion troops and furnishing war supplies, and has extended credits for purchase of overseas surplus. In addition, Italy has profited from U. S. contributions to UNRRA and the international bank.

Despite the difficulties presented by shortages of both foodstuffs and industrial materials, both the left and right wings have made political capital of unrest. Latest example was the food riots engineered by Communists in southern Italy As a result of the political bickering, there has been a resurgence of Fascist sentiment, with Mussolini's former followers growing increasingly bolder

Leftists also have backed the attacks on pope and church, with the intention of weakening respect for the Catholic doctrine of authority, family and property. However, the rightist dominated government has been quick to fight abusive criticism of the clergy. An editor charged with publishing phornographic cartoons of a friar and unclad woman was sentenced to two years in jail.

U. S. HEALTH:
Shows Improvement

After getting off to a bad start in the early months of the year, the health record among life insurance policyholders in the United States was excellent for the year 1946 as a whole.

At the start of the year, there was a rise in the death rate among policyholders, but by the second quarter this trend was reversed and a marked improvement was shown.

FOREIGN AFFAIRS:
Red Tape

The sullen Russians continued to keep overseas relations with U. S. military personnel on strictly a formal basis as illustrated in their order to an American naval vessel to clear out of Dairen, Manchuria, within the prescribed 48 hours.

The LC-3 1090 entered Dairen as a diplomatic courier ship to bear supplies and mail to the U .S. consul. Legally, the vessel was permitted to remain only 48 hours, and the Russ ordered the Americans to leave or accept the consequences when it appeared they might be delayed over efforts to obtain landing clearance for a Standard Vacuum Oil company employee, a newspaper correspondent and a magazine photographer.

Russian authorities in control of Dairen had given the U S. consul the run-around in his attempts to secure permission for the three to land. However, their action stemmed from a fear to grant the clearance without prior approval from their masters in Moscow rather than personal feeling.

QUAKE:
Rocks Japan

As hundreds of thousands of Japanese made homeless by earthquake and tidal wave shivered in the wintry air, the U. S. rushed relief to the distressed areas.

Having become used to the shock and terror of wartime B-29 raids, the Japanese accepted the catastrophe with resignation, calmly counting their dead and injured in the thousands and their property damage in the millions. No less than 24 of the 47 prefectures felt the tremors, with the coastal regions of southern Honshu, Shikoku and Awaji islands swept by seven foot walls of water rushing in from the sea.

All of the horror and distress was portrayed by the Tokyo newspaper Asahi in an eyewitness report from Shikoku: First, startled people felt the ground shaking beneath them, then they could hear a great roaring sound. Stumbling from their quaking houses, they rushed for high ground, but many were overtaken by a surging wall of water and their screams rent the air. Some people saw a little girl with a doll crying, "Save me, gentle Buddha," but when they returned to search for relatives the tearful child was missing and all they could find was the doll, wedged between planks on the beach.

INDO-CHINA:
Imperial Headache

France was the latest European power to suffer an imperial headache, with Indo-Chinese natives battling French forces for extension of self-government.

Under a compromise effected last March, France granted self-rule to several provinces but retained control over the rest of the country as a lever for continued dominance. Availing themselves of a well-oiled machine developed under Japanese auspices during the wartime occupation, the native leaders of the Viet Nam (Independence party) have pressed for an extension of their self-rule.

Not yet able to grant all of French Indo-China independence and be assured of the protection of its commercial interests in the rich Far Eastern country, France has been forced to use troops to retain a grip in the absence of an agreeable compromise.

Lift for Milady

Now, we have seen everything in ladies' hats — or have we? Latest creation by Edward Stevenson of Hollywood, Calif., where one can expect almost anything, utilizes Christmas wrappings, etc., which otherwise might go into the wastebasket. This chic number is fashioned from cellophane and metal foil paper, cellophane straws, holly, bells, pine cones and tabs.

Salvage Army Equipment

At repair shops in quartermaster depots throughout the United States thousands of different kinds of worn or damaged military items ranging from mess kits to mobile bakeries, from shirts to typewriters are being restored to usable condition in one of the biggest peacetime repair jobs ever known.

Savings of $150,000,000 have been accomplished at labor cost of $13,000,000.

RAW MATERIAL:
U. S. Reserves

Huge demands during two world wars have drawn heavily upon United States reserves of metals and minerals although the country still has abundant resources of the most essential, according to the New York Trust company.

Great as are its resources, United States reserves of some important metals and minerals have been depleted by unprecedentedly high production during the last five years

Washington Digest

Oriental Scholar Improves Nutritive Value of Rice

By BAUKHAGE
News Analyst and Commentator.

WNU Service, 1616 Eye Street, N.W., Washington, D. C.

WASHINGTON. — Do you know that an invention of a young Persian-American may rid the orient of its greatest curse, malnutrition?

Do you know how it happened that some of the most beautiful classics of Middle Eastern literature came to be written in a language — Aramaic —once the "vulgar" patois of the people?

Baukhage

The same man answered both those questions for me and it's quite possible that had he not been able to answer both, he would have been able to answer either.

It was the inventor, himself, M. Yonan-Malek who enlightened me in two and a half hours of the most charming and informative conversation in which I have indulged in many a strike-darkened, politics-clouded Washington afternoon.

Briefly, he has invented a process which keeps the nutritive value of rice in the kernel, boosts the rice yield by 25 per cent, cheats rice-eating beetles and weevils out of their annual million dollar banquet, but probably most important of all, leaves the Vitamin B factors in each grain of rice intact.

Since the rice-eating countries account for half the world's population and since malnutrition is a serious problem in all of them, the invention seems a little less than revolutionary in its potentialities. It is already the basis of a going concern.

Polish Vitamins Out of Product

My acquaintance with rice has been a nodding one, furthered by periodic visits to Chinese restaurants. When I ate the underpinning of the celery sprouts and a strips of chicken, I didn't realize that the ancient Pharaohs of Egypt would have approved its polished whiteness. I didn't realize that that polished whiteness had been achieved by 19 different cleaning, milling and polishing operations And I certainly didn't guess that those 19 operations had robbed my rice of 76 per cent of its thiamine, 56 per cent of its riboflavin and 63 per cent of its niacin — and most of its food value.

White rice, it seems, is a fetish that goes back to the days of the Pharaohs when white was the symbol of royalty Some unnamed chef with a deep sense of the fitness of things didn't like the idea of his Pharaoh partaking of crude, plebian-looking rice So he ordered the royal millers to polish the grain to a pearly whiteness. The millers complied, never realizing they were polishing the food value out of the food.

The poor people of Egypt went on eating their rough unpolished rice. And nobody guessed why they were healthier than their rulers. This situation lasted until the French revolution when the revolutionaries insisted on their right to keep up with the royal Joneses. They wanted polished white rice too—(and white bread). They got it, and have been getting it ever since. The custom has persisted until today when we still require our rice millers to strip away more than half the vitamins from our rice and wheat.

This is not so important in potato and bread-conscious America, but in oriental countries where frequently the word "rice" and "food" are synonymous, it's something else again. Six hundred thirty million orientals derive more than 40 per cent of their food calories from rice —and if the rice is polished, they are losing vital nutritional values at every meal.

Malek became rice-conscious back in 1938 when one of his friends wished aloud that he could figure out some way to increase rice consumption in the United States.

At that time, tons of rice were rotting in the California rice fields for want of a market. Each season, this country's rice growers were being left with a surplus of at least three million bags of rice. The industry was slowly going broke.

Malek went at the problem in the approved American tradition. He polled representative California housewives to find out why they weren't serving more rice at their dinner tables. He learned that they were tired of burned pots and pans and sticky gummy rice. "If we could only buy canned rice, ready to heat and serve," they would sigh.

Malek tried to oblige. For several months, he cooked rice and canned rice — in his own home, in industrial kitchens, in government laboratories. But the rice invariably looked and tasted like flour paste.

Long Memory Aids Research

One day, however, he tried cooking and canning the patna variety of rice from India. The results were somewhat more encouraging. The canned kernels seemed less gelatinous, almost fluffy. Then he remembered something he'd read about the natives of Assam. It seemed these natives suffered less from beri beri than did natives of other oriental regions. Malek took to the research books, and discovered that the Assamites parboiled their rice. That is, they soaked it for days in water to loosen the tough hulls, then they steamed it.

Up to that point Malek had been trying to can polished white rice. Rice whose vitamin-filled bran layers had been cleaned, hulled, milled, scoured and polished away. This was the first mention of the treatment of rough paddy rice before it was milled. He leaped on it as a possible clue.

He managed to get from a friend a bag of rough paddy rice—prepaid fortunately, for by this time, Malek was walking to and from his experimental laboratory, unable to afford even a car token.

He soaked the rice for days. When he needed to parboil the rice in steam, he found an unused sterilizer at a nearby hospital where the internes were glad to help him. Even his neighbors in his apartment building were on hand to help him spread the parboiled rice on the roof to dry.

Now he had his precious parboiled paddy rice. But the tough hulls on the kernels posed a problem. An ordinary rice mill handles rough rice in carload lots. The only way for Malek to mill a hundred pounds was to find a hand mill. Well, he found a hand mill and ground the hulls from the rice. The rice was canned, and this time the kernels that rolled out were hard, dark, chocolate colored and separate.

At that time, Malek didn't know he had accidentally driven the water-soluble bran layers into the rice kernel itself. He only knew this rice was distinctly different than any he had canned before.

What he had to do then was to determine the length of time to soak the rice, what temperature to use, under what steam pressure to parboil it. It took Malek months, working with makeshift equipment to hit upon the right formula.

Finally he obtained rice which, when canned, came out fluffy, with each grain separate and perfectly tender. The layers of bran driven into the kernel imparted a different nut-like bran flavor—and the long cooking at high temperature had made the rice sterile But the best part of all—which he discovered through scientific analysis—was the fact that this new rice was unbelievably rich in vitamins.

The army and navy were interested, and Malek offered them his patents for the war's duration. At the present time he's busy licensing rice mills here and abroad to use his process

About the only thing he has left to worry about now is how to obtain the rice in order to process it. The rice supply, as any grocery-haunting housewife will know, is not what it used to be. The world supply of rice is short this year, and a large percentage of rice raised in the United States has been allocated to countries where rice is a staple food. This scarcity explains why rice, along with sugar and syrup, is the only food still remaining under price control.

But once the world supply increases, there'll be more rice, more nutritious rice, more flavorful rice. Furthermore, Malek guarantees that the brand-new bride won't have to make any last-minute switches in the dinner menu because the rice she cooked turned out all wrong.

Oh! — what about the Aramaic classics? I couldn't do justice to that one — not without a little more space and a lot more help from Malek.

BARBS . . . *by Baukhage*

I see by the papers that factory smoke makes cabbages grow bigger. And making the factories smoke makes bigger appetites for bigger cabbages.

* * *

Are you an unkind person? Maybe. We learned in our copy books that "politeness is to do and say the kindest thing in the kindest way."

They now have invented an exploding scarecrow that goes bang every three minutes, says Business Week. It won't take the crows long to know that a barking dog does not bite.

* * *

Plate glass production has reached all-time high, says Business Week. So have babies and automobile accidents.

DISPLAY HISTORIC DOCUMENTS

WASHINGTON.—Attorney General Tom Clark is hatching a unique plan for selling civil liberties to the American people. He will send a special train through the 48 states carrying some of the priceless treasures of American freedom.

It was Clark, working quietly behind the scenes, who had more than anyone else to do with organizing the president's special committee on civil liberties, which will study southern lynchings and race problems.

Accordingly he has evolved the idea of sending a special train across the United States containing the most sacred documents of American history which guarantee our freedom.

At first Clark proposed equipping two special cars with showcases which would display the Bill of Rights, the Declaration of Independence, the Emancipation Proclamation, the Constitution and so on.

However, he found that the Proclamation of Emancipation by which Lincoln freed the slaves was in the hands of Abraham Rosenbach of Philadelphia, famous collector of old manuscripts. Clark, therefore, called Rosenbach to tell him about his plan and ask for the loan of the proclamation.

Rosenbach agreed to cooperate, and suggested an entire train instead of two cars. He offered to help raise the extra money and, as a result, it now is planned to equip an entire special train with showcases in which will be displayed the most cherished documents of American history. Soldiers will guard the train, just as guards stand watch continually over these documents in the Library of Congress. In addition, as the train arrives at each state border, an extra car will be added displaying the historic documents and civil rights mementoes of the state.

Finally, Clark plans to have large-size duplicates of the freedom documents "blown-up" as permanent exhibits to be left behind in the high schools of each city through which the train passes.

IRON CURTAIN STAYS DOWN

Assistant Secretary of State Bill Benton, who has tried desperately to lift the iron curtain, recently was prevented by the Russians from visiting Moscow.

Benton was scheduled to fly to Moscow with Chester Bowles, his old advertising partner But the Russians found Benton had only 48 hours in which to make the trip, let him get as far as Berlin, then stalled him for 48 hours, claiming Moscow weather made it impossible for his plane to land.

Finally, Benton went back to Paris, where he checked by coded cable with the American embassy in Moscow, found that the weather in Russia had been perfect during the time he was being barred from the Soviet capital.

Benton, who is in charge of state department information, has tried to beam radio broadcasts into Russia in order to give the Russian people the real truth about the USA. Many Russians don't even know that the American army and navy participated in the war against Japan.

* * *

NEW WAGE POLICY

A new policy line in preventing strikes was agreed on at a secret meeting of Secretary of Labor Schwellenbach and his top advisers.

Hereafter, government mediation machinery will swing into action four to five months before union contracts expire in major industries, instead of waiting until union demands and strike threats are in the air

It is felt that many serious work stoppages can be avoided if union demands are anticipated and negotiations begun well in advance of contract expirations.

First major industry on which the new policy will be tried will be the maritime, which faces another possible work stoppage in June At that time, union contracts of seamen of the AFL and CIO on the west and east coasts expire

* * *

PROBE MONOPOLY

The department of justice is trying to decide whether to bring anti-trust proceedings against American Telephone and Telegraph company for freezing out small competitors. Independent would-be manufacturers of telephone equipment have little chance to break into the market because of the A. T. & T. policy not only of owning all its own equipment but buying it from its own Western Electric company, a 99 per cent A. T. & T subsidiary.

* * *

CAPITAL CHAFF

The coal strike may seriously affect next year's potato and apple crops, according to the department of agriculture. The trouble is that the shortage of coal tar curtailed supplies of insecticides, which are needed to fight such crop pests as the chinch bug, the European corn borer, the coddling moth and the potato bug. James Mead, retiring New York senator, now has the inside track for chairmanship of the Democratic national committee.

...To ...museum visitors, how... ...he can point out a few ...old articles which serve ...e reminders that even ...heroes conquered the ...someone had to cook and ...sew, rear children and help with the farming.

HISTORY WAS MADE . . . With the rifles, saddle and other equipment included in this general view of a section of the historical museum.

Modern-day housewives stare uncomprehendingly at such primitive devices as candle molds, a sauerkraut stomper, a broom of hickory splints, a spinning wheel and reel dating back to 1859. Typical of the hardships which the pioneer woman endured are exhibits of crude farm implements—an awkward flail, clumsy hoe and handmade barley fork.

The old iron Dutch oven and grill in the museum once were the only cooking utensils owned by some Mormon family, which carried them across the plains on the historic migration from Nauvoo, Ill., to Utah.

Recall Indian Raids.

Many souvenirs of the constant guerrilla warfare between the hostile Indians and workmen who pushed the rails ever westward also are on display. Supplementing the tomahawks and arrows is the handiwork of Indian women who engaged in more peaceful pursuits than their warriors. Included in the display are fine baskets and beadwork, tobacco pouches, medicine bags, amulets and other articles fashioned by Sioux women and decorated with embroidery of flattened porcupine quills dyed with roots and berries.

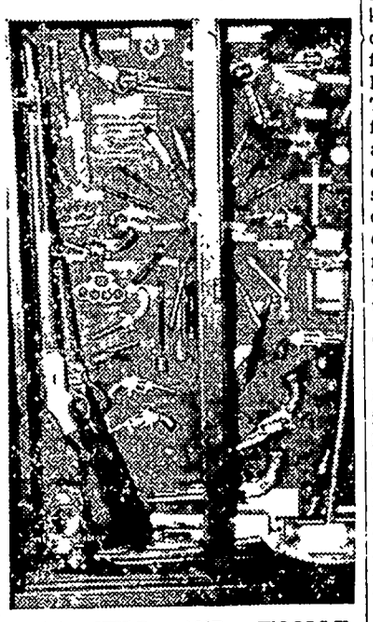
Wild-eyed youngsters gaze in awe at the pistols which spat flame and lead in the hectic early days but which now rest peacefully in the museum's display cases.

Many Guns Shown.

A huge .69 horse pistol is on display, along with flintlocks dating back to the American revolution and pepper-box types, derringers, ball and cap and muzzle-loading types. In one case are guns taken from train robbers while another case cohtains bullet molds, cartridge loaders, powder flasks and horns, shot pouches and other pieces of equipment used in pistol shooting.

A rare old book showing the trails from Texas to Ellsworth, Kas., one of the roaring "cow towns" of the '70s, and a collection of branding irons highlight the mementos of the day of the cattleman and cowboy.

Mute symbols of a still earlier day when the buffalo and bison roamed the western plains by the millions are the watch and scissors used by "Old Jim" Bridger and a money belt and autographed picture of "Buffalo Bill" Cody.



THE WILD AND WOOLLY WEST . . . Is re-created for goggle-eyed youngsters in this display of guns and knives.

The epic migration of pioneers over the Mormon trail, Oregon trail and other pathways to the West is represented by many relics. Attracting major interest is an original map issued to westbound pioneers, showing every place across the prairies where food could be obtained and the location of blacksmiths.

Rare and original photographs of the Great Emancipator hold the spotlight in an extensive Lincoln collection. A replica of the Lincoln funeral car also is displayed.

Tribute to Rails.

With the building of the West irretrievably linked with the development of rail transportation, the museum features mementos in the history of railroading.

Principal item is a yellowed telegram bearing a single sentence, "You can make affidavit of completion of road to Promontory Summit." This message, sent by Grenville M. Dodge, chief engineer, to Oliver Ames, then president of the U. P., signified completion of construction work, and on the following day the Golden Spike was driven to join the Union Pacific and the Central Pacific as the first transcontinental railroad linking the East and West.

...UTE TO PROMISED LAND . . . Mormon pioneers used these ...arm implements and household utensils on their historic trek ...auvoo, Ill., to Utah.

...indness No Handicap, Industrious Ohio Man Proves

College Coeds Are Free Baby Sitters

CORVALLIS, ORE. — This college town has become a parents' paradise since Oregon State college coeds have started serving as free baby sitters. The baby sittters are provided by the college Red Cross chapters, the only regulation limiting the service to 10 p. m. on school nights and 12:30 a. m. on Saturdays. No charge is made for the coed's services.

Sportlight by Grantland Rice

SOME short while back, one of the leaders in college football asked your correspondent to name the 15 leading coaches in the country. The only answer we could think of in a given time limit was this: "The 15 coaches who have the best material."

There is little questioning the fact that for the season of 1946, Red Blaik of Army deserved his award, due largely to the fact that Red and his staff carried Army three years without a defeat.

Time and again we have been asked to rank the coaches in order.

Bierman

This is an impossible job. Look over just a few from the list — Neyland of Tennessee, Blaik of Army, Harlow of Harvard, Little of Columbia, Crisler of Michigan, Thomas of Alabama, Leahy of Notre Dame, McMillin of Indiana, Neely of Rice, Butts of Georgia, McKeever of Cornell, Wade of Duke, Snavely of North Carolina, Odell of Yale, LeBrucherie of U.C.L.A., Bierman of Minnesota—but why keep on? This is only a partial list, where, if given the same material and the same schedules, luck would have to write the story.

I can say this. There is no bunch connected with sport that gives as much time, thought, worry and complete concentration as football coaches give. They brood by day and night. An ankle, a shoulder, a knee or a back can make all the difference in the world. Those in front figure they must stay there. The losers must win a game or two. There is a big difference in material from time to time but the old grads and the public at large never consider this. They look only to the final scores Such coaches as Red Drew of Mississippi, Red Sanders of Vanderbilt and Paul Bryant of Kentucky may be unknown nationally, but they are as good as the best with what they have.

'A Coaches' Coach'

There may be a better coach than Dick Harlow of Harvard—but who is he? Neyland of Tennessee can keep pace with anyone. Jock Sutherland was the coaches' coach in college until he came over to pro ranks. Spend a few days with Steve Owen and Greasy Neale, in or out of season, and you get part of the answer —fall, winter, spring and summer—they're always talking and thinking football, still playing over games they lost.

Lonnie Stagg at 84 was still in harness this last season, reluctant to retire. Lonnie was a star at Yale, 60 years ago. With all the tears they shed and all the moaning they give the world, it is almost impossible to shake them loose without using a grenade.

Your correspondent more than once has ducked the opportunity of picking or trying to pick the 10 best coaches of all time. Looking back to something over 40 years we'd say that four of the best were Pop Warner, Knute Rockne, Hurry-up Yost and Percy Haughton.

Pop Warner gave football more on the technical side than anyone else, including the single and double wing, a system still just as effective as the T.

Colorful Yost

Yost gave football its first flare of coaching color and Michigan its first great college football record—56 victories in five years, blemished only by a tie with Minnesota, before Chicago broke the string in 1905 Knute Rockne brought to football its greatest combination of coaching ability, human interest and personality. Rock, in addition to being a great coach, was also the game's star personal contribution when it came to human contact.

Bob Zuppke of Illinois brought to football coaching the added gifts of philosophy and humor. Zup had more color than two rainbows. One of his best friends was the late Howard Jones of Yale and Southern California. No two men were ever further apart as human beings. But they were fine coaches and close pals.

Haughton of Harvard today is a greatly underrated coach. Cold, hard, austere, he was one of the greatest. A star tactician and technician, Haughton was probably the best of all in discipline. As Tack Hardwick told me once, "If Haughton told Harvard to jump off a 100 foot cliff and he would catch us—we'd all jump. And Percy would catch us."

Character Builders

The thousand, at least a thousand, football coaches we've met and known in the last 40 odd years, have made an almost unbelievable contribution, not only to sport, but also to the good of the nation at large. Not all of them, of course. But the big majority have turned out a great job in the way of training, instruction, discipline and, if you'll pardon the phrase, "character building."

Did you ever know Dan McGugin or Lonnie Stagg? Ask their players, many of them now gray or bald.

Around the House

To restore and preserve cane seats treat lightly with linseed oil. Be sure all excess oil has been wiped away.

—•—

Cloth-covered suitcases can be restored to newness by covering the fabric with a coat of high grade lacquer.

—•—

To prevent windows from sticking, rub a little floor wax in the window sash groove.

—•—

To remove the metal base of an electric light bulb that has broken in the socket, push a cork into the base and turn it.

—•—

Winter window washing is made a lot easier by adding denatured alcohol to the water to prevent freezing. Wipe quickly with crushed tissue paper.

Here's a handy idea that makes it easy for you to fit snaps smoothly and perfectly to a garment. Sew all the snaps on one side first, then rub a little chalk over them and press them lightly on the opposite side. The white chalk marks left on the garment indicate where other halves of the snaps should be sewed.

—•—

Use top-stitching to emphasize lines that are important to the design of a dress, suit, or coat. This can be effectively combined with lapped seams and should always be done by machine to make sure stitches are uniform.

—•—

To remove stubborn particles of dirt which settle in moldings, cracks and other hard to get at corners use a paint brush that has been dipped into thick suds.

Still Second Rating

The touring company had never been of the best, and when they reached the stage of playing to the family of the man who owned the little country theater, and found that even they left at the end of the first act, it was decided to break up. Two of the actors set out to work their way back to New York.

They were lucky enough to get a passage on a barge, and when passing through a lock they overheard this conversation:

"What you got on board, Jim?"

"Load of fertilizer and a couple of actors, Bert."

The two actors looked at each other in silence, then sighed deeply.

"Cyril," said one, "shall we never top the bill?"

WHY TAKE HARSH LAXATIVES?

Healthful Fresh Fruit Drink Makes Purgatives Unnecessary for Most People

Here's a way to overcome constipation *without* harsh laxatives. Drink juice of 1 Sunkist Lemon in a glass of water first thing on arising.

Most people find this all they need —stimulates *normal* bowel action day after day!

Lemon and water is *good* for you. Lemons are among the richest sources of vitamin C, which combats fatigue, helps resist colds and infections. They supply valuable amounts of vitamins B_1 and P. They pep up appetite. They *alkalinize*, aid digestion. Lemon and water has a fresh tang too—clears the mouth, wakes you up, starts you going.

Try this grand wake-up drink 10 mornings. See if it doesn't help you! Use California Sunkist Lemons.

GIRLS! WOMEN!
try this if you're
NERVOUS
On 'CERTAIN DAYS' Of Month—

Do female functional monthly disturbances make *you* feel nervous, irritable, so weak and tired out—at such times? Then *do* try Lydia E. Pinkham's Vegetable Compound to relieve such symptoms It's *famous* for this! Taken regularly — Pinkham's Compound helps build up resistance against such distress Also a great stomachic tonic!

LYDIA E. PINKHAM'S VEGETABLE COMPOUND

WNU 02—47

● Rub in Ben-Gay, quick! Gently warming Ben-Gay brings speedy, welcome relief from chest-cold discomfort. You see, Ben-Gay contains up to 2½ times more methyl salicylate and menthol—two pain-relieving agents known to all doctors—than five other widely offered rub-ins. Insist on genuine Ben-Gay, the original Baume Analgésique.

Also for Pain due to RHEUMATISM, MUSCLE ACHE, and STRAINS.
Ask for Mild Ben-Gay for Children.

FIRST ROBIN?

Quentin Stille reports that he saw a robin Friday, Jan. 17 at the Messelheiser farm southeast of Klemme, and that several others at the farm saw the robin. Is this the first robin of spring, or the last one going south? Maybe he is one of the early birds and wants to get an early start in the Iowa spring just around the corner.

YOUNG MARRIED DISCUSS FARM MANAGEMENT WITH HERB HOWELL

Herb Howell, Iowa State College Management Specialist discussed "This Business of Farming" with 26 Rural Young Married Couples at Britt Friday night, January 17th. Mr. Howell emphasized the importance of keeping a close outlook on price trends He also pointed out that some persons do a better job on one phase and some on other phases of the business so that each farmer should capitalize on the phase of farming where he makes the most. He did, however, point out that starting farmers should have a flexible business in order to keep on top financially. Debts, loans, financing, and efficiency were all brought into the discussion.

The group is planning parties, dances, and more discussions.

MARCH OF DIMES

March of Dimes letters have been mailed out to every family in the county by Chairman Roy McMillin.

The Times urges all who have received letters to return their contributions immediately. Hancock county people should be generous in their contributions to this most worthy cause which has already done a big job in our own county and will continue to do so.

KLEMME FARMERS MAKE HIGH CORN YIELDS

In the De Kalb national corn yield contest for 1946, Emil Lau was named champion for Hancock County, with 108.38 bu. per acre. Virgil Cook was runner up with 108 17, Lewis F. Weaver was 3rd with 101.09.

Emil Lau and other county champions from Iowa were honored at a presentation banquet Tuesday, January 10th in the Grand Ballroom at the Fort Des Moines Hotel.

There were some over 300 farmers and dealers in attendance Entertainment was by an orchestra, the Songfellows and other entertainers from the WHO staff. Emil Lau was awarded a beautiful plaque and citation.

BUYS FEED MILL

The Lowell Blankenship family of Belmond moved Thursday to the former Cloon property in the northwest part of Goodell. Mr. Blankenship also purchased the feed mill from George Hall and will be in that business. The Storms family who lived on this property moved to Belmond.

The Klemme Vagabonds have booked a game with the famous Harlem Globe Trotters, world famous negro basketball team for a game in the Klemme High School Gym, Friday, Febr. 21. More particulars later.

SHAMROCKS WIN DOUBLE-HEADER FROM VIKINGS

Two Closely Contested Games Here Monday Night

Coach "Pat" Patterson's high school Shamrocks handed the Ventura Vikings a double-barreled defeat here Monday night before a large crowd.

The Little Shamrocks put on a thriller that saw them tied with the Young Vikings 8 to 8 at the half and 14 to 14 as the the last quarter began when they forged ahead to a slim 24 to 22 lead as the game ended.

Buckley directed the Little Shamrock attack with 8 points, while Osborn gathered in 7, Brinkman 6 and Sherwood 3.

Coach Leo Esbeck's Vikings put up a hard fought, clean battle for three quarters, playing the Shamrocks on even quarters until the final period when they could not keep up with the Shamrock barrage of fast shots from the field. The Shamrocks ran the score up to 40 to 33 as the game ended.

The teams were tied 10 and 10 in the first quarter and at 18 to 18 at the half. Klemme gained a 2-point lead in the 3rd quarter 27 to 25.

Jacobs swished through seven field goals and a gift shot for 15 points. All of the Shamrocks were shooting good as Carolus racked up 9, Grosshuesch and Schmidt each 6 and Baack 4.

Anderson a n d Mollencamp each caged 9 points for Ventura.

HAYFIELD CAGERS HERE THURSDAY NIGHT

Hayfield High School comes here Thursday night, Jan. 23 for a double-feature basketball game, starting at 7:30 o'clock.

Urge Farmers To Investigate Crop Insurance

Hancock county farmers should be thinking seriously about the opportunities provided by federal crop insurance this year, says Paul Henderson, county extension director. Recent indications are that if farmers show they are not interested in such insurance the program may be dropped.

Henderson says the Federal Crop Insurance Corporation was originally created in 1938 to insure farmers against all the natural risks of farming as a means of protecting incomes. Such insurance is not available elsewhere

The insurance of the corn crop still is in the experimental stage. It will finish its fnal season as a trial crop this year.

The current effort is making the insurance program work is designed to get wide enough use to put the program on a sound financial footing and to cut down the expense of administering the work.

Unfortunately, Henderson says, the insuring of farm crops still is relatively new and untried. As yet it hasn't become established as a consistent practice such as insuring against fires has over a period of 50 to 100 years.

As now set up, crop insurance provides protection of the crop investment should losses occur early enough for the land to be used for another purpose. And it guarantees a minimum income if the crop is harvested.

This means the farmer will be compensated for the loss of putting in his original crop if he has to replant. Or if the crop is destroyed or damaged too late in the season to replant, he will at least be assured of an income from the crop.

Regardless of whether or not the farmer ultimately decides to take crop insurance, he should at least investigate the protection it offers him, Henderson believes. Details of the local program are available at the County AAA office.

PLANS MADE TO OBSERVE BOY SCOUT WEEK

Chairman Curtis G. Riehm presided at the Hancock District Scouters meeting held on Wednesday evening at the Boughton Funeral Home in Britt. Members of the District committee and representatives of sponsoring institutions were Dr. Arnold Landon and W. S. Pritchard of Garner, Paul Wolford, Dr M. R. Morgan, Mr. Boughton, and Don Melaney of Britt, Harry Raber and Ed Gabel of Kanawha.

Mr. Riehm called attention to Scout Week which is to be observed February 7th to 13th. Troops everywhere will have special programs during that week, including pot luck suppers with their parents and meetings with their sponsoring institutions.

In Hancock District all Scouts will participate in a Boy Scout Rally at the Britt High School gymnasium on February 12th. They will demonstrate their Scouting ability for the benefit of their parents and friends and play games such as Scouts play in troop meetings. They are all games of skill, giving the Scout practice in first aid, compass reading and knot tying and will make a very interesting program not only for themselves but for the spectators.

CORRECTION

The Times last week stated that the Methodist Study Group voted to send $2 00 to Miss Florance Prouty for missionary work in Chile, South America. The amount should have been $20.00.

Fred Radloff, Ell Township Farmer, Died Saturday

FARMERS MUST FILE SOIL CONSERVATION REPORT

The Hancock County AAA Office wishes to call to the attention of the few farmers who have not yet filed reports of soil conservation practices carried out on their farms during 1946 that the deadline date for filing such reports is February 1st, 1947, less than ten days away. No payment will be made for any practices carried out on a farm unless a performance report is filed for the farm by that date.

The AAA Office also urges farmers who have given incomplete reports on their farms to complete them at once. Most of them incomplete reports fall in 2 classes· farmers have made their reports but have not yet filed evidence that they were advised is required in order to receive payment for a practice; or, at the time the committeeman contacted the farmers to obtain his report, the farmers indicated that some of the practices (such as plowing under green manure crops) were not completed, or that additional practices would be carried out yet before the end of the year, but no report has been made as to whether or not those practices were completed or carried out.

Prompt completion of these reports will facilitate the work of the county office in preparing the applications for payment.

ELL TOWNSHIP FARMER DIES SUDDENLY

Funeral Held Tuesday For Fred Radloff, 72

Funeral services for Fred Radloff, 72, were held at St. Paul's Lutheran church at 2 p. m. on Tuesday with Rev. G. J. Kupke officiating. Burial was made in the Concord township cemetery. Mr. Radloff died suddenly at his farm home northeast of Klemme Saturday.

Fred Radloff was born Feb. 3, 1875, in the province of Pommern, Germany. He came with his parents to America when he was 6 years old and the family home steaded in Nebraska. One year later the family moved to Clayton county.

On Oct. 20, 1897, he was married to Minnie Behrens at Volga City. In 1913 the family came to the Klemme vicinity and has resided there since.

Surviving are his wife, 8 children, Fred of Lyle, Minn.; Harold of Hanlontown; Mrs. Victor Meyer, Ventura; Mrs. Earl Quintus, Garner; Raymond of Garner; Frieda, Ruth and Lawrence at home; 3 sisters: Mrs. Charles Strien, Farmersburg; Mrs. Herman Heins, Postville, and Mrs. Bertha Ihde, Wilton, Minn.

Mr. Radloff was very active in church , community and civic affairs.

Former Goodell Man Killed At Waterloo; Held Rites Thursday

Funeral services for Robert Hughes, 60, were held Thursday at 1:30 p. m. in the Kearn funeral chapel in Waterloo with the burial at Waterloo.

Mr. Hughes of Jessup had worked at John Deere's in Waterloo for years. While at work Friday a. m. he fell from a scaffold 12 feet high onto a cement floor. His head was badly crushed and one hip broken. He was taken to the hospital but never regained consciousness, dying Tuesday morning.

He leaves his wife who lives at Jessup and 3 stepchildren, brothers Sid and Tom of Calif. and Delbert of Minneapolis. He was a brother of the late Mrs. Lew Avery, Ed Hughes and John Hughes, all former Goodell folks. Local relatives attending the funeral were Lew Avery, Mrs. Wilbur Smith and Avery Bier.

Johnsons Now At Tampa

Tampa Florida
January 15, 1947

Friend Jorgenson:

We finally arrived in the sunshine state and sure enjoying the beautiful scenery and all.

There are many fine trips to take from here. They are having summer weather here with the temperature at 80 degrees.

We are feeling fine and hope all our Klemme friends are the same. Please send the Klemme Times.

Municipal Trailer Court
Tampa Florida.

BOARD TO LET CONTRACTS ON NEW BRIDGES

Hancock county supervisors have approved the report of Engineer Charles F. Merten, recommending a letting on the construction of several permanent bridges on highways in the west half of the county.

The board ordered a letting on the construction of these bridges to be held at the courthouse in Garner Monday, February 3.

The bridges will replace temporary structures built following the flooding rains of the past 2 seasons which washed away several bridges on the Boone river.

Mr. And Mrs. Walter Blumer Celebrated Silver Wedding

ONE HUNDRED GATHERED AT METHODIST CHURCH

Dinner And Program Held Here Sunday, January 19

One hundred relatives and friends gathered at the Methodist church basement in Klemme, Sunday, January 19th to celebrate the 25th wedding anniversary of Mr and Mrs. Walter Blumer of Klemme.

Mae Neuberger, daughter of Mr. and Mrs. John Neuberger of Klemme, and Walter Blumer were married at the Methodist Church Parsonage in Garner by the Rev. Wm. Gauger on January 16, 1922. They were attended by the groom's brother-in-law and sister, Mr and Mrs. John Lemke who were present for the occasion Sunday

A short program was enjoyed by all in the afternoon. Mrs. Leonard Kaduce played "Down By The Old Mill Stream" while the bridal party and family were seated at the bridal table which was centered with a large wedding cake topped with a large silver twenty-five, a bouquet of flowers on each end of the table, a gift from the bride's parents, and lighted candles on either end.

The group all sang a hymn followed by a prayer by Emil Blumer.

Mary Ann Blumer read a poem she had written for her parents on their anniversary. Ivan Blumer read the life history of Mr. and Mrs. Blumer. Emil Blumer gave a talk on the humorous side of their lives. The group all joined in by singing "Let Me Call You Sweetheart" and closed with the hymn "Blest Be The Tie That Binds."

A lunch of wedding cake and brick ice cream with a pink 25 on top was served cafeteria style after the program by Mrs. Ed. Becker, Mrs. Carl Wille, and Mrs. Harlow Helps with Miss Dixie Johnson of Ames and Miss Dorothy Ellingson of Klemme as waitresses. Miss Ruth Neuberger cut the wedding cake. Raymond Wille had charge of the guest book.

Mr. and Mrs. Blumer were presented a chest of silverware and purse of money by their son Leo as a remembrance from all those present.

Mr and Mrs. Blumer have spent their entire life on a farm ir Klemme and vicinity and now live 4½ miles southeast of Klemme They are parents of six children: Margie, Mrs Raymond Wille, Garner; Leo, an electrical engineer student at Ames, Ivan, a senior in Klemme High School; Mary Ann, Glenn and Marlene who attend school at Avery No 2.

BEN MULLIN HOME SCENE OF MARRIAGE CEREMONY

Mayme Walker Bride Of Orrie Mullin, Hardy Farmer

The country home of Mr. and Mrs. Ben Mullin, southwest of Klemme, was the setting for a quiet wedding ceremony on Wednesday afternoon, January 20th, 1947 when Mayme Walker of Livermore, Iowa, became the bride of Mr. Orrie Mullin, of Hardy, Iowa. The ceremony, which was performed by the Rev Calvin Grosshuesch, pastor of the Klemme Evangelical and Reformed Church, was witnessed by Mr and Mrs. Ben Mullin, the former being a brother of the groom

Mrs. Ben Mullin had prepared a delicious dinner which was served soon after the ceremony. Besides the wedding party the other guests at the dinner were Rev. and Mrs. Grosshuesch.

Mr. and Mrs. Orrie Mullin are now at home on their farm near Hardy, Iowa.

Christmas Seals

Mrs. Bredbenner informs The Times that there are still a few persons who have not returned their Christmas Seal letters and contributions. She asked that you please return the letters at once.

Fred J. Arnold New President Of Klemme Civic Club

Carrier Pigeon Lands At Albert Priebe Farm

A banded pigeon landed in Albert Priebe's cattle yard Monday evening, evidently to seek shelter from the storm. The bird seemed near exhaustion and was taken into the house to recuperate. The Priebes found a band on the pigeon's leg with the numerals 1-1. Mr Priebe expected to turn the bird loose as soon as it seemed able and the weather had cleared.

The bird probably belonged to some society making a test on it's homing instincts.

Adeline Medaus Celebrated Her Tenth Birthday

Adeline, daughter of Mr. and Mrs. Edward Medaus, was ten years old Wednesday, January 13th, and in honor of the event her mother invited 20 of Adeline's little friends to a party after school.

The children enjoyed playing games after which Mrs. Medaus served a delicious lunch. Adeline received many nice gifts from her little friends.

COUNTY SCHOOL MASTERS AND WIVES ENJOYED PARTY

The School Masters of Hancock County and their wives enjoyed a dinner followed by a party at the Hull Cafe at Garner Thursday evening.

After the dinner and business meeting the group played Court Whist. The Goodell superintendent and Mrs. Smith of Garner won high scores, and Supt. and Mrs. A. L. Kingery of Klemme won low score for the evening.

PLANS FOR COMING YEAR WERE DISCUSSED AT MEETING

Dr. A. H. Dulmes, Vice President And Asa Arnold, Sec. Elected

The Klemme Civic Club met at the Community Hall last Thursday evening to re-organize and elect officers for the coming year.

President of the past year, Lloyd Sherwood presided and plans were discussed for the coming year. It was decided to continue club activities and with this in view the club was reorganized and will be directed by Fred J. Arnold who was elected president. Dr. A. H. Dulmes was named Vice President and Asa R. Arnold was re-elected Secretary and Treasurer.

Membership Dues Discussed

Membership dues and business place assessments were discussed and a committee named by President Arnold to call upon the business places within a short time to collect assessments and receive membership dues

No definite program for the coming year was worked out at the meeting, but will be handled by the committee selected by the president to carry on the work of the club.

Three or four large group meetings with a dinner and entertainment will again be put on during the year for all of the members.

GIRL SCOUT NEWS

The Girl Scouts met at the home of Mrs. Sumner Trumbell Thursday evening for a waffle supper.

Each girl told of something worthwhile she had done during the past week. The Scout laws were recited and discussed.

Birthday songs were sung for Charlotte Nuehring, Iris Schaefer and Neva Ann Anderson who had birthdays the past week.

A Review of 1946

Looking back over 1946, it was a year you wouldn't believe if you had seen it in the movies. President Truman went down in a submarine, the general public went up in a free balloon and John L. Lewis at last got into a battle in which he didn't get at least a tie. It was a great year for Ingrid Bergman, the St. Louis Cards, the Republican party and Assault.

—•—

United Nations started the year in the Bronx with a cafeteria lunch and finished on Manhattan Island with $8,500,000 in choice real estate, thus nosing out Leo Durocher, "The Egg and I," and the Elliott Roosevelts for profitable seasons. Navy almost beat Army, Henry Wallace picked one of the easiest of those sixty million jobs, Abie's Irish Rose at last got into pictures.

—•—

Joe Louis, Stymie and Yale had good years in the world of sports and the international high jump was won by Bernard Baruch, who went from a park bench to the rarefied atmosphere of the atomic bomb from a sitting start. . . . Frankie Sinatra gave his bobby soxers back to the Indians.

—•—

Ted Williams, Billy Conn, Chester Bowles, Harold Ickes, Bilbo and the Boston Red Sox had a bad 12th-month. The Normandie, OPA, the New Deal and Joe Stalin's recollection of what he promised at Yalta were junked. The radio quiz industry gave away all but $11.35 worth of all the $25,890,167,879,456.25 merchandise produced in America since V Day. The horse meat from the country made good in the hamburgers of the city. General Electric announced a not too satisfactory year, but found a way to produce snow artificially and promised a liberal allowance on old snowflakes.

—•—

Mrs. Eleanor Roosevelt went so far left of center that she fell asleep and collided with another automobile on the Sawmill river highway. A stone to mark the spot where she once slept was duly erected. This seemed quite a reflection on the Roosevelts up to the time two passenger airplanes bound in the same direction collided over Maryland.

—•—

There were strikes all over America, with the newsreel cameramen getting some of their best all-time battle shots. An unknown bettor tore up a $2,100 daily double ticket at Garden State. The oldest living Elk died in 37 states. Russel Crouse of the theatrical firm of Lindsey and Crouse was injured badly when a day's receipts fell on him. Ex-Mayor LaGuardia of New York was extricated from UNRRA before starting another global war. The Democrats lost an election in large numbers. Thirty-five million and six hundred and seventy-eight thousand Americans bought an egg, presented a dollar bill, got two cents in change and asked "I wonder if there is any danger of inflation?"

—•—

The year closed on a touching note. Fiorello LaGuardia opened a Sunday program with a tender testimonial to the Christmas spirit of goodwill to all men and exclaimed, "Oh, how wonderful it would be if we could adhere to the love-thy-neighbor precept all the year around." He then attacked newspapers, real estate owners, congress, the state legislature, a firm of architects and divers others as "thieves," "crooks," "big bums," "corrupt cowards," "hooligans," "mutts," "tin horns," "punks" and all around polecats.

...of anything like community ...had ruined it from the start.

"...the right of all babies."

THE BABY'S RIGHTS

"Just the form of a marriage; just the pretense of a welcome and a home are the right of all babies." That is Miss Norris' contention in today's article as she answers the old but ever-present problem concerning the prince and the beggar-maid.

"Sometimes," Miss Norris continues, "these forms fill out with real life and love; sometimes the baby becomes miraculously the little beating heart of a real home."

That is sage advice, for the questions arising from the actions of reckless youth must be answered in the terms of the far future, not only as they affect the boy and girl involved but also the still unborn baby.

The prince in this case returned from war, finished his college career and prepared to step into his wealthy father's lucrative business. But he met the beggar-maid, who really had never begged for anything except the evils of reckless girlhood. Their association ended with a rude awakening, but, on Miss Norris' advice, they were married a year ago.

Now their baby is dead, the girl wants her freedom, wants to marry someone else.

Beverly was lonely, bored, perverse. She hated the strange place, she missed the constant excitement, the gossip and planning of her old life. Lew was equally wretched, and the small baby lived only a few days

Now Beverly wants her freedom, wants to go home, wants to marry someone else. Lew cannot remarry without sacrificing his faith and again breaking his mother's heart For although Martha wants temporal happiness for her only son, she wants spiritual safety more. Money can't buy her out of this difficulty; time isn't supposedly a factor, for Beverly is not yet 23, and may live for 50 more healthy years. Martha writes me again, in despair a second time.

Must Think of Future.

She blames me for my advice. She says that if Lew had consented only to a justice-of-the-peace wedding and adoption of the baby by strangers he would not now be hobbled by a tie that will forever prevent his marriage with a girl of his own faith. She says that but for my decision there never would have been a marriage between Lew and Beverly at all, and Beverly might have made any arrangements she liked for the baby. Anyway, she finished angrily, the baby died, so all that fuss about his rights was nonsense.

Well, I wonder? One has to work on deep basic principles in these questions. One has to think of the far future. Perhaps it isn't too good for a boy like Lew to feel that the claim of his first-born can be brushed aside to make way for the beautiful church wedding with bridesmaids and music that his mother plans for him. Perhaps the sobering reality of motherhood might be the first step toward making a woman of Beverly. And certainly—and no perhaps about it—the difference to a little boy or girl is life-long in its effects.

Just the form of a marriage; just the pretense of a welcome and a home are the right of all babies. Sometimes, too, these forms fill out with real life and love; sometimes the baby becomes miraculously the little beating heart of a real home.

GOOD KIDS AID VETS

Lack of a juvenile delinquency problem in Houghton, Mich., is credited with solving the housing problem for six veterans.

In their quest for homes, former servicemen noticed that the juvenile courthouse was empty. Inquiry disclosed that it hadn't been used for three years.

A petition to the county board of supervisors brought them the right to use the building for temporary homes. After some repairs, the veterans and their families moved in.

Colorful Kid

By Howard Beckler

WNU Features.

It is a well known fact that Marty Burns is the smartest bozo in the leather pushing racket, insofar as the managing end of the game is concerned.

That's how he happened to get his hooks onto the Walla Walla K.d, and came to make the one and only mistake of his career

This knuckle duster came bristling into the office one winter day with a crash and a bang. He tossed six newspaper hounds off the much-scarred mahogany of Marty's desk, and then spoke his piece to the great man himself.

"I can lick anybody in the joint," he told Marty "Including you, Burns. But I ain't gonna" Marty Burns opened his mouth and closed it again He was mildly shocked

"You're going to be all right Kid," Marty told him "And about your brains, I'll take care of that I've got a set of signals worked out for your next fight. It'll be just as though I'm right in the ring with you. I run my hand through my hair, you cross your right. I pull my left ear, and you hold him off with your left jab. I tweak my nose and you hook him to death with the left."

In his fight with Big Boy Riley, the Kid dropped Riley for the count with a steaming right cross, while Marty is tweaking heck out of his

"I've been holding out on you, boss. Yeah. I've two faults instead of one."

nose, calling for a left hook. That kind of got under Marty's skin. "What's this mean, Kid?" Marty tweaked his nose for a demonstration.

The Kid looked at him. "Your nose itch, boss," he said No, the Kid wasn't exactly an Einstein

After that Marty tried every known method of signaling his fighter, but the Kid kept on winning and doing the opposite to what the signal called for

Before long, they signed with Tiger Jones, who was right next to the champ The Kid was a magnet at the gate

Marty Burns wore himself to a shadow worrying about the Jones fight. He didn't sleep nights, trying to figure a way to get his brain into the ring with the Kid. He walked the streets. He smoked fifteen cigars a night. The Kid could never take Tiger Jones without his. Marty's, help. He was positive of that. Then two days before the fight, the Kid gave him the answer.

He was reading his press notices in the Morning Gazette "Hey, boss, listen to this THE WALLA WALLA KID IS PERHAPS THE MOST COLORFUL SCRAPPER TO HIT THE COUNTRY IN A DECADE."

"Colorful," Marty mused. "Colorful That's it! Colorful, colors!" He slammed the Kid on the back "You like colors, don't you, Kid?"

"It's jake with me, boss."

"All right. This is simple, Kid So simple, I think even you can understand it. Now, listen close," Marty talked slowly to make sure it would penetrate the mystic thickness of the Kid's flaming skull. "I take three cards, of three different colors. I hold up the red card and you cross your right. Green card and you jab with the left, and blue card you hook the left."

They were hanging from the rafters at the Armory the night of the fight. Tiger Jones didn't waste any time loosening up the Kid's lower lip with a wicked wallop.

The Tiger was rushing. Marty flashed the blue card. A steaming left hook would slow the Tiger to a walk. But the Kid was backing away jabbing with his left. The Tiger crashed through and dumped him in the corner for an eight count. That's just about the whole story. Four rounds later, the referee stepped in and pushed a badly beaten Walla Walla Kid to his corner.

Reporters circled Marty and the Kid after he had showered and dressed. "What beat him, Marty?" They shot the question at the little manager.

"His one and only fault beat him," Marty tapped the red head of the Kid. "Nothing between the ears."

The Kid managed a grin through shattered lips. "I've been holding out on you, boss."

"Yeah?"

"Yeah. I forgot to tell you that I'm color blind."

"GAY GADGETS"

Associated Newspapers—WNU Features

By NANCY PEPPER

OFF THE RECORD

It's the fair-haired boy who turns the platters at the local radio station who turns the heads of teen-agers these days. Practically every town has at least one; big cities have many. Their sole claim to fame is that they can play the phonograph; yet they receive fan mail of Van Johnson proportions from the bobby socks brigade. It's a situation that needs looking into more thoroughly.

Call Him Names—This character who plays records over the local radio station is called a "disc jockey" a "pancake turner" or a "record Romeo," depending upon your mood Of course, you also call him "swonderful"

What Does He Do?—Actually he plays records on the studio phonograph and announces them Specifically, he sometimes sings along with the band and he gives out with gay quips and banter, otherwise known as "corn", he reads out the names of the teen-agers who requested certain records and he handles the commercials that come rol'ing in because you like him so much On certain nights he invites a studio audience to watch him perform, and they call out the police to handle the crowds!

• • •

Fads and Undergrads

We haven't had too much time to check up on your new fads, but so far the big trend seems to be those tuck-in sweaters and belted skirts we've been writing about so much. And here are some of the new ideas that are slated to make the grade.

Cardigan Comeback — Last year you only wanted to wear Sloppy Joe's This year you go for cardigans, worn open down the front over a trimly tucked in blouse, a skirt and a wide belt. Also, you've taken to those new cardigans in jacquard patterns.

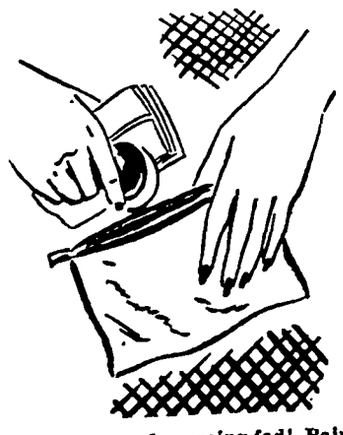
Fresh as Paint—You're decorating your dickey collars with textile paints, or you're buying dickies that come with jitterbug figures already printed on them. When you do the job yourself, you prefer pretty flowers with a sequin or two for sparkle.

Woolen Contrasts

Chartreuse and dark green wools are combined by designer Mary Kay Dodson for this suit worn by Virginia Welles, star of "Ladies Man." A chartreuse gilet is worn under the coat.

Minute Make-Ups

By GABRIELLE



It's a new and amusing fad! Paint your fingernails with glistening pale pink polish and tip them with a glowing crimson. Wear lots of bracelets and one dramatic ring. But be sure that your hands are soft and smooth before attempting such drama!

JESUS CROSSES RACIAL BOUNDARIES

LESSON TEXT—John 4.4-10, 27-30, 39-42.

MEMORY SELECTION — Whosoever drinketh of the water that I shall give him shall never thirst.—John 4:14.

Racial and social prejudice divide mankind, although they are really one family by the creation of God. Speaking a thousand or more tongues and countless dialects; living in separated areas; suffering under or priding themselves in (as the case may be) a certain social order, and disagreeing even about the things of God, they manage to build up formidable barriers between their various groups.

The Word of God by both precept and practical example teaches just the opposite.

I. Barriers Broken (vv. 4-9).

Contrast the woman of Samaria with Nicodemus, whose coming to Christ we studied last week. He was rich; she was poor. He was a Jew; she was of the mixed race of Samaritans. He was a man of character and high position; she was immoral and uneducated. He sought Jesus; Jesus sought her.

In doing so, he cut straight across the barriers of race, tradition, social position, education, everything. He was interested in her soul's salvation and nothing could stand in his way. We would do well to follow his example

Every Christian is by his very calling a soul-winner. We dare not delegate this responsibility to the pastor or missionary. As soul-winners we are vitally interested in our Lord's approach to this woman who was far from God, apparently hopelessly involved in sinful associations, a citizen of a hostile nation and an adherent of another religious faith.

By asking a favor of her, Christ tactfully placed himself (as does any petitioner), for the moment, on her own plane. He was not a distant, learned religious leader deigning to cast a bit of religious philosophy to her. He was a tired, thirsty man asking for a drink of water.

But he was more! He was the gracious Son of God, declaring to her that he was ready to give to her the water of life.

II. Problems Solved (vv. 9, 10, 27-30).

The first problem this poor woman had to face was her sin problem. Is not that true of all of us?

She first tried to avoid it by raising the race problem, and the reply of Jesus told her of the water of life Her quick desire to escape the drudgery of carrying water, gave him opportunity to face her with her sin She could never find peace and joy until there was a frank and open facing of sin in her life.

Let us make no mistake at this point, for the moral law of God is the same now as it was on that far-off day when Jesus brought the woman of Samaria face to face with her own sin.

Possibly in an effort to evade her moral problem by theological discussion (a common practice in our day, too!), and partly because of her ignorance of true worship, she asked a question about a controversial matter relating to outward ceremony. Is it not a singular thing how men who know nothing of spiritual life delight in the propagation and defense of organizations and in the conduct of outward religious exercises?

True worship is revealed (v. 23) as being first "in spirit." We do not cast aside all external helps to worship, but real worship goes through and beyond both place and symbol to real soul communion with God, second, "in truth."

The disciples were wise enough not to interfere with what Jesus was doing (personal workers take note!), and it was not long before the woman saw Jesus as the Christ! Observe how quickly she went to tell others.

III. Salvation Declared (vv. 39-42).

Jesus honors this poor fallen woman by making to her his first declaration of himself as the Messiah (vv. 26, 27). He is the high and exalted One, but he is at the same time the friend of sinners. To Nicodemus, the learned ruler of the Jews, he spoke of the new birth. To the poor woman of Samaria he declared his Messiahship. He is no respecter of persons, and neither are those who truly follow him.

Those whom the woman brought to Jesus saw and heard for themselves, and many of them believed. Personal testimony is a wonderful thing, but the ultimate purpose of such witness is to get men to come by faith into the presence of the Lord Jesus himself.

A personal experience with Christ leads to real assurance; without which there can be no spiritual growth or usefulness.

May many who read these words, and who have so often heard and read about Jesus, come to him today so that they may say: "Now we believe . . . for we have heard him ourselves, and know that this is indeed the Christ, the Saviour of the world" (v. 42).

Beauty and Health By Simple Exercise

GOOD FIGURE HINTS

MIDDLE age often begins at the waistline. You can beat Father Time at his own game, however, by exercising those fatty pads off waist and hips. The toning-up will improve your entire figure.

* * *

Whatever your figure problem—waist, hips, posture, bust, legs, chin—our Weekly Newspaper Service Booklet has result-getting exercises to help you. Send 25c (coin) for Beauty and Health Through Simple Exercises to Weekly Newspaper Service, 243 W. 17th St., New York 11, N. Y. Print name, address, booklet title.

JUST RESTING

The Situation

Husband—I'm busy. Be short!
Wife—I will. I am!

A Requisite

"Does the law give a man the right to open his wife's letters?"

"Yes, but not the nerve."

Give a woman an inch and she becomes a ruler.

Non-Stop

Helen—You like his attentions—why don't you marry him?

Betty—Just because I like his attentions.

Jewish Clock

Probably the only Jewish clock in existence today is on the facade of the Jewish Town Hall in Prague, Czechoslovakia. Its Hebrew numerals are set from left to right and its hands also move counterclockwise.

HARSH LAXATIVES UNNECESSARY?

Millions Find Healthful *Fresh Fruit Drink* Gives Them All the Laxative Aid They Need

Don't form the habit of depending on harsh, griping laxatives until you've tried this easy, healthful way millions now use to keep regular.

It's fresh lemon juice and water taken *first thing* in the morning—just as soon as you get up, the juice of one Sunkist Lemon in a glass of water. Taken thus, on an empty stomach, it stimulates *normal* bowel action, day after day, for most people.

And lemons are actively *good* for you. They're among the richest sources of vitamin C, which combats fatigue, helps resist colds and infections. They supply vitamins B_1 and P, aid digestion and help alkalinize the system.

Try this grand wake-up drink 10 mornings. See if it doesn't help you! Use California Sunkist Lemons.

How To Relieve Bronchitis

Creomulsion relieves promptly because it goes right to the seat of the trouble to help loosen and expel germ laden phlegm, and aid nature to soothe and heal raw, tender, inflamed bronchial mucous membranes. Tell your druggist to sell you a bottle of Creomulsion with the understanding you must like the way it quickly allays the cough or you are to have your money back.

CREOMULSION
for Coughs, Chest Colds, Bronchitis

From where I sit ... *by* Joe Marsh

Willie Goes to School at 23

Everybody's joshing Willie Wells about going back to school. They remember when Willie would hide out in the woodshed—scared to bring his report card home to Pa.

But under the G.I. Bill of Rights, Willie (who has a wife and baby) is getting a free education at the Agricultural College. And Uncle Sam is giving him a fine report: "Deportment, excellent; Progress, above average."

That goes for all those undergraduate veterans. Like Willie, they appreciate an education more than ever now. They're industrious and well-behaved—their favorite beverage is milk, or a temperate glass of beer. For them the "three R's" seem to mean: Responsibility, Resourcefulness, Restraint.

From where I sit, cynical folks who thought veterans wouldn't want to return to school—wouldn't stick to steady habits of work and moderation—have their answer in "undergraduates" like Willie.

Joe Marsh

KLEMME SCHOOL NEWS

Kindergarten News

—Miss Seim, Teacher

Mardell and Marlin's motner, Mrs. Stadtlander visited our room on Wednesday afternoon. Paige Patterson, Mrs. Lloyd Lau, Cozette's mother, and Miss Hollatz visited us on Friday

Edna Heginger, Virginia Kudge, Mardell and Marlin Stadtlander and Richard Swalve have neither been absent or tardy this 6 weeks.

First And Second Grade News

—Miss Halfwassen, Teacher

The pupils that have neither been absent or tardy for the past six week are:

Second Grade
Gary Baack
Berleen Bridges
Beverly Christiance
Jimmy Karsjens
Janice Stokesbary
Sharleen Swanson
Eva Thieman
Barbara Thompson
Ronald Trampel

Those receiving a 100 in Spelling in Second Grade for the six weeks are:
Sharleen Swanson
Ronald Trampel
Beverly Christiance
Berleen Bridges
Janice Stokesbary
Gary Baack
Eva Thieman

Friday was Marcella Nuehring's birthday and she treated us with candy bars.

The first and second grade pupils have a play store in their room Many empty boxes were brought by the pupils. This project is carried out in their Arithmetic.

Third And Fourth Grade

—Miss Heinrich, Teacher

Those receiving perfect Spelling lessons in Third Graed are
Robert Arnold
Warren Terhufen

Those receiving perfect Spelling lessons in Fourth Grade are:
Graydon Barz
Cecil Jacobs
Faye Janssen

Fifth And Sixth Grade News

—Mrs H G Voetberg, Teacher

Last week we had two brithdays in our room, Lu Verne Heginger and John Bisom Lu Verne treated with oranges and John cup cakes.

Those in the fifth grade having a perfect attendance for this six weeks are:
Delwyn Brede
Ronald Karsjens
Thomas Waddingham
Lois Ann Jacobs

Those in the sixth grade having a perfect attendance for this six weeks are:
Galen Gruis
Reverdy Mace
Larry Stille
Billy Waddingham
Neva Ann Anderson
Sharon Bridges
Eunice Helps
Elaine Neuberger

Our Sophomore Class

—Reported by Donna Fjetland

One semester of studying is being completed this week All classes are taking semester tests and everyone is worrying about whether they are going to pass or not.

The sophomores have covered quite a lot of material in their different subjects this semester.

In Geometry we started with angles and triangles and are now in deep study of the circle.

English has been varied. The first thing we studied was good manners. Now we are studying all about library.

In Biology we have studied about everything from worms to human beings. It has been rather interesting.

World History is becoming much more interesting to understand now because we are beginning to understand it. We are still in Ancient Times. however.

Short Stories and essays have composed our Literature for the last semester.

We have had two school parties. We hope to have as many more in the next semester.

Everyone is very glad that one semester is over already and hope the next one passes as quickly as this last one has.

LISTING AIRPLANES

For the first time, assessors in Iowa have been instructed to list all airplanes in their districts.

MET WOLF

As he walked over the crest of a hill while out hunting rabbits, Robert Slager of Williamsburg met a wolf coming toward him It was a toss-up which was the most surprised but Slager fired eight rounds from his 22 into the wolf, brought the carcass home with him.

PONY HELPS

No snow shoveling for Glen Kirkendall and Dale Copeland, Independence boys. When a heavy snowstorm hit last week, they hitched up Colleen, Glen's pony, to an improvised snow plow One boy led the pony, the other one swept off the remaining snow from the walks.

DOWN EMBANKMENT

Children riding in the Potsville school bus got an extra lesson for their day's education one day last week; the lesson being in traffic safety. In meeting a gravel truck, the bus driver turned out too far and went over an embankment. No one was hurt.

Higher Costs Make Increase In Telephone Rates Necessary

Increased telephone rates for Klemme have become necessary in order to provide satisfactory telephone service.

We want our customers to know this increase is necessary.

Our Costs Greatly Increased

The cost of almost everything entering into the furnishing of telephone service has increased.

Since 1939 our payroll has gone up 150 per cent due to higher wages and an increase in the number of people employed. Payrolls amount to over two-thirds of the cost of providing telephone service.

Other things we buy greatly increased in price — telephone poles are up 85%, copper wire 41 per cent, switchboards 35 per cent.

Expenses Have Gone Up Faster Than Income

This company is handling the greatest amount of business in its history and the amount of money we are taking in is greater than ever before.

However, telephone expenses have gone up much faster and are now 80 per cent greater than in 1939, in spite of all our efforts to hold down the cost.

Earnings At Low Point

The earnings of this company have been inadequate for many years. Even with the tremendous amount of business during the war the company's earnings were very low . . . lower than any previous period. Since the war our earnings have declined still further and are now at a critically low level, in spite of the fact that our volume of business is breaking all records. This company has not paid a dividend on common stock since 1939.

Good Service Depends On Adequate Rates

We are doing everything possibe to meet completely the service needs of all our customers. We have been handicapped by shortages of equipment and materials.

To provide good telephone service and to continue to increase its usefulness we have spent $1,100,000 in Iowa since 1939 for service improvements and additional facilities and will need to spend over $1,000,000 more in the next few years.

Adequate earnings are necessary in order to attract at reasonable terms and on a sound basis the money required to carry out this program.

The new rates are the minimum which will enable us to meet the higher costs of providing service and fully serve the public's telephone needs.

Following are the rates for the most commonly used classes of service which along with changes in rates for some other services will become effective with bills dated on and after February 16, 1947 in Klemme.

(These rates do not include federal or state tax)

Business 1-Party Wall	$2.75	Residence 1-Party Wall	2.15
Residence 2-Party Wall	$1.65	Rural Grounded Wall	1.75
Rural Metallic Wall	$2.25		

We regret that it is necessary to increase rates but in the interest of good service we have no other course. If you wish any additional information or have any questions we shall be pleased to have you call our business office.

The administrator reserves the right to reject any and all bids.

Dated at Klemme, Iowa, this 27th day of December A D., 1946.

JOHN A CHAMBERS,
Administrator of the Estate of Frank Gee, Deceased
(Publish Jan. 22-29 1947.)

ATTEMPTS TO RECOUP

Joseph Gemar, a transient, was in Storm Lake on Christmas. says he lost $20 in slot machines. He attempted to recoup by prowling in three business establishments. A watchman recognized him and Gemar was arrested In addition to losing $20. he spent Christmas day in durance vile and also paid $100 fine. One moral might be, you can't beat slot machines.

FARM LABOR SITUATION TO BE BETTER IN 1947

Iowa farmers can look forward to an improved farm labor situation, believes John Fitzsimmons, head of farm labor at Iowa State College.

Starting with the war Fitzsimmons says the demand for farm labor soared until the peak of 1945. In 1946, though good help was still scarce, demand dropped off by 40 percent.

The biggest problem for 1947 probably will be concerned with specialty help for such jobs as corn detasseling, canning and nursery work.

The big demand by farmers will be for year-around help, Fitzsimmons says. Many farmers worked on through the war when they normally would have retired earlier. And all farmers put in long hard hours during the war years.

Because they are looking for the kind of workers who will stay with them over a long period, they are becoming more particular about the kind of help they'll take. But by the same token, that makes the job better and more secure for the worker once he is placed, Fitzsimmons says.

In general, the labor specialist believes there will be enough labor available for another year of high farm production. The biggest fly in the ointment is the lack of housing on farms to take care of year-around labor's needs. Where housing can be provided, labor probably can be found Workers from neighboring states are becoming more interested in the year-around Iowa farm job, Fitzsimmons says.

Worry—the interest paid by those who borrow trouble.

141,000,000 piggy banks

That's a lot of piggy banks . . . one for every man, woman and child in the country.

They hold a lot of pennies . . . more pennies because of America's private power industry which provides electricity at continuingly lower rates.

While the cost of everything else has been going up your electric rates have been going down.

We have followed our policy and our promise to you of continuingly lower rates, even during these recent years of inflation and higher taxes.

WEEKLY NEWS ANALYSIS

GOP Takes Over 80th Congress; President Cuts Wartime Powers; Industrial Pay Reaches Peak

Released by Western Newspaper Union.

(EDITOR'S NOTE: When opinions are expressed in these columns, they are those of Western Newspaper Union's news analysis and not necessarily of this newspaper.)

Opening of 80th congress saw Republican majority in limelight. At top, Senators Vandenberg (Mich.), Wherry (Neb.) and White (Me.) In middle, Senators Robertson (Wyo.), Bricker (Ohio) and Taft (Ohio). Bottom, Senators Cain (Wash.), Thye (Minn.) and McCarthy (Wis.)

CONGRESS:
Ready to Go

Taxes and labor legislation were scheduled for early consideration as the 80th congress convened under Republican leadership.

Veteran GOP luminaries held the reins as the session got underway. While seniority was acknowledged in the naming of the party's congressional command, the men named have proven their mettle in legislative wars and qualify for the positions.

One of the outstanding figures in the bi-partisan foreign policy developed by Secretary of State Byrnes, Arthur Vandenberg (Mich.) was the choice for president pro tem of the senate. Quiet, able Wallace White (Me.) took over the majority leadership of the senate while aggressive, conservative Kenneth Wherry (Neb.) was in line as the party whip in the upper chamber.

Joe Martin (Mass.) was the unanimous choice for speaker of the house but a battle developed for the majority leadership between the Taft and Dewey forces. Although charged with being a Dewey man, Charles A. Halleck (Ind.) vowed impartiality and obtained the position after a brief struggle. It is within the power of a majority leader to advance or push certain legislation, hence the importance of the post to factions seeking to build up their prestige.

LIVESTOCK:
Halt Mexican Imports

Veterinarians were scheduled to check every Mexican animal imported into the U. S. since reopening of the border October 17 for the dreaded hoof and mouth disease following reports that the malady had broken out in three Mexican states.

At the same time, Republican congressmen revealed their intention to probe President Truman's reopening of the border last fall in the effort to provide additional livestock to relieve the acute meat famine then prevailing. It was charged that Mexico never has eradicated the disease because of lax supervision of imports from other South American countries afflicted with the sickness.

Of seven outbreaks of the hoof and mouth disease in the U. S. since 1870, the last two occurred in 1924. Highly communicable, hoof and mouth disease blisters the feet and mouth of cattle, affecting their ability to move freely and eat normally.

WHITE HOUSE:
Steals Thunder

Beating congress to the punch, President Truman officially proclaimed the end of hostilities to terminate government powers under 20 laws and mark 33 others for expiration within six months to five years. Loosely, the period of hostilities is supposed to cover actual fighting.

Mr. Truman did not call for an immediate cessation of the states of emergency proclaimed in 1939 and 1941 nor of the state of war, revealing that he would recommend action on these measures to congress. A state of emergency is designed to cover any situation deemed critical to the country while a state of war is considered to prevail until the signing of peace treaties.

In terminating hostilities, the President:

—Reduced wartime taxes on liquor, beer, wines, fur, luggage, jewelry, telephone and telegraph service, transportation, electric bulbs and billiard and pool tables to prewar levels.

—Ended government power to seize privately owned mines and plants.

—Scheduled the end of price supports for farm products for 1948.

LABOR:
Pay Up

Losses of 107,475,000 man days of work during the first 11 months of 1946 due to strikes partly were offset by increased wages and shorter hours over the comparable 1945 period, the department of labor reported.

Time lost in walkouts set an all-time peak, even topping the embattled postwar year of 1919, the department said. As against the 107,475,000 man days lost this year, 30,307,000 were lost in 1945; 8,336,000 in 1944, and 16,089,000 for the 1935-'39 prewar period.

Industrial pay hit new tops following the year's bitter labor disputes. Average weekly earnings in the bituminous coal industry rose to $62.54 on an increased work week, but other pay jumped appreciably despite shorter time. Figures for different industries follow:

	Average weekly earnings	% change	Average weekly hrs.	% change
All	$45.68	+11.5	40.4	— 2.8
Iron, steel, and products	49.85	+ 7.6	40.3	— 6.0
Blast furnaces, steel works, rolling mills	50.43	+ 8.2	38.6	— 9.2
Electric machy.	48.50	+14.3	40.9	— .8
Autos	52.80	+11.9	38.3	— .2
Meat packing	43.06	— 3.9	37.5	—19.4
Oil refining	57.39	+ 8.0	40.0	— 5.1
Tires, tubes	57.19	+15.1	38.1	— 5.1
Mining— Anthracite	61.82	+ 9.9	39.2	— 4.6
Metal (iron, copper, lead)	49.58	+ 6.8	41.0	— 7.6
Telephone	44.30	+ 6.3	39.1	— 7.5

FOREIGN AFFAIRS:
Border Problem

As first intimated in Secretary of State Byrnes' historic Stuttgart address September 6, the U. S. will press for revision of Germany's eastern border when the Big Three meet in Moscow March 10 to discuss a peace treaty for the Reich.

Backed by Britain, the U. S. will seek restoration of Pomeranian and Brandenberg farmlands given to Poland by Russia after the end of the war. While the U. S. intends to press for a return of this territory, it will accede to the cession of the rich industrial section of Silesia and half of East Prussia to the Poles.

The U. S. position for restoration of Pomerania and Brandenberg to Germany is based on the fact that these regions comprise 25 per cent of the Reich's best farmland and the country would suffer a serious food deficiency if the land is not returned.

News in Brief . . .

The 30th anniversary of the Monroe Auto Equipment company, largest independent producer of hydraulic shock absorbers, points up the phenomenal growth of the motor vehicle and allied industries during the last three decades. In 1939, the industries' sales topped 4 billion dollars to lead all other manufacturing enterprises. Installation of new facilities has enabled Monroe to boost shock absorber output to 25,000 daily.

POWER:
Increase Service

The year 1946 was a period of phenomenal growth in the electric utility industry in the number of customers served, with nearly 2,000,000 new customers added.

Another high record established in 1946 was the increase of 100 kilowatt hours in average residential consumption of electricity to set an all time high average of 1,330 kilowatt hours used per customer.

POTATOES:
Huge Loss

As much as 20 million bushels of government-owned potatoes may go to waste following U. S. support of the 1946 crop in the face of a sagging market.

Originally, the government held title to 100 million bushels as the result of a bumper harvest. Making good on its agreement to maintain prices at at least 90 per cent of parity, the U. S. bought substantial stocks and covered other commitments with loans, redeemable if the market rose. The huge waste is expected to follow from rotting of the potatoes in inadequate storage on the farms.

To escape total loss, the government resold millions of bushels to distillers and livestock feeders at bargain prices. Distillers of beverage and industrial alcohol bought over 26 million bushels. About 525,000 bushels were resold for export to famine areas, with the amount held down by perishability and high transport costs.

Public institutions and school lunch programs received about one million bushels of the surplus potatoes free.

U. N.:
Pursue Disarmament

The question of disarmament proceeded on its labrynthine course in the United Nations.

As a struggle shaped over formulation of an atomic control measure, the Russians asked the 11-nation security council to proceed full steam ahead on disarmament without waiting for final action on nuclear energy. Declaring that disarmament is the most important factor for strenghtening peace and security, the Reds called for an agreement within three months at the latest.

Meanwhile, the pesky question of the veto snagged deliberations on control of atomic energy. While the United Nations' atomic energy commission approved of the U. S. plan and sent it to the security council to be worked out, Russia expressed opposition to the provision that no Big Five power be permitted to apply the veto to escape punishment for violating regulations. Since the Reds can use the veto in shaping control in the council, however, prolonged discussions loomed.

HOUSE:
Assail Reds

Noting a softening in the Russian attitude following U. S. implementation of a "get tough" policy with the Soviets, the special house committee on postwar economic planning headed by Representative Colmer (Dem., Miss.) and dominated by Democrats, urged a further tightening of relations with Moscow until it meets its international obligations and agrees to full control of atomic energy.

Drawn after a group of committee members had toured Europe, Russia and the Middle East, the report declared that an affirmation of reports that the Soviets were using German plants for rearming would justify a renunciation of the Potsdam agreement and a demand for the Communists to vacate the eastern occupation zone. Pointing up Russian rearmament policies, the report stated that the Soviets were concentrating on development of heavy industry convertible for war in their new five year plan.

Until the Russians agreed to play ball with the Allies, the committee recommended that the U. S. withhold appreciable financial assistance from the Soviets, curb the extension of technical assistance and industrial exports, and license the sales of American firms to the Reds.

COLLEGE:
Peak Enrollment

Taking full advantage of the G.I. bill of rights, vets constitute a large percentage of undergraduates attending educational institutions, a survey of 688 universities and colleges disclosed.

Compiled by Dr. Raymond Walters, president of the University of Cincinnati, the study showed that of 1,718,862 students at the 688 schools, 714,477 were ex G.I.s. In addition, 150,000 vets were enrolled at 650 junior colleges and thousands more at several hundred other schools, bringing the grand total of G.I.s to slightly more than half of 2,000,000 students.

With ambitious vets availing themselves of generous educational opportunities, current full-time enrollments at the 688 top universities and colleges are at peak levels, the survey showed. Roughly, they are 57 per cent above the 1939 figure and twice that of 1945. Two men are enrolled to every woman whereas the wartime ratio was three women to two men.

DEBT:
War Tells

Showing the effects of total war, the nation's indebtedness stood at 400.5 billion dollars at the end of 1945, according to a survey of the department of commerce.

While total debt doubled during the 1941-'45 period, federal debt jumped five times. In 1945 alone, federal debt rose 42 billion dollars while state, municipal and private obligations declined 7 billion.

Washington Digest

Colorful Seminoles Cling To Ancient Tribal Customs

By BAUKHAGE

News Analyst and Commentator.

WNU Service, 1616 Eye Street, N.W., Washington, D. C.

(This is the first of two articles on the effect of postwar conditions on the most misunderstood of American citizens—the Seminole Indians, with Mr. Baukhage reporting from first-hand observation.)

Somewhere North of the Everglades:—The sun is setting over flat stretches of saw-grass, making a feathered silhouette of cabbage palms on the far horizon, dropping a tint of lilac among the water hyacinth in the pond at my feet where lazy, hump shouldered Brahman cattle cool themselves. Rigid white cranes stand undisturbed by us. Above, great hawks wheel and, as we pass, a bevy of snipe rises like black and white confetti tossed in the air by a giant hand.

Baukhage

Back at the turn of the road that leads to the attractive headquarters building of the Brighton Seminole Indian reservation, smoke curls up from beneath a fire of logs in a palmetto thatched cooking "chikee" of one of the Seminole camps. Here live three generations of a single family group—yet a fairly large segment of the entire Seminole nation, for there are only 625 of them in all Florida.

Like most tourists when I first came to Florida, I was startled to meet face to face these women in their gayly colored skirts, their high, bead collars, their astounding hair dress; the men, less gayly clad but still with their gay kerchiefs and cowboy hats; the solemn children, replicas of their mothers in their bright, flowing garments—shopping at the Five and Ten!

Seminoles cluster around chikee in native costumes deep in Florida Everglades.

It is hard to believe that these gayly clad yet modest folk, so unwarlike that only three (so far as I know) enlisted in World War II and none were drafted, once defeated the United States forces in three wars stretching from the time of the Revolution until almost the end of the last century.

By then, with their Chief Osceola tricked into capture while at a peace parley, all but 150 of the Seminoles were dead or had yielded to mass deportation to the West. But the 150 never gave in. Because of that fact the tradition has grown that they are still at war with the United States.

It is true that no formal peace treaty ever was signed—they have had no chief since Osceola died in captivity—but the Seminoles have full citizenship. However, they made their first formal and voluntary move toward reconciliation and cooperation in 1938. A group of Seminole leaders, meeting with American officials in the Everglades, then asked the government for schools, hospitals and better horses and cattle.

A program immediately was drawn up and entered into with good will on both sides, but it is a question whether this step has had as much influence on the life and habits and customs of the Seminole in this short span as have the weight of economic conditions—the depression followed by the high demand for labor during prewar and war periods.

For more than three quarters of a century no Seminole has owned land, his possessions were limited to a few cattle and hogs running wild in the swamps, and to what personal property he could store under the palmetto roof of his open-faced hut in the Everglades. Today there are three reservations. William Boehmer, Indian agent at Brighton, saw that venture rise from its inception. He tells me every family on that reservation owns a car and one family boasts five.

Radios are common as are electric flashlights and kerosene lanterns, some knives and forks and other practical gadgets and a lot of store food and canned goods. However, there has been no change in housing styles. Before the original deal was closed in 1938, one of the Seminole leaders first made sure that living habits should not be interfered with. He was quoted as saying:

"Indians must live in air and sunshine. Must dress as their fathers dress."

But additional opportunity for employment has brought about a desire for an education. As nearly as I could learn, education to the Seminole means learning to speak English and perhaps to read and write it. Because the Seminoles are naturally intelligent, it is no trick for them to learn if they want to. But the labor demand likewise has interfered with the process. When the family gets a special job picking tomatoes the children go along and pick, too. There are no penalties for being absent from school.

With the shortage of teachers of every kind it is unlikely that the supply ever will quite reach the demand even on the part of the busy Seminoles. The school in the Everglades is closed at present. Undoubtedly when conditions change and the Seminole again is confronted with job competition the government will be called upon to furnish the White Man's learning in larger doses and with fewer interruptions.

In any case neither prosperity nor education has as yet caused the Seminole to complain about his housing situation. A few modern houses built on one reservation were left unoccupied, except for one porch. There is nothing wrong with a Seminole chikee. A chikee really ought to be translated "room" instead of "house," since there are as many separate chikees as required for each family. They are of two different types, one for cooking and one for sleeping and living. They consist of a thick palm-fan roof with low-hanging "eaves" supported on poles and rafters. There are no walls in the living hut but there is a platform a couple feet off the ground and usually a bunk-like bench which can be used for the women as a work table, as well as for sleeping.

These dwellings are airy all right and would be damp during a long sub-tropical rainstorm if it were not for supplementary tarpaulin.

Barbs . . .

Every time I go to Florida I wish I had studied palmistry so I could identify the trees. It's hard enough to distinguish a pepper tree from a senator even if you are familiar with the bark of both.

• • •

Being in the dog house may be an embarrassment but it's better than a park bench. And with all its fleas it isn't as overcrowded as some apartments.

Now Eat Food Of White Man

What the White Man calls progress has done more to affect the eating habits of the Seminole than our cultural activities have affected his viewpoint. Draining and lumbering in the Everglades have sharply reduced food sources—dried creeks and ponds, cutting timber and forest fires have killed off wildlife. But the accessibility of the grocery store has tended to make up with bakers' bread, beef, coffee, sugar syrup and canned fruits.

The Washington MERRY-GO-ROUND

DREW PEARSON

BIG FARMS VS. SMALL FARMS

WASHINGTON. — Inside fact behind the senate small business committee's release of the report on small-scale and large-scale farming is that the report had been suppressed for nearly two years by big California land interests.

The very fact that the bureau of agricultural economics dared make the study was one reason the last congress cut its research funds. The study so infuriated Representative Al Elliott, California Democrat and friend of the big farmers, that he has fought all appropriations for farm research ever since.

The study was begun in the summer of 1944, while Congressman Elliott was leading a fight to repeal the old law by which no one could own more than 160 acres of U. S. reclamation land. The study compared two towns in San Joaquin valley section of California's huge Central valley—one, Arvin, is composed mainly of workers on large industrialized farms; the other, Dinuba, is made up largely of people who own and work their own farms.

It was found that Dinuba, the small farm community, had two independent business establishments to every one in Arvin, the big farm community; that retail trade was 61 per cent greater in Dinuba; that 20 per cent more people were supported by the same dollar volume in agriculture in Dinuba than in Arvin; that the residents of Dinuba had a far higher standard of living—better streets, garbage disposal, schools, parks, public recreation, more churches, participation in local government, two newspapers to one.

The study was recognized by economists as of great importance, but the pressure of large farmers and landholders was too great. It lay buried until it was brought to the attention of fair-minded Sen. Jim Murray of Montana, chairman of the small business committee. He determined to publish it.

SURPLUS GRAVY

The comedy of errors that led to discovery of more than two million gallons of high octane gasoline in surplus military planes sold to a Jefferson City, Mo., scrap dealer caused an epidemic of red faces at War Assets administration.

However, WAA chief Gen. Robert Littlejohn and his aides would have been even more embarrassed had the whole story leaked out. Besides the 5,540 planes with their $700,000 worth of gas sold to the Missouri dealer, WAA also sold about 15,000 other planes, also tanked up with high octane gas. This fact, however, didn't get out. In addition, dealers who bought the planes reaped a tidy windfall from costly radio equipment, motors and gears.

OIL SALESMAN LEWIS

In the coal and oil trade, John L. Lewis is sometimes called: "The greatest oil salesman in history." Here is the reason why:

Railroad after railroad, unable to afford costly tie-ups from coal strikes, now is converting from coal to oil. There was a day when the railroads, deriving a tremendous revenue from hauling coal, sided with the coal operators and the miners in opposing oil. But not now.

The Boston and Maine, which, next to the Maine Central, pays more per ton for coal than any other railroad, is switching to diesel engines as quickly as possible. The Jersey Central, which taps the Pennsylvania anthracite fields, also is going over to diesels. And the Pennsylvania, which runs straight through the best bituminous coal fields in the East, is laying in some diesel switch engines.

But the most interesting conversions are taking place on the Union Pacific. That road has long burned oil to some extent, but it also happens to be the sixth largest coal producer in the world, with a production of 6,500,000 tons annually.

The towns of Rock Springs and Hanna, Wyo., are almost entirely dependent on coal mined for the Union Pacific. Today, however, those towns may become like the skeleton mining cities of the gold-rush days.

For, in addition to 600 oil-burning locomotives, the Union Pacific now is converting all mainline passenger trains to oil. In addition, their "Big Boy" freight locomotives, the world's heaviest, are converting, together with 115 switchers and 45 diesel units.

The Santa Fe also has just ordered new diesel units.

INSTRUMENT OF MERCY . . . A hundred and fifty thousand dimes, contributed in the 1946 March of Dimes, paid for the fully equipped mobile emergency unit, three views of which are shown above. In addition to moving emergency patients, the unit serves as a training center and auxiliary hospital facility when needed. The unit proved its worth during the severe epidemic last summer.

CEASELESS WAR

High Polio Toll Gives Impetus To March of Dimes Campaign

WNU Features.

With latest reports compiled by National Foundation for Infantile Paralysis indicating that the year 1946 witnessed the most severe epidemic of polio in the history of the foundation, concerted effort is being centered on the 1947 March of Dimes which opened throughout the nation on January 15.

The national foundation, spearhead organization in the ceaseless war against the great crippler, is directing agency for the annual March of Dimes campaign. The drive will be concluded January 30

Heavy expenditures resulting from the nationwide 1946 epidemic have dipped deeply into the foundation's funds, directors assert in urging generous support for the 1947 dedication to provide means for coping with any emergency in the future. The March of Dimes, they said, is the only method employed by the foundation to raise money to finance its many activities.

Fatalities Decline.

Figures compiled by the foundation disclose that in 1946 there were more than 24,000 cases of infantile paralysis, with fatalities running between 5 and 10 per cent. In the year 1916, before the foundation was organized, the greatest polio epidemic in history was recorded. That year 27,363 cases were reported by 45 states, fatalities running as high as 25 per cent.

The sharp decrease in fatalities is attributed in part to the persistent educational program waged since the foundation was started in 1938, which brought about better diagnosis and early hospitalization. At the same time improved therapeutic methods were credited with prevention of many cases of permanent crippling.

Hardest hit during 1946, according to foundation figures, were the Mississippi valley region, where Minnesota headed the list of heavily hit states with a total of 1,113 cases. However, Florida on the east coast and California on the west coast, also were seriously affected, and other widely scattered regions were hard hit as well.

Adhering to its policy of leaving half of all funds collected during the March of Dimes with its local county chapters, the foundation left more than eight million dollars with these chapters during January, 1946. Up to November 1, more than 360 of these chapters had entirely depleted their shares of this fund and had to call upon the foundation for help. This help reached the sum of more than four million dollars.

Emphasize Research.

Besides supplying local chapters with emergency funds the foundation used its share of March of Dimes collections in furthering a concentrated and widespread program of research into causes and possible cures of the malady, and in training doctors, physical therapists, epidemiologists and other "front line" soldiers in the war against polio. A considerable amount also was spent on public education, and during 1946 more than six million pieces of literature on the disease were distributed free. During the last fiscal year nearly two million dollars was expended for research activities

The foundation emphasizes that no victim of polio, regardless of age, race, creed or color, need go without the best available care through lack of funds.

Infantile paralysis, the statement points out, is among the most unpredictable of diseases. No one knows when or where it will strike —but until research finally finds the answers to many puzzling questions still obscured, there is one sure thing about polio—and that is that it will strike

No Group Immune.

Despite its name, it can strike and has struck persons of all age groups, although the age group five to nine appears to be most susceptible Boys seem to be slightly more susceptible than girls, and there is no evidence to show that any one race is more immune to its ravages than any other

What is important at this stage, the report says, is that a doctor be consulted as soon as the disease is suspected — and sometimes the symptoms so closely resemble those of a common cold that no chances should be taken Early diagnosis and hospitalization may prevent death or permanent crippling, the report stresses, and the early services of a competent medical man are absolutely essential.

In discussing the future, the report expresses confidence that the cause and a prevention of the dread crippler will be found. In the meantime, it is pointed out, the public has every assurance that March of Dimes funds, distributed by local chapters in their territories, have made possible the best available care and purchased the most up-to-date equipment regardless of cost, so that any foreseeable exigency can be met.

Aid Is Assured.

Behind the local chapters stands the national foundation, carrying on its program of public education and research, and ready to send aid to any county which may deplete its funds through unusual epidemic conditions.

The work will go on, the foundation promises. Funds collected during the 1947 March of Dimes will replenish exhausted treasuries so that when the 1947 polio season rolls around—sometime in the late spring and through the summer—the nation will be ready

RELIEF FROM CAMPUS GRIND

College Students Given 'Time To Think'

CEDAR RAPIDS, IOWA. — Coe college students in the future will be given "time to think"!

A day off "now and then" will be decreed so students can study, talk with their teachers or "just sit and think through" some of their academic and social problems, it was announced by Byron Hollingshead, acting president of the local college.

Faculty members will stick around the campus for informal conferences, "preferably over a cup of coffee in the grill," Hollingshead said. Library and reference rooms will remain open. The day will be announced well in advance by the faculty executive committee and the student council.

Averring that "right now modern education defeats its own purpose," the young educator declared:

"It's impossible to get an education in the modern colleges because the colleges make it impossible by rushing the student through the curriculum."

The average college, he insisted, is cursed by "entirely too much teaching and too little learning."

"It's about time we gave our students a chance to sit back and think about what they're told," he added.

Further relief from the campus grind also is assured Coe students. Administrators hope eventually to give them a week's vacation from classes when it counts the most—right before final exams.

New Device Tests Drunk Drivers

EAST LANSING, MICH. — Latest device introduced by Michigan state police in an attempt to curb highway accidents is an "intoximeter," an on-the-spot, roadside chemical test for drunk drivers.

All patrol cars in the state will be equipped with the newly-developed device by mid-March, according to Capt. Caesar J. Scavadara, head of the state police traffic division.

The device has a two-fold purpose: To eliminate miscarriages of justice resulting when persons are charged with drunk driving because they are sick, injured or have taken drugs; and to provide police with a "foolproof" method of proving intoxication.

The intoximeter, enclosed in a small cardboard cylinder, permits a police officer to make an on-the-scene test for intoxication subject to later check by a technician.

The motorist or pedestrian involved in an accident or giving signs of intoxication blows up a small rubber balloon attached to the device, the officer clocking the time required for a red fluid in a glass tube to become colorless.

Longer Life Pays Cash Dividends

CHICAGO. — Man's never-ending quest for long life is paying dividends — in cash, according to Frank G. Dickinson, economist and statistician for American Medical association.

In contrast to the heydey of the American Empire, when anyone 35 years old was considered "old," life expectancy in the United States has increased from 49 in 1900 to 65 in 1946.

The advance is credited by Dickinson to modern medicine, better food and improved housing.

In 1900, Dickinson points out, the average man of 20, earning $1,250 annually, could have valued his lifetime earnings at $27,400. In 1940 he could place a value of $29,900 on his prospective earnings.

Prospective earnings for a man of 35 increased from $25,000 to $26,200 during the same period.

Huge Plastic Buffalo Planned as Memorial

CODY, WYO. — As a memorial to Buffalo Bill, a mammoth plastic buffalo one day may be erected atop Cedar mountain here. Sculptor Lawrence Tenny Stevens says he plans to build a buffalo standing 150 or 200 feet high on the mountain in memory of the famed scout. Inside the body will be an elevator, lunch room, curio shop and perhaps a cocktail lounge, the sculptor adds.

NEWS BEHIND THE NEWS

By PAUL MALLON

Released by Western Newspaper Union

LARGE FIELD OF CANDIDATES LOOMS FOR GOP NOMINATION

WASHINGTON —Tom Dewey has been running off with the publicity for the 1948 presidential nomination —while issuing denial of intent. His spectacular victory in the nation's strongest political state has brought him even into the feminine gossip columns, where it is being reported he is the best Republican vote getter. Higher up some of the leaders are saying his nomination and election are already a foregone conclusion.

But this does not happen to be the case. Dewey is not the best Republican vote getter. Those Republicans, who are finepointers, have figured that Bricker of Ohio received 59 91 per cent of the vote in his home state; Martin 59.81 per cent; while Dewey received 56.60 per cent. (But Warren of California got nearly all.)

Nor is Dewey's titular leadership actual. The working leaders of the party really are Vandenberg on foreign policy and Taft on domestic policy. This may or may not turn out to Dewey's advantage. While he sits in Albany taking a stand only necessarily on the issues of the state, Vandenberg will be mostly at the United Nations the next two years taking a stand on every international issue which comes along. Similarly Taft, in the senate, will be required to act daily on economic issues of the day. In the past, the positions occupied by Vandenberg and Taft have been considered by politicians to be detrimental. Usually in such positions, men accumulate too much opposition in time, and the nomination goes to a governor (Landon and Dewey) or to an outsider (Willkie) against whom not much can be said.

But we are in an atomic era now. We are seeking progress toward peace and production. If the active Republican leadership should succeed in delivering one or both, the step from the senate to the White House might be shorter than that from Albany.

Vandenberg already has been announced as the next president by the governor-elect of Michigan — although he renounced intent also. Taft is in an excellent tactical position since he adroitly retired from the last race in favor of Bricker (who now has similarly bowed in favor of Taft). And of course Warren of California, Martin of Pennsylvania, Stassen of Minnesota (an announced candidate) and Martin of Massachusetts, may be running along with some others who could make it a close fight. Thus my present conclusion is that the chances of Vandenberg and Taft, if added together, are certainly much better than Dewey's. Unless they kill each other off, or split, they could beat him today.

Biggest strictly political news of the elections was the breakdown of the Democratic city machines. Those machines, plus the South, were the Democratic party. But Kelley is clinging to Chicago only by a clutch on his own hair (he lost half the most important Cook county offices), having delivered the next mayoralty race to an antagonistic Democratic leadership. Dewey did not similarly crack the Tammany machine in New York, but a Republican presidential candidate might. The Hague leadership went further toward inconsequence in New Jersey, and the Republicans carried Boston for the third time in history.

So the Republican race now is hearing the bugle, with the knowledge that its nominee likely will win the White House—and the race is wide open.

The various candidates today control so many divisions of the vote no one would have a nominating majority. Warren will have the Pacific coast and probably Rocky Mountain area, Vandenberg and Taft will divide the Midwest, and Dewey can get a substantial following in the East and South, although the big Pennsylvania delegation would be for Martin. If Taft and Vandenberg get together, one might win, if a deadlock ensues, the nomination would go to someone like the popular Warren of California or Martin of Pennsylvania, with Dewey theoretically looming large in the background, but perhaps not as large as the Ohio group which could nearly run the party if it works Washington things right.

Personally I am saving my money and marking all Republican presidential stories now down to publicity.

• • •

LABOR CURBS LIKELY

Numerous Republican comments have leaned lightly, or not at all, on the prospect of labor legislation growing out of the Republican majority in congress. While the avenues of public discussion in press and radio have concerned themselves particularly about legislation to curb unions, official Republican sources have been notably quiet.

Programs of proposed action had been laid down by various groups, but the senators who will do the job have not been talking aloud.

Sportlight

By GRANTLAND RICE

RECORD crowds set new marks at the turnstiles last season in practically every sport. But what has become of the color that the games once knew? There is probably, or possibly, greater skill and ability around than sport ever has known. But it is quite possible that the big gates and the bigger pay, for pros and college alike, have throttled a vital quality of competition. I think it has. The pay check now dominates the scene.

You might ask me just what color is. Here's one answer—Babe Ruth, Jack Dempsey, Bobby Jones, Bill Tilden, Man o'War, Tommy Hitchcock, Earl Sande, Dizzy Dean (in capital letters), Walter Hagen, Exterminator, Knute Rockne, (also in capital letters), George Gipp, Hurry-up Yost, Bob Zuppke, Pepper Martin and Frank Frisch. Each one of these was a champion, but something more than a champion. For each one had a crowd appeal that is sadly lacking today.

Dizzy Dean

For example, Leo Durocher of the Dodgers has drawn more comment than any five managers Leo is a great manager. But a large flock of this publicity has come from details far apart from baseball. Ted Williams drew more words, favorable and unfavorable, than any other ball player last year. So Ted must have had a type of color They at least knew he was around, liking him or hating him.

Joe Louis has the color of ring perfection—one of the greatest fighters of all time. But outside of this Joe is an extremely quiet fellow who doesn't like the great bright spotlight.

'Just Business Men'

In Ben Hogan and Byron Nelson, golf has two of the greatest golfers the ancient Scottish game has ever sent to the fairways. But who could say they were in the same class with Bobby Jones and Walter Hagen or Gene Sarazen for crowd appeal? They are two prominent business men who can break 70, collect their dough and move along.

Stan Musial, one of the nicest people you ever met, a great ball player, the top of the year, isn't colorful in any sense of the word. Stan is just a great ball player. He wants to be nothing else. Neither is Eddie Dyer, an able manager and a great fellow. Sport today has become big business. There is plenty in the way of sport left, but with the billions, not the millions, involved, a lot of color has seeped out.

I was talking about this color angle with Frank Frisch, the New Rochelle flower expert.

"Just what is color?" I asked Frisch, as Johnny Kieran cocked an attentive ear, a Kieran habit when any information is coming along.

"The basis of all color," Frisch said, "is always ability first. No punks get by. Many have tried to use color, or so-called color; in the place of ability. It won't work. Color means Dempsey, Jones, Hitchcock, Grange, etc., all stars. Color is also a natural quality. It can't be faked. Two of the most colorful ball players of all time were Babe Ruth and Dizzy Dean. They were naturals. They always were exactly what they were. Human and likable, but great artists. But they were real—not phonies. How that mob can spot a phony.

Game's the Thing Now

"The game doesn't need color today," Frisch said. "You can start a dog fight between two terriers and draw 10,000 people Ball clubs that were far down in the second division drew from 800,000 to 1,000,000. Football games that meant nothing except another football game were sellouts. Today it is the spectacle, the contest, that fills a stadium or a park, not any outstanding star. It's the game, the show today, not an individual star."

This is all true. It all may be for the general good of sport. After all, only the game counts. But despite this any writer hanging around for human copy misses Hagen, Waddell, Yost, Zuppke and many others who had a certain human appeal that so few have today. Sport competitors are serious people working at a big job now. Most of them have outstanding ability. But with too many it is more big business than sport. The pressure is heavy. The big idea is winning.

Today we have only a few left—and I can't even remember their names. Joe Louis? The top champion of them all—who limits his publicity to ring efficiency. In baseball we have Ted Williams—who is still a big story when he flops. Stan Musial, the best ball player in the game today, is just the best ball player. He has no interest in any outside headlines. Football coaches —able business men with a big job to do. No particular color. No Rockne, no Zuppke, no Yost. It may be better this way.

But it's duller.

ASK ME ANOTHER?

A General Quiz

The Questions

1. When you are confronted with a "Hobson's Choice," how many choices have you?
2. The name Huguenots was given by the French during the 16th century to what group?
3. What makes the stars twinkle?
4. The siege of Troy lasted how long?
5. What bug swims bottom up?

The Answers

1. You have no alternative
2. The Protestants.
3. The density of the air.
4. Ten years.
5. The "back swimmer" swims on its back. It is the only water bug that does so.

Faithful Model of Sir Drake's Ship Inch Long

Among the outstanding exhibits of glass-case ship models is the Hampshire collection in the Institute of Marine Engineers in London, says Collier's. The life work of one man, it consists of 13 miniature reproductions of famous vessels built on a scale of 1 inch to 64 feet, or about one-eighth of the usual size of decorative ship models.

Most unusual of them all is a faithful reproduction of Sir Francis Drake's three-masted Golden Hind, which is one inch in overall length, or so small that it can be hidden behind a half dollar.

Chopsticks Sole Survivor Of One-Finger Piano Pieces

Of the thousands of one-finger piano pieces that served as parlor tricks during the 19th century, the sole survivor is Chopsticks, says Collier's. Since it was first published in Glasgow in 1877, this commonplace little tune has not only become popular throughout the world but its theme has been borrowed by such outstanding composers as Liszt and Rimski-Korsakov.

This Home-Mixed Syrup Relieves Coughs Quickly

Needs No Cooking. Saves Money.

The surprise of your life is waiting for you, in your own kitchen, when it comes to the relief of coughs due to colds. In just a moment, you can mix a cough syrup that gives you about 4 times as much for your money, and is surprising for quick results.

Make a syrup by stirring 2 cups of granulated sugar and one cup of water a few moments, until dissolved. No cooking needed—it's no trouble at all. Or you can use corn syrup or liquid honey, instead of sugar syrup.

Then put 2½ ounces of Pinex (obtained from any druggist) into a pint bottle. Fill up with your syrup, and you have a full pint of really wonderful cough medicine. It never spoils, lasts a long time, and children love it.

This home mixture takes right hold of a cough in a way that means business. It loosens the phlegm, soothes the irritated membranes, and quickly eases soreness and difficult breathing.

Pinex is a special compound of proven ingredients, in concentrated form, well known for quick action in coughs and bronchial irritations. Money refunded if it doesn't please you in every way.

Annual Basketball Tourny At Klemme Begins Tonight

GARNER MEETS KANAWHA IN THE FIRST GAME

Tournament Finals Will Be Played Here Saturday Night

The big event on the calendar this week in the Annual Hancock County Basketball Tournament which will be played in the Klemme High School gymnasium beginning this Wednesday evening at 6:30 o'clock when the Garner Cardinals tangle with the Kanawha Bulldogs.

Three games are scheduled for Wednesday night. At 7:30 o'clock Crystal Lake meets the Klemme Shamrocks, and at 8:45 Goodell and Corwith will play. There will be two games on each of the following nights, Thursday, Friday and Saturday. The first games beginning at 7:30 o'clock and the second game at 8:30 o'clock. The semi-finals will be played Friday night and the finals and consolation on Saturday night.

Officials are Andy Anderson of Lakota and V J Meyer of Bancroft O T Stokesbary of Klemme is the official scorer and L. A Ridder of Klemme, the official timer

In the past the Klemme gymnasium has accomodated the largest tournament crowd of any school in the county, and this year it is expected that former records in attendance will be broken. There are no reserved seats so first come, first served. The high school teams in the contest are Garner, Kanawha, Britt, Woden. Goodell, Corwith, Crystal Lake and Klemme

Is your subscription paid in advance? Check your date, please.

RENTING CAUSES MORE SOIL LOSS

Arthur Designes New Lease Rider for Encouraging Better Practices

Iowa rented farms have more soil erosion and soil depletion than owner-operated farms. Landlords and tenants urgently need to undertake more soil building practices on rented farms, according to I. W Arthur, agricultural economist at Iowa State College.

Arthur has designed a conservation lease "rider" to encourage and facitate the adoption of desirable soil management practices on rented farms The primary purpose of the "rider" is to assure the tenant that he will receive fair compensation for his investment or contribution to a completed soil building practice in case he must leave the farm before he has had full benefit from the practice. The "rider" can be used to accompany any Iowa farm lease whether oral or written.

If a tenant is to become aggressive in establishing soil building or soil conserving practices on a rented farm, he must be assured of either one of two things.

Assure Tenant

Either the tenant must be sure (1) that he can stay on the farm until he has had full benefit from his investment in the soil practice, or (2) that if he has to leave the farm before realizing full benefit then the landlord will repay him for the unused value remaining

The conservation lease "rider" can be used to accomplish the second alternative If the tenant stays on the farm he has no unused value due

Three steps are taken by the landlord and tenant when using the "rider."

1 List the soil building and soil conserving practices to be started on the farm during the lease year.

2. List the contributions to each practice to be made by the owner and by the tenant.

3 Calculate the unused value of the tenant's investment or contribution if he leaves the farm before he gets full benefit from his investment in the practice.

Evaluate Practices

Accompanying the rider is a one-page explanation sheet suggesting rates of depreciation to use in deciding the amount of the unused value due the tenant.

While the different practices will vary in the number of years they will be of value, Arthur says it is best to write off the tenant's investment in any practice by the end of 5 or 6 years. Misunderstandings are likely to arise if it is strung out over a longer period.

The explanatory sheet accompanying the rider gives suggested schedules for calculating depreciation and unused value of tenant's contribution in such practices as spreading limestone, use of commercial fertilizer, contouring, grass waterways, terracing, strip cropping, drainage and other practices.

Complete details on the conservation lease rider and its use may be obtained from Iowa State College.

The afternoon was spent informally after which a nice lunch was served and Mrs. Harson was presented with many nice gifts.

HANCOCK COUNTY PAYS OVER $1,000 BOUNTIES

Hancock county paid $1,022.55 in bounty claims during the year 1946, a report from the office of the county auditor indicates. Bounties were paid as follows: Wolves, $10, gophers, 25 cents; crows, $183 40, and foxes, $721.

Hancock County's 1964 farms last year produced a total of $14,253,471 worth of farm products for an average of $7,309 per farm, Paul Henderson county extension director, said this week.

In a report based on preliminary 1945 census figures, just released by the Department of Commerce, Henderson pointed out that this value of all farm products produced last year compared with that of $5,972,851, in 1940. The figure is based on reports from 1950 farms. All products sold totaled $13,479,180, with the rest consumed on the farms.

Livestock and livestock products sold accounted for the greatest part of the farm income with $9,190,661. Crops sold from 1559 farms brought $4,287,309.

The value of farms and farm property increased from $32,440,193 in 1940 to $43,360,271 in 1945. More Hancock County farms are operated by renters than by owners, Henderson reports. But the number of owner operators has increased in the past 5 years. This year 137,418 acres were operated by owners as compared with 133,064 in 1940, and 218,297 acres were operated by renters as compared with 219,153 acres 5 years ago.

Hancock County farmers have cropped 306,631 acres of land last year, compared with 313,700 in 1945, and had 61,348 acres in pasture Only 1875 acres of timber were reported.

The census shows that 7952 persons were living on Hancock County farms last year.

Other census figures indicate that 1725 farms had electricity by last year, 656 had running water, 1868 had radios and 1528 telephones. Only 58 farmers were reported being more than 5 miles from a hard surfaced road.

Dinner Held In Honor Of George F. Gast

A family gathering was held at the Clara Stille home on Tuesday in honor of George F. Gast, who has been visiting relatives and freinds here the past month. Mr Gast expects to leave soon for his home at Beltrami, Minnesota Those present were Mr. and Mrs. W. C. A. Gast and Fred Mechstroth of Garner; Mr. and Mrs. Ralph Janssen of Iowa Falls; Mr. and Mrs. Arthur Carlson of Clear Lake and Mr.and Mrs. Herman Gast of Klemme. A very delicious dinner was served by Mrs. Stille.

BIRTHDAY

LaVohn Caroline, daughter of Mr. and Mrs. Marvin Isvik was 6 years old Tuesday and in honor of the event her grandmother Mr. C. A. Larsen had a dinner for her and entertained Mrs. Isvik and daughters, LaVohn and Mary Ellen; and Virginia Kudje.

Celebrated Golden Wedding

Mr and Mrs. Milo Brown observed their fiftieth wedding anniversary at their home near Garner Sunday, January 26, 1947

They held a family dinner at the home at noon and open house to all others who came to call from 2 to 5 in the afternoon and from 7 to 9 in the evening.

Mrs. Brown, nee Myra Chipman and Mr. Brown were both born near Momence, Ill.

In 1881, their parents came to Iowa. Milo's parents to the Brown farm, four miles west of Garner and Mrs. Brown's parents to their farm home in Kossuth county.

They were married in Mrs. Brown's parent's home at Burt, January 27, 1897. They established their home on the Brown farm and have always lived there.

Of their family of four sons, one baby died in infancy; Arther was killed in a plane crash in 1931 Leo is living in Garner and Emery is living on the home place. They have three grandchildren.

Former Legislator Died At His Home In Madison Twp.

SCHOOL TO TRAIN MEN FOR DAIRY FIELD JOB

An increasing number of men over the state are inquiring about employment as supervisors in local dairy herd-improvement associations, reports Lyle Jackson, Iowa State College dairy specialist.

These positions, which pay an average of $150 per month plus board and room, have proved extremely valuable to men with some dairy experience who want to gain additional knowledge by working with top dairymen in the state.

In order to qualify men for these positions, Jackson says another free, 3 weeks' training school will be held from March 10 to March 29. At these schools, applicants are given training in the duties and responsibilities of association supervisors.

The supervisor, working with local association from 20 to 25 dairymen, spends 1 day a month on each member's farm. He is responsible for weighing and testing the morning and evening milk from each cow, calculating feed records and making feeding and culling suggestions based upon the herd records.

Jackson points out that there is an excellent opportunity for the supervisor to observe the most efficient management practices being followed by his top members. And the positions are ideal training for work requiring daily contacts with people.

Men who would like to qualify for the positions and for the training school in March are asked to write to Lyle Jackson, Morrill Hall, Ames, Iowa. Additional information on the work also may be obtained from local county extension directors' offices.

Entertained At Court Whist Party

Mr and Mrs Maurice Murray entertained a group of young people at their home Saturday evening at a Court Whist party

High scores were won by Mrs. Carol Brager and Mr. Carol Brager Low scores were won by Luella Thieman and Lester Neuberger.

The hostess served a nice lunch after the games.

Had Turkey Dinner

Mr. and Mrs. George Lawhorn and Dr and Mrs. A. H. Dulmes entertained at a turkey dinner Sunday evening at the Lawhorn home.

After dinner bridge was played with Mrs. A. L. Kingery and A. J. Kudje winning high score, and A. L. Kingery the travel prize.

GIRL SCOUT NEWS

The W. S. C. S. of the Liberty Methodist Church will meet at the home of Mrs. Carol Brager on Wednesday, February 5th at 2:00 p. m.

If you dont want it, sell it with a Times want ad.

S. B. DURANT, MADISON FARMER, DIED OF HEART ATTACK

Was Prominent In Politics And School Matters

Funeral services for S. B. Durant, 75, pioneer citizen of Hancock county and a former Representative from Hancock County in the Iowa Legislature, were held Saturday afternoon in the American Baptist Church at Forest City, with burial in the Madison township cemetary.

Mr. Durant died suddenly at his farm home in Madison township where he had resided for many years. He died Wednesday of a heart ailment and had been in ill health for some months.

He is survived by his wife, a daughter, and two adopted sons.

Mr. Durant was active in county politics for many years and was greatly interested in school matters. He served Hancock well as a representative in the Iowa Legislature.

Obituary

Seth Benjamin Durant was born on January 9th 1873 of pioneer parents John and Matilda Durant just west of center school house in Madison Township, Hancock County, Iowa and departed this earthly life frobm his farm home just ½ mile from his birthplace.

He received his education in the rural schools and one term of business college at Garner, Iowa. At the age of 17 he took the teacher's examination, and got his teacher's certificate. He was a successful teacher in his home township and adjoining townships for 12 years.

On November 5th 1902 he was united in marriage to Edith A. Howland of Madison Township. God blessed their home with two girls, Doris and Velma and two adopted sons, Donald and Duane Leo.

He was an enthusiastic promoter of all projects for the betterment of farm life. Among those he sponsored was the rural telephone, The Farmer's Cooperative Elevator, The Farm Bureau and the Farmer's Mutual Insurance Company.

Three times he was elected as Hancock County Representative to the Iowa Legislature and served in the 36th, 44th, and 45th General Assemblies.

In the winter of 1925 he received the Lord Jesus Christ as his Saviour and united with the American Baptist Church and was a faithful member until the last.

He was preceded in death by his father, mother, four sisters, five brothers, and one little daughter, Doris and shall be greatly missed by his wife Edith, daughter Velma (Mrs. Lyle Jefson) of Forest City, Iowa, and his sons Donald and Duane Leo of Corwith, Iowa, six grandchildren and a host of relatives and friends.

He was a good neighbor, a kind friend and a devoted husband and father. He possessed a sterling charcter thoroughly honost in all his dealings, and was interested in every good cause. One had to know him to realize his actual worth to the to the community and world at large.

He was laid to rest in the Madison Cemetery .

ARRIVES IN JAPAN

The Sandbergs of Goodell have received word from their 18 year old twin grandson, Pvt. Arnold Jenison, that he is with the armed forces in Japan. He went over on the victory ship "Central Falls," taking 14 days to make the trip from Fort Lawton, Wash., to Yokohoma.

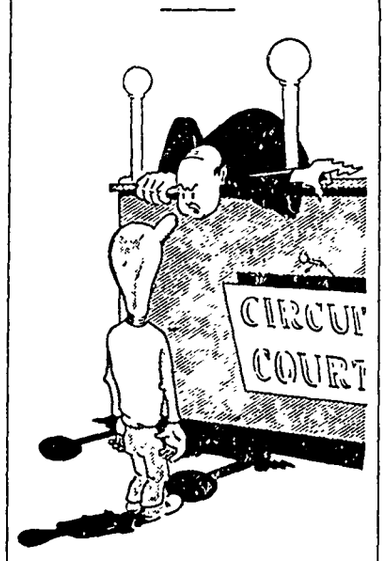
A Stiff Blow

This is the season of weather stories. Which brings to mind the mighty winds which range the great open spaces of eastern Oklahoma. Out there the wind blows so hard that the boys often use it to ride to town on. They stand out in the road and hold up their big hats like sails, and the next thing they know the breeze has set them down in front of the courthouse. Sometimes it turns wells inside out and spills water over 17 counties.

One day a visitor noticed a log chain hanging from a limb near a lonely cabin. He asked the settler what purpose it served.

"Well, stranger," the man replied, "when I wake up in the morning I peek through a crack in the cabin and take a look at that there chain. If it's a-hangin' down, everything is all right. But if the chain is a-stickin' straight out from that there limb, I figger it's too windy for me to work."

WATTS WRONG?



Judge—Give the court your name, occupation, and state the charge against you.

Defendant—My name is Sparks, I am an electrician and I am charged with battery.

Judge—Officer, place this man in a dry cell.

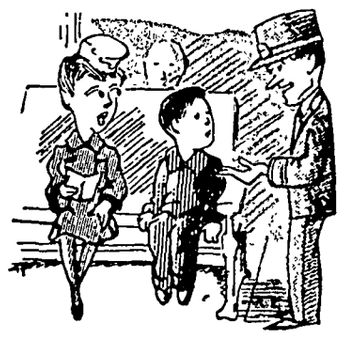
Weather Report

A certain Washington club decreed that any member caught talking shop within its relaxing portals shall pay a fine of two dollars. One day a popular member, on entering the club, cheerily called out to the assembled company, "Good evening, gentlemen."

"Bob," rejoined one of the members, "don't you work at the weather bureau?"

Puzzled, Bob admitted that he did. He was fined two dollars!

UNINTERESTED



Conductor—Madam, you'll have to pay for that boy.

Lady—But I never have before.

Conductor—That doesn't matter to me. He's over 12 years old, and you'll have to pay his fare or I'll put him off the car.

Lady—What do I care? I never saw him before!

Buzzing, Too

"In your advertisement you said that there was a sting in the air after sundown," complained the summer boarder.

"Well," replied the hotel proprietor, "take a look at those mosquitoes."

Faster and More Rugged

Interviewer — So you were in Egypt?

Veteran—Yeah.

Interviewer—In the Sudan?

Veteran—Naw, in a jeep.

Cushioned

Jimmy—Mom, baby just fell off the piano!

Mother—Oh, was he hurt?

Jimmy—No, mom. He fell on the soft pedal.

Lucky Accident

Teacher—Johnny, give me two pronouns.

Johnny—Who, me?

Teacher — That's right, Johnny; good work.

Homely Mug Squadron

"What's that ugly insignia on the side of the bomber?"

"Sh-h-h-h! That's the commanding officer looking out of the porthole."

Two Chapters More

Passenger (to bus conductor reading paper)—What time does this bus start?

Conductor (pointing to paper) — At the end of this article.

No Witnesses

Lawyer—It would be better for you if you had a good alibi. Think hard now. Did anyone see you at the time of the crime?

Client—Fortunately, no.

JESUS THE GIVER OF LIFE

LESSON TEXT—John 4:46-51; 5:2-9; 11 11-13.

MEMORY SELECTION—I am the resurrection, and the life; he that believeth in me, though he were dead, yet shall he live.—John 11:25.

The miracles of God, through his servants and the Lord Jesus Christ, are not mere marvels or wonders. They are not for the advancement of the cause of any man or for personal glory. They are the mighty signs of an omnipotent God wrought for the good of men, for their spiritual enlightenment and as a testimony to the one true God Jesus is the giver of life; first and most important, of spiritual life, but also of physical life and health.

Leaving Samaria after his blessed work there, our Lord went up into Galilee, where he met many simple-hearted folk who were ready to believe. Here he was able to work miracles of healing and of grace.

I. A Sick Boy Made Well (John 4:46-51).

A nobleman's son was sick. Ah, yes, affliction and sorrow come to the home of the rich as well as the poor. Death comes to the young as well as the old. In fact, the first grave dug in this world was for a young man.

But it is also true that affliction may be, in God's hand, a means of blessing. This son's sickness sent his father to Jesus, and resulted ultimately in the salvation of the entire household (v. 53).

There is another helpful lesson here—our Lord's Word is as good as his presence. The man asked Jesus to come, but he sent his word instead. It was accepted, believed, and completely effective.

How blessed for us who may not have the physical presence of the Lord to recall the potency of his Word. When he says it, believe it!

II. A Lame Man Made Whole (John 5.2-9).

Back in Jerusalem at the Feast of Purim, a time of joy and gift giving, our Lord found his way to the pool of Bethesda where there were misery and disease. His compassionate heart sent him there to help and to bless.

"Impotent folk"—the words well describe not only those who lay helpless about the pool of Bethesda, but they fit us as well. Oh, yes, we are strong, capable, fearless, but only until we meet some great elemental problem. Then we see that we are indeed "a great multitude of impotent folk." The silent fog can paralyze a nation. Death, sickness—who can stay their hand?

Long familiarity with his weakness had bred in the man with the infirmity a sense of despair. Such an attitude invites defeat. It is unbecoming to a Christian. Let us not forget in the darkest hour to "keep looking up."

Jesus told the man to "rise and walk" — the very thing he could not do for his 38 years of life But when the Son of God speaks to us he gives the power to respond to his command.

III. A Dead Friend Made Alive (John 11:11-13).

The fact that Jesus is our Friend and our Saviour does not exempt us from human sorrow, but it does assure us of the needed grace to bear the trial and to trust him even in life's darkest hour.

Lazarus, the friend of Jesus, was sick. The home in which Jesus had found rest and fellowship was in deep trouble. Jesus was no longer in Judea. In haste, word is sent to him of his friend's illness. But he did not come.

Why does he delay? Such is the heart cry of thousands today who call on him in their hour of trouble. The purposes of God are beyond our ability fully to understand. We need only to trust him and abide his time.

Notice that his failure to respond at once to the message of Lazarus' sisters did not mean that he had deserted them (11:4-6). Nor did it mean that he had denied them his help (v. 7). Lazarus may have been dead before the word reached him. He may also have delayed in order that there might be no question about the resurrection miracle. And he may have tarried in order that their faith might be strengthened.

Above all, do not fail to notice that he came. He always does. Jesus has never failed any child of his. The time and the manner of his answer to our prayers may not conform to our opinion of what should have been done, but let us remember that we know only in part. He knows all. Let us trust him. In his darkest hour Job said: "Though he slay me, yet will I trust in him" (Job 13:15).

He called Lazarus forth from the sleep of death. Even so he calls sinners forth from their spiritual death into glorious eternal life! The lifegiver, our Lord and Saviour, is here now ready to give life to everyone who will call on his name. Will you?

Use Odds and Ends For Colorful Afghan

Royal Jupiter, Grand Champion, 1946 International Livestock Exposition, was purchased by Firestone to be exhibited to the farmers of America on a 22,000-mile educational tour.

Two Firestone CHAMPIONS

ROYAL JUPITER, Grand Champion steer at the 1946 International Livestock Exposition, best shows today's demand in beef cattle. And on American farms, the New Firestone Champion Ground Grip is the Champion among tractor tires.

As the Champion, this new tractor tire cleans up to 100% more effectively . . . pulls up to 62% more at the drawbar . . . lasts up to 91% longer . . . and rides smoother on the highway.

There are sound reasons for this. The curved traction bars flare outward from the center, making a wider opening at the shoulder from which mud and trash fall easily. The connected bars take a powerful "center bite" in the heart of the traction zone. The extra-deep, pyramid-like curved traction bars cut sharply into the ground with a cleaving action. The extra height, plus buttressing at the base and Triple-Bracing near the center, give the bars greater strength and stability. Continuous bars give the Champion smoother contact with the highway . . . lengthen tire life.

When you order tractor tires, or a tractor, ask your Implement Dealer, Firestone Dealer Store, or Firestone Dealer to specify Firestone Champion Ground Grips.

WRITE FOR FREE BOOKLET

RISE OF $9 PER ACRE IN IOWA LAND PRICES

Iowa land prices continued eir upward trend last year, th an average advance of $9 r acre registered for the state, cording to W G Murray, head f the Department of Economics d Sociology at Iowa State Colge.

The price increase for 1946 is ily slightly lower than the $10 r acre jump registered in 1945 d marks the sixth straight ar that land prices in the state ve risen The average sale rice in the state last year was 49 per acre, 69 percent above e 1941 price of $88 per acre

The figures on land prices and ends were prepared by Murray nd R. W Wilcox, Iowa State ollege farm economist, from a rvey of 376 Iowa real estate okers made on Nov 1, 1946

The brokers indicated that xcellent land advanced more han fair to poor land Top ade farms sold for $15 per re more last year than in 1945, hile the poor farms climbed nly $3 per acre The price rise n all land was greatest in western Iowa and least in southern owa

Although prices advanced dur- g the year, the brokers pointed ut that there were fewer sales ast year than a year earlier, nd two out of three of the men aid prices were stationary on he first of November Many f the real estate men indicated hat buyers were both critical nd cautious in their selection f farms. Soil fertility was nly one of the characterstics esired in a farm Good roads, a modern house and electricity also was mentioned

Murray says the larger current price rise of excellent land probably reflects a growing number of farmers who have the cash to buy the better farms. When farmers have the funds, they are interested in better land and better buildings

If buyers continue to show caution and avoid over-optimism, Murray says a disastrous

Clean Up Around Farm To Cut Rat Infestment

Although the arrival of freezing weather makes pre baiting and poisoning of rats impractical on most farms, there still r much that can be done in the way of rat control during the winter, says Harold Gunderson, Iowa State College entomologist

To help curb rat losses during the winter, Gunderson suggests a thorough clean-up campaign. This includes cleaning up all junk piles around the farm With scrap iron now selling at a high price, Gunderson says on most farms there's enough scrap to pay the cost of an entire rat control program

If lumber and posts are worth saving, they should be piled up off the ground on supports at least two feet high Stack bottoms, manure, garbage and other litter should be scattered in the fields Weeds around the buildings should be cut.

Such clean-up work removes hiding places, makes the dog's job easier when he chases a rat and tends to concentrate a scattered population so rats are easier to poison

Where hardware cloth is available, it should be used to rat-proof cribs and bins. All grain storage buildings should have springs on the doors so they will stay shut.

Even though temperatures may be too low to use poison bait successfully, rats still can be destroyed by trapping and gassing, Gunderson says.

Seventh and Eighth Grade News
Reported by Andra Jones

Wednesday was the day for report cards. Some were happy and some unhappy, but all agree on doing better next six weeks.

We were glad to have Dorothy Lacey visit us last Monday

In the eighth grade Arithmatic we have been working hard on insurance problems while the seventh grade have pondered over scale drawing problems.

We have made maps in eighth grade history to show the progress made in campaigns of the Civil War

Wednesday we wrote a test in Civics

The Seniors
—Reported by Peter Larsen

Everyone is pretty well keyed up this week after the semester grades came out and getting used to their new classes. In place of Commerce Law they are now taking Business Arithmatic.

Friday we had a class meeting and started getting ready to graduate. We chose "We have crossed the bay, the ocean lies before us" as our motto. Our colors are blue and silver, while American Beauty Roses are our flower. We decided on these with almost no trouble for a change. Usually we argue and decide on nothing. The boys and girls always want different things.

In Physics we just finished a unit on sound and are now studying light. We just finished depreciation and bad debts in our bookkeeping class. American history is covering the growth of our country and we now have all the 48 states in the Union In Literature we are studying essays.

NO STAMP

Lloyd Dickman, Sumner rural mail carrier, had an unusual experience just before Christmas. For the first time in 31 years of service, he completed his mail route without having to lick a single stamp.

SEMESTER HONOR ROLL

The end of the first semester in Klemme High School found twenty nine students on the honor roll

The requirements for the honor roll are high. A student must attain a grade of B or better in all scholastic subjects.

In the category of all A's the senior class placed two students, Phyllis Christiance and Marcille Josten, the sophomores one; Donna Fjetland; and the freshman one, Gloria Haefner.

Senior classman Ivan Blumer, junior La Vonne Beier and sophomore Phyllis Boland received three A's apiece.

Those students who earned two A's and two B's were seniors Peggy Lou Coobs and Lois Ann Lau, junior Alice Anderson, and freshman Ruth Janssen and Luella Priebe.

Those who earned one A and three B's were seniors Dean Jacobs, Emily Johnson, and Clarence Larsen Jr; and sophomores Norma Early and Marjorie Lau, and freshman Darlene Etchen, Marian Kastler, and Lillian Wille

The following earned a B grade in all subjects, senior Jean Kurtz; juniors Ruth Kurtz, Esther Klinge, Buelah Goll, Erdene Nelson, and Donna Heivilin; sophomores Isabelle Gibbs and Irene Lyons; and freshman Beverly Beier.

The following were neither absent nor tardy during the first semester, freshman Gloria Haefner and Marian Kastler; sophomores Wilford Back, Phyllis Boland, Norma Early, Madelyn Lundy and Iris Rosendahl; juniors, Loretta Anderson, Beulah Goll, Esther Hartbeck, Ruth Kurtz, and Erdene Nelson; seniors Peggy Coobs, Marcille Josten and Lois Ann Lau.

TWO POPCORN HYBREDS AVAILABLE AT COLLEGE

Commercial seed for two types of hybred popcorn is being made available to Iowa growers this winter through the Committee for Agricultural Development at Iowa State College

Joe L. Robinson, production manager for the committees, says the hybred popcorn is being sold only to Iowa growers and only in units of 50 pounds.

One hybred is of the yellow pearl type It is a cross between inbred lines of South America and Supergold The yellow hybred stands up from 30 to 35 percent better than the open-pollinated varieties. It matures later and should be planted on good ground

The other hybred is white and is known as Iopop No. 5. It produces a more pointed ear than the regular Japanese hulless but is smaller in type. It stands better than Japanese hulless, yields about a fourth more and has greater popping expansion.

Farmers and commercial growers can obtain additional information on these varieties from the county extenson director.

KEEP THE EGG IN ITS OWN CLEAN PACKAGE

Manufactures spend millions of dollars perfecting packages for the products they sell. They want them attractive, durable and easy to handle.

Mother nature designed the package for the eggs a hen lays. It's clean, attractive and protective of the quality of the product But county extension Director Paul Henderson says that by the time this egg package reaches the market it may be cracked, chipped, dirty, and the product inside may have lost its high quality

Henderson points out that the responsibility for keeping eggs clean and of high quality rests with the farmer. And it's the farmer who will gain through higher prices for eggs.

While poultry producers feel there is less danger of eggs spoiling during the winter, months, there is increased trouble from soiled and broken eggs. Special attention must be given to housing conditions as well as the kinds and amount of equipment.

Houses that are not insulated are apt to be damp. Chickens walking on the wet litter carry filth and dirt back into the nests. Unprotected droppings are another source of contamination.

Providing adequate nests will prevent crowding and egg breakage. And the nests should be provided with a good supply of litter Drinking fountains should be kept off the floor to prevent the birds from beaking water on the floor.

It takes no more time or money to produce clean eggs than dirty ones.

CORN IS CHEAPEST FATTENING GRAIN
Oats Lower in Feeding Value But Selling Higher in Price per Pound

Iowa farmers who let current feed prices help determine the kind of a feeding program they follow will find corn at present prices the cheapest feed on the market, says Lauren K. Soth, Iowa State College farm economist

When compared with corn, all other grains are priced higher than their relative feeding values. The Department of Agriculture lists the price of oats in Iowa the middle of November at $46.20 per ton That was the current market price Corn at that time was selling for $40 40 per ton. Since the feeding value of oats for livestock fattening is only 85 percent that of corn, the actual dollar feeding value of oats would be only $34 30, compared with the usual price of $46 20

Wheat Higher

Wheat is another good example It has the same feeding value as corn for fattening livestock But in November the price of wheat was $62.50 compared with the corn price of $40 40 per ton.

Soth points out that while the comparison between grains can be made fairly easily, the comparison between grains and high protein feeds or between grains and hay is more difficult In final results, much depends upon the way the feeds are combined and the kind of rations used And it must be remembered that since there can be only partial substitution of protein feed for corn or hay for corn, the figures give only a general idea of relative values.

For example, the dollar feeding value of linseed meal and soybean meal when corn is $40. 40 a ton is $68 70 per ton. The current market prices in central Iowa are around $117 fo seed meal and $110 for so meal. At the same time age is selling for $140 pe while on the basis of fe value the price would be $

Hay Is Cheap

Soth points out that the feeds that are commonly u priced compared to corn alfalfa and clover-timothy ed hay. Alfalfa is selli an average price of $15 90, it has a feeding value should market worth $28.60. The mixed hay is ing for $13, with a feeding of $22.40

If present levels of feed continue, Soth says many ers will want to make the use of corn and good hay ting down on the use of grains and high protein Expensive, high protein should be used where they do the most good—with y growing stock, high-prod milk cows and during the third of the gestation peri bred sows.

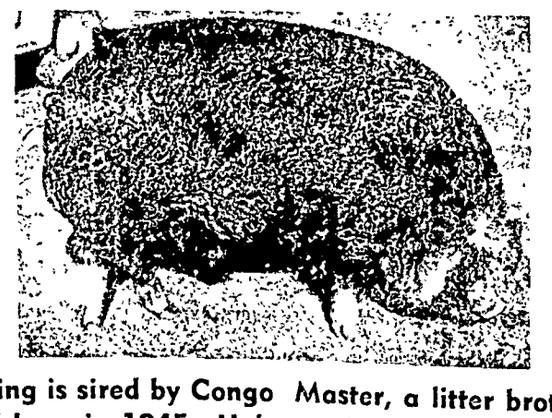
THIS OFFERING IS SIRED BY CONGO MASTER A195171



This offering is sired by Congo Master, a litter brother to the Junior Champion of Iowa in 1945. He's proclaimed by many to be the greatest aged boar today. Some are also sired by Modern World, a wonderful breeding boar.

The gilts are the Modern day type of Poland China. Many of them will weigh 500 pounds sale day. If you are looking for an F. F. A. or 4-H litter, or if you are a farmer or breeder, interested in securing a profitable litter for '47, be in the seats on sale day.

They are bred to Congo Master, Mission A, a half brother to the Worlds Grand Champion barrow last year, and Monogram, from the Peterson Bros. herd of Canby, Minnesota. One of the best trio of boars in the midwest.

ADVISE CAUTIOUS SEED OAT BUYING

Should Avoid Paying High Prices for Advertised "Clinton-Type"

Oat breeders and farm crops specialists at Iowa State College this week said they doubted the advisability of Iowa farmers paying an extremely high price for commercial seed oats which are being advertised as "Clinton-type" or "sister" of the Clinton variety.

This is especially true if a farmer hopes to get back his investment by selling seed to other farmers in 1948. By that time there probably will be enough certified Clinton and Benton on the market to take care of demands.

The commercial varieties are being advertised now yielding as high as or higher than Clinton and as being resistant to the blight disease Helminthosporium.

Clinton Best

H. C. Murphy, oat breeder for the United States Department of Agriculture at the Iowa Agricultural Experiment Station, points out that some of these varieties actually may be from the same cross that produced Clinton But he emphasizes that Clinton was selected for increase in Iowa because it was the best all-around cross developed for conditions in the state. It not only led all others in yield, but was more resistant to lodging, had stiffer straw and a higher test-weight per bushel.

While some of the crosses with bond were released for development in other states, others were not officially released at all because they did not measure up to the Clinton. Some of the seed from test plots and college farms, however, found its way into the hands of individual farmers and then seed dealers. Now, these varieties are being sold at rather fancy prices under such trade names as Colo, Golden Cross, Bond Hybred and others.

Not Certified

Murphy emphasizes that if these oats did originate from the breeding work done at the college the farmer will be getting a good oat. But, in the opinion of those who did the work, they will not be getting a variety as good as Clinton, and the advisability of paying a high price for the seed still is questionable Since the seed cannot be certified, there always is a chance that the variety did not originate at the college.

Farmers who can't get Clinton, Benton or Marion this year, and want to protect themselves against Helminthosporium blight, can plant treated seed of Tama, Boone or Control. Seed treated should be from a productive field.

Murphy and Donald Coe, plant disease specialist, have repeatedly stressed the advantages of seed treatment with New Improved Ceresan While the treatment won't give complete resistance to the blight it will help protect the crop through the seeding stage when the disease often does the most damage.

Treatment can be made any time from now until planting next spring.

Colorful Garb Marks Florida Indians

Seminoles Misrepresented By Sensational Writers

By BAUKHAGE
News Analyst and Commentator.

WNU Service, 1616 Eye Street, N.W., Washington, D. C.

(This is the second of two articles based on visits to the Seminole Indian reservation at Brighton, Fla.).

SOMEWHERE NORTH OF THE EVERGLADES. — Whenever one tries, as I did, to study the human side of the Seminoles—that nation which has left so little written record of its short but historic life-span—one is deluged with information and misinformation. Misinformation of the type on which the Sunday supplement writer feeds.

Baukhage

For example, examine the contradictory data on the Seminoles and snake killing: When I called on Agent Boehmer, his wife recounted how a greatly-excited Indian had appeared one day on their doorstep to announce his pressing desire that Boehmer come to the Seminole camp—a 100 rods or so distant—to kill a rattler.

Boehmer obliged. He carefully avoided carrying the corpse through the camp (a Seminole taboo), and he noted the usual fire lighted at the point where the victim fell. As usual, the Indian children had cooperated with him, without actively participating in the execution.

There are two explanations as to why the Seminoles would not themselves kill the snake. One is that once in the past the Seminoles were ordered by the White Man to leave Florida for points west. They prepared to remain even though it meant retiring deep into the Everglades. However they decided it would be a good idea for both parties if they made a treaty with the snakes. They did so on a "live and let live" basis That is one explanation.

Or it may have been one of those common sense arrangements embellished with the authority of mysticism There are few snakes which, if left alone, won't reciprocate.

Another interpretation may be that when a white man attacks the rattler, the chances are that if anyone is bitten, it would not be an Indian. I understand Seminoles do kill snakes when it seems necessary.

Boehmer, whose opinion I learned to value as I pursued this subject, thinks the rattlesnake situation is interesting, but I couldn't get him to say it meant the Seminole was superstitious.

Gaudy Costumes Intrigue Observer

Like every observer, I was impressed by the Seminole attire. Not by the men's—they wear conventional garments lightened by a gay handkerchief about the neck when they pursue their daily tasks, hunt on the reservation or loaf in camp. They have shortened the long skirt-like garment (comparable to the woman's cape) to sport-shirt length, even in ceremonial dress.

I found only Sam Huff, reputed to be a medicine man as well as the handy man at the school, wearing the long skirt-like garment, plus the blouse Some say Sam clings to this outfit merely because of his love for the past; others say it may have something to do with his special function as a medicine man; there is a whisper that it is a badge of repentance or punishment for some past sin. Sam is a grandfather today. He still lives in the nearby camp with the rest of his three generations.

The younger men save their gay shirts for dress up occasions (the annual green corn dance and the hunting dance), but they have adopted modern trousers. Their shirts are coverd with complicated geometric tracery; their scarves are bound by a metal or wooden clasp; they wear beads or other brightly-decorated fobs.

The most striking piece of Seminole clothing is the woman's billowing skirt; next come the beads which cover her neck from shoulder blade to ear tips; then her hairdress.

Unlike the men, the Seminole women (except those who have been completely converted to modern ways) wear their special garb and wear it all the time. Consequently, they always look "dressed up."

The hairdress, an innovation and a highly practical one, dates back only some six or seven years The woman's smooth black hair is brought forward over a semi-circular cardboard form like the wide peak of a cap. This gives her the appearance of peering at you from underneath a wide, circular hat brim, and is achieved easily without the aid of the beauty shop and virtually without mirrors. Furthermore, the coiffure is one development that has no connection with the White Man's culture.

Women's Skirts Are Real Art

Unlike the hairdo, the Seminole skirt and cape haven't changed except to grow more artistic and more intricate with the advent of colored textiles. They likewise have become less difficult to create, thanks to the hand-driven sewing machine. This gadget long since has been as common in tepee, hogan or even igloo as an ice-pick in a modern flat.

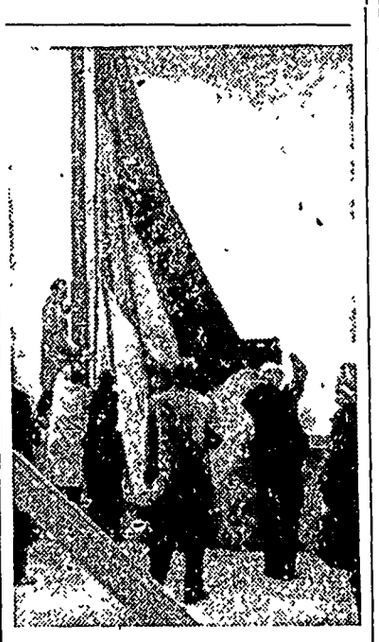
The skirts are made of parallel bands of a brightly colored patchwork design which experts claim are real art. They are fashioned of hundreds of separate pieces of colorful cloth, blended or contrasted to make a barbarically splendorous whole. The skirts bell out, widening in circumference as they approach the hem which, according to regulations, must trail at least three inches or thereabouts on the ground.

How can this be a practical everyday dress in a country of swamps and morasses, of barbed and cutting underbrush? That is the first question I (and every ignorant observer) asks. But they are practical, say the experts who have seen them in operation. Through wet going and wading, they are "histed" (there are no undergarments to complicate matters). Traveling over the dry and dusty fields, rife with snakes and other annoying reptiles, they protect the bare feet and shins. As Miss or Mrs. Seminole moves forward, toeing in slightly, according to good Indian custom, she gently kicks the dragging rim forward without baring the bare feet to inquisitive eyes or any flora or fauna that might obtrude.

The only other cloth garment is the cape. This is usually a single solid and bright color matching the skirt.

The Seminole beads remain a mystery. So far, I have been able to learn little concerning the origin, purpose or excuse for them beyond the explanation offered by Agent Boehmer and supported by his wife: "They wear them because they think they're pretty." And what better reason in any woman's lexicon?

It does seem strange, though, to see a comely Indian matron, her skirt tucked high before a roaring fire on a hot Florida day, or working vigorously in a tomato patch, or even strolling through a shop among sweltering whites in low cut dresses or open sport shirts, with perhaps 25 pounds (they have been weighed) of beads in a solid collar rising as high as the whalebone-enforced "chokers" American girls wore in the first decades of the 1900s.



NEW GERMAN FLAG . . . Unfurled for the first time (officially) is the new German flag, shown being hoisted on the Tagblatt tower in Stuttgart, Germany. New state colors are black, red and gold.

POLIO POSTER BABY . . . Once a victim of the dread polio disease, Nancy Drury, 4-year-old daughter of Mr. and Mrs. Frank Drury of Louisville, Ky., was chosen to symbolize the fight against infantile paralysis in the 1947 March of Dimes. Nancy, shown relaxing in a warm bath at her home, made a splendid recovery after being stricken with polio in July, 1944.

NEWS REVIEW

Marshall Gets Key Post; Labor Reforms Studied

STATE DEPARTMENT: *Happy Day*

"There are two happy days a man has in public life," former Secretary Byrnes told British Ambassador Kerr. "There is the day a man is elected to office. Then there is the day he quits."

January 7, 1947, therefore was a happy day for the dapper little South Carolinian when he stepped down from his high post in the Truman administration. It was a happy day, too — under the Byrnes' standard—for General of the Army Marshall who was named to succeed him.

Byrnes

But as Byrnes implied, Marshall's cheer was destined to be short-lived as he took over direction of the nation's international affairs. Byrnes had a tough time tussling with the Russians over completion of peace treaties for the axis satellites and Marshall faced the even tougher job of framing pacts for Germany and Austria.

Although friendly with Russian leaders, Marshall is no admirer of Communism or Communist tactics. Just before being named to office, he blasted Chinese Reds for risking the welfare of their country to obtain power and resorting to untruths to tar the U. S.

Marshall

Some observers also read in Marshall's appointment an effort by President Truman to build the general up as his successor in 1948. Should Marshall make a name for himself in the state department, his work there plus his prestige as the No. 1 military chief in World War II would give the Democrats a strong candidate to offset dissatisfaction with the Truman regime in the reconversion period.

CONGRESS: *Sharpen Payroll Axe*

Economy - minded GOP house members, axe in hand, were eying the big federal payroll in their announced drive to scale U. S. expenditures 12 billion dollars below the 1946 budget of 41 billion dollars.

Declaring that there is hardly a government department that does not have twice as many employees as needed, Representative Taber (Rep., N. Y.), chairman of the house appropriations committee, asserted that 1,000,000 workers could be chopped off the payroll of 2,300,000 without seriously impairing services. Not more than 500,000 employees in all are needed, Taber said.

Labor Reforms

Sen. Joe Ball (Rep., Minn.) and Rep. George Case (Rep., S. D.) pushed labor reform in early sessions of the 80th congress, Ball proposing sweeping measures for corrective legislation.

First, Ball called for prohibition of secondary boycotts and making labor organizations liable for violating contracts.

Then, he introduced legislation to ban all union and closed shop agreements and maintenance of membership contracts.

Finally, Ball proposed to decentralize collective bargaining to prevent the tieup of an entire industry through general negotiations.

The new Case bill introduced in the house permits issuance of injunctions to prevent strikes impairing the public welfare, forbids unions to coerce employees, seize property in disputes, withdraw essential maintenance workers, or order walkouts with majority approval of members; and makes union liable for damages resulting from breach of contract. The bill also grants the states authority to ban the closed shop.

ECONOMICS: *President Reports*

In the first annual economic report issued by the President under the employment act of 1946, Mr. Truman set forth the principles for a prosperous America Drawn by a three man council of economic advisers, the report called for continuance of the traditional free enterprise system supplemented by constructive government assistance where necessary

Long-range recommendations include maximum use of labor and productive facilities, prevention of economic fluctuations, cooperation in international trade and finance, and promotion of welfare, health and security.

Because of their immediate bearing, the short-range recommendations were of greater interest. The report asked for the maintenance of present tax rates to provide for substantial retirement of the national debt; lowering of prices wherever possible to increase consumption; moderation of labor demands to head off additional price rises; increase in the minimum wage above 40 cents an hour, and extension of the fair labor standards act to workers now excluded.

TEMPORARY TREND

Marriages and Births Hit Peak

WASHINGTON. — Return of war veterans was largely responsible for boosting marriages and births to record highs in 1946. Viewing the trend, population experts are trying to figure out how long the United States can support large population increases, but Guy Irving Burch, director of the population reference bureau, believes the rise is only temporary.

Births in 1946 were one per cent greater than in 1943, previous record year, according to the office of vital statistics.

Births headed toward a peak 11 months after a record high in the number of American marriages. The trend still is upward.

Family Size Drops.

Before the 1946 rise in the birth rate the average size of the "completed" American family was about 2.5 children. It is estimated that 2.2 children a family would maintain the population at its present size of about 140,000,000.

Burch says the increase in births "definitely appears to be temporary, entirely attributable to the return of war veterans."

Statistics for cities of more than 100,000 population, most comprehensive figures available, show more marriages were performed in the first nine months of the year than in all of 1942, previous high year.

More Families Created.

Apparently styles in the sizes of families are not changing, Burch says. "It's simply that we've had more marriages and more families have been created with one and two children in them. Over long periods the tendency toward large families has been downward.

"It's more reasonable to assume this is what is happening:

"The statistics show that, first, the depression postponed about 800,000 marriages for a time; second, the war caused young people to defer marriage.

"Veterans have returned. They were, and still are, being married in large numbers. So the birth rate is up. This will continue for a time. But then the trend will recede. Births will decline.

"Most students of population trends agree that the United States will experience a decline of around 25 per cent in the birth rate before the year 2000.

"The experts disagree when the population total will 'stabilize' itself. these estimates range from the present number of about 140,000,000 persons to about 175,000,000 or even 200,000,000."

IT'S ABOUT TIME

Delays Sometimes Harrowing, But Old Wrongs Finally Healed

WNU Features.

Time heals all wrongs. If you're inclined to doubt that old adage, read these:

Elmer L. Nolte now can call himself officially a graduate of Lewistown, Pa., high school. Unofficially, he has been a graduate since 1889. The school board finally decided that Nolte should be given the diploma he didn't get when the great June flood of 1889 halted graduation exercises.

The school of agriculture at Pennsylvania State college received a letter from a farmer who requested the second of a series of lessons for which he had enrolled. After a harrowing investigation, extension service workers learned that the student had signed up for the course in 1908.

In 1916 George W Austin quit high school in Stamford, Conn , and went into business. Recently he decided to obtain his high school diploma. Returning to the school for a week, Austin successfully passed examinations in history, science and social studies, and was awarded the certificate—30 years late.

Smiling sweetly, a 94-year-old woman told Frank McAuliffe, jewelry salesman in a San Francisco store:

"I'd like to pick up that silver gravy boat I left here to be cleaned. My sister said she'd be angry with me if I didn't get it pretty soon."

McAuliffe inquired. "When did you leave it? Several weeks ago?"

"Oh, my no—in 1902."

McAuliffe found it too—in the basement.

At New Rochelle, N. Y., an elderly woman boarded a New Haven train.

"I didn't buy it today," she told the conductor as she handed him her ticket. He looked at the ticket and blinked. It was dated September, 1898.

The passenger made her trip through. There was no time limit on such tickets back in those days.

George Cain, 77-year-old resident of Brisbane, Australia, recently was awarded a medal which he won fighting for the British army 56 years ago. In September, 1890, Cain was one of the five survivors of an expedition into Rhodesia. It took the London war office 35 years to decide on the award and another 21 years to locate Cain and deliver the decoration to him.

Back in 1930, Charles B. Borell of Champlain, N. Y., then an employe of the U. S. Immigration service, was ordered to proceed from Belfast, Ireland, to New York. He sent his household goods ahead by freighter. It was only a few months ago that congress finally got around to authorizing payment of $163.20 to Borell for the shipping charges. His claim had been held up for 16 years because he failed to route the goods on an American vessel.

Arduous Walk Fails To Halt Man of 92

MOBILE, ALA. — Although 92 years old, George (Dad) Howe is still sprightly after completing a two-month, 504-mile walking trip from Savannah, Ga , to Mobile. His eventual goal is Los Angeles, which he hopes to reach on September 21, his next birthday anniversary

"California Bound" is the legend on the little wagon which Howe pulls. His home is an army pup tent, and he says he has slept under a roof only five times since leaving Savannah.

He also carries equipment to permit cooking his own meals.

Howe has a two-fold purpose in undertaking the long journey to the coast: To see if a man his age can stand the walking and to visit a grand nephew in Los Angeles.

Cowboy Now Rides Herd on Fur Coats

BERWICK, ME.—A former Colorado cowboy now is riding herd to 100 tiny, scampering chinchillas valued at about $1,000 each.

Clifford H. Wilson currently does his branding on the right ear of the little creatures, whose pelts make desirable fur coats.

With a pair of chinchillas imported from South America, Wilson and his wife started their chinchilla ranch here three years ago. By careful breeding methods, they have increased their herd to more than 100 animals. Several pairs have gone to begin other ranches.

The chinchillas thrive on dried grasses, berries and nuts. Goat's milk agrees with them so well that Wilson has bought a dozen goats.

Bane Lots of Johnsons In Northwest, By Golly

ST. PAUL, MINN.—The Jones boys are unusual in the Northwest, Veterans' administration officials decided after finding only 1,600 of that clan listed on their records.

They are far outclassed by 9,680 Johnsons and 5,600 Andersons. The Petersons and Smiths number 3,300 each.

'Stuffed' Owl Hoots And Empties Tavern

CHICAGO.—To give a little life to the collection of stuffed birds which adorn the walls of James Kromar's tavern, a regular customer presented the proprietor a live owl.

Kromar placed the bird atop the cash register, the owl sitting almost motionless among the specimens of the taxidermist's art. Most of the customers were unaware that the bird was alive. But when the owl began to blink and hoot, many of the patrons made a hurried exit.

The owl next was presented to the Anti-Cruelty society.

People Are Honest, Blind Man Testifies

DENVER. — A man approached Melvin Wasson, blind operator of the news stand in Denver postoffice, and said: "Here, I owe you four dollars." The man explained that he had given Wasson a dollar bill the night before and said it was a five "because I was short and needed the money to tide me over."

Wasson, telling the story, grinned and said: "If you give people credit for being honest the chances are 100-to-1 they will be."

SQUIRTS FOR LITTLE DITTOS . . . Two Chinese youngsters, riding in a wheelbarrow, are sprayed with DDT as the U. S. army sprays an entire village near Shanghai as a means of combating malaria.

Paralyzed Woman Cooks from Bed

RIVERSIDE, R. I. — Although partly paralyzed and bedridden, Mrs. Elizabeth Doyle, 74, runs a house and does all her cooking from her bed.

Part of the secret is strings. They run from her bed to the door latches, the fan plugs and radio dial A small electric stove is at her side while a nearby table and cloth bag slung to it contain food and the necessary ingredients for cooking plus all the odds and ends a housewife needs.

Mrs. Doyle's cooking isn't confined to immediate needs. She has put up plum and apple preserves while lying in bed.

With most of the cooking accomplished in the morning, Mrs. Doyle often sews, crochets or fixes her scrapbooks in the afternoons. A district nurse calls every other day to dust and help straighten out the house.

"Off We Go" AVIATION NOTES

BUG AIR BLITZ

While the army and navy air forces are going all-out to prepare for stratospheric warfare, another government department is working this winter for a full scale aerial offensive next summer—against a foe over which the United Nations has no control.

The bureau of entomology and plant quarantine of the department of agriculture is mobilizing its own air force for the greatest attack in its history on such crop and forest destroying insects as the Japanese beetle, gypsy moth, white fringe beetle, pink bollworm, spruce bug work and the lowly but greedy spittle bug.

Damage to crops and woodlands from the insects is estimated by agriculture specialists at between three and five billion dollars annually.

Planes operated in the bug blitz bear scant resemblance to the sleek modern machines of aerial warfare. Some are as old as 15 years, and their worth is measured in terms of their ability to fly slowly and at low altitudes.

The department will put into the air its own air force of at least 15 planes, augmented by any number of planes chartered locally. Practically every private airport of reasonable size in the country is equipping at least one airplane with spray apparatus.

Department experts contend that experiences last year proved that one plane can spray 1,000 acres in one day, while to cover that same area with ground equipment would require 70 men with seven machines five weeks.

* * *

FOLDING WINGS . . . Striking feature of the L-13, America's first all-metal liaison airplane, are its folding wings, shown in the above photograph. An aerial jack-of-all-trades, the Consolidated Vultee plane is suitable for many uses.

* * *

INEXPENSIVE LIGHTING

Small airports can be lighted for night flying at a cost of about $2,600, Civil Aeronautics administration reports on the basis of an experimental installation at Lafayette, Ind., now undergoing tests. Results at Aretz airport show that the lights identify the airport for a pilot flying at 1,000 feet from a distance of 15 to 18 miles, and in an exceptional case the lights have been seen from 30 miles away. Operating cost for current averages about 15 cents an hour.

EDISON CENTENNIAL

Early Efforts Backfired but Lessons Brought Lasting Fame

WNU Features.

During his lifetime Thomas A. Edison found time to root around in about everybody's backyard, doping out a gadget or a machine or a formula that would help his neighbor. He was crammed with ideas about many things, some of which, as everybody knows, brought him enduring fame. There were some, however, that his 84 years did not give him time to perfect.

As the 100th anniversary of his birth, on February 11, 1847, approaches, there are probably very few people who know that Edison once won a patent on a "flying machine." Back in 1910, he doped out an idea on a helicopter, in which field he thought the future of aviation lay. On another occasion he was granted a patent on a method of preserving fruit, and when he died he was working on a formula for extraction of rubber from the lowly goldenrod.

'Wizard' Was Human.

Edison once even worked on an insecticide, and this experience shows a human side that belies any suggestion that he had a "magic thumb" in the inventive business. He was just coming into fame as the "Wizard of Menlo Park" when he was approached by a neighboring farmer whose principal crop was threatened with destruction by an invasion of potato bugs. The year was 1878, Tom was 31, and he already had to his credit such inventions as the phonograph and a score of telegraph patents. The farmer allowed as how an up-and-coming young inventor ought to be able to find a way to kill off the potato bugs.

Accepting the challenge, although he knew relatively nothing about bugs and plants, Edison collected a quart bottle full of potato bugs and set forth to compound a lethal potion. Testing every chemical in his laboratory, he hit upon bisulphide of carbon as a sure-fire potato bug killer. Jubilantly, he and the farmer sprinkled the infested potato vines and waited to tabulate the results.

The bugs died like flies—but so did the potato vines; and Edison had to pay the farmer $300 damages for, as he put it, "not experimenting properly."

He never again made the mistake of not experimenting enough. Consequently, some of his inventions took him years to perfect, and because of his patience the world has become a much better place in which to live. His invention of the electric light made necessary a system of electrical distribution which brought not only light but also scores of electrical gadgets to the farm home as well as city residence. His phonograph put the best music into the home, and his numerous other inventions, including the motion picture, made life easier, more comfortable and entertaining.

Worked Too Well.

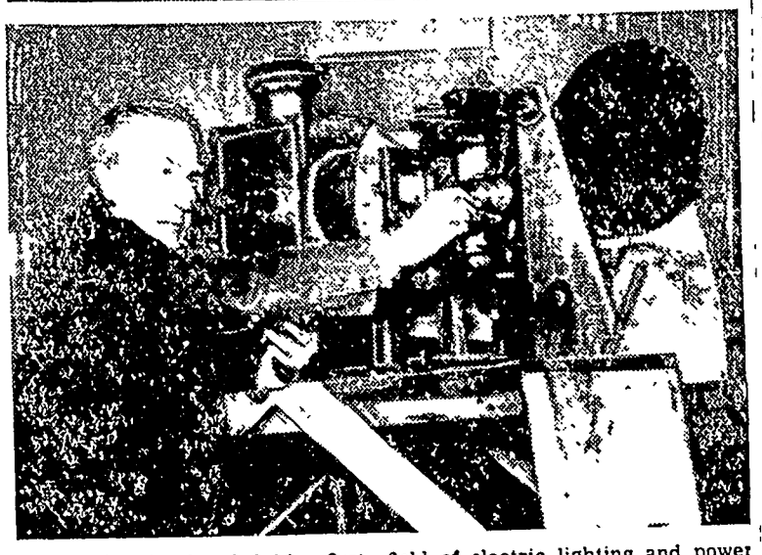
There was one other of Edison's creations which backfired, but it wasn't because he hadn't perfected it; this one, on the contrary, worked too well. At one time he was working as night telegraph operator in the Grand Truck railroad station at Stratford Junction, Canada. One of the requirements of the job was that Edison, then 17, must check in on the wire every half hour by sending the signal 6 in Morse code to the train dispatcher at a nearby station.

Edison deplored this arrangement because it prevented him from catching up on the sleep he wasn't getting during the daytime, which he spent in study and experimentation. So he rigged up a device for automatically sending out the signal 6. He hooked up the instrument to the office clock so that every 30 minutes the signal went out over the wire, thus reassuring the dispatcher that Edison was on the job whereas, in fact, he was sound asleep.

This ruse was successful until one night the train dispatcher tried vainly to contact Edison on the wire during one of his catnaps. Alarmed by the prospect that the Stratford Junction telegraph office was unmanned, the dispatcher made his way to Edison's office on a handcar. He arrived just in time to find Edison blissfully sleeping while the young inventor's machine obediently dotted-and-dashed the prescribed signal.

The next day Edison started looking for another job, but the experiment proved of incalculable value because it started him on a train of thought that led him first to the invention of a stock ticker and an automatic telegraph, thence to the phonograph and later to the motion picture camera.

Two highlights in Thomas A. Edison's amazing career are shown in these pictures. Top, Edison is shown demonstrating his first phonograph at the White House on April 18, 1878. Lower, the inventor is shown operating an early and crude model of his first motion picture machine.



Earns First Money.

With the idea planted in his mind of constructing telegraph apparatus that would automatically send and record messages, Edison invented and patented an improved stock ticker. It was so much better than the crude tickers which antedated his that a telegraph company paid him $40,000 for it—the first money Edison ever received for an invention.

With the $40,000 Edison established a shop in Newark, N. J., in 1870, and began the manufacture of stock tickers. He was 23, and for the first time in his life he had enough money to experiment with the hundred and one ideas that coursed through his agile mind.

One of a score of telegraphic patents he took out as a result of his experiments in Newark was on an automatic telegraph, which could send and record messages on a strip of paper tape at a rate far beyond the speed possible in sending and receiving by hand. In seeking to improve his first automatic telegraph, Edison experimented with a machine employing a turntable covered with a paper disc. Perforations in the paper disc sent out dots and dashes when the turntable was rotated. One day, however, the turntable was operated at an excessive speed and, instead of dots and dashes, the result was a musical hum. Edison was quick to sense the possibilities of his discovery, and on July 18, 1877, he made the following entry in one of the 2,500 notebooks he filled with scientific data and reports before his death at 84 on October 18, 1931:

"Just tried experiment with a diaphragm having an embossed point and held against paraffin paper moving rapidly. The speaking vibrations are indented nicely and there is no doubt that I shall be able to store up and reproduce automatically at any future time the human voice perfectly."

Less than a month later he did just that.

First Movie Was 'Talkie.'

Ten years later, in 1887, Edison set out, as he later commented, "to do for the eye what the phonograph did for the ear." The result was the birth of what today is probably the most glamorous industry in the world—the motion picture industry.

Thus it was that the germ of an idea which took root in Edison's mind when he was fired as a telegraph operator ultimately led to invention of the stock ticker, the automatic telegraph, the phonograph and the motion picture camera.

Edison probably is best remembered as the inventor of the first practical incandescent lamp. The lamp was a handy symbol of achievement seized upon by the public, but actually it constituted only a small portion of his work in the field of electric lighting and power distribution.

From 1868, when he received his first patent for an electrically energized voting machine, until his death 63 years later, Edison created 1,097 patentable inventions — by far the greatest number of patents ever issued to any one individual by the United States Patent office. The wide range of his accomplishments is almost unbelievable.

The carbon transmitter that made Alexander Graham Bell's telephone a commercial success was an Edison invention, and for many years the names of both Bell and Edison appeared on telephone instruments. This same transmitter later was adapted to radio and served as the first broadcasting microphone.

Perfects Telegraphy.

Edison patented a system of telegraphy through space six years before Guglielmo Marconi made the instrument that earned him the title of "Father of Wireless Telegraphy."

Edison invented, built and operated the first electric railroad in America. Some of his patents caused revolutionary changes in the cement industry, and as early as 1908 he was building cement houses with prefabricated molds.

He invented an electric automobile, a helicopter, a method of making plate glass. He patented a method of preserving fresh fruits and vegetables in glass containers; he devised a machine, called the micro-tasimeter, for measuring minute heat fractions, and another, the odoroscope, for registering the presence of odors, however slight.

Indefatigable Worker.

Before introduction of the typewriter, Edison invented an electric pen which cut stencils of handwriting so that one letter could be reproduced in illimitable quantities. Its modern counterpart is the mimeograph machine.

These and scores of other creations, some of great importance and some, like his talking doll, hardly more than novelties, came out of Edison's mind.

He rued the fact that the day contained only 24 hours, because it did not give him enough time to do everything he wanted to do. His favorite motto — and one which he displayed prominently on the walls of his laboratory and offices—was a quotation which said, "There is no expedient to which a man will not resort to avoid the serious labor of thinking."

Although Edison lived to be 84, he continued to put in long hours of study and work right up until a few weeks before his death. When friends chided him about not retiring to a life of ease, his reply was that "There'll be plenty of time to think about retiring when I reach 100."

Tom Edison has "reached 100" and he has "retired," but his memory lives on in a thousand creations that have benefitted mankind.

Hypnotism Aids in Tooth Extraction

BAKERSFIELD, CALIF.— Hypnotism, long considered a good stage trick but also utilized in medicine and in curing mental ills during recent years, found a new use in dentistry here.

When Mrs. Violet Nicola went to a medical-dental clinic to have two teeth extracted, it was discovered that she was allergic to all types of anesthetics. The dentist called two doctors and a psycho-therapist into consultation. The consulting psycho-therapist started talking to the patient and within a few seconds she was in a hypnotic trance.

Thirty minutes later Mrs. Nicola was brought out of the trance, minus her two teeth but completely unaware that they were gone. Although the doctors and two other witnesses told her the operation was over, Mrs. Nicola was not convinced until she looked in a mirror.

Boy Peruses Comics As Home Fire Flares

CHAMPAIGN, ILL. — Even a fire in his own home could not induce seven-year-old Bernard Burke to abandon his comic book. Firemen, called to the Burke home to quell a blaze, found Bernard in the bathtub reading a comic book. To anxious queries, Bernard calmly explained: "I'm busy. The firemen will put it out." After the blaze was out, Bernard was still in the tub.

"GAY GADGETS"

Associated Newspapers—WNU Features

By NANCY PEPPER

PARTY PATTER

The winter season hasn't officially started until someone gives a party. Just in case that someone is you, here are two teen-tested ideas guaranteed to keep the gang so busy that nobody ever will suggest a kissing game.

Relay Relaxation—Divide the gang into two teams. Give each team a folding chair, a lunch box with a whistle in it and an umbrella. First in line on both teams must take all these articles to the far end of the room; put up the chair, sit on it, open the lunch box, blow the whistle, open the umbrella, then fold everything up again, return to the team and pass all the stuff on to the next in line. The team that finishes first wins. In fact, everybody has a wonderful time except your parents, who are stuffing cotton into their ears.

Parlor Picnic—Pack a picnic basket for every couple and identify each with a tag that has a movie actress' name on one side and the name of a girl at the party on the other. Supply the boys with fake money and then have them bid for the baskets of their favorite movie queens. The boy who bids for and gets the basket tagged Lana Turner may be disappointed to find that Mary Jones goes with it. Whether or not he cheers up as they plow through the sandwiches is up to Mary.

ALL WORK AND NO PLAY

I've made conversation
For hours on end,
To laugh at his jokes
I've had to pretend.
I've danced till my feet
Won't perform any more,
(While he's danced on my toes,
Instead of the floor).
He's ruined both my shoes,
And spilt cokes on my dress,
'Till I'm sadly aware that
I look like a mess.
Now, at the end, when I
Want to relax, he
Tells me we'll walk,
'Coz he can't pay a taxi.
The evening's been long and
So dreary and blunder full—
TELL MY WHY TEENS THINK
THAT DATES ARE SO WONDERFUL!

Gray Casual Dress

Perfect for chilly days is this full bodied wool jersey dress with slot-tuck seaming which accents sleeve fullness. The dress features a neckline filled with scarf and a saddle tan leather belt which shapes the fullness of the skirt.

Minute Make-Ups

By GABRIELLE

Once again it's glitter! Beads, gold and silver painted feathers, rhinestones. And you can add to that glitter by little touches. Silver ribbon rosettes on velvet bands to wear about your throat, your hair, your wrists. Beaded roses, a huge pink one tipped in silver sequins makes a simple dress into a creation. So—Glitter!

Mr and Mrs. Emil Blumer and Mrs. Merlin Neuberger and Dean, left Monday on a six weeks trip through the south Their destination is Brownsville, Texas, where they will visit the John Neuberger family

Mrs. Earl Mixel, of Albany, Orgeon, visited from last Wednesday until Friday at the Ben Ridder home in Liberty township. She then went to Ayrshire, Iowa, for a visit with her parents, Rev. and Mrs. Howdeshell.

"Red" Buntenbach of Upper Iowa University, Fayette, spent the week end visiting his parents, Mr. and Mrs. Ed. Buntenbach "Red" was also doing some flying from the Wicks airport at Garner while at home.

Rev. Fred Griewe, of Garner again supplied the pulpit at the Klemme and Liberty Methodist Churches last Sunday, for Rev. H E. Harvey who is ill. Rev. Harvey returned home Friday from the Park Hospital at Mason City where he was a patient for about ten days. He will not be able to preach for about six weeks.

Mr and Mrs. O. A. Fredin and Donald of Fort Dodge came Saturday and spent the night at the Mrs. C. A. Arnold and James Fredin homes. Sunday Mr. and Mrs. O A. Fredin and Donald and Mrs James Fredin went to Rochester, Minnesota to visit James Fredin who is undergoing treatment at the Warrall Hospital there. They found James much improved

Champion of Liberty. How the zeal of two great editors brought the famous statue to Bedloe's Island, told by Jack Stone in The American Weekly, the magazine distributed with the next week's CHICAGO SUNDAY HERALD-AMERICAN.

Running hot water through the cream separator before putting the milk through will mean closer skimming if the machine is in good condition.

Installed Electric Dish Washing Machin In Cafe

Last week Mr and Mrs. Tom Roths improved their place of business by installing an electric dish washing machine in their kitchen at the cafe The new machine works perfectly; it not only washes dishes, but also grinds garbage and disposes of it. It is a great time saver in the kitchen.

Shamrocks Drub Hayfield Hornets In Game Here

Coach "Pat" Patterson's High School Shamrocks chalked up another ball win Thursday evening when they drubbed the Hayfield Hornets 63-16. The Shamrocks were ahead 30-6 at the half Patterson used a lot of his reserves in this game to give them experience. Lanky Carolus starred for the Shamrocks by splitting the net for 27 points.

The Little Shamrocks also won their game in a closely fought contest 23-22.

Corn does best with fertilizer applied at the side of the row.

Sam Hackney Repo on the U.S.A.

Sam Hackney and the missus just returned from a trailer trip around the country. They're tired, and glad to be home, but mighty impressed with what they saw.

As Sam reports—every section has something different; a different way of talking; different tastes in food and drink; different laws and customs. But bigger than all these differences is the American spirit of tolerance that lets us live together in united peace.

"Of course," says Sam, "you run into *intolerance* from time to time. Individuals who cri other's right to speak h enjoy a glass of beer; or any trade he chooses. But the exceptions—and we tolerant of them!"

From where I sit, mo ought to make a trip Hackneys — to realize how America is bigger many differences ... h of those differences is thing that makes us stro

Iowa Newspaper Editor Finds Telephone Rate *Boosts Necessary*

The following unsolicited editorial appeared in the Jan. 16th issue of the Eldora Herald-Ledger.

COMMUNICATION COSTS

The recently announced price boost in telephone rates in Eldora and most other communities has roused widespread protests. It seems to the layman that here is another instance on the part of vested interests to take advantage of the upward spiral of prices to profiteer at the expense of a helpless public. Now far be it from us to defend moves which balloon our already inflated dollar even further, however, we do happen to know that the price increase in telephone rates was made with the greatest reluctance on the part of the telephone people.

Without going into stastistical detail on comparative costs, let us look at the situation confronting communication companies. When the recently abandoned rates were established, labor and material costs were at a very reasonable level, and although forseeable emergencies were provided for when the rate was computed, only a very small margin of profit was provided for on the theory, later proven, that the lowest possible rat would encourage widespread use of the facilities.

During the war replacement equipment was, for all practical purposes, unobtainable, so, in spite of increased wage costs, the communication companies were able to operate at the old rates. With the end of the war the much-patched equipment could be patched no more and had to be replaced. And replacements were again available in limited quantities . . . at greatly increased costs.

Still, the increase in the cost of wire, switches, telephones, tools, trucks and all the countless things that communication companies must use constitute a small part of the increased cost of operation. Wages paid to employees is by far the greatest item in the expense of operation.

Communication comp have been forced to wage boosts to their empl to meet the rising costs o ing. As a result of these increases, the Western Telegraph company ca longer operate without subsidized. Telephone ployees who used to get cents an hour have been g ed a substantial increas almost a fifty percent r

Telephone employees ed this extra money for expenses, and they are s ing this money in the munity in which they are ployed. So you see the er telephone rates we are ing are not going to lin pockets of some pos profiteer, but to help neighbor get-along until t come back to somewhere mal.

Luella Thiemann Bride At Church Ceremony Here

YOUNG COUPLE WILL MAKE THEIR HOME ON FARM

Bride Attended Schools In Ell Township And Klemme

The Klemme Evangelical and Reformed Church was the scene of a marriage ceremony Tuesday afternoon, January 28th, 1947, when Miss Luella Thiemann, daughter of Mr and Mrs Henry Thiemann of Klemme became the bride of Mr Roland F Yakel, son of Mr and Mrs. Chris Yakel of Lincoln, Nebraska.

MRS. ROLAND YAKEL

The attendants were Miss Shirley Fekkers, of Meservey, sister of the bridegroom, and Mr. Paul Thiemann, brother of the bride.

The bride was attired in a light gray suit and wore a sholuder corsage of red roses Miss Fekkers wore a fuchi dress with a corsage of white carnations The groom wore a navy blue pinstripe suit and his bestman wore a brown suit.

The bride attended the grade school in Ell Township No. 7 and completed her education in the Klemme High School Mr Yakel attended the school at Alexander, Iowa.

Mr. and Mrs. Yakel will make their home on a farm southwest of Meservey

A reception and dance was held in honor of the couple at the Klemme Community Hall on Tuesday evening, which was attended by a large crowd.

Poliomyelitis, A Year Around Menace Need Aid, Contributions Lag In County

Chairman Roy L McMillin, of the Hancock county March of Dimes campaign for Infantile Paralysis, reports that the general response to the March of Dimes campaign letters mailed to 4000 Hancock county homes is not what the committee had expected and he urges that those homes that have not forwarded their March of Dimes contributions to do so at the earliest possible time.

The 1947 March of Dimes began January 15 and runs through Jan. 30—16 days. But infantile paralysis attacks daily—and our doctors and scientists are still on the offensive against the malady. For 16 days we are afforded the opportunity to furnish year-round ammunition—to put our dimes and dollars against a ruthless enemy of the nation and its children.

The polio virus is one of the most dreaded foes of American families. It strikes swiftly and deadly, with scarcely preceptible warning, eating away nerve centers, wasting muscles, maiming limbs, taking lives.

Last year our dimes marched against one of the most disastrous polio epidemics to sweep the nation since 1916, the worst in our country's history when the final tally for 1946 is complete indications are that it will exceed 20,000 victims.

You may be helping to save the life of some child within your own community who may be stricken with this dreaded disease.

HELLO, FOLKS!

Mr. and Mrs. Eugene Johnson of Clear Lake are the parents of a 7½ pound baby boy born on Saturday, February 1st at the Mercy hospital. He has been named Eugene Ellsworth. It is their second child.

GROUND HOG SAW HIS SHADOW

Sunday, February 2nd was a bright sunshiny day and so the ground hog saw his shadow and we are doomed for six more weeks of cold, winter weather

LANUCH DRIVE TO IMPROVE POULTRY MEAT

Initial plans were being completed this week for an all-out drive in Hancock County and the district around Mason City, to improve the quality of poultry meat, according to Paul Henderson, county extension director

Listed as one job in the state this year, the campaign to raise the quality standards of Iowa poultry is receiving the cooperation of all poultry and allied industries, Henderson said

The campaign is labeled the Chicken-Of Tomarrow Program and calls for the adoption of sound, up-to-date breeding and management practices to produce chickens that dress out quality carcasses. Henderson says the poultry industry and poultry specialists at Iowa State College have pointed out that unless the state does improve quality there is danger of losing profitable markets to outside competition.

To get the program rolling in the county, Henderson says all local hatcherymen, feed dealers, lumber dealers, produce station operators, veterinarians, vocational agricultural instructors and other interested agricultural leaders are being invited to attend a Chicken-Of Tomorrow meeting at Mason City, Tuesday afternoon in the Y. M. C. A. at 2:00 p. m.

Purpose of this meeting will be to discuss the need for quality poultry improvement and to outline the steps needed in the district to bring this improvement about.

Plans also will be laid at the meeting for the Chicken-Of-Tomorrow contest which is being held in connection with the program. Purpose of the contest is to locate and recognize flock owners and breeders in the district who are doing and outstanding job of quality production.

HENRY JOST TAKES OVER D-X SERVICE STATION HERE

Henry Jost took over the D-X service station here Monday from Carl Nettifee, who had given up his lease and expects to leave soon for Texas.

Mr. and Mrs. Jost are the owners of the station and for the past few years have leased it to others.

Mr. Nettifee expects to leave in a few weeks for McAllen, Texas to join his wife and baby who now reside there. Mrs. Nettifee is employed as a waitress in a cafe at McAllen, which position she held during the war.

Soybean seed is expected to be scarce and high-priced next spring.

Deer Me!

TO REDUCE DEER HERD NEAR CEDAR FALLS

A fifty percent reduction in the deer herd centered in the Josh Higgins Parway along the Cedar River between Cedar Falls and Waterloo has been recommended to the Conservation Commission by departmental technicians. Investigations following numerous complaints by farmers of serious crop damage in the vicinity reveal that more than 100 deer are concentrated in the area Extensive damage to corn, alfalfa, soy beans, truck garden crops and to tree plantations have been investigated The recommendation advocated the use of state conservation officers in destroying the deer with the venison being given to charitable organizations

This procedure was followed in 1943 in the Ledges Park vicinity when more than 100 deer were killed and the large herd in that vicinity disapersed. Since control measures were taken in the Ledges Park damage has been decreased to a minimum; however as a result of the dispersal, small herds have mushroomed over wide areas and, in some instances, are becoming nuisances from an agricultural standpoint

The game technicians have advised that because of the critical situation in Josh Higgins area immediate steps be taken to reduce the herds but not to eliminate them from the area

Numerous Bobcats Reported

Widespread reports of wildcats being killed in the state during the past few weeks indicate that another wild animal is making a definite comeback in Iowa. The wildcat, bobcat or lynx was considered extinct for many years and occasional animal killed during the last decade was a rarity During the fox and rabbit hunting season in 1946 and again this year bobcats were killed in some numbers, particularly in the eastern part of the state One fur-buyer has purchased five bobcat skins from Iowa hunters this season The wildcat is a predatory animal and lives principally on small animals Game biologists believe that Iowa cats are living primarily on cottentail rabbits. This animal sometimes confused with housecats that have gone wild; however, the wildcat is a much larger animal than even the largest domestic cats, reaching aweight of from twenty to twenty-five pounds.

ED. BUNTENBACH SALE BARN MISSED ONE SALE DAY SINCE 1936

When Ed. Buntenbach opened his livestock sale barn at Garner thirteen years ago he determined that he would hold a sale every Thursday regardless of weather, holidays or anything else.

Ed. kept his record near perfect but Old Man Weather stepped into the picture last Thursday when Ed. was stranded at a farm home south of Goodell and all roads were blocked. That Thursday there was no sale at his barn. Again back in 1936 when some roads were blocked for weeks another sale date was missed. If our readers recall, in 1936, there was not a train into Klemme for three weeks and fuel piles were low. The highway would be opened one day, and in a few hours the high winds would close them with drifts, and the job had to be done all over again the next day. At that time Iowa experienced its longest period of cold weather in history. For three weeks the thermometer never went higher than 20 degrees below zero!

Mr. Buntenbach remarked that Iowa, however, is not such a bad state as far as weather is concerned. He has a remarkable record in his sales record of only one miss in eleven years.

BOY SCOUT WEEK

Nearly 2,000,000 Cub Scouts, Boy Scouts and Senior Scouts will observe the 37th anniversary of the Boy Scouts of America during Boy Scout Week, Feb. 7th to 13th. Through their World Friendship Fund of voluntary gifts the Boy Scouts of America have given $110,-000.00 to help Boy Scouts overseas rebuild their organizations during the first year of their "Shirts-Off-Our-Backs" project more than 400 cases—or twenty tons—of Scout Uniforms and equipment collected from Scouts were contributed to Scouts in 13 nations. Scouting has always been an active force in promoting better understanding and mutual goodwill among the nations. Above is the official poster marking the event.

A Tribute To Paul Howdeshell Former Klemme Youth

(Aryshire Chronicle)

The following letter of sypthathy was received by Rev. and Mrs J M Hodweshell from a friends of their son, Paul, in Detriot

18628 Lindsay Street
Detroit 19, Michigan
January 9, 1947

Dear Rev and Mrs. Howdeshell:

There is little I can do to alleviate the sorrow and grief that has come upon your family at this time I wish to express my sympathy for you and trust that you find consolation in the knowledge that Paul was a gentleman of fine charcter.

Paul and I worked together at Detroit Terminal warehouse for about 18 months. During that time we ate lunch together five days a week, which gave me an opportunity to know him and appreciate him. More recently I recommended him for a position with Cunningham-Ruddy company, telling them his qualifications and charcater. The interviewer asked if there was anything further I wished to say about him. I stated that if they gave him a fair trial they would be more than satisfied with him in a short time.

Paul was an individual set apart from all other men I know. His sincerity and friendliness made him seem over aggressive when one first met him However, as time went by one saw the true nature of his charcater The many little things he did for all his friends are remembered One would see him with any encumbrance such as pressure cookers, hams, candy or it might be anything under the sun. These items would be for friends and clearly reflected his character. Paul got a lot of satifaction out of life in this manner.

Paul had many friends around town, and I presume that many of them had the same experinece I had. That was a telephone call from him wishing me a Merry Christmas. He was thinking about his friends and took the time to say hello. Fate would have it the last contact between us.

Except from observation I know little about his philosophy of life. In conversation he never to my knowledge used "cuss" words let alone vile phrases that sometimes come from mouths of men. He conducted himself as a gentleman. There is no question in my mind that you agree with me that when one lives by the Ten Commandments, the Golden Rule, and foremost by the teachings of Christ that there is a reward.

Preachers of the Gospel, parents and others sometimes do not appreciate the fruits of their teachings. Here was an example of a man absorbing Christian principles in his youth, going out in the world transmitting these same prnciples to his friends. I hope to absorb some of them and in turn sow the seed with my children. Personally, Paul left an impression that will have lasting effect.

I know that you feel sad and lonely at this time. However, I am sure that you also feel consoled by the fact that you have been instrumental in enriching the lives of Paul's many friends.

Sincerely,
Angus MacAskill

BANK DEPOSITS AT RECORD HIGH

Footing In Hancock County At 11 Million

The 6 banks operating in Hancock county under state and national charters had a total footings on Dec. 31 of $11,469,071.40, the largest in the history of the county.

Deposits totaled $10,885,981.10 also a record high. High prices for soybeans and hogs are reason for the increase to bankers.

The First State Bank of Britt led the field of 6 banks, with deposits of $3,484,948.70 and total footings fo $3,679,457.62.

The Hancock County National of Garner listed deposits at $2,580,344.67, and total footings of $2,694,810.22; Farmers State Bank of Kanawha, listed deposits in the sum of $1,945,252.06 and total footings of $2,063,688.66.

First National of Klemme, had deposits totaling $1,898,871.00, and total footings of $1,980,320.96; State Savings Bank of Goodell listed deposits in the sum of $559,875.04, and total footings of $587,995.33.

Farmers Bank and Trust Company, which was organized a little over a year ago, listed deposits in the sum of $416,689.63, and total footings of $462,789.61.

The Iowa 1946 fall crop was 16 percent smaller than that of a year ago.

All Roads Closed As 2-Day Blizzard Hit Iowa Wednesday

MOTHER OF LEVI KLOTZBACH DIED THURSDAY AT GIARD, IOWA

Mrs. Katharine Klotzbach 93, who had lived in the Giard area of northwestern Iowa since her childhood and had seen 90 years of changes from primitive to modern ways of living, died on Thursday.

She was buried in much the same manner as the pioneers laid away their dead. Roads to Giard cemetery were blocked with snowdrifts. Farmers opened a trail across snow-swept fields. The casket was carried from the field and through an opening cut in the drifts to the cemetery.

Mrs Klotzbach, who had lived in the vicinity of Giard longer than any other person, is survived by nine children, 32 grandchildren and 22 great-grandchildren

She was the mother of Levi Klotzbach of Klemme and the step-mother of Mrs. Anna Ulrich, also of Klemme.

Treated and Untreated Oat Growing At Farm Bureau Office

Paul Henderson, County Extension Director, has two oat plants growing at the Farm Bureau office. These oats are planted to show the results of treating oats versus not treating. The new blight know as Helminthosporium was very disasterous in some fields last year and promises to be worse in 1947. Treating the seed with the new improved Ceresan is one way to help increase yields. Treated vrsus non-treated seed in 1946 produced an average of about 20 bushels per acre on Tama, Boone and Control varieties. Treat all of all the oats and flax you plant. Cleaning also helps a great deal.

Circle Meets

Circle No. 4 of the Methodist W. S. C. S. met for a quilting party at the home of Mrs. D. P. Anderson, Tuesday.

CLEAR LAKE GIRL BRIDE OF KLEMME YOUNG MAN

Betty Jean Brower And Cortland Dorenkamp Married Jan. 22

Mr. and Mrs. Henry Brower, 504 North Street, Clear Lake, announce the marriage of their daughter, Betty Jean, to Cortland George Dorenkamp, son of Mrs. Hauka Barkema of near Klemme, on Wednesday evening, January 22 at the Gretna Green Wedding Chapel at Yuma, Arizona. The ceremony was performed by Rev. L. L. Roberts.

MRS. C. G. DORENKAMP

The bride is a graduate of the Clear Lake high school and the bridegroom, Cortland G. Dorenkamp, is a baker First Class in the U. S. Navy and is stationed at San Diego, California.

The couple will make their home at Imperial Beach, Calif.

WAS WORST IN THE PAST FIVE YEARS

Schools Closed Down On Account Of Blocked Roads

The worst blizzard in 5 years struck Iowa last Wednesday and Thursday, blocking every highway in the state, many which were not opened until Saturday. An estimated 14 inches of snow fell in north Iowa.

Schools were closed and there was no mail service until Friday. The Hancock County Basketball tournament scheduled to be played in Klemme beginning Wednesday night was called off and started again Saturday afternoon. The Garner team arrived here, but were snowed in until Thursday afternoon.

Klemme started digging out Thursday when the snow plow made the rounds and had most streets opened to traffic by evening. The huge piles of snow along Main Street were hauled away in trucks Friday and Saturday. Tractor loaders from the Northern Implement Company made short work of loading the trucks.

The Koerner Dairy delivered their milk with a tractor hooked to a trailer.

Schools Closed

The two blizzards of the past week closed Klemme schools Thursday and Friday and again on Monday and Tuesday. Likewise the basketball tournament has been postponed from day to day, but Saturday the first round was played off. The balance of the games will be played if and when roads are open and participationg schools can make the journey to Klemme.

AND THE SNOW PLOW BROKE DOWN

Too much snow! The snow plow assigned to Supervisor Chambers' territory here was doing a noble job opening up the roads when it broke down and had to be taken to the county repair shops at Britt for repairs. The plow broke down Saturday and had to be dismantled and was not back in service Monday or Tuesday when another blizzard hit north Iowa.

W. S. C. S. Meets

The Klemme Methodist W. S. C. S. meets this week Thursday with Mrs. J. C. Thomas as Leader and the lesson in charge of Mrs. Lester Stille.

Hostesses are Mr. Art Wellemeyer, Mrs. Frank Ward and Mrs. Herman Bridges.

Methodist Circle Will Meet With Mrs. Ax

Circle No. 4 of the Methodist W. S. C. S. will meet at the home of Mrs. Wm. Ax on Saturday evening, February 8th.

Slaughter lamb prices will brobably continue high all winter and spring.

AROUND IOWA

IDENTICAL

Osage claims some sort of a record when a five-man legion bowling team turned in identical scores for one evening of bowling Each of the five members of the team rolled three games and each came up with the same average score, 134 points per game.

POLE CAT

Frank Vera of Algona noticed bad oders coming from his panel truck, cleaned it out two or three times and finally found the reason, dead pole cat which some local wag had tied under the hood The truck is being billeted outdoors for a few nights

SIXTH TIME

Burglars broke into the Dewey Howe grocery at Lake City recently It was the sixth time within a year that the store has been burglarized.

SEASON PASS

When Jack Oelke, youhful wheelchair invalid, wsa unable to attend a basketball game at Independence recently because all seats were sold out, student council members took up the matter They voted a season ticket to all games and will escort him to and from the games

SHOT UP INSULATORS

When the power supply at Adair was cut off recently, the workmen on the power line found that the insulators had been shattered, apparently by shot gun blasts, had to replace eleven of them

SIXTY-SIXTH

At Manson, Mr and Mrs. D D Hughes, visitors there from West Des Moines, observed their sixty-sixth Wedding anniversary recently

THANKS FROM GREECE

Girls in the homemaking department of the LaPorte City schools have "adopted" a family in Greece, sending five boxes so far. Recently the class had a warm letter from the recipient, Stergios Vlanas, in Trikkala, Greece.

EIGHT-SIDED HOUSE

One of the more unique old-time dwellings in Iowa is located at Marion, an octagonal or eight-sided house The house is built around a central stair well and has recently been made into four apartments The home was built about 1870 by J B Young

25 YEARS

Bert Lindstrom of Kiron resigned as correspondant for the Odebolt Chronicle recently after 25 years of service This may not be a record but it is a long time of service.

LONG CHASE

When deputy Sheriff Lewis Haberkorn apprehanded a McIntire, Iowa youth wanted for desertion, the young soldier away and ran Nothing daunted, Haberkorn, a Word War I veteran, chased his man all the way home, through the barn, across open country, through woods, over a wire gate, into a ravine, through a cornfield and finally back into McIntire where the he tried to hide in a church and was caught. The dog chase took about an hour and the young soldier, in giving up, said he had never seen anyone run like Haberkorn.

TWO ACCIDENTS

Three cows belonging to Wm Kindred of Palo went for a stroll one evening on Highway 74 A car driven by John O'Brien of Shellsburg hit one cow A few minutes later Richard Dauenbaugh, of Cedar Rapids, struck a second bovine Both cows were killed and the vehicle occupants shaken up and bruised.

WANT SNOW

At Griswold, Evald Stone and Dale Willoughby, are anxiously awaiting a snow storm. They have recently built a small rotary snow plow, of "home owner" size It was given a trial run in the snow recently and worked very well but showed need of some alternations. Stone and Willoughby are now busy making the alternations and waiting for another snow, meanwhile ignoring the gibes of their friends who say they ought to put a compass on it so the operator can steer through the dense clouds of snow it dispells.

HIGH PRODUCTION IS 1947 FARM GOAL

Will Bulid War Depleted Soils As Fast As Food Demand Allows

Iowa's 1947 farm production goals, recently announced by the Iowa USDA Council, will serve as useful guides to Iowa farmers in making 1947 plans, says Lauren Soth, Iowa State College economist. The goals were set to reflect the Council's thinking on future price and supply trends.

In general, the goals call for another year of high farm production with a shift back to rebuilding war-depleted soils as fast as food demand will permit.

The corn goal, set at 10,500,000 acres, is 5 percent below the indicated planting of 1946. Council members, in recommending the decrease, said the goal undoubtedly would be met and probably exceeded, with more corn being planted at the expense of oats and possibly soybeans.

Oats Goal

The oats goal of 5,570,000 acres calls for a 7 percent reduction. Soybeans are set at 2 million acres, or 28 percent above 1946 plantings.

Soth says the increase in soybean acreage was approved strictly on an emergency crop basis in view of the fats and oils shortage and not as a long-time trend Soybean seed next spring is expected to be high with a tight supply The Council has recommended that soybean prices be supported next year on the 1946 basis. Flax also was recommended for an increase—17 percent—with a recommend-d price support of $5.

Tame hay acreages also were raised by the Council Members requested 300,000 acres more than the suggested Washington figure of 3 million

Livestock Production

Turning to livestock production, the Council suggested a goal of 1,300,000 dairy cows as compared with 1,295,000 indicated on Iowa farms in 1946. From this number a slightly lower milk goal was suggested—6,500,000 pounds compared with 6,708,000 Slightly lower production per animal is anticipated by the Council because the unusually excellent pasture conditions last spring and summer resulted in record output.

In numbers of chickens to be raised in 1947, the Council has recommended an increase of 2 million over the goal of 48 million originally suggested for Iowa by Washington. An 18 percent increase in the number of sows to farrow next spring had previously been announced.

The goal for beef cows, first suggested at 617,000 was not changed But the Council has approved the goal with a strong recommendation to farmers that beef cattle herds be culled closely

FARM OUTLOOK IS BRIGHT FOR 1947

The demand for farm products should continue strong this year. And Iowa State College farm economists say strong demand for farm products is the key to the 1947 farm outlook. Prices, they say, may decline some the latter part of the year, but they will remain well above prewar levels.

Looking at specific farm products, the economists say that marketings of grain-fed cattle will begin to increase after the first of the year. Many more choice and prime cattle will go to market next summer than a year ago.

There are fewer lambs being fed than a year ago, with feeding about the same as during the 1940-44 period.

On the crop side, the contined high goals for farm production will maintain a strong demand for fertilizer. Supplies are expected to be only slightly larger than last season.

And in the same vein, supplies of farm machinery will continue short of demand for several months at least.

CREAM TEST AFFFCTED BY NUMEROUS FACTORS

Can a separator be set to skim a certain test of cream?

A W Rudnick, Iowa State College dairy specialist, says the answer is "no," although the opposite is a common impression What actually happens when the separator set is changed is that the volume of milk to cream is varied.

Thus, the separator can be set to skim 1 part of cream from 8, 9 or 10 parts of milk and so on For example, if your separator is set for 1 out of 10, a 35-percent milk would yield about a 35-percent cream And with the same setting, a 4-percent milk would yield 40-percent cream.

Rudnick says as the lactation period advances, the milk usually becomes richer. And that should mean richer cream

He points out, however, several reasons why this may not happen. For one thing, as the cream becomes richer there may be less of it, and the same amount of flushing will bring down the test. If there were 10 pounds of 35-percent cream, the addition of a quart of flush water or skimmilk would reduce it to about 32 percent. But if there were 4 pounds of 38-percent cream, and the same amount of flushing liquid, the test would be only 30 percent

Rudnick says there are other factors, too, which affect the test of cream besides the cream or milk screw and the amount of flushing liquid. Some of these are the cleanliness of the bowl, speed of the machine, temperature of the milk, the bowl out of balance and a damaged float

The average number of pigs per litter has been going up during the past 10 years.

Spreading Manure In Winter Is Profitable

Hauling barnyard manure out to the field this winter will continue to be profitable and important program on the farm if weather permits driving over the fields.

Iowa State College agronomists say that barnyard manure our most important fertilizer, always should be used wisely. It's especially important now when the supply of commercial fertilizers, used to supplement barnyard manure, is short.

By spreading manure in the winter, the agronomist say the farmer's profits from increased yields are not curbed by the loss of valuable nutrients that otherwise might escape.

Very little nitrogen is lost as ammonia when the manure is spread during cold weather. And as the usual gradual freezing and thawing proceed during the early winter, the nutrients slowly leach into the ground. There they are held in readiness for the next year's crop.

An analysis shows what these nutrients can mean in cropland.

One ton of average mixed stable manure contains about 10 pounds of nitrogen, 5 pounds of phosphoric acid and 10 pounds of potash This means a ton of manure is equal in plant growth to 100 pounds of 10-5-10 commercial fertilizer.

Manure also contains many minor elements essential for plant growth, large numbers of essential soil bacteria and high-quality organic matter. Under average conditions, about three-fourths of the nutrients fed to livestock are recovered if the manure is properly handled.

SAYS CORN PRICE WILL STAY NEAR LOAN LEVEL

While purchases of corn for export will tend to strengthen prices during the next several months, Lauren K. Soth, Iowa State College farm economist, says the huge supply in relation to livestock numbers probably will keep prices near the loan level until 1947 crop prospects are known.

Soth says corn futures prices have not shown any particular trend since last August when the size of the 1946 crop became fairly certain and when the government loan rate for this season was predictable within a few cents.

Although prices of many by-product and high-protein feeds declined in November and December, corn still is the cheapest concentrate feed. Feeders will find that with today's prices it will pay to econimize on high-protein feeds and use a maximum of corn.

Oats also are high priced in relation to corn, Soth says. In December, oats prices were about two and a half times the prewar average, while corn prices were only 80 percent above prewar. Of all the common feeds, wheat by-products are closest to their prewar relationship with corn.

SOW SALE

Selling 40 Head

Sale to be held in heated pavilion on farm 7 miles west of Klemme; 7 miles south and 2 miles east of Britt; 5 miles north and 2 miles east of Kanawha, on

Saturday, February 8 th

Starting At 1:00 O'Clock P. M.

THIS OFFERING IS SIRED BY CONGO MASTER A195171

This offering is sired by Congo Master, a litter brother to the Junior Champion of Iowa in 1945. He's proclaimed by many to be the greatest aged boar today. Some are also sired by Modern World, a wonderful breeding boar.

The gilts are the Modern day type of Poland China. Many of them will weigh 500 pounds sale day. If you are looking for an F. F. A. or 4-H litter, or if you are a farmer or breeder, interested in securing a profitable litter for '47, be in the seats on sale day.

They are bred to Congo Master, Mission A, a half brother to the Worlds Grand Champion barrow last year, and Monogram, from the Peterson Bros. herd of Canby, Minnesota. One of the best trio of boars in the midwest.

HANCOCK COUNTY BOARD PROCEEDINGS

2ND ADJOURNED JANUARY MEETING

Garner Iowa
January 20, 1947

The Hancock County, Iowa, Board of Supervisors met in session on above captioned date pursuant to adjournment with F J Schoun John Chambers and George Th Gerdes present

The minutes of the last meeting were read and approved as read

On motion and second the following bond are approved Dolores Lenz, Deputy Treasurer, Myrtle Halverson Assessor; CharlesF Merten, Engineer, Garnet Gelner Deputy Clerk of Court, Blanche Ritter Assessor, Wm Riemer, Justice of the Peace; Myrtle White, Deputy County Auditor: Helen Patrick, Deputy Recorder, Ben V Greiman, Township clerk, and George J Ulrich Treasurer of the Hancock County Farm Bureau.

On motion and second the report of the boiler inspection at the county home and Courthouse is approved

Supervisor Schoun is appointed a committee to investigate and cause repairs to be made in DD No. 49 and 50 Branch Al.

On motion and second the application for a loan from the Permanent School Fund of M. J Pintkin is approved

On motion and second the annual report of R. J Fritsch, Justice of the Peace, is approved.

BE IT RESOLVED that the county auditor be and he is hereby authorized to draw warrants on the County Fund of Hancock County in payment of copies of the 1946 Code of Iowa for the Justice of the Peace, demanding them

On motion and second the Board adjourned to February 3 A. D, 1947 at 9 o'clock A M

HAY QUALITY AND YIELD ARE FALLING

Some Iowa Soils In Need Of Phosphorus To Produce Acceptable Crop

Alfalfa and red clover hay from some of Iowa's Grade A land is low in phosphorus that it can't be fed safely unless phosphorus is added to the ration from some other source Moreover, phosphate fertilizer can be used profitably for alfalfa and red clover on more than two-thirds of the cropland in the state

This is shown in trials conducted throughout Iowa by the Iowa Agricultural Experiment Station In reporting on these trials, Iowa State College agronomists L. B Nelson and H R. Meldrum say the hay yield on stunted areas in northwestern and central Iowa was increased as much as three times by applications of phosphate The phosphorus content of the hay increased a half

Most experiments show that the best time to apply fertilizer for the legume hay crop is just before sowing the small grain crop. The fertilizer then helps the small grain as well as the hay. Fertilizer can be broadcast before seeding and thoroughly disked in or it can be applied at the time of seeding with a grain drill having a fertilizer attachment.

Potash, Nitrogen

The agronomist point out that enough phosphate or phosphate-potash fertilizer should be applied to take care of the needs of both the oat crop and the following legume hay crop. Soil tests will help determine whether both phosphate and potash are needed The study indicates that potash will help on about 19 percent of Iowa soils.

Nitrogen, too, is an important consideration when a nurse crop is used in seeding the legume. In general, about 20 pounds per acre of nitrogen are reccomended, this is equal to 65 pounds of ammonium nitrate or 100 pounds of ammonium sulfate per acre. In many cases this will boost oat yields by enough to pay for the fertilizer.

AROUND IOWA

PILE UP

Six cars figured in an auto pile up near LaMars recently. Car No 1 was being passed by car No. 2 when the latter hit an icy spot, spun into the ditch Car No 3 stopped to help and car No. 4 ran into the rear of car No 3 Car No. 5 also pulled off to one side to help and car No 6 went into a spin trying to escape the tangle, whirled around and hit car No. 5. Damage up to $250 per automobile was reported Driver of car No. 1, incidently, kept right on going, probably does not even know what he missed.

LOSSES HAND

Gordon Followill of near Corydon, farm hand, suffered the loss of his right hand recently when it became caught in a corn picker.

DIED IN FIRE

As she lifted the lid of a kitchen range, Estella McLaughlin, 72. Glendon women, breathed in smoke and flames which burst from the stove and set fire to her hair and clothing. Death resulted almost instantly A brother, Orden, had lit the fire only a few minutes previously and had stepped outside, returning to find his sister dead.

RETIRES

Court Reporter M. C. Grier, of Emmetsburg, has now retired after 53 years of service as reporter in the 14th judicial district. There is now no lawyer in that district, who was practicing when Mr Grier started his duties.

HOT WEATHER ICE

Jim Cuppy, of Storm Lake, who sells ice, reported that one day recently he was harvesting a "crop" of the frozen fluid with the temperatures 80 degrees above, found it sweltering work. Temperature in the shade at the same time was 50 degrees.

THREE FOXES

A fox hunt by 150 members of the Izaak Walton League at Indianola bagged three fox one recent Sunday, an average of one fox per fifty hunters.

DIED IN CABIN

Recently Mr. and Mrs. Otto Thompson, of Irwin, Shelby county, left for California to make their home after retiring from the farm. They stopped over night at a tourist cabin in Texas and were asphyxiated by a gas heater which they left turned on after closing the windows.

Dean Corwell in the Holy Land. Authentic glimpses of Palestine, sketched by one of America's leading artists. See the full color production in The American Weekly, the magazine distributed with next week's CHICAGO SUNDAY HERALD-AMERICAN.

The Gee Estate sale at Goodell has been postponed until Saturday, February 8th.

CEREMONY AT METHODIST MANSE JAN. 28

Miss Alvina May Eugen of Des Moines and Harvey Junior McHone of Cambridge, Iowa, were united in marriage at the Methodist Manse January 28th, at 2:00 o'clcok with the Rev. H. E. Harvey officiating in a double ring ceremony. Mr. and Mrs Kenneth Bell of Garner were witnesses.

3 Days Late, Light Keeper Never Missed

CHARLEVOIX, MICH.—A lighthouse keeper whose absence was unnoticed for three days while he drifted helplessly in a crippled motor launch on Lake Michigan was rescued little the worse for wear.

Daniel A. Buckus returned to his duties as light tender at Ile Aux Galets after he was picked up off the southeast tip of Beaver island, 15 miles from here, by coastguardsmen.

Other crewmen at Ile Aux Galets did not become alarmed at Buckus' failure to return from shore leave, supposing he had stayed on the mainland because of a light fog.

Buckus, however, had set out and became stranded just outside of steamer lanes when his motor failed.

ORDER FERTILIZER TO USE IN SPRING

Ordering Now Will Help To Get Kinds and Amounts That Are Needed

Farmers who order their fertilizer now for delivery this winter will greatly increase their chances of having the kinds and amounts they need next spring, says H. R. Meldrum, Iowa State College argonomist.

In spite of a record delivery of commercial fertilizer in 1946, demand continued to outdistance the supply, Meldrum points out. And present indications are that 1947 will see the heaviest demand in history The use of commercial fertilizer has been increasing rapidly in Iowa the past few years, Meldrum reports. More than 153,000 tons were used n 1945 This one-half more than was used in 1944 and three times as much as in 1943

Returns Good

The agronomist cites several factors which are responsible for this skyrocketing demand For one thing farmers are finding that fertilizer plays an important part in good soil management. Higher income has enabled farmers to buy more fertilizer And the price relationship between cost and the value of farm products is usually favorable Then, too, the AAA program has encouraged the use of more fertilizer

While demand and production both are high, the fertilizer industry faces many problems. New machinery, equipment and repairs are badly needed to turn out the record volume of fertilizer wanted Labor trouble handicap many fertilizer producers, not only in the manufacturing and mixing plants, but in the phosphate and potash mines as well. There's a shortage, too, of boxcars for shipment

More Nitrogen

Meldrum says the supply of raw material is adequate But most of the nitrogen fertilizer is a by-product of the coke and steel industries. Consequently, the supply of this material will depend largely on the capacity of the steel mills.

On the optimistic side is the fact that several ordinance plants are being converted to nitrogen fertilizer plants This should help the nitrogen fertilizer supply.

Ordering fertilizer early and taking delivery now will help the fertilizer industry operate on a year-around basis instead of concentrating operation into spring and fall rush periods.

When the fertilizer arrives this winter it should be stored in a dry place, preferably on a wood floor. The bags should be set on end and piled no more than two tiers high If the fertilizer cakes or hardens it can be pulverized easily by putting it through a hammer mill or pulverizer. Meldrum says fertilizer does not deteriorate with age.

PAINT FRUIT TREES TO REPEL RABBITS

Months of care and work in establishing home orchards are lost in a few days every winter because of rabbit damage, says Paul Henderson, county extension director.

Those who have been unable to safeguard their trees yet this year will find that spraying or painting both trees and shrubs now doesn't take long and is likely to pay dividends before spring.

Henderson says a mixture of 7 pounds of resin and a gallon of denatured alcohol makes about the best repellent and is easy to handle with a paint brush If the mixture is to be sprayed, an extra half gallon of alcohol should be added to make spraying easier. The sprayer should be rinsed with alcohol when mixture is finished.

The rosin—alcohol mixture should be applied around the tree trunks and well up the scaffold branches. It will do a good job of repelling rabbits unless the snow gets so deep that they are unable to find anything esle to eat.

Often when that occurs the snow is well over any screen or paper that may have been put around the trunks and the rabbits will get to the branches anyway

Henderson suggests that when the snow gets to this stage it's wise to feed the rabbits for a few days rather than to let them damage the trees. Cutting a few water spouts and other edible material and piling it in the orchard usally do the job.

CARE IN COLD WEATHER REQUIRED FOR TRACTOR

Cold weather means extra jobs for the farm tractor on most livestock farms and increases the importance of taking care of the tractor, says Dale Hull, Iowa State College agricultural engineer.

Probably the number one enemy is consideration of water in the crankcase, Hull says. This can be prevented by bringing the engine up to operating temperature as rapidly as possible after starting, and keeping it at operating temperature Use of radiator curtains or shutters will help

Loosening the crankcase drain plug daily and allowing accumulated water to drain also is advised

Low operating temperatures result in excessive corrosion, crankcase dilution, loss of power and formation of cold-engine sludge

Hull also suggests lubricating the entire tractor at the end of the day's use instead of doing it at the beginning of the next day. This forces out moisture which may have worked into the bearings during the day. And it prevents the formation of moisture due to condensation, and permits the lubricant to flow into the bearings readily while they are still warm

Keeping the battery fully charged will aid in easier starting And keeping the ignition system in first-class condition, using winter grade oil in the crankcase and using clean water grade fuel also are recommended The fuel tank should be filled at the end of each day's run to prevent the formation of moisture inside the tank overnight.

Hull says lack of lower winter operation may result from the use of summer grade fuel, incorrect carburetor setting, incorrect manifold heat, cold running engine or heavy oil in the transmission and differential.

POOR HATCHING CAUSE HALF BILLION EGG LOSS

The flock owner with a contract to supply hatching eggs has an obligation both to the hatcheryman and to his neighbors who buy chicks from the hatchery to see that his birds are managed and fed to produce topquality eggs.

Paul Sanford, Iowa State College specialist, points out that the annual egg loss from poor hatch-ability amounts to over one half billion eggs in the U S. A loss of one half billion eggs figured at an average price of 38 cents per dozen amounts to $15,835,000 a year.

The reduction in hatching egg loss must come through improved breeding, feeding, management and incubation.

A fertile egg is a living organism, and the contents of the egg must be adequately supplied with all the nutrients necessary for the nourishment of the embryo for the 21-day incubation period. These nutrients must come from the feed the hen eats.

Sanford says the ration of a laying flock producing eggs should contain 16 percent protein and should be fortified with the necessary vitamins and minerals. A considerable portion of the protein should be made up of animal products such as milk, meat scraps and fish meal. Quality and not quantity is important.

Of the vitamins, Sanford says A, D and G are necessary for high hatchability. The A and G vitamins are found in green feeds, with A also found in yellow corn and G in milk Since green pasture often isn't available when hatching eggs are being produced, the ration must be fortified with vitamin concentrate.

While vitamin D comes from the direct sun which enables the hen to build her reserve, additional supplies during the winter months must come from other sources, such as fish oils and meal.

Last year's crop of lambs was much smaller than the year before.

Fair Collective Bargaining Asked

Management wants equality with labor around the bargaining table rather than an end to collective bargaining, explains President William K. Jackson, of the United States Chamber of Commerce.

Asserting the principle of collective bargaining has been accepted by American industry, Mr. Jackson said:

"What representative business leadership wants is fair bargaining.

"The National Labor Relations Act as it now stands does not promote fair bargaining. Under this jaundiced act, the procedure is loaded against management in favor of unions.

"Even such elemental rights as free speech, the right of both sides to present the matter in dispute, are curtailed to tie the hands of management while the unions load the gun to enforce their demands."

Labor Monopolies Cloud Business Sky

Monopoly labor union power in essential industries has become a new factor to consider in judging economic trends, according to William K. Jackson, president of the Chamber of Commerce of the United States.

"To an extraordinary degree," he said, "the business trend has come under the influence of labor-management relations.

"The rise and fall of the business curve in 1946 closely followed the rise and fall of man-hours lost in strikes. The sensitivity of total production to strikes in essential industries was illustrated by the fall of industrial indices during strikes in steel, coal and transportation.

"It is evident, therefore, that prospects on the labor-management front dominate to an unusual extent the general business outlook.

"Some say the rash of strikes simply recapitulates economic history in the period immediately after World War I. That period, like the present, was marked by rising living costs and unrest as the aftermath of war.

"But the disruption of industry by strikes cannot be dismissed by drawing a parallel with the past. Organized labor never had in 1919-20 the tremendous power it holds over industry and public welfare today."

RECORD SEED CROP ALFALFA, CLOVER

Will Permit Seeding Nearly 5 Million Acres More Than In 1946

The record-high crops of alffalfa and clover seed this year mean that 4,710, 000 more acres of soil-building hay and pasture crops can be seeded next year than was possible in 1946, says E. S. Dyas, Iowa State College argonomist. And it means that 6,246,000 more acres can be seeded in 1947 than during the 1935-44 average These figures are based on seeding at the rate of 10 pounds per acre.

Dyas says figures released by the United States Department of Agriculture show the production of alfalfa seed to be 1,674,000 bushels this year compared with 1.207,000 in 1945. Red clover seed totals 2,007,000 bushels compared with 1,744,000 last year.

Despite the increased production of seed, however, high demand is keeping prices up, the argronomist points out. And some of the increased production is going to be allocated to foreign countries. Then, too, the best quality seed usally is sold first. So Dyas urges all Iowa farmers who still need alfalfa or clover seed to buy early.

Lem's Dogs vs Thad's Chickens

Running a newspaper, you get to know a lot about human nature.

Thad Phipps was in the other day, all burned up. Wanted me to run an item on how Lem Martin's dog had raided his chickens again, and ought to be put away by law.

I told him: "Lem was in on Saturday. Said you shouldn't be allowed to keep those chickens so close to his house—and in a residential zone, at that."

Thad shuts up right pronto then. And that very evening I see him making his peace with Lem at Andy Botkin's Garden T —over a friendly glass of be

From where I sit, anyon find something in his neigh complain about. (Some folk even disagree with Thad's ri enjoy that glass of beer with But where would we be if body tried to have a law against everything they dis with? We wouldn't have neighbors left!

Former Klemme Man Will Be Guest Speaker

ELDERS GUEST AT ADULT BANQUET

Will Speak At Garner On Trip To Guatemala

C. R. "Dutch" Elder head of the publications department of Iowa State college, has been secured as guest speaker for the Garner adult evening school banquet to be held at Garner high school gym, Monday Feb 17 at 6:30.

Elder needs no introduction in this community as his home town is Klemme He is the son of Ralph Elder of Klemme.

C. R. Elder

"Dutch" was in charge of all publicity of the recent trip which was made to Guatemala, South America, with other members of the Iowa State college staff. The purpose of this trip was to study the new varieties of corn that are being developed there in cooperation with the state college. Elder has been giving lectures on this trip throughout the state since his return.

This banquet is being sponsored by the Garner adult evening school and the Music Mothers. Any proceeds from the banquet will be turned over to the band uniform fund.

A Letter To The Editor

Huntington Park, Calif.

Dear Mr. Jorgenson

We will write you a few lines as we promised when we left. We left Ames January 7th and it was a very cold morning and we almost froze before we got on the train. We arrived in Omaha at noon and left after a short stop after arriving, passing into Nebraska. We did not see any snow in Nebraska at that time and there was lots of corn yet to be picked. We arrived in Salt Lake City the next day at 11:00 and the train stopped there for a short time. There was lots of snow and mountains but it got warmer as we came nearer to California. We got in at the station about 8:00 in the morning and our brother and sister-in-law met us there and took us home. On Saturday we went to Long Beach for a sight-seeing tour along the ocean We went out on the ocean in a sight-seeing boat about 15 miles and saw all the ships laying in the harbor. Sunday I and Ing Lauritsen and Dean went to Palm Springs, it was about 70 in the shade They served the meals outside there and it was a beautiful place surrounded by mountains. The next Saturday we drove to Knox Berry Farm, and there they have all the old relics from years back and raise berries there. We had our supper there and then drove home and on our way home we could hardly see as it was so foggy Sunday we went out seeing again through the orange groves and they were all loaded with fruit. Some of the mountains along the way were 5,500 feet high We then walked about a mile back in the woods to Christy Lake, it was a very pretty lake and we could see the children making snow balls on the mountains. We have been visiting friends around the city and enjoying the trip very much. The weather is nice and it rained once since we have been here. The nights are very cool. We will close for this time.

Best wishes,

Mr. and Mrs. Herman Priebe

Annual Christmas Seal Meeting In Klemme

The annual Hancock County Christmas Seal meeting will be held in Klemme at the Methodist Church on Saturday, Feb. 22, with a one o'clock dinner.

SALES POSTPONED BECAUSE OF BLOCKED ROADS

Garfield 4-H boys meeting at Engstlers, 8:00 p. m.

February 17:
Garner night school banquet. 6:30 p. m. High School Gym. Dutch Elder, speaker.

February 17:
Boone 4-H boys meeting at Virgil Everetts, 8:00 p. m.

THE KLEMME POST OFFICE FORCE KEPT MAIL MOVING

The blizzards and blocked roads of the past week made it a big task to keep the mail moving, but the local post office force did the best they could and went out of the way to give service.

Saturday afternoon Bill Keraus, Sumner Trumbell and M. L. Harson took the Klemme mail to Garner to get it started on its way, and brought back mail from there

Sunday afternoon 20 bags of mail was brought in and Bill Keraus sorted mail nearly all afternoon Carrier Sumner Trumbell, M L. Harson and Orville Bridges started out with rural mail and covered all of the territory they could possibly reach

The men at the post office and Carrier Trumbell deserve a big hand for going out of their way to give mail service where possible.

Blocked Roads Delayed Mail Service In And Out Of Klemme

Mail service was practically at a standstill the past week because of the blizzards nearly every day Trains were running behind schedule and many were stuck in snow drifts in North Iowa.

Rural carrier Sumner Trumbell was unable to make his route most of the time because of the blocked roads.

The storm was one of the worst that had hit Iowa in several years.

Think You've Got Troubles? Read This Man's Woes

Decatur, Mich.—Hershel Campbell renewed his subscription to the Decatur Republican recently He also sent the Republican publisher the following letter explaining how it was possible

In reply to your request to send a check, I wish to inform you that the present condition of my bank account makes it almost impossible My shattered financial condition is due to Federal laws, state laws, county laws, corporation laws, brother-in-laws, mother-in-laws, sister-in-laws and outlaws.

Through these laws, I am compelled to pay a business tax, amusement tax, head tax, school tax, gas tax, carpet tax, income tax, food tav, furniture tax and excise tax Even my brains are taxed I am required to get a business license, car license, hunting and fishing license, and a dog license

I am also required to contributet to every society and organization which the genius of man is capable of bring to life; to women's relief, the unemployment relief, the gold digger's relief. Also to every hospital and charitable institution in the city, including the Red Cross, the black cross, the purple cross and the double cross.

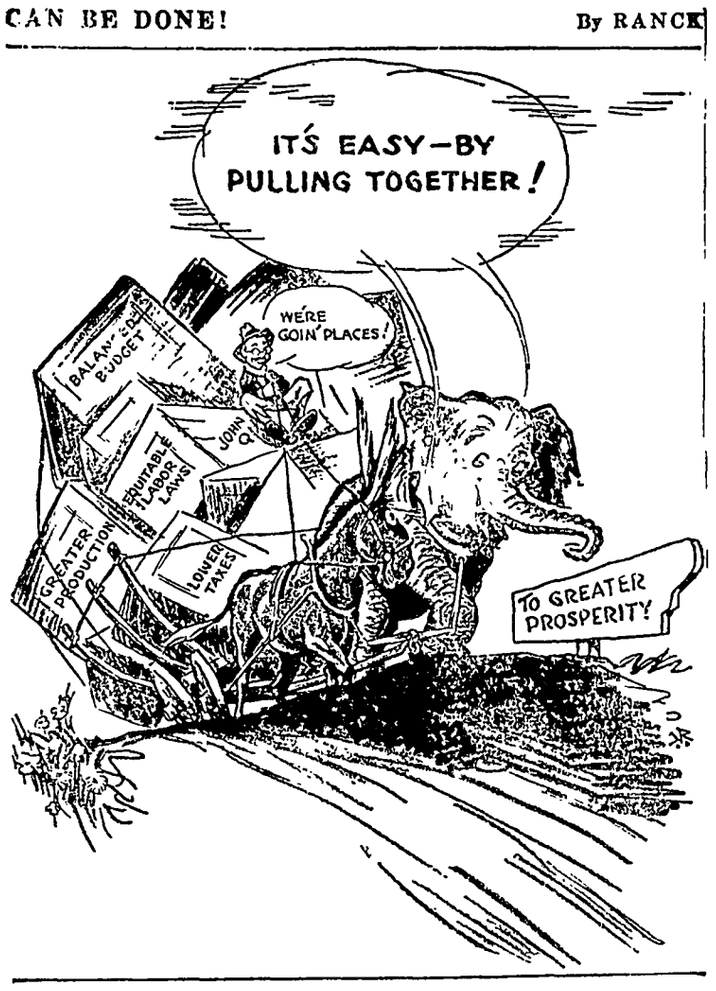
For my own safety I am required to carry life insurance, property insurance, liability insurance, burglar insurance, accident insurance, business insurance, tornado insurance, unemployment insurance, old-age and fire insurance.

My business is so governed it is no easy matter for me to find out who owns it. I am inspected, expected, suspected, disrespected, rejected, dejected, examined, re-amined, informed, required, summoned, fined, commanded and compelled until I provide an inexhaustible supply of money for every known need of the human race.

Simply because I refuse to donate to something or other I am boycotted, talked about, lied about, held up, held down and robbed until I am almost ruined.

I can tell you honestly that except for a miracle that happened, I could not enclose this check. The wolf that comes to many doors nowdays just had pups in my kitchen. I sold them and here is the money.

CAN BE DONE! By RANCK



CENTENNIAL COINS ARE ABOUT GONE

Mailing hundreds of Iowa Centennial Commemorative Coins each day is a full time job for a corps of special assistants, says Charles A Barber, Assistant Treasurer of State, under whose direction the coin is being delivered to out of state purchasers.

With fewer than 7500 coins remaining in the special issue of 100,000 fifty cent pieces minted in honor of Iowa's centennial year, Iowans and out of state purchasers alike pay $3.00 each for the popular coin. Originally sold for $2.50 each to Iowa buyers during the initial sale when banks handled the coin without expense to the Iowa Centennial Committee, the additional fifty cents, says Mrs Edith McElroy committee executive secretary, goes to pay the handling costs which are heavy.

Each coin is placed in a special envelope made for the purpose and sent by registered mail to the purchaser 27 cents in postage alone is included in this expense Queries concerning the coin and its history pour into the office both of the Treasurer of State and the Iowa Centennial Committee adding to the immense volume of detail work involved.

While the limit of one coin per purchaser has been lifted, the Centennial Committee still reserves the right to limit the number sold a single buyer. At its present rate of sale, the small surplus remaining should be sold within the next thirty days, according to centennial headquarters, and state officials are anxious to distribute the coin as widely as possible.

Sales of Iowa's commerative coin has broken all records for previous issues. Ordinarily such special mintings move slowly, and in numerous instances, a considerable portion of the issue is available several years after minting.

Hancock County Soil Conervation District News

The Hancock County Soil Conservation district will offer, on request by the farmer, a complete farm plan including surveys, maps which have soil types, per cent of slope, degree of erosion or amount of silting in ditches, drainage surveys and assistance in training farmers to do some of the recommended practices. If you are a farmer, land lord or tenant, and want to avail yourself of this service, get a request from the county extension directors office or contact one of the commissioners, S. A. Barber, Kanawha; Ben Riemer, Garner; or W. J. Rasmuson, Britt.

School In Session Only One Day Past Week Due To Storms

The past week was a week of blizzards, blocked roads and no school. The Klemme schools were open only one day, last Thursday The storm upset the schedule of the county basket ball tourney held here

The preliminaries were played off Saturday afternoon and night, and the semi-finals on Thursday night The games were then called off again and the finals held on Saturday evening Despite the cold weather and poor roads the attendance was good

COUNTY MAY CLEAN OUT L ARGEST DRAIN DITCH

Charles F Merten was appointed engineer to investigate the necessity and feasibility of a cleanout of the main ditch in drainage district No 1 and 2, petitioned for by Chris Gilstrap, et al Drainage district No. 1 and 2 is the largest district in the county and it is estimated that the cleanout will cost approximately 80,000.

Penn Eckels Named On The Following Committees.

Hancock County Republican, Penn Eckels was named on the following committees by Speaker of House Kuester· Agriculture, banks and banking, conservation of resources, and constitutional amendments, county and township affairs, elections, judiciary, motor vehicles and transportation, public libraries, public utilities and roads and highways. Representative Eckels is serving his first term in the Iowa legislature.

Acids Dumped In River Cost Ohio Company $18,000

Ohio conservation authorities won a signal victory recently when the Electric Autolite Company of Toledo agreed to pay the state $18,000 for fish killed in the Little Miami river by acids and cyanid which the company had dumped into the water. In addition, the company agreed to provide 200,000 minnows for restocking the stream, and to cease the practice of dumping lethal wastes into public waters.

As life is made up, for the most part, not of great occasions but of small everyday moments, it is the giving to those moments their greatest amount of peace, pleasnatness, and sincerity, that contributes most to sum human good. —Leigh Hunt.

Flying of a flag with the union down is a signal of distress.

Hancock County Spelling Contest To Be March 22

HANCOCK D. H. I. A. JANUARY REPORT

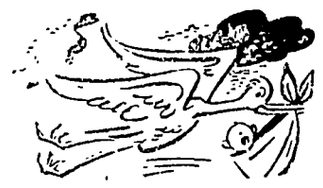
John Ward, supervisor of the Hancock DHIA reports 24 herds average 730 lbs. of milk and 27.8 lbs. of butterfat. Of the 367 cows on test, 272 were milking and 95 were dry. Two new herds were added to the group. They are owned by Merling Upmeyer, Garner, and Everett Sheets, Britt.

The following 305 day lactation records were completed. A Guernsey owned by C. J. Wille, Klemme, 268 days produced 7815 lbs. of milk and 400 lbs of butterfat; a Holstein owned by Roy Jacobs, Klemme, 285 days produced 10762 lbs. of milk and 336 lbs. of butterfat. A Brown Swiss owned by C. E. LaFavre, Klemme in 305 days produced 11072 lbs. of milk and 445 lbs. of butterfat; A Holstein owned by V A Cook, Klemme in 279 days produced 10604 lbs. of milk and 347 lbs. of butterfat; a Holstein owned by Floyd Friedow & Sons, Kanawha in 305 days produced 11120 lbs. of milk and 379.8 lbs. butterfat. A Holstein owned by Huling Bros, Britt in 305 days produced 12009 lbs. milk and 405 lbs. of butterfat; a Holstein owned by Fern Huling, Britt in 305 days produced 14163 lbs. of milk and 498 lbs. of butterfat. A Guernsey owned by Jack Ostercamp, Britt in 305 days produced 8327 lbs. of milk and 370 lbs. of butterfat; a Holstein owned by Mitchel Bock, Klemme in 305 days produced 10339 lbs. of milk and 343 lbs. of butterfat.

Study Group Meets

The Study Group of the Methodist Church will meet this Thursday afternoon at the home of Mrs. J. A. Chambers with Mrs. Roy Jacobs as co-hostess. The meeting is scheduled for 2 00 p. m.

HELLO, FOLKS!



Mr and Mrs. "Cap" Blank are the parents of a 7 lbs. 5 oz. baby girl born February 10 at the Garner Nursing home. The new arrival has been named Judy Ann.

Mr. and Mrs. Fred Ostercamp of Britt are the parents of a near 14 lb. baby boy They also have a girl in the family. Before her marriage Mrs. Ostercamp was Esther Jahnke of Klemme.

Mr. and Mrs. Paul Haefner are the parents of a 6 lbs. 3 oz. baby boy born Saturday, Feb. 8. The little boy has been named Daniel John after his grandfather in England They have a little girl, June Irene.

Mr. and Mrs. Fred Becker joined the grand parent class Sunday evening when their son-in-law and daughter, Mr. and Mrs. Cecil Katter announced the arrival of a 9lb. baby boy born at the Mercy Hospital Sunday evening, February 9th at 8:00 o'clock.

Mr. and Mrs. Victor Greiman of 2613 Sheridan Road, Dayton, Ohio, are the parents of a baby girl born Friday, January 31st. Before her marriage Mrs. Greiman was Miss Marjory Wicks of Klemme. Mr. Greiman is a son of Mr. and Mrs. W. H. Greiman of Klemme. The new arrivial has been named Sharon Kay.

HANCOCK COUNTY SPELLING CONTEST

The Hancock County Spelling Contest will be held in the Garner High School gymnasium, Saturday, March 22, 1947, beginning at 9:30 a. m. Contestants should be there at 9 a. m.

Two contestants may be entered from each township group, and one from each town school, with an alternate from each unit. Township chairman should plan to have their respective contests before March 14, 1947.

There will be a written test in which each contestant will spell 100 words, 10 at a time. The pupil missing the fewest words will be declared the written champion.

The words for written test will be taken from Horn-Ashbaugh Workbook Speller, first 24 weeks, grades 3-4-6-8.

The ten (10) best spellers in the written test will spell orally to determine the oral champion. The words will be taken from a prepared Horn-Ashbaugh list until the word list is exhausted, or until the pronouncer chooses to use the Eaton Contest Speller, 1945 Edition.

The written and oral champions will spell orally to determine the county champion who will represent us in the State Contest at Des Moines, April 19, 1947.

In all other particulars the contest rules as printed in Eaton's Contest Speller, 1945 Edition will be used.

If any dictionary reference is requested, Webster's Un-abridged will be in the auditorium for immediate use and final authority.

The Garner Lions Club is again offering $10.00 in cash prizes to the winners.

This year a new champion will be crowned since the best spellers in the contest last year were in the eighth grade and have since been promoted to high school. The winners are:

1943 winner, Ronald Lechelt of the Britt Public School.

1944 winner, Margaret Brugman of the Garner Public School.

1945 winner, Leland Davis of the Magor Township Schools.

1946 winner, Eileen Langlitz of the Goodell Public School.

The first two rounds in the oral spelling contest will be practice words and any words missed will not count against the contestant. The contest words in both written and oral will begin wih 3rd grade words.

NO BIDDERS AT GARNER ON 2 I- BEAM BRIDGES

There were no bidders in Garner Monday when the county board was to let the contract for 2 I-beam bridges with concrete abutments. A new date for letting will be held later it was indicated Tuesday by county Auditor Fred Missal.

Home Made Bread Was The Vogue In Klemme Last Week

A lot of Klemme men were not upset about the blizzard and blocked roads of the past week. It's an ill wind that blows no good, someone once said. In this case the bakery trucks could not get into town and as a result there was no bread on the grocery shelves.

Thereupon the ladies of the town did a lot of baking of bread, rolls, and biscuits. And that is quite a treat to most men. And they said "let it blizzard, that home-made bread is sure good."

History Holds Key to Cheap Homes

Put in New Claim for Merits Of Rammed Earth Buildings

By BAUKHAGE
News Analyst and Commentator.

WNU News Service, 1616 Eye Street N. W., Washington, D. C.

WASHINGTON.—Is there a solution of the low-cost housing problem as simple as the dirt under our feet? Have we been overlooking a bet, which Pliny said the Romans were overlooking, in the first century A. D. and to which most people have shut their eyes ever since?

Baukhage

Anthony F Merrill says so and so does a convincing job of proving the contention in his book "The Rammed Earth House," which I have just read. It seems incredible!

It didn't seem incredible to Pliny who heatedly proclaimed that the Romans had, in Africa and Spain, "walls of earth."

They are "moulded rather than built," Pliny explains, "by enclosing earth within a frame of boards, ing or my cooperation," says the secretary, "they may be assured of them both."

Rammed-earth, according to Merrill. is a term describing "both the material and the process of wall building by which earth is tamped into the shape of a wall or building block. In essence, a compressed block or section of earth will, when tamped, assume the shape of the form into which it is pressed and, when the moisture dries out, harden into a permanent shape suitable for use as a building material."

The reasons set forth by Merrill as to why, if this method of building is so good it has not been widely adopted, are logical· One—there's no money in it, except the money saved by the builder. Two—contrary to the impression among sellers of building materials, Merrill insists it would help rather than hurt their business. The man who builds a rammed-earth house can't afford any other kind. And he has to buy everything—floor, roofing, plumbing—everything in fact except the walls, which are free except for the cost of the forms and the tamping.

Merrill's thesis is that anyone willing to acquire the rudimentary knowledge of building, can build a rammed-earth house himself with three bedrooms, spacious living, dining and cooking facilities and all plumbing and heating equipment for less than $5,000. He can build as good or better a dwelling than most of the so-called defense homes, so widely used during the war, for $3,000. And there are already modest cottages in a number of places which cost little more than a thousand dollars for two members of a family to build.

The old and new in rammed earth houses. Top panel shows modern structure at Claremont, Calif. Bottom shows church at Sumter, S. C., which has stood through more than a century.

constructed on either side. These walls will last for centuries, are proof against rain, wind and fire, and are superior in solidity to any cement. Even at this day (more than a century after Hannibal) Spain still holds watch-towers that were erected by Hannibal."

The idea of houses of earth is not incredible to Clinton P. Anderson, secretary of agriculture, who has written the preface to the book.

"If Tony Merrill and his rammed-earth builders want either my bless-

Solons Have Laugh on Selves

When Bob Hope or Henry Morgan or even Senator Claghorn pokes fun at congressmen, that's supposed to be humorous. It's always open season on politicians in this country where people riddle their public officials with gags instead of guns.

But it is not generally realized that legislators like to laugh, too—even when the laugh's on them. And at least one of them enjoys congressional jokes so much he's written a 350-page book about them.

Compiling the congressional Joe Miller may seem a far cry from steering policies of the senate judiciary committee, but Senator Wiley has been working on the humorous project since 1939 when he first was elected to the United States senate. Last year he got around to sending a letter to all his colleagues in the house and senate, asking them their favorite jokes. He was deluged with stories—good, bad and corny; and most of them jokes on or about congress and congressmen. All of which inspired the title of his book, "The Laugh's With Congress."

Under the title "The Women—God Bless 'em," he relates how in the closing and very literally hot sessions of the 79th congress, the then Sergeant-at-Arms Wall Doxey ruled twice within three weeks that, although women in slacks could be permitted in senate galleries, women in shorts would be inimical to the dignity of the senate and were to be barred from the gallery.

All of which moved Sen. Richard Russell of Georgia to remark: "In hot weather, I am sometimes envious that I cannot wear shorts myself. Mr. Doxey is supposed to be an authority on what creates confusion in the senate, but personally, I have no objection to shorts." (If this had been printed in the record there would have been "laughter" after that one.)

Another story claimed as the favorite of former Sen. Guy Gillette of Iowa and Arkansas' young Sen. William Fulbright is a true one. As Senator Gillette tells it, his colored maid had noticed that the senator, then a representative, had his picture in the paper. Underneath was a caption to the effect that he might be nominated for the upper chamber. "Is a senatuh higher than a representative?" the maid wanted to know. "Yes," Gillette told her, "they are so considered because a senator represents an entire state and a representative represents a district of a state." The maid's next question was: "Well, is there anything lower than a congressman?" Gillette is said to have been forced to imply that there was indeed nothing lower than a congressman!

NEW CITIZENS . . . Veterans of Pacific campaigns, 150 alien nationals of the U. S. navy were sworn in as American citizens on Guam. The group was composed of American Samoans, Chamorros and Filipinos. Judge P. J. Phillip of the immigration and naturalization service presided.

NEWS REVIEW

GOP To Continue Probes; Boundary Dispute Looms

CONGRESS:

Busy Bodies

GOP congressional investigators prepared to dig deep into war expenditures and un-American activities with the full support of the first Republican majority in 16 years.

Senate Republicans beat down an effort of the Democrats to transfer duties of the war investigating committee to the inactive committee on expenditures in the executive department by a 47 to 45 vote.

The watch-dog over efficiency of the war effort under President Truman while he was still senator from Missouri, the war investigating committee widened its scope under Senator Mead (Dem., N. Y.) to probe irregularities in munitions contracts. In the wake of disclosures of the close relations existing between congressmen and army officers with war contractors, the GOP voiced its determination to dig deeper into wartime dealings.

Not always in favor during the liberal New Deal administration, the house un-American activities committee promises to enjoy smoother sledding under the Republicans. Now headed by Representative Thomas (Rep., N. J.) the committee laid plans for an early probe of Communism in government departments, labor unions, Hollywood, and colleges and schools.

GERMANY:

Polish Claims

Should the U. S. oppose Polish claims to the 40,000 square miles of former eastern German territory taken over by the Poles under the Potsdam agreement, this country faces a stiff fight with the Russian bloc. With the U. S. bringing the full force of its prestige into play, however, it may secure modification of the Polish claim or cudgel out other concessions from the Reds.

Poland served notice of its determination to permanently affix the new territory at the deputy foreign ministers' meeting in London, called to lay the groundwork for the Big Four conference in Moscow in March to formulate a German treaty. Since given control of the territory at Potsdam, the Poles said they have moved 1,383,000 Germans out and 3,500,000 Poles in.

Nub of the disagreement lies in the Poles' contention that they were led to understand they were given full sway over the territory at Potsdam. The U. S., on the other hand, holds that they were merely given temporary administrative control, with the question of Germany's final postwar borders to be settled at a peace conference.

PORTAL:

Tax Relief

The burden of portal to portal back pay will largely be shouldered by Uncle Sam when, and if, union members are awarded their substantial claims against industry as a result of Secretary of the Treasury Snyder's announcement that such outlays are deductible against taxes levied in the years affected

Because portal payments to workers will be liable to taxation, however, the U. S. stands to recover some of the refunds in personal income taxes. In many instances, the portal claims run into hundreds of dollars per worker, leaving them open to a heavy bite under the high wartime rates.

Under Snyder's ruling that industry could claim credits on taxes paid in the years for which portal demands were granted, companies would be able to take advantage of high rates and excess profits levies of the war years. At the same time, they would be entitled to a 6 per cent interest on the money collected from them to cover their tax liabilities.

FOOD:

Enemy's Need

Declaring that the U. S. could not afford to permit the American flag to fly over a gigantic Buchenwald, former President Herbert Hoover undertook another survey of food needs in the U S. and British occupation zones in Germany.

In addition to providing for essential German relief, Hoover's junket was aimed at making the reich as self-supporting in food needs as possible. Improvement in the food situation would lead to a reduction in present U. S. relief costs of 300 million dollars annually. The former president had the assistance of two food experts on his tour, being accompanied by Dr. Dennis Fitzgerald, chairman of the international emergency food council, and former Ambassador Hugh Gibson, who aided him in World War I relief work

COMMODITIES:

U. S. Eyes Trade

In an effort to prevent serious breaks in commodities, Secretary of Agriculture Anderson announced that the department's commodity exchange authority would be freed of other duties to permit full time policing of the markets.

Anderson disclosed the move in the face of growing speculation. Remembering the big break in cotton last October and the alleged manipulation of butter prices in New York, department authorities acted to check future slumps affecting prices. Studies are being completed on the factors in the cotton break, with Anderson ready to ask for additional regulatory authority if warranted by the investigation.

STILL MISERABLE . . . Misery and poverty still are rampant in China. This poorly-clothed, hungry and tired little boy sleeps in the doorway of a Shanghai hotel while his mother begs for coins from American servicemen.

INCOME INCREASES

Farm Cash Receipts Hit Peak

WASHINGTON. — Farmers' cash income from livestock and crop marketings in 1946 soared to the record-breaking total of more than 24 billion dollars, according to a preliminary survey announced by the agriculture department.

The latest bureau of agricultural economics estimate places cash receipts at $24,100,000,000, the highest in history and a 16 per cent gain over 1945. Earlier predictions had forecast only 23 billion dollars, but high prices for meat animals, cotton, feed grains and feed crops following the end of price control boosted the earlier prediction by more than a billion dollars.

Receipts from livestock and livestock products were estimated at about $13,400,000,000, an increase of 14 per cent over 1945. Income from crops was placed at about $10,700,000,000, an increase of 18 per cent.

Marked increases in returns from cotton, food grains and feed crops were largely responsible for the gain in the total crop receipts.

If the final accounting of cash farm income matches the preliminary estimate, cash receipts in 1946 will be 16 per cent over the previous year. The 1945 figure, a record up until last year, was $20,700,000,000 During the prewar years of 1935-39, cash receipts averaged $7,900,000,000.

Preliminary estimates released by the department indicate that cash receipts for December, 1946, were about $2,500,000,000, which is 20 per cent below the November total but 30 per cent above December, 1945

TOO MUCH, TOO WELL

It Shouldn't Happen to Expert— But Reports Indicate It Does

It pays to be an expert—sometimes, that is.

For instance, out in San Luis Obispo, Calif., Prof. James Merson was demonstrating to his California State Polytechnic institute class how to crank a tractor without breaking an arm — and broke his arm.

Then there are experts on safety like Mrs. James C. Carmack of Providence, R. I. She went to make a speech on the subject; hobbled into the auditorium on crutches —had a little accident en route.

Still on the subject of speeches, there's the San Francisco authority on happy home life. He asked a court to postpone his wife's divorce case so he could keep a date to lecture. His subject: "How To Be Happy Though Married."

An expert on wills was the late Charles Tressler Lark, Hackensack, N. J, lawyer. As a result of his wide legal practice, he acquired a national reputation on the subject. Recently his own will came up in court and was barred—it hadn't been witnessed.

When Francis Curry had to leave his New York liquor store for a few minutes recently, he entrusted the establishment to the safe care of a friend, Frank Heines, a detective. When Curry returned, the store — and detective — had been robbed.

Not to be overlooked in the line of experts are the weather forecasters.

such as S. D. Flora, who prognosticates the precipitation in Topeka, Kans., and — just in case — keeps an umbrella handy in his office

Dr Barnett Mindlin, Chicago dentist, did an expert job of repairing a set of false teeth — in fact, it was worth $50, the dentist claimed. But the patient, 70-year-old John Langhout, objected and insisted he wouldn't pay. Dr Mindlin reached into Langhout's mouth for the teeth They were good teeth, too, expertly repaired, for the mouth clamped shut on Mindlin's fingers. In court, Dr. Mindlin exhibited a swollen finger; Langhout was held on a disorderly conduct charge.

Few husbands will question the assertion that women are experts at arguing. New proof comes from Springfield, Ill., where the first all-woman circuit jury in Sangamon county history was sworn in to consider an automobile damage suit. The 12 women argued all night long, then reported they were hopelessly deadlocked.

STUDENTS AT NEW COLLEGE WILL READ '100 BEST BOOKS'

PITTSFIELD, MASS. — Continuing the daring educational innovation based on "the 100 best books of ancient and modern thought," a new non-denominational college for 300 students will be opened here next September by Liberal Arts, Inc.

Dr. Stringfellow Barr, who largely is credited with this new approach to liberal education, will head the new institution, which will be established on a 700-acre estate fronting for nearly a mile on Stockbridge lake.

It was Dr. Barr who introduced the organized reading of 100 volumes of the best from Homer to the present day at St. John's college in Annapolis, Md., in 1937 He has resigned as president of that institution to found the offshoot here.

Endowed with $4,500,000 by Paul W. Mellon, son of the late Secretary of the Treasury Andrew W. Mellon, the new liberal arts college will be situated on the old Dan R. Hanna estate, about a mile and a half from Tanglewood, the home of Serge Koussevitzky's Berkshire festival.

The property already includes about 30 buildings, including an inn and dormitories, where the late John E. Parsons, a New York lawyer, maintained a home for fresh air children.

A college for men, the new school will have a maximum enrollment of 300, with a faculty of about 30. The entire college course will be devoted to the study of prescribed books, with no conventional college departments.

Helpful Thieves Dig Auto Out of Snow, Return After Use

BAYFIELD, WIS. — Thieves proved helpful to Douglas Knight when his car became stalled, but Knight also proved helpful to the thieves by unwittingly lending his car for their depredations.

Missing a turn on the way home one night recently, Knight dropped the front wheels of his sedan into a snow-filled ditch. He continued on foot, intending to get towed out the next morning.

The energetic thieves, however, came along later, found the key still in the car, and dug, shoveled and pushed until they got it out.

The next morning Knight found everything intact except that his unknown helpers had used up all the gasoline in the tank and, apparently driving at high speed, had boiled out all the anti-freeze. They had returned the car to the same place in the same ditch.

Sews for Victory

LARAMIE, WYO.—They wanted to pin a medal on Mrs. Winifred Coulter, 81-year-old dressmaker, for war service performed for Albany county Red Cross chapter. Mrs. Coulter has a record of 4,027 hours of sewing work, completing 2,998 garments since Pearl Hrrbor.

First Chinchillas in Georgia Are Thriving

STILSON, GA. — Chinchillas, whose pelts some day may go into the making of a $35,000 coat, are making themselves right at home in the deep South. H. G. Lewis, owner of the first chinchilla farm ever established in the state, recently received 17 of the little animals from California. Not a single sniffle has developed among the animals, Lewis reports.

"Off We Go" AVIATION NOTES

DOCTOR'S PRESCRIPTION

"There's nothing like altitude to get away from cares and tired nerves." That's the prescription of Dr. B. I. Pippin, flying doctor of Richland Center, Wis.

"Besides," he adds, "it's dangerous to drive a car."

Dr. Pippin estimates that traveling by air has saved him almost six months' time in the last 24 years. The surgeon, who has been flying since 1922 and making professional air trips since 1926, regularly flies from Richland Center to Reedsburg Municipal hospital. He also uses his plane for short routine hops and has flown to almost every major city to attend medical conventions.

• • •

In Marengo, Iowa, high school youngsters get off to a flying start. In fact, three of them already are licensed to fly planes. Youngest of the trio is Peggy Olson, 16, who earned money for her flying lessons by working in a drugstore and by detasseling corn. Their instructor is Dale Griffith, veteran of the Pacific war.

• • •

STILL IN DEMAND

Despite the large quantities of surplus craft available and adequate production of new models, a sizable number of prewar type used airplanes still are in demand, it is revealed in price ratings released in the spring 1947 edition of Air Market Values.

Bringing the highest comparative prices are five-place Beech, Howard, Spartan, Stinson and Wacos which have no 1946 counterparts Also high in current market favor are executive corporation transports, such as Lockheed 10s and 12s, Beech 18s and Grumman amphibians. Hardest hit in the current market are small two-place light planes.

• • •

HORSES HOP ATLANTIC . . . "Peaclaw," one of six race horses flown from London aboard a Skymaster to race in California, is led from the plane by a trainer.

• • •

PEAK FREIGHT YEAR

Member lines of Independent Airfreight Association, Inc., will carry 220 million ton miles of freight in 1947, more than 12 times the amount transported in 1946, the first year of operation, company officials predict. The five IAA lines include the Flying Tiger line, which has an army transport command contract calling for two flights daily to both Tokyo and Hickam field, Hawaii; Slick Airways, Inc., U S. Airlines, Inc., Willis Air Service, Inc., and Flamingo Air Service, Inc.

This Home-Mixed Cough Relief Is Truly Surprising

Easy. No Cooking. Big Saving.

You may not know it, but, in your own kitchen, you can easily prepare really surprising relief for coughs due to colds. It's old-fashioned—your mother probably used it—but for real results, it's hard to beat.

First, make a syrup by stirring 2 cups granulated sugar and one cup of water a few moments, until dissolved. No cooking needed. It's no trouble. Or you can use corn syrup or strained honey, instead of sugar syrup. Then get 2½ ounces of Pinex from your druggist. This is a special combination of proven ingredients, in concentrated form, well known for prompt action in throat and bronchial irritations.

Put the Pinex into a pint bottle, then fill up with your syrup. Thus you make a full pint of splendid cough syrup, and you get about four times as much for your money. It never spoils. Children love its pleasant taste. And for quick relief, it's a wonder. It loosens the phlegm, soothes the irritated membranes, eases the soreness, makes breathing easy, and lets you get restful sleep. Just try it, and if not delighted, your money will be refunded.

Monopolistic Practices Threaten Free Economy

FOLLOWING closely upon the heels of a house sub-committee report concerning the evils of monopoly and concentrated economic power, President Truman, in his message on the State of the Union to the 80th congress, held the correction of these evils in our system of free enterprise as second only in importance to curbing the power of labor unions.

Soon after the senate reconvened, Senator Wayne Morse (Rep., Ore.) introduced his "anti-monopoly act of 1947" making it unlawful for business firms to form a monopoly and prohibiting them from joining international cartels and providing a $3,000,000 annual appropriation for the justice department to enforce provisions of the proposed law. Senator Morse was joined in introduction of the measure by Aiken (Rep., Vt.); Langer (Rep., N. D.); Young (Rep., N. D.); Murray (Dem., Mont.); Kilgore (Dem., W. Va.) and Taylor (Dem., Ida.).

Some provisions of the bill would eliminate discriminatory freight rates by directing the Interstate Commerce commission to prepare uniform class rates for railroad transportation; authorizing the justice department to participate in patent suits and prohibit patent licensing agreements which limit production or control prices; authorizing the Federal Loan administration to make long term capital loans at low interest to small and competitive business enterprises with emphasis on guaranteed loans handled through private banks; more adequate enforcement of the Sherman and Clayton acts, and amendments making officers and directors of corporations violating the acts liable to penalties; authorizing the Federal Trade commission to act as master in chancery in any anti-trust proceeding and to bring findings of fact and recommendations to the court; directing the President to review the operations of regulatory agencies.

A Losing Battle

Recently your Home Town Reporter discussed the report of the house small business committee showing how ineffective had been the fight against trusts and monopolies during the past 50 years, and how this concentration of economic power had grown to effectively shut out competition.

President Truman, although aware of the conservative trend of the present congress, did not hesitate to back up this house committee report and, indeed, of a prior finding of fact by a committee known as the temporary national economic committee. Said the President:

"The second major policy I desire to lay before you has to do with the growing concentration of economic power and the threat to free competition in private enterprise . . to strengthen and enforce the laws that regular business practices is not enough. Enforcement must be supplemented by positive measures of aid to new enterprises Government assistance, research, programs and credit powers should be designed and used to promote the growth of new firms and new industries . . . we also should give special attention to the decentralization of industry and the development of areas now under-industrialized."

Expect Little Action

Although this question of eradication of monopoly and concentration of economic power is considered by economists as ranking high in importance if the American capitalistic and free competitive enterprise system is to survive, there is grave doubt if this congress will take any action, either upon the President's suggestion or the bill which Senator Morse and his colleagues have introduced. It may be remembered that Senator Morse introduced this same bill in the 79th congress and it ran up against a stone wall of opposition. If possible, the present congress is more conservative, more inclined to let business alone than even the last congress, and although the anti-trust division of the justice department and the restraint of trade suits may be pressed by this and other agencies, there simply are insufficient funds and personnel to carry through on any well organized program, if not backed by further action from congress.

After reaffirming his belief in capitalism, Senator Morse declared:

"However, I refuse to blind myself to the fact that private property economy does not entitle great combinations to a license to make unreasonable profits and exercise unreasonable controls over the public at the expense of the rank and file of the American people. I refuse to ignore the fact that if we are to maintain this private property economy then the individual citizen who wishes to exercise economic initiative must be able to do it in a free competitive system."

(Editor's Note: This is another in the "Stories of the States" series.)

By EDWARD EMERINE
WNU Features

There's no place like Missouri—as any Missourian will tell you. Part northern, part southern, part eastern and part western, and wholly American, the "Show Me" state is a collection of individuals, climates, soils, industries and resources. "Build a fence around Missouri, cut it off from the rest of the world and it will get along all right," is a boast often heard.

Missourians might be nearly right at that about their state being self-sustaining Cut off from the rest of the world, they still could enjoy mountains, plains, rivers and lakes They could eat beefsteak, lamb chops, ham and bacon, fresh fish, fried chicken, fruits, vegetables and bread, and still have plenty of whipped cream, pie, cake, sugar, potatoes—Irish or sweet—oatmeal, butter and eggs. Their shoes would be made in St. Louis, and they would have a choice of wool or cotton clothing, straw or felt hats, light clothing or fur coats. Besides, they would have whisky, beer, wine, tobacco, corncob pipes and the Missouri mule. They might be short on gold and a few other luxuries, but they would have coal, wood, lead, zinc, iron, glass, clay, copper, nickel, cobalt, steel, antimony, tungsten, arsenic and some oil and gas.

Topography Is Diversified.

Topographically, Missouri is more a part of several other regions than a region in itself. Northern Missouri is a continuation of the rich, rolling farm lands of Iowa. Western Missouri is a part of the great mid-continental prairie. Southwestern Missouri is part of the Ozark plateau of Arkansas, and flat southeastern Missouri is delta or bottom land characteristic of the lower Mississippi valley

The state's diversity is even pronounced in its people. The quiet St. Louis business man is unlike the go-getter from Kansas City. The farmer in northern Missouri speaks a different language than the delta agriculturist. And the Ozark people differ from all the rest. On one thing they all agree: Missouri is a great state! Missourians have a state pride as deep and fixed as any Texan's.

There are no deserts, no barren peaks in Missouri. Corn grows tall, woods are thick, fruits and berries abound, and beneath the soil's surface are rich stores of minerals.

High in Industries.

Although a rich agricultural state, Missouri has a two billion dollar manufacturing industry even in normal years. Meat packing at Kansas City and St. Joseph, boots and shoes at St. Louis, men's and women's clothing in all the large cities, tobacco processing, airplane manufacture, book and other printing, and industries established to process the state's resources and raw products place Missouri among the ranking industrial states. Mining, lumbering, cement making, corn cob pipes and other products are important industries. Both Kansas City and St. Louis rank high as wholesale distribution centers for the entire Mississippi-Missouri valley. Flour mills and cereal plants at St. Joseph had a tremendous war output.

Missouri is one of the few middle states that yet markets ties, lumber, laths and shingles in large quantities, supporting more than 300 commercial sawmills. The state has the largest deposits of lead, zinc and coal in the Middle West. It also has valuable clays, building stone and sands. Missouri produces about 42 per cent of the annual production of baryte for the United States.

With its varied topography, Missouri has many scenic attractions. It has more than 240 recorded caves, many with several floors and some with underground streams. Besides its many natural lakes, it has Lake of the Ozarks which was created by the Bagnell dam across the Osage river, built in 1929. This lake is 129 miles long with 1,300 miles of shoreline. Big Spring, with a measured daily flow of 640,000,000 gallons, is the largest in the world. All streams and lakes are stocked with fish, and the hunting of quail, ducks and other birds is widespread. The forests and hills of the Ozark mountains are nationally famous.

Spanned by Railroads.

Missouri is one of the leading railroad states of the nation, being served by 13 trunk line roads.

Agricultural products of Missouri include two and one-half billion pounds of beef annually; one billion pounds of pork; four billion pounds of milk; one million pounds of chickens; besides eggs, sheep, cotton, wool, corn, wheat, tobacco, soy beans and other crops.

From its rich historical background, Missouri has emerged as a friendly, hospitable state, a little more southern than northern in accent, a little more western than eastern in its ways.

LaSalle's explorations in 1682 located what is now Missouri as a part of the vast Louisiana purchase. It was relinquished to Spain in 1762, returned to France in 1800 and purchased by the United States in 1803. During the Civil war, Missouri, although a slave state, furnished 108,773 troops to the Union and more than 50,000 to the Confederate army.

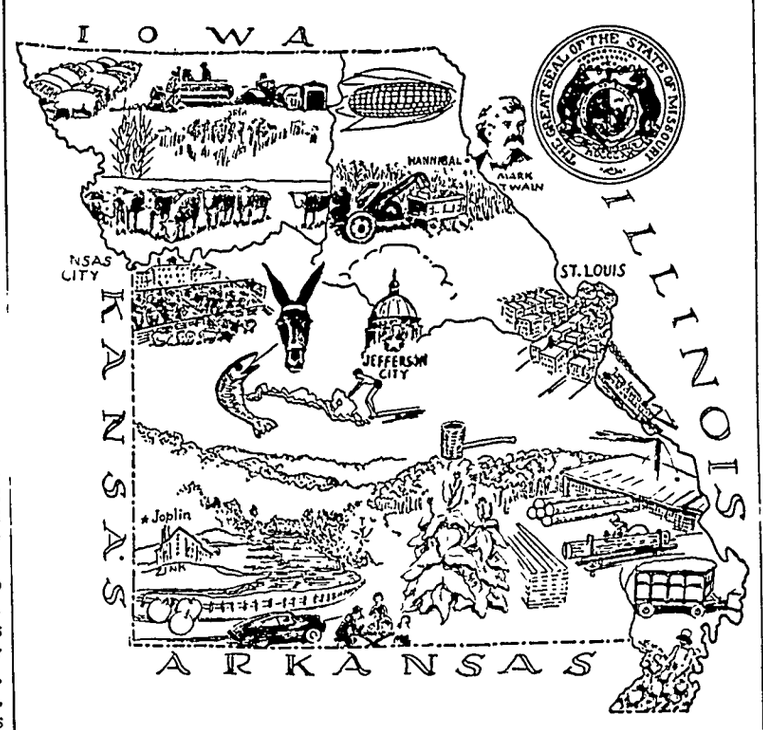
Many Historic Sites.

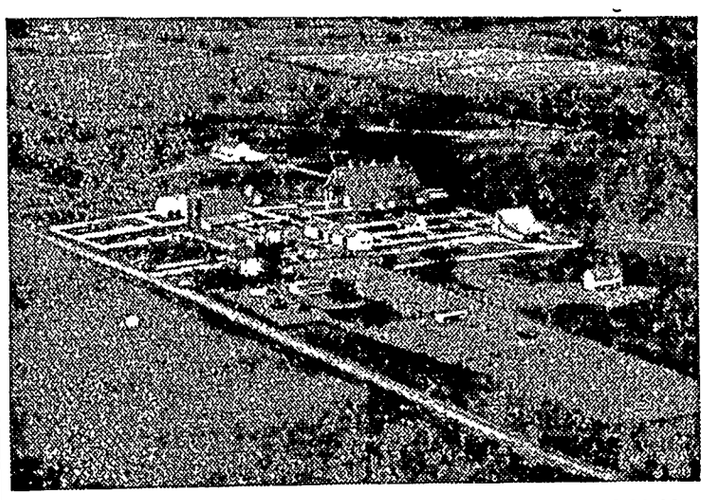
The state has many sites of historic and prehistoric interest. At many places are traces of Indian villages and camp sites. Indian mounds and earthworks are numerous The old home of U. S. Grant, built by the general himself, still stands outside the city limits of St. Louis The boyhood home of Mark Twain (Samuel L. Clemens) is preserved at Hannibal, and statues of Tom Sawyer and Huckleberry Finn have been erected.

Missouri is known as "The Mother of the West." Inspired by reports of the Lewis and Clark expedition, a St. Louis Spaniard named Manuel Lisa in 1809 organized the first of the fur-trading companies. Jim Bridger, first white man to see the Salt Lake valley, was a Missouri fur trader The Oregon Trail led from Missouri to the Pacific coast, and Independence, St. Joseph and other western Missouri towns outfitted the men who conquered the West. Eastern terminus of the Pony Express was at St. Joseph, and the Santa Fe Trail was blazed from New Franklin to the Southwest, with the Santa Fe railroad to follow later.

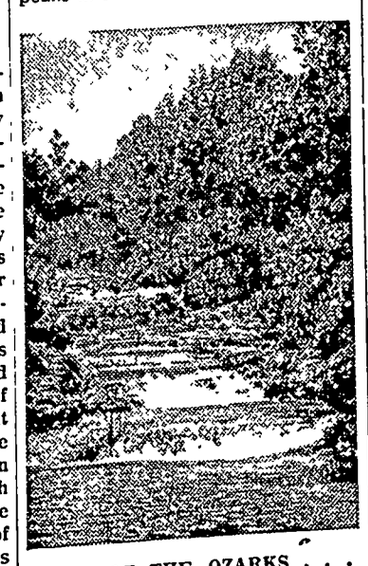
It was the "Missouri Compromise" act of congress that brought Missouri into the union as a state in 1821.

Born in turmoil, it has endured all the hardships of pioneering, insurrection, reconstruction and modern competition. Perhaps through the trials of generations its people have learned that a "show me" attitude is far safer than naive acceptance of things at face value!





TYPICAL FARM SCENE . . . Modern farms dot the rich and highly productive rolling acres of Missouri. Here is shown the J. C. Penney farm near Hamilton.



LAND OF THE OZARKS . . . Sylvan scenes abound in the picturesque Ozark mountains. This is a typical springfed stream in the mountain fairyland.

LOYAL SON . . . Phil M. Donnelly, governor of Missouri, is a loyal son who "never bothered" to leave his native state. Born at Lebanon, Mo., March 6, 1891, Donnelly attended Missouri schools, practiced law in his native state, served as county and city attorney, and spent 20 years in the state legislature before being elected governor for a four-year term in 1944. He is married and has one son.

Worthless Swamp Converted into Productive Farm Land

Not many years ago much of the southeastern part of Missouri was a great wooded swamp. "Swampeast" it was called. Today it resembles Yazoo valley of Mississippi, with some of the richest soil in the world.

First came the woodsmen who cut down the trees in the swampland. Next came a few settlers who were successful with diversified farming. In 1923 southern planters and sharecroppers, running away from the boll weevil, discovered the incredible richness of "Swampeast," where in places the alluvial muck had been as much as 200 feet thick.

More than two million acres of Swampeast today are drained by great ditches. What was once worthless swamp land is now worth up to $1,000 an acre! It produces almost twice as much cotton to the acre as any other non-irrigated land known. Today it has 400,000 acres in cotton, which, although only two per cent of Missouri's farm land, makes cotton the state's leading cash crop.

One of the largest developments, consisting of more than 1,000 miles of ditches which drain 550,000 acres, is the Little River drainage district, built by private enterprise without a penny of federal or state money.

MINUTE FICTION

Hope Eternal

By Gwynn Jones

WNU Features.

EPITAPH JONES closed the door of the crazy old cabin with a resounding bang. He gave the house a malignant look before he turned and stamped noisily off the sagging porch.

Though he looked a carefree figure, Epitaph's thoughts were acutely painful. "A weepin' woman. Always a-weepin'. Livin' in lux'ry, a lovin' man, all the work she can do and still she weeps. No sooner she stops weepin' for one thing she begins weepin' for somethin' else. Weep and cry—cry and weep, till I gotta find me some real sunshine somewhere, quick."

As though drawn by a magnet, his feet climbed a steep street, passed a pool hall, a fruit market, a barber shop, a pawn shop. He turned through a white-washed gate into a neat yard where red tubs set on great gray stumps waited their summer cargo of flowers.

Epitaph's knock was answered by a trim young woman who greeted him with a pleased laugh.

"Why, how-de-do, Mr. Jones. I was jest sayin' to myself I wisht that nice Mr. Jones would drop along and here you come promenadin' in. Do have this easy chair, Mr. Jones, and lemme take your hat."

Tearful spring had drifted into gracious summer and summer had faded into frost-tinted autumn when Epitaph again crossed the black and gray ash heaps where grimy children and bony goats still swarmed. He did not swagger now. His raiment was as natty as ever and his cap still clung at a rakish angle but there was a chastened air about him. He had a look of one who has suffered a grievious disillusionment.

"Why how-de-do, Mr. Jones. I was jest sayin' to myself I wisht that nice Mr. Jones would come along."

Pausing before the crazy old cabin, he surveyed it fondly. Then he tip-toed across the sagging porch and slowly pushed open the protesting door.

A TALL thin woman in a dejected black dress appeared from an inner room. She saw Mr Jones and began to laugh. Mr. Jones felt the universe reeling. Sissy laughing!

"Why Sissy, I thought you was such a weepin' woman. You sick, Sissy?"

"No indeedy. Never felt better in my life. Come right in, Epitaph." Sissy trilled merrily.

"How come you to change so, Sissy?"

Sissy chuckled, "Well, when you went off with that gigglin' Cyrene I took a thought to myself. If that no-account Cyrene can laugh another girl's man away from her, I says, I better learn me some laughs too, so I did."

Epitaph shuddered as at a prickling memory.

"But Sissy, I don't like laughin' women. Can't you weep jest a little, Sissy?"

"No, I'll weep no more. How come you stayed at Cyrene's so long if you don't like laughin' women, Epitaph?"

"This mornin' she got a—a kind of laughin' fit and throwed a hammer at me. So I took it was kind of a hint and I jest natchelly snuck out and left. Hammer hit me, too."

"Ain't that a shame. Cyrene didn't ought to act so. Now me when I have laughin' fits I jest hurl flat irons," and Sissy caught up one that stood on a near-by table and advanced on her guest in a perfect gale of merriment.

THE west was still bright when Epitaph beached his boat on the sandy shore A crooked path led him to a small clearing in a wood. On a ragged blanket before a ramshackle hut built mostly of packing cases and tin strips, sprawled a man, idle, relaxed, half-hidden in a haze of rank tobacco smoke. A scrawny hound, equally relaxed, dozed beside him. As Epitaph Jones gazed on that peaceful scene a sense of relief, of security, swept over him.

The man on the blanket looked up. He spoke with a rare economy of effort.

"Hi, Ep'taph. Make y'self t'home. Meet m' sis' 'Vang'line." He closed his eyes, exhausted.

Epitaph shivered—half turned to flee. Then he made an about-face.

Said Mr. Jones most politely, "How-de-do, Miss 'Vangeline, I jest dropped in to see would you like me for a steady boarder. I need me a change of climate, bad, and with you I could dwell forever in one apex of glorious delightsomeness," concluded Mr. Jones in an ecstatic burst of poetic fervor.

DELICIOUS! BRAN MUFFINS
Flavored With Fresh Orange!

So quick and easy to make, too!

Kellogg's toasted All-Bran and fresh orange juice! Yummy! What flavor!

⅓ cup shortening	1¾ cups sifted flour
½ cup sugar	2 teaspoons baking powder
1 egg	¼ teaspoon soda
½ cup Kellogg's All-Bran	½ teaspoon salt
1 teaspoon grated orange rind	½ cup orange juice
	¼ cup milk

Blend shortening and sugar. Add egg; beat well. Stir in Kellogg's All-Bran and orange rind. Add sifted dry ingredients to first mixture alternately with orange juice and milk. Stir only until flour disappears. Fill greased muffin pans two-thirds full. Bake in moderate oven (400° F.) about 30 minutes. Makes 10 orange-y muffins.

Good Nutrition, Too! All-Bran is made from the VITAL OUTER LAYERS of finest wheat — serve daily as a *cereal*.

Kellogg's ALL-BRAN

GOT A COLD? Help shake it off with HIGH ENERGY TONIC

If you are run down—because you're not getting all the A&D Vitamins you need—start taking Scott's Emulsion to promptly help bring back *energy* and *stamina* and build *resistance*. Good-tasting Scott's is rich in natural A&D Vitamins and energy-building, natural oil. Buy today! All druggists.

SCOTT'S EMULSION YEAR-ROUND TONIC

THROW AWAY HARSH LAXATIVES!

Millions Have Ended Constipation with Healthful Fresh Fruit Drink

Don't form the habit of depending on harsh, griping laxatives until you've tried this easy, healthful way millions now use to keep regular.

It's fresh lemon juice and water taken *first thing* in the morning—just as soon as you get up, the juice of one Sunkist Lemon in a glass of water. Taken thus, on an empty stomach, it stimulates *normal* bowel action, day after day, for most people.

And lemons are actively *good* for you. They're among the richest sources of vitamin C, which combats fatigue, helps resist colds and infections. They supply vitamins B_1 and P, aid digestion and help alkalinize the system.

Try this grand wake-up drink 10 mornings. See if it doesn't help you! Use California Sunkist Lemons.

NONE BETTER WHY PAY MORE? St. Joseph ASPIRIN WORLD'S LARGEST SELLER AT 10¢

COLD SUFFERERS!

666 STARTS RELIEF IN JUST 6 SECONDS

Get famous, prescription-type 666, for super-speedy relief from cold miseries. Try 666 Cold Tablets, or, 666 Liquid Cold Preparation today. Caution: Use only as directed.

GET SEED OATS TESTED EARLY

Reports are coming in from all sections of the state concerning poor germination tests of seed oats. Farmers who are having germination tests run have the advantage of knowing how heavy to seed oats next spring. Along with germination tests, plans should be made to clean and treat oats before planting time The seed should be treated with New Improved Ceresan as a protection against excessive damage from Helminthosporium.

The lamb crop in this country will probably go down again in 1947 for the sixth year in a row

When Iowa farmers plant their corn on the contour they can expect to harvest about 10 percent more than when planting up and down the slopes.

Fifty-eight million spring pigs is the national goal this year.

HANCOCK COUNTY BOARD PROCEEDINGS

3RD ADJOURNED JANUARY MEETING

Garner, Iowa
February 3 1947

The Hancock County Iowa, Board of Supervisors met in session pursuant to adjournment on above captioned date with F J Schoun George Th Gerdes and John Chambers, present

MANAGEMENT VITAL TO POULTRY IMPROVEMENT

The Chicken-of-Tomorrow program to improve the quality of poultry meat produced in the state is primarily a management program, emphasizes W. R. Whitfield, Iowa State College poultry specialist.

A number of hatcherymen and flock owners over the state have indicated the belief, Whitfield says, that the quality improvement campaign is aimed at breeders. While breeding is important, it can account for only about 20 percent of the improvment needed. The other 80 percent must come from the adoption of up-to-date practices on the farm

As with the successful All-Pullet Laying Flock program, the Chicken-of-Tomorrow program calls for the buying of quality chicks. On that score, breeding is important. In order to develop into quality meat birds, chicks must have the breedin ability to put on fast, economical gains and feather fast.

Once the chicks are on the farm, however, housing, feeding and disease control determine the kind of market birds produced In Iowa it is the management phases of quality improvement that need the most attention, Whitfield says. That's the primary reason for the all-out cooperation of the Agricultural Extension Service and all poultry and allied industries in sponsoring the simple but program management.

I, A. J. Kudje, Secretary of the Klemme Independent School District do hereby certify that this report is a true and correct statement of the financial matters of said district for the quarter ending December 31st, 1946 as shown by the records in my office.

A. J KUDJE,
Secretary

To bear up under loss, to fight the bitterness of defeat and the weakness of grief, to be a victor over anger, to smile when tears are close, to resist disease and evil men and base instinct, to hate hate and to love love, to go on when it would seem good to die, to look up with unquenchable faith in something evermore about to be—that is what any man can do, and be great.
—Zane Grey.

Milk production has been increased as much as 25 percent by dusting dairy cattle for grubs.

Importation of alfalfa seed from other countries greatly increased during the last 6 months of 1946, figures released by US DA show.

Deaths in U. S. railway grade crossing accidents were reduced from 2,568 in 1928 to 1,840 in 1944.

Every state in the United States grows corn.

"Of The People, By The People, And For The People"
•
..... LINCOLN MIGHT WELL HAV HAD COOPERATIVES IN MIND WHE HE SPOKE THOSE IMMORTAL WORD
•
".. OF THE PEOPLE"?
Yes indeed! Co-ops are made up of th people from the small towns, farms an cities, a real cross section of the natio All persons are eligible for membershi Co-ops truly are, "of the people."
".. BY THE PEOPLE"?
Certainly! Co-ops are operated by t members. One member, one vote. A management is under the direction the Board of Directors, elected in op meetings by a vote of the members. Y Co-ops are, "by the people."
".. FOR THE PEOPLE"?
Of course! Co-ops incarnate the publ interest because they are operated f the benefit of patron-owners, not for t profit of investors. No great financi burdens must be cleared in order to sha in the benefits. Membership shares a low cost and may be earned in savin made through trading with the co-op Decidedly co-ops are, "for the peopl and their best interests.

OFTEN COSTLY TO BUY CHEAP SEED

When Sold At Bargain Prices Weed Seed Percentage Frequently High

The smart farmer will check carefully the material on the seed tag before buying any agricultural seed, believes E. P. Sylwester, in charge of the seed labratory at Iowa State College.

Cheap seed often is the most expensive, Sylwester warns. This is particularly true in the case of seeds sold at "bargain" prices, for they frequently contain a high percentage of weed seed.

The Iowa State scientist believes much of the present weed problem is due to low-quality seed sold by unreliable dealers. He says Iowa farmers should take every precaution to receive the full benefit of protection under the Iowa seed law.

Iowa Law

The Iowa law is much stricter for dealer labeling than in farm-to-farm sales Farmers can help protect themselves by carefully reading the tags on any agricultural seeds they plan on buying Seed containing more than 3 percent weed seed cannot legally be sold in Iowa

Seed sold in farm-to-farm sales must be labeled with the date and percentage of germination, and must carry a guarantee that no primary noxious weed seeds are present. Seed can be sold to commercial establishments for purposes of recleaning without violating the law.

If there is any danger that agricultural seed is weed-infested, it should be thoroughly cleaned, it should be thoroughly cleaned before planting. A seed test should be run to determine the freedom from weeds and the germination power. If the purity is good but germination low, seeding rates should be increased accordingly.

Reliable Dealer

Sylwester believes one of the most important factors when purchasing agricultural seed is to buy from a reliable dealer. A dealer cannot operate for any length of time without the good will of the community

Another point to watch is to check for primary noxious weeds It is illegal to sell agricultural seed containing seeds of such weeds as quack grass, perennial sow thistle, Canada thistle, bindweed (creeping Jennie), horse nettle, perennial peppergrass, leafy spurge or Russian knapweed.

Farmers should also check the label for germination percentage and for secondary noxious weeds, such as buckhorn, wild carrot, sour dock and red sorrel. And be sure the variety of seed you buy is adapted to your purpose.

If you purchase good seeds fully labeled as to purity and germination, remember where you got them. Then patronize that dealer in the future, Sylwester suggests.

ROAD NOTES

On February 1st each year the County Engineer is required to file a report with the State Highway Commission covering the road work of the previous year This report which consists of 26 pages is a summary of the details of all expenditures from the county road funds. A copy of the report is filed with the County Auditor and may be inspected by anyone interested

There are two road funds controlled by the Board of Supervisors and the County Engineer. The Road Maintenance Fund is raised from taxes levied on all property in the county. The Road Construction Fund is that portion on the 4 cent gasoline tax received by the county or 1 and 14-15 cents per gallon on the net returns after deducting refunds. The balance of the 4 cent gasoline tax goes to the State Highway Commission, the cities, and the town of Iowa.

The Road Maintenance Fund of Hancock County was spent as follows:

Roadway maintenance	18,811.53
Surface maintenance	93,017.38
Bridge and culvert repairs	4,387 04
Snow removal	12,163 01
Road drainage	4,808.55
Miscellaneous	1,128.36
Administration & Engineering	2,774 11
Total	137,089 98

You will observe that surface maintenance is the biggest item of expense in maintaining our roads. This consists of blading the surface of the roads to keep them smooth and adding gravel when the surface wears thin This item could be reduced by surfacing our main traveled roads with concrete or black top As soon as we complete the grading of our truck system, we can start a program of constructing a higher type surface

The Road Construction Fund of Hancock County was spent as follows:

Right of way	$10,106 94
Bridges and Culverts	22,086 70
Grading	17,994 00
Clearing and grubbing	2,784 75
Gravel surfacing	12,410.00
Gravel pits	3,291 00
Administration and Engineering	3,652.06
Total	$72,325 45

During the year we graded and graveled 13 miles of local roads, constructed one concrete arch extension, three wooden bridges, and 62 culverts. The money spent on the grading and graveling of the Kanawha-Goodell road and the Hutchins-Woden road came from the Farm to Market Road Fund which consists of federal and state money and is spent under the supervision of the State Highway Commission.

Our future program for the construction of roads from the Farm to Market Fund is as follows. In the year of 1947 we hope to grade the roads from Woden north and west to the county line, and the road from Hayfield, east, through Miller In 1948 we hope to grade the road from Klemme east to the county line. In 1949 we hope to grade the road from Klemme to Corwith. The completion of this program depends on funds that may be made available We find that while construction funds have increased about 40 percent above prewar amounts, construction costs have more than doubled.

Most Head Vegetables Need Extra Preparation

Too close a trim of head vegetables such as cabbage, lettuce, broccoli, cauliflower and celery means a loss of the part that is generally richest in vitamins and minerals. Making these outside parts appetizing calls for a little extra care. They need careful washing. Then, because they are less tender than the inside, they may be cut in small pieces and put in the kettle a little ahead of the rest of the vegetable.

The outside leaves of cabbage may be chopped and cooked and the more tender inside served raw in salad. Outside leaves may also be used in making cabbage rolls, an economical meat dish.

To make cabbage rolls, wash the leaves and wilt them in hot, lightly salted water until they are limp enough to roll. Mix chopped cooked meat with chopped onion, crumbs or boiled rice, a little melted fat, pepper and salt, and moisten with gravy, milk, chili sauce or catsup. Put some of this mixture on each leaf and roll it up. Place rolls in a baking dish, add hot gravy or a little hot water, cover and bake in a moderate (350-degree) oven about three-fourths of an hour, or until the cabbage is tender.

Cut T.B. Toll

The 1945 death rate for tuberculosis reached an all-time low figure of 38 deaths per 100,000 population in the United States, according to the 1946 Encyclopaedia Britannica Book of the Year. Other statistics indicate that tuberculosis may eventually be stamped out in the United States. While 103.1 out of every 100,000 people in Minnesota died of tuberculosis between 1915 and 1919, only 27.5 per 100,000 people died from the disease between 1940 and 1944, a 73 per cent reduction. One hundred ten children under the age of 15 died of tuberculosis in New York City in 1940 compared with 1,200 children's deaths from tuberculosis in 1915, when the number of children in the city was approximately the same.

CAN EXPECT SOME FARM PRICE DROP

But No Sharp Break Such As Followed World War I Is Now In Sight

Farmers can look for some decline in demand for farm products and a weakening of agricultural prices during 1947. But there probably will not be a sharp break in prices such as followed World War I, says Francis Kutish, Iowa State college farm economist.

Less than 2 years after the first world war, prices of industrial goods and farm products dropped rapidly, followed by a slump in industrial production. If history should repeat itself, we could expect a rapid drop in prices next April or May

The outlook for the present period, however, is considerably different from that of 1919-20 This is due largely to the greater backlog of demand for such durable goods as automobiles, farm machinery, refrigerators and housing In World War I, industrial plants were not converted to war goods production on the scale of World War II.

Price Supports

Although farm prices rose nearly as much this time as in the first world war, the average of all prices rose only 60 percent from December 1941 to December 1946. During the inflation of World War I prices climbed 145 percent.

Farm prices now are out of line with other prices and may be expected to get back in line during the next 2 years. They won't drop as much as they did in 1920 and 1921, however, because of the government price supports which are to remain until the end of 1948.

The much smaller price rise for industrial goods in this inflation suggests a smaller decline in the post-war period. This means less ligelihood of a reduction in industrial production, Kutish believes.

Budget Balanced

Much of the inflationary potential is now out of the picture. The federal budget is now balanced Nature blessed us with huge crops in 1946. Production of some manufactured goods, notably textiles, is catching up with demand at current prices.

It appears likely that a high level of production will be maintained this year The strike danger now seems less troublesome, with management and labor working together better

Consumers will shift their spending for toward manufactured goods, but the reduction in demand for farm products will not be great as long as the national income stays up at the current level of 175 billion dollars a year.

Moth Prevention

Clothes moths are found in nearly all homes regardless of their location. Articles in reasonably tight trunks, chests or wooden boxes can be protected during the summer by scattering between the folds of the clothing either flake napthalene or paradichlorobenzene Under ideal conditions one-quarter pound will give enough protection. These chemicals are cheap An overdose of flakes is safer than too little. Clothes that are folded between sheets of thin clean paper are better protected. Keep all covers tightly closed. Paper garment bags are of little value for killing moths, but if the clothing is free from moths and put into a garment bag and sealed, the paper will keep the moths out indefinitely When storing clothes in a closet, clean the closet thoroughly Seal up all cracks and equip the door frames with rubber or felt gaskets so the door will shut tight. Hang from the shelf or ceiling muslin bags filled with one pound of the chemicals mentioned. The fungus will stop the moths from feeding and will gradually kill them.

River Jordan

The River Jordan, renowned in Bible and hymn, is a bizarre stream that rises in mountain springs of Lebanon and Syria, north and northeast of Palestine. By the time it reaches the papyrus marshes of Lake Hule, "Merom" of the Bible, it has fallen to only 230 feet above sea level. Nine miles later, at the clear sweet waters of Lake Galilee in northern Palestine, the Jordan is nearly 700 feet below sea level. Funneled from the lower end of the lake, it then winds southward in an ever-downward course until it empties into the landlocked, salt depths of the Dead sea, 1,290 feet below sea level. The trench through which the Jordan flows is known as a rift valley, a drop in the earth's crust caused by geologic "faults." This trough—remarkably straight, and ranging from 2 to 14 miles in width—is only 65 miles long from Lake Galilee to the Dead sea.

PLATES NOT REQUIRED BY NEW CORN PLANTER

An experimental corn planter, which does away with the need for plates and which will accurately drop ungraded corn, has been developed at Iowa State College. The machine is not being manufactured and may not be on the market for a long time.

Designed by Charles Morrison, a research fellow working under supervision of E. V. Collins of the college agricultural engineering staff, the new machine will take seeds varying in size from lima beans to popcorn and drop two, three or four per hill, depending on how it is set. It will drill seed just as accurately.

The planter differs from conventional models in that vertical drums are fitted on the outside of each hopper. Seed flows from the hopper into the bottom of each drum There it is picked up by mechanisms on rotating disk, fitted against the inside of each drum. As the disk turnes excess seeds are spilled from the mechanism until only one kernel remains to be deposited into the seed tube. Planting rates are varied by varying the space of the disk.

Because the new planter can handle seed of varying sizes, Collins believes it may pave the way to eliminating the time-consuming job of seed grading, which contributes to the present high cost of hybrid seed. Moreover the planter will speed corn research which entails frequent planting of small quantities of ungraded seed. And it will eliminate the trouble of changing and testing planter plates each spring and the error frequently made in using the wrong set of plates.

Between 1795 and 1818, the American flag had 15 stripes.

Co-operative factories handled 84 per cent of Danish hogs.

Agriculture is the largest single industry in the nation. More than eight million people work on farms.

Bright red holly berries grow on female holly trees but male trees usually have the finest foliage.

Parsnips are a good source of the bone-building minerals, calcium and phosphrus. They also furnish some vitamin B1, and C.

Tiled baths were commonplace in Roman times.

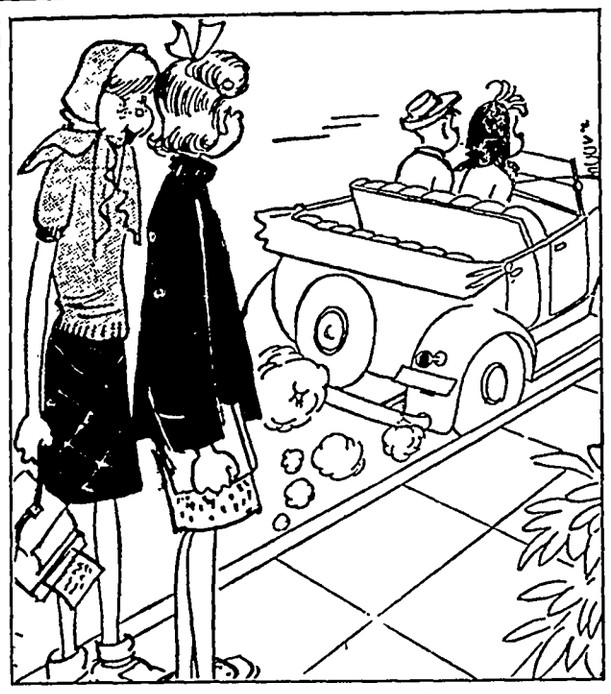
CROSS TOWN

By Roland Coe

"He's just that smart that he can get my mother to make me take him for a walk without him sayin' a word!"

BOBBY SOX

By Marty Links



"It's an engagement of convenience . . . Her father runs a garage!"

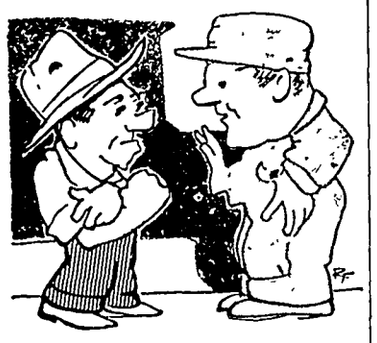
Crudeness in Reverse

The fall harvest and planting were done, and Dad and Mother decided that they would accept their daughter's oft repeated invitation to spend the week-end at her lovely modern home in the city.

When the family gathered for breakfast, Dad looked at the shining electric percolator, the gleaming automatic toaster, and the efficient electric broiler — all placed on a charmingly appointed, cheery table in the dining room.

Daughter was waiting expectantly for exclamations of admiration on her up-to-date culinary conveniences, when Dad remarked: "Well, I swan! Here you made fun of us for eatin' in the kitchen when you spent your vacation with us, but I can't see that that's any worse than cookin' in the dinin' room."

HARD TO BELIEVE



Two truck drivers locked bumpers at a busy intersection, and both got off their trucks. "Yuh big, lousy ape!" yelled one angrily, "are dem dopy eyes too bleary t' see where you're goin', or is dose clodhoppers too big t' git 'em on de brakes?"

"Aw, shucks, bud," replied the other, smiling sweetly, "you're cute, too."

Fancy Cops

Little Clarence had never heard of the famous Northwest Mounted Police, and so when he returned home from having seen a news-reel depicting these stalwart guardians of the law he was momentarily at loss for words with which to describe them.

Suddenly the youngster's face lighted up, and he exclaimed, "Oh, mom, I saw a bunch of guys riding round on horseback and everyone of 'em dressed up like Nelson Eddy!"

Imaginary Loss

Johnny stumbled along the street, crying bitterly.

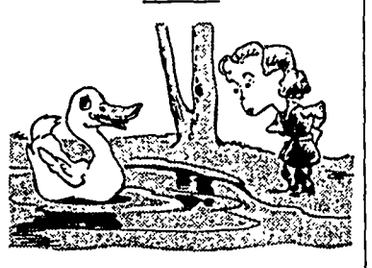
"What ails you, young fellow?" a kindly old gentleman inquired.

"I've lo-ost the d-dime the t-teacher gave for b-being the best boy in the class," Johnny sobbed.

"Oh, well, don't cry," counseled the kindly gentleman; "here is another that will take its place. But tell me how you lost it?"

"'Cause," replied Johnny, "I wasn't the best boy in the class."

POOR EXAMPLE



The mother was having a hard time each day persuading her five-year-old Dora about the health value of a bath. She decided to appeal to the very young lady's vanity.

"A daily bath," she cajoled, "will give you a beautiful figure." Noticing the young one's skeptical look, the mother questioned:

"Don't you believe me?"

"Yes, I believe you," Dora promptly answered, "only, Mom, have you taken a good look at a duck lately?"

All the Signs

"Did you hear that old man Jones' house burned down last night?"

"No, but I ain't a mite surprised. I was goin' past there in the evenin' when I saw smoke a-comin' out all around, under the eaves; I sez to myself, sez I 'Where there's smoke there must be fire.' And so there was!"

Taking No Chances

Old Gentleman—You're an honest lad, but it was a $10 bill I lost, not 10 ones.

Boy—I know it was a $10 bill I picked up, but the last time I found one the owner didn't have any change.

It All Depends

"Dad, what do pro and con mean?"

"Well, son, pro is your convincing unanswerable argument, and con is the other fellow's contemptible drivel."

Rival for Speed

Grocer—Have you been to the zoo?

Delivery Boy—No, sir.

Grocer—Well, you ought to go some time. You'd get a big kick out of watching the turtles zip past.

Caretaker

"This plant," said the gardener, "belongs to the begonia family."

"I see," said the lady. "How kind of you to look after it while they're away."

Smooth Line

"What's a diplomat?"

"A person who can tell you to go to the devil so pleasantly that you're rarin' to go."

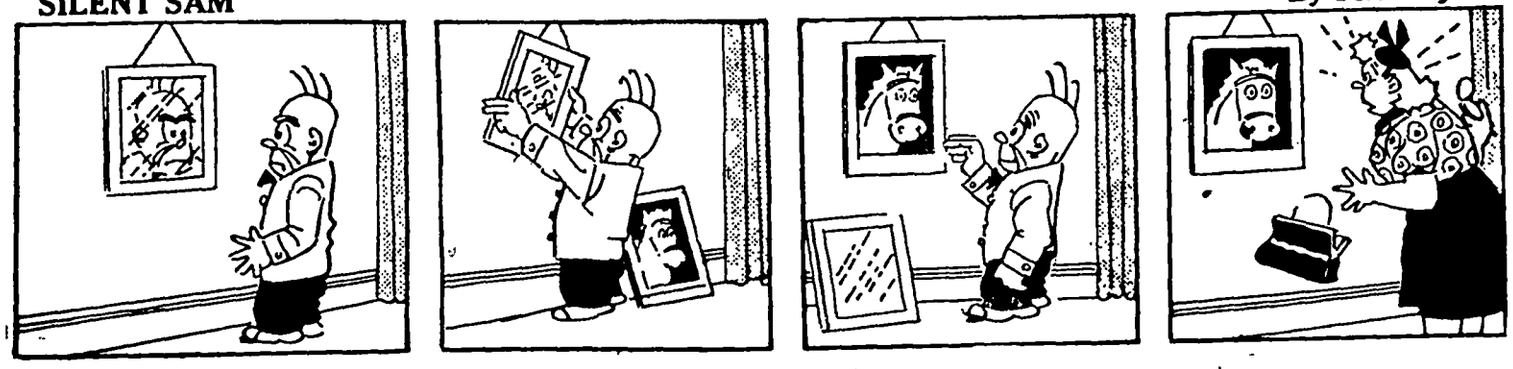
By Jeff Hayes



AND GAIETY MARK FIESTA . . . Representing the Anglo-influence in the annual mid-winter Charro Days Fiesta at Brownsville, Texas, are these two "Americanos" dancing the "jarabe tapatio," typical Mexican hat dance, under a banana tree.

THE UNITED STATES

Texas Fete Revives Colorful Days on Frontier

BROWNSVILLE, TEX.—Fired by the passion of hot Spanish blood and tempered by subdued Anglo-Saxon influence, the Charro Days Fiesta, Carnival of Nations, major winter celebration of Texas, crowds three centuries of life along Texas's first and last frontier into four days and nights of supreme gaiety.

On the border of the United States and Mexico, where the blood of Americans and Latins once flowed but now blends, 300,000 persons from both sides of the Rio Grande will cavort on February 13, 14, 15 and 16, in an hilarious pagan pre-Lenten fantasy unparalleled in America.

The Charro Days hearkens back to colorful days when titled Spanish conquerors and virile soldiers carried the sword and the cross of Christian civilization to a wild Mexican frontier.

To make the celebration as authentic as possible, residents of the semi-tropical Rio Grande Valley of Texas and their neighbors from northern Mexico appear in typical costumes of the colorful day Spanish colonial and military.

Men become charros, symbolizing the Spanish cavalier, horseback gentleman for whom the fiesta is named. A charro was a proud man of vitality, usually of Spanish descent, who rode the plains of Mexico in quest of adventure and romance.

Colorful Attire.

Charros are dressed in tight-fitting trousers, embroidered with bright colors, a jacket of dark hue with silver buttons, a gay sombrero and Mexican spurs. His beard was trimmed neatly, pointedly.

The feminine counterpart was the lady be addressed as "charra," a name derived from the colorful costume she wore—the China Poblana. It consisted of a full skirt of bright spreading skirt spangled with encounted bright sequins in a profusion of rainbow hues. She wore a white gardenia or scarlet hibiscus blossoms in her hair in memory of the love tryst with a charro, who rode up on his black horse to serenade her at the Spanish hacienda.

Aura of Gentility.

Today, at each Charro Days Fiesta, descendents of the original Spanish conquistadores mingle in the colorful carnival throngs with their fellow charros from Illinois, Michigan or Iowa — a far cry from the days when men fought with swords and blunderbusses for destinies that today yield millions of dollars annually in citrus and other harvests.

Descendants of prominent Spanish families who first settled in the region and built it into a thriving frontier city take part in the celebration each year.

Against the romantic atmosphere that pervades the four days and nights of the Charro Days Fiesta in Brownsville, there is dancing under the royal palms, lovers whisper soft words in the shadows of the citrus groves along an international border, while nationally famous Latin orchestras beat out the gay rhythm. Strolling bands of strolleurs wander through the quaint, century-old streets, singing for a coin for a smile or a pretty face.

'CHIAPANECA' COSTUME . . . Shadows of the past cling to Miss Juanita Fernandez of Brownsville, Texas, descendant of early Spanish conquistadores. She wears a typical Charro Days costume, the "chiapaneca," the state costume of Chiapa, Mexico.

During the daylight hours, there are colorful, romantic parades, extending for more than miles along humanity-massed streets. One of the most impressive spectacles is the annual children's parade, in which upwards of 10,000 school children, aged 4 to 12, from both the United States and Mexico march to the rhythm of mariachi bands, singing the folk songs of Old Mexico.

Climax of the entire fiesta, though, is the annual grand parade of Charro Days. This year the grand parade will, more than ever before, cement the warm bonds of friendship between the peoples of Latin America and the United States.

Galaxy of Events.

After the parades there are rodeos, horse races, street dances and pageants in a riot of color. On the final day of the Charro Days Fiesta, celebrants move across the river to Brownsville's neighboring city of Matamoros, Mexico.

Here, in a plaza where the Empress Carlota once trod and whose paving stones are worn by the feet of many nationalities, is staged a Noche Mexicana (Night in Mexico) in a setting typical of the days when the Emperor Maximilian and his French armies ruled Mexico 80 years ago.

So widely known has Charro Days become that representatives from most Central and South American nations are present annually.

"Turistas" from all parts of the U. S. also come to Brownsville for the fiesta and join in the festive fun. For Charro Days is "everybody's celebration." It has no rules nor regulations. Every man becomes a charro, every woman is a china poblana.

Recalls War Days of '98

SANTA MONICA, CALIF. — Favorite of doctors and nurses at the Sawtelle veterans' hospital here is Florence Robinson, 92, a veteran of the Spanish-American war. Though blind for the last nine years, Miss Robinson keeps to a busy schedule at the hospital.

Miss Robinson has never worn a uniform. When she enlisted in the army in 1898, it was the first time the government had included nurses in the armed forces and there were no prescribed uniforms. Each nurse wore the uniform of her own school.

When she began her career in 1898 during a typhoid epidemic at Chickamauga Park, Ga., nurses worked 12 hours a day in thick mud caring for men who lay on rough boards in tents. Pay was $30 a month. Ambulances at that time were horse-drawn wagons.

FIRST ELECTRIC SHAVE

We just got our first electric razor. Patient and razor are doing well. We found it under the Christmas tree and regarded it with apprehension. People had been shaving with electric razors for years. We knew that. But we had never been much of a hand with machinery. Electricity, we had always thought, was okay in dynamos, transformers, etc., but not among whiskers.

—•—

We read the directions and thought of submitting the whole business to our attorney in case of damages. Then we thought of Napoleon, of Wellington, of Old Put, of Fremont and other brave men of history. We took the apparatus out of the box and cried — "Forward! Ours not to reason why! Ours but to plug and try!"

—•—

"First be sure the white dot is in the center of the dial," said the shaving orders. Dial? Was this a radio or a razor? . Were we to get a shave or a quiz program? . . Stand your ground, men!

—•—

We fixed the dot. We made the necessary connections. We plugged in. The thing was really almost noiseless, but to us it seemed as if we had just started two airplane motors and a gasoline lawn mower. We dropped everything and read the directions again. Then we called down to see if there had been any short circuits

—•—

It was too late to quit now. We thought of the men at the Alamo and pressed on. Our face was unscathed. So was our beard. It seemed we had failed to remove the glass protecting cover from the business end of the apparatus. Life is like that.

—•—

We took this off and went to work again. On we went in the spirit of the 49ers and the men at Concord bridge.

—•—

Everything WORKED! The beard came off swiftly. Our face remained intact. In fact it came out a better face than when it went in. No blow-outs, no knocks, no backfires. Anybody want an old tube of shaving paste and a brush? Science marches on!

Down the Hatch

Dr E. M. Jelinek, director of Yale school of alcoholic studies (which we assume tried to trace all unjustifiable thirsts to Harvard or Princeton), says there was more drinking in America in 1946 than ever before. In fact, the people consumed more liquor in nine months than they had in the previous 12. Maybe the Republican victory in November ha dsomething to do with it.

—•—

But Dr Jellinek says that despite the fact there was more drinking, there was a decline in drunkenness. That is easily explained by the fact that the bars chisel on the drinks so much that it is almost impossible to feel any effect until after the sixth or seventh

• • •

TIP TO UNCLE SAM

Be a pal of troubled nations—
Poor in cash and friendship stout;
They will in reciprocation
Bellow "Throw that big bum out!"

WHEN billions, not mere millions, begin to pour into sport, you have a sure sign that the danger spot is ahead. Record-breaking crowds in college football have been a big factor in college professionalism, which has reached an all-time high. The tidal wave of gold, coming with a record boom also has broken all betting marks in both college and professional sport.

The wonder is that more scandals haven't crashed the headlines. This will happen unless sport in general gets stronger guardianship than it has drawn to date — with harsher penalties attached.

Grantland Rice

Just as pro football was coming to the finish of one of its greatest years, the Giant scandal developed and members of the Cleveland Browns, facing a championship play-off, got involved in a drunken brawl with police In both New York and Cleveland, police were kept busy with pro football players for various reasons.

Merel Hapes was barred from the Giant-Bear game and Capt. Jim Daniels of the Browns was barred from the Brown-Yankee contest in Cleveland.

Rumors are not always true—but they at least demand closer watching than many of them have drawn. In the reign of Judge Kenesaw Mountain Landis, I happen to know that the old Judge was not only respected but also actually feared by anyone even lightly involved. I don't think anyone in sport today is afraid in any way of anyone directing sport.

Too Much Temptation

The Judge suspended Buck Weaver for life because Weaver, who hadn't taken a dime, had failed to report the conspiracy. I've had more than a few ball players ask me not to print the fact that I met them at some race track. They were afraid the judge might hear about it.

Any ball player caught playing around with a bookmaker or any type of gambler would have been up before the judge for rugged punishment in a rush.

Sport, financially, has gotten too big. Too much money is involved. Discipline has gone haywire. There has been too much temptation for the weak to resist, knowing the golden doubloons that are rolling around.

Too many, high in sport, have been asleep too long. The receipts have been too good. The dream has been too pleasant. They have refused to heed "the rumble of a distant drum."

The great majority of athletes are honest. Yet too many are undisciplined and too many out of condition. We have no sympathy for grown athletes who say they have been tricked or fooled by gamblers.

Any athlete, who after the first suggestion of a crooked proposition doesn't go directly to his coach, has no place in any game. It may come to the point that any athlete under any form of suspicion may have to be watched. Certainly any jockey, football, baseball or basketball player, to mention only a few entries, seen in company with any gambler needs watching.

Only a Few Crooks

As some philosopher once said "Rubes can think up more crooked things than crooks can invent."

In my opinion the great bulk of sport is clean. But among so many involved, there are sure to be a few who are either crooked or weak. And it takes only a few of these to upset the works. This is why the game today, college and pro, needs eternal vigilance and harsher penalties.

The average person you meet will tell you that college football players should be paid, considering the big money college athletic associations take in. This may be O. K. but don't call them amateurs. For they are not. They are only fake professionals.

I recall some years ago running across Dizzy Dean when Ole Diz looked worried.

"I've just been called before Judge Landis," he said.

"I haven't been doin' anything. But I'm still skeered."

That's the type of rulership sport needs today—an iron hand plus every known way of finding out what is going on. To take anything for granted is the surest way of wading into heavy trouble.

The Babe Still Tops

When Babe Ruth entered a New York hospital some time ago, an entire nation was shocked to hear that he was seriously ill. News of his recovery has lifted the pall.

In his day and time, the Babe has signed more autographs than any other member of the human race. No one can say how many thousands of baseballs he has signed. Babe lost count years ago. He was so popular that he finally had to seek some form of self-protection.

LESSON

By HAROLD L. LUNDQUIST, D. D.
Of The Moody Bible Institute of Chicago.
Released by Western Newspaper Union.

Lesson for February 16

Lesson subjects and Scripture texts selected and copyrighted by International Council of Religious Education, used by permission.

JESUS AT THE FEAST OF TABERNACLES

LESSON TEXT—John 8:12-16, 31-36; 9 1-5.

MEMORY SELECTION—I am the light of the world he that followeth me shall not walk in darkness, but shall have the light of life.—John 8:12.

"The Light of the World is Jesus!" Who does not remember with what delight we as children sang, "Come to the light, 'tis shining for thee . . . The Light of the World is Jesus." How precious was the truth that thus flooded our souls!

Has the passing of the years dimmed the beauty and glory of that light in our hearts and lives? Do we need it renewed? God is willing and ready. Jesus is the light and just as the sunlight sheds its glory on an awakening world at dawn, so Christ sheds abroad the light of God in the hearts of believing men. The writer of these lessons pens these words with the prayer that as this portion of God's Holy Word is studied and taught, that light may break forth on many a soul lost in the bewilderment of this dark world

Our study centers around three simple words fraught with beauty and rich in meaning.

I. Light (John 8:12-16).

The text says, "Then spake Jesus" When? Just after he had silenced the hypocritical accusers of a woman taken in sin, and had spoken the word of peace to her troubled soul. She was to "go and sin no more" because she had met him who is the light of the world They that follow him "shall not walk in darkness"; they are the children of light, they have the very light of life.

How sad it is that with the light of the world shining in all its brightness, men loved their own darkness. The Pharisees, instead of receiving the Light, had to argue, and to do it on a low, fleshly plane. They even accused Jesus of being a liar. Think of that!

So it is that men may reject the Light of God and go on into a darkness made deeper because they have seen the light.

Now we look at our second beautiful word. How sweet it sounds as we repeat it—

II. Freedom (vv. 31-36).

Free! Four letters, but what a depth of meaning! Chains have fallen off, prison doors are open. The one who was bound is free But here we are concerned with an even more important liberty, the freedom of the soul. Many there are who boast of their independence, but who are merely slaves. Jesus said: "Whosoever committeth sin is the servant of sin" (v 34) not its master.

How shall they be freed? Note three things in these verses. (1) A condition—"If ye continue in my word" This means not only a profession of faith, but a daily appropriation and realization of his truth in life. (2) A promise—"Ye shall know the truth." The philosophies of men profess to be a seeking after truth, but how few there are who look to the one place where it can be found—in Jesus Christ. (3) A result—"The truth shall make you free" Truth always sets free.

Men are enslaved because, as in some foreign lands, they have not had the opportunity to learn the truth (we have failed to send it), or because they have rejected it.

Freedom and light can lead only to

III. Vision (John 9:1-5).

This is one of the most instructive passages in Scripture. A man born blind is seen by Jesus. His disciples note his interest and begin to theorize on a theological question. They had learned so little of the compassionate spirit of Jesus that they saw in this blighted life only an illustration of a theological problem. May God help us that we may never be so blind.

Jesus goes at once to his blessed work. He was in the world to do the works of God. He and the Father always work. Let us follow his blessed example. The King's business requires haste. Let us work "while it is day, the night cometh when no man can work."

By a loving and gracious act, Jesus stirs in the heart of the man that faith which causes him to go, to wash, and, glory to God, he sees!

Such a personal experience of the divine power of the Son of God leaves no doubt in the man's mind that the One who caused him to see "is a prophet." All of a man's doubts concerning the deity of Jesus Christ disappear when he becomes his Saviour.

Do not fail to read the remainder of the chapter and note how this man's faith was victorious in the face of trials, persecution, and even of excommunication; for outside the temple he met Jesus and took him as his Lord. As Dr. Scroggie puts it, "His excommunication was a promotion. He went from the synagogue to the Saviour."

"COLD BUG" GOT YOUR CHILD?

Get MENTHOLATUM quick!

© 1946, The Mentholatum Co.

Poor little chest muscles all sore and "achey" from hard coughing? Quick, Mentholatum. Rub it on back, chest, neck. Your child will *like* that warm, gently stimulating action. Helps lessen congestion *without* irritating child's delicate normal skin. At same time comforting vapors lessen coughing.

From where I sit ... by Joe Marsh

That Ring Around the Bathtub

Joe Crowell blew his top the other day. Seems that for weeks he's been trying to get his youngsters to scrub out the bathtub after using it. And this night he sees *two* rings around it—one where young Sonny left off, and another about Pinky's level.

He raves and rants—and takes it out on the missus for her lack of discipline. And later that evening he sees her quietly polishing the hardwood table that's right by his chair. She's removing the rings he's left there with his evening glass of beer!

From now on, Jeb's careful to put his glass down on the table cover—like the missus does. And I hear he's a little more forgiving about rings around the bathtub. Just keeps on patiently reminding.

From where I sit, there are little annoyances in every family—conflicting habits and opinions in every community. A little patience—a little more "forgive and let live" is the only antidote.

Joe Marsh

KLEMME LOCAL NEWS

Werner Schlawin was on the sick list over the week end.

Mr. and Mrs. Roy Arnold went to Sioux City Monday evening for a few days.

Mr. and Mrs. Art Schoenwetter and Homer Schoenwetter were dinner guests at the G. W. Schoenwetter home Sunday.

Because of the drifted roads, many of the country students stayed in town Wednesday, Thursday and Friday.

Mrs. Vern Bisom and daughter, Connie returned home last Wednesday from Fort Dodge, where Connie was a patient at the hospital. She is making a good recovery

Mrs. Ed. Jacobs and son Dean visited with Ed Jacobs at the Mercy Hospital Tuesday. Ed is making a good recovery and is expected to return home this week.

Jimmy Celebrates Birthday

Mr. and Mrs. Wm. Bessman and Harry of near Dows came last Wednesday evening to help Jimmy, son of Mr. and Mrs. Mitchell Bock celebrate his 3rd birthday. His grandparents were late due to the storm, but Grandma Bessman's cake tasted just as good to Jimmy.

Bull's Stomach Yields Two Pounds Of Hardware

A $15,000 prize bull owned on a farm near Freeport, Ill, submitted to a major operation when an x-ray revealed presence of strange articles in his stomach The operation produced 13 pieces of baling wire, 1 bolt, a dozen stones of assorted sizes, one piece of sheet metal, one by 3 inches, an 8-penny nail, part of a 16-penny nail, and some smaller odds and ends Total weight two pounds. After the operation he stood in his stall and ate hay with relish.

When buying spinach, choose stocky bunches with fresh crisp, clean leaves of good green color

It is estimated that U S plants will turn out enough floor and wall tile in 1947 to cover 850 average square city blocks.

The state tobacco monopoly in Czechoslovakia has received from the UNRRA 600,000,000 American cigaretts.

There is just one condition on which men can secure employment and a living, nourishing wage, for whatever they contribute to the enterprise, be it labor or captial, and that condition is that some one make a profit by it. That is the sound basis for the distribution of wealth and the only one It cannot be done by law, it can not be done by public ownership, it can not be done by socialism When you deny the right to a profit you deny the right of a reward to thrift and industry

—Calvin Coolidge.

MY LEGACY

To those who follow after me I'd like to leave a legacy of all the things I loved so well—each lake and stream and shady dell.

Primeval forests now so rare I would preserve with jealous care. My furry friends I would protect, and not one bird would I neglect. I want posterity to know I was a friend and not a foe.

The richest treasures in our land are those we get from nature's hand. They're ours to love, to have, and hold and should not be exchanged for gold.

We have no right these gifts to waste, for they can never be replaced. I'd like my plea throughout the land to make them safe from vandal's hands. —Enos Haywood, Pennsylvania. Angler.

Shamrocks Enter Sectional Tournament Tueday Night

The Klemme Shamrocks are getting set to win the sectional tournament to be held at Forest City starting Tuesday, February 25h when they meet Crystal Lake at 7:00 p. m.

In the upper bracket of B teams with the Shamrocks are Crystal Lake, Hanlontown, Joyce and Wesley. In the lower bracket are Goodell, Hayfield, Kanawha, Woden and Rake.

In the Class A are Forest City, Bancroft and Thompson in the upper bracket, with Buffalo Center, Titonka and Britt in the lower bracket.

If the Shamrocks win over Crystal Lake they meet Hanlontown Thursday evening, Febr. 27th at 7:30 o'clock. A win over that team will put them against Wesley or Joice in the finals on Saturday evening at 7:30 o'clock.

The Klemme Shamrocks have a good chance to win the sectional this year. Rake is doped to win the lower bracket.

Former Klemme Couple Will Celebrate 50th Anniversary

Mr. and Mrs. Gustaf H. Carlson of Ingram, Wisconsin, former residents of Klemme, will celebrate their Golden Wedding Anniversary on Sunday afternoon, Fbruary 23rd.

Open house will be held from 2·00 until 6·00 p. m, with a program to be given in the Ingram Methodist Church, at 2:00 o'clock, followed by a reception in the Village Hall. All friends are welcome to attend.

Arthur Carlson, grandson of Mr. and Mrs. Carlson, and small son of Mr. and Mrs. Jim Carlson, will sing a special song prepared by Arthur Welemeyer of Klemme, to the tnue of "On The Solid Rock I Stand." Arthur has a wonderful voice for a small boy and appears in public quite frequently.

Scout Fund Campaign Under Way In Hancock

George Gerdes and C G Waterman, district finance chairman for the Hancock district Boy Scouts of America, announced plans are nearly complete for the annual "Find the Friends of Scouting" campaign in the district.

E. A. Greiman has been appointed local chairman at Garner, Don Melaney at Britt, C. G. Waterman at Klemme, Henry Johnson at Kanawha, George Gerdes at Woden and Rush Gabrielson at Crystal Lake.

This campaign is being conducted throughout the Winnebago council to raise $27,338 to be used for the scouting program in Butler, Cerro Gordo, Floyd, Franklin, Hancock, Mitchell, Winnebago, Worth and Wright counties.

During 1947 a special expansion program is being conducted which will bring the membership to over 3,000.

Study Group Met Thursday

Mrs. John Chambers and Mrs. Roy Jacobs were hostess to the Study Group of the Methodist Church in the home of Mrs. Chambers last Thursday afternoon.

The President, Mrs. E. J. Arnold presided.

The history of the song "This Is My Fathers World" was given by Mrs. E. J. Arnold, who had the devotions.

Mrs. Medin gave Folio 3 and 4 of the book "Portrait of a Pilgrim."

Mrs. Emil Beier was in charge of the questions.

A delightful lunch was served.

County Meeting Held On Public Nursing

A meeting of community leaders was held on February 14th at 2:00 p. m. in the Courthouse at Garner.

Those attending were Mr. Erwin Buck, Mrs. Leo Sankey, Mrs. Herman Paul and Mrs. Ada Chaplin of Britt, Mr. and Mrs. John Chambers of Klemme, Mr Chas. Whitney, Mrs. Fern Katter, Mr. Jack Dethmers, Mrs. E. H Phillips, Miss Louise Beyer, Mr. Marion Paulson, and Miss Harriet Oxley of Garner.

The district advisory nurse, Miss Elizabeth Wyss of Fort Dodge, Miss Wilma Soehren, Wright County Nurse, Mrs Bernice Wilkin, Winnebago County nurse and Mrs. Lynn Thompson of Clarion also attended.

The group discussed the work of the Public Health Nursing Service in the county for the past six months and planned to further extend the service. Mrs. Lynn Thompson told the group of a Public Health Nursing council in Wright County that is causing great strides to be made there. Through discussion, the group concluded that formation of such a council would further the work in Hancock County

Those at the meeting form the initial committee This group plans a March meeting in Britt for definite council organization

Early Chicks Will Pay Highest Returns To Poultry Raisers

The Chicken-or-Tomorrow quality meat improvement program, which calls for the buying of early chicks, is right in line with the outlook for poultry prices this year, says Paul Henderson, county extension director.

Henderson says a report from Francis Kutish, Iowa State College farm economist shows that this is one year when early chicks will pay best returns to Iowa poultrymen.

Feed supplies are ample this year, and good feed supplies usually mean increased numbers of late hatched chicks. These late chicks are likely to be a headache to farmers, poultry processors and the government price supporters.

Chicks which are on the farm before the last of April will be ready for the meat market before September. After that chicken prices are likely to tumble Early pullets go into early fall egg production when egg prices normally are highest.

Besides these price advantages, early chicks grow faster and produce better quality meat which should command a higher market price

USDA economists expect at least one-half million more pigs this spring than last.

Garner Girl Marries Young Klemme G. I. Farmer

VELETTA JURGENSON IS THE BRIDE OF MELVIN SCHLEI

Garner Methodist Church Was Scene of Quiet Wedding Sunday

The Garner Methodist Church was the scene of a wedding ceremony Sunday afternoon, February 16th, 1947 at 4.00 o'clock when Miss Veletta Jurgenson, daughter of Mr. and Mrs. Alfred Jurgenson of Garner, became the bride of Melvin O. Schlei of Klemme. Rev. Broberg, pastor, performed the ceremony before the altar lighted with tapers and decorated with baskets of snapdragons.

The couple was attended by Miss Dalores Lenz of Garner and Mr Clarence Kluckhohn, Jr. of Klemme.

The bride wore a gray suit with black accessories and her corsage was of gardenias and roses.

Miss Lenz wore a green suit with black accessories and her corsage was also of gardenias and roses.

Nuptial music for the ceremony was provided by Mrs. Howard Duesenberg at the piano.

The ceremony was attended by the immediate relatives and close friends of the couple.

Immediately after the ceremony a wedding lunch was served at the bride's home. The table was decorated in pink and white and lighted with candles, and a decorated wedding cake served as a centerpiece.

Mrs. Schlei is a graduate of the Garner high school and is employed as deputy in the County Treasurer's office Mr. Schlei is a graduate of the Klemme high school and after serving about five years in the Army Air Corps began farming near Klemme.

The couple is taking a two-months honeymoon trip through the southern states and Mexico They will farm near Klemme this coming year.

Mrs. Melvin Schlei

Entertained At 500 Party

Mr. and Mrs. Fred Etchen entertained at two tables of 500 at their home Thursday evening. Mr. and Mrs. Fred Bell won high scores and Carl Swanson and Mrs. Lloyd Lau won second high scores for the evening. The hostess served a nice lunch after the games.

Celebrated Birthday

Mr and Mrs. Clarence Lemke entertained relatives at their home last Tuesday evening in honor of daughter, Pamela Kay, who was one year old on Friday, February 7th The evening was spent visiting after which a delicious lunch was served by Mrs. Lemke, who had baked and decorated a birthday cake on which one candle was placed Pamela received many lovely gifts.

Those present were Mrs. Lewis Neuberger, Wert Loger; Mr. and Mrs. Otto Lemke; Mr. and Mrs Lester Neuberger, Claudia Jean and Franklin; and Mr. and Mrs. Melvin Neuberger, Elaine and Alan.

FERTILE DUMPED KLEMME HERE TUESDAY NIGHT

Fertile took a double header from the Shamrocks here Tuesday night after the Fertile Reserves defeated the Little Shamrocks in an overtime period 24 to 20.

After holding a 13 to 9 lead over Fertile, the Shamrocks lost to the Fertile first eam 35 o 30.

Mr. and Mrs. Paul Haefner are the parents of a 6 lbs. 3 oz. baby boy born Saturday, Feb. 8. The little boy has been named David John after his grandfather in England. They have a little girl, June Irene.

Famous Globe Trotters To Appear In Klemme

There will never be another Cleo (Baby Ruth) Johnson. That is the consensus of those who have seen this great negro basketball player.

He will be in Klemme on Friday, February 21 with the Famous Globe Trotters, the world championship traveling negro basketball team.

Year after year this fleet Cleveland, Ohio player, one of the original members of the Globe Trotter cast, has burned the hoops He has been improving with age. Coming back last year after the three-year layoff for the war, he hit his highest average. Over 168 games he average 26 points

Deadly from the corner, a marvelous dribbler there isn't an angle he doesn't know.

Coach Bobby Grund has built one of the strongest teams in the 14 year history of the Trotters. In Wally Edwards, judged the outstanding freshman player in the 1944 world's professional cage tournament in Chicago, he has one of the trickiest pivot players in the country. Almost single handed he kept the Cleveland Bombadiers in the running against the famed Washington Bears in the 1944 quarterfinal round of the national meet and 22,000 fans roared in acclaim as his crew barely lost to the eventual champions.

Two of the finest set shots in America, Red Pryor and fleet Wizzo White help round out the cast with Art McCune a great guard from Toledo, Ohio

The Trotters who have made fans eyes pop out with their cage ability and antics, have pleased thousands of fans from coast to coast every season.

Shamrocks Win County Tourny By Beating Britt

The Klemme Shamrocks won the county tournament here by defeating Britt in the finals in a closely contested game 27 to 25 while Garner won third place by defeating Corwith 37 to 19.

Record crowds attended all of the games.

Former Times Printer Buried At Rockwell City

Charles "Spider" Nissen died at Rockwell City, Iowa and was buried Saturday He was the youngest son of the late Mrs. Harry Nissen Smith and learned the printing trade in The Times office many years ago. He was with the Rockwell City Advocate at the time of his death and had been with that paper for many years.

SAILOR TRANSFERRED

Verne F Greiman, 20, yeoman 3rd class, son of Ben F Greiman of Route 4, Garner, has been assigned to the naval air station, Pensacola, Fla. Verne reported to the air station from Los Alamitos, California air station . He entered service on November 9, 1944, and received his recruit training at the naval training center, Great Lakes, Ill.

Goodell Woman Ill With Flu

Mrs. O. C. Evanson of Goodell has been absent from her duties at the store. She is ill with flu and an attack of rheumatism.

RAIL TRAFFIC RESUMED IN KLEMME AFTER BLIZZARDS

Rail traffic was at a standstill through Klemme for about ten days due to the two blizzards that blocked Rock Island tracks.

A snow plow came through last Wednesday and cleared the drifts from the cuts. Other trains then began moving and service was resumed on the Rock Island.

ERICK JOSTEN DIED THIS MORNING

As the Times goes to press we learn that Erick Josten, who has been ill for some years, died this Wednesday morning. Funeral arrangements have not been made.

Thousands Of Pheasants Killed In Iowa Blizzards

S. S. CLASS SENDS CLOTHES TO EUROPE

Mrs. Carl Finders and Mrs. Clifford Montgomery were appointed by the 50-50 class of the Klemme Methodist Church to pack boxes of used clothing to send to a femily of 15 in Leerdam, Netherlands. The class has furnished enough clothing for eight boxes which have been sent. A box of Christmas gifts and candy and nuts was also mailed.

Several letters and cards of appreciation as well as pictures of the family and of their town of Leerdam have been received by Mrs. Finders and Mrs. Montgomery. All the boxes mailed have been accounted for. The family states that all this clothing has been a big help to them as clothing is very scarce and very expensive in Holland.

More boxes are to be sent as the clothing is turned in.

This Holland family state that they will send the class a gift to show their thanks and appreciation in the near future.

GIRL SCOUT NEWS

The Girl Scouts held their weekly meeting at our meeting place. Our meeting was called to order by our patrol leader, Maxine Barz. We opened our meeting by saying the Girl Scout Laws promise and by Pledging Allegiance to the flag. We have started on badge work, we are going to take the badge homemaking.

—Scribe, Charlitte

CUTSHALL - SCHOENWETTER

Miss Velda Schoenwetter, daughter of Edd Schoenwetter of Garner, became the bride of Forrest Cutshall of Liberty township at a double ring ceremony at the Schoenwetter home on Wednesday evening, February 12th at 8·00 o'clock, with the Rev. Broberg officiating.

The couple was attended by Mr and Mrs. Russell Hanson of near Kanawha.

Wesenberg Purchased Gee Estate Near Goodell

Lew Wesenberg of Goodell was the successful bidder at the auction sale of the Gee Estate in Amsterdam east of Goodell Saturday afternoon. Mr. Wesenberg bid $3,100 for the tract of land.

WORK CIRCLE WILL MEET

Work Circle will meet tomorrow at the Methodist Church. The hostesses are Mrs. Clara Stille and Mrs. Frank Schulz. Quilters come early.

Chambers Did Good Work On Opening Roads After Storm

Supervisor John Chambers gave excellent service to his territory following the two blizzards by getting the roads plowed open in such short time. Mr. Chambers kept plows going day and night and by Thursday night had every road in his district open to traffic. It was a tremendous job but Chambers and his crews did the best they could to get roads open as fast as possible.

The writer was over in Franklin County Sunday and many roads there had not yet been opened. The town of Chapin was isolated at the time as plows were pushing toward the town.

Hancock County supervisors did a fine job in getting the roads open in record time compared to our neighboring counties.

TOTAL PHEASANT LOSS STILL UNDETERMINED

Loss to north Iowa pheasants during the storms of February 9 through 15 have not yet been completely determined by conservation department officials. It is believed, however, that over-all loss may be as high as a quarter of the birds, especially in the north central section of the pheasant range. Most of the loss was caused by smothering when snows, driven by subzero winds, formed ice balls on the nostrils and in the throats of the birds.

In some parts of the pheasant territory, especially in areas of good cover, little loss has been reported. In other sections mortality has been described as "terrific." Large concentrations of pheasants, numbering as high as fifteen hundred is some instances, have to a large degree dispersed with milder weather and many of the birds are being found along graveled roads where they are picking up grit.

Conservation officers report a definite increase in pheasant poaching in spite of storm losses. G. L. Ziemer, State Conservation Director, has made the statement that the birds need the cooperation and protection of veryone during the remainder of the winter and also during the critical nesting period.

Although "it is too early to predict the effect of the storm on the 1947 hunting season," it was pointed out that the remaining birds, with good nesting success, could repopulate the coverts. Director Ziemer, spiking rumors and speculations relative to a closed season, stated that "conditions existing next fall will determine the hunting season in 1947."

Storm loss of quail has to date been confined to the northern parts of the quail range outside the open season zones. In the southern Iowa quail populations are described as "heavy and in good shape."

Mr. And Mrs. Ewald Josten Surprised On Anniversary

Mr and Mrs. Ewald Josten were pleasantly surprised by friends and neighbors at their home Sunday evening in honor of their fifteenth wedding anniversary. They were presented with a beautiful crystal set in honor of the occasion. Their anniversary date, however, was on Monday, February 17th.

The evening was spent informally after which a nice lunch, brought by the visitors, was served.

Those present included Mr. and Mrs. Paul Goll and Hilda; Mr. and Mrs. Menno Albers; Mr. and Mrs. Howard Baack; Mr and Mrs. Alfred Jurgemeyer and children; Mr. and Mrs. August Josten and children; Mr. and Mrs. Donald Neuberger and sons; Wert Loger; Mr. and Mrs. Louis Jurgemeyer; Mr. and Mrs. Les Hartbeck and Marian; Mrs. Lewis Neuberger; Mr. and Mrs. Wm. Jurgemeyer and Miss Bertha Johnson.

All enjoyed a fine time and Mr. and Mrs. Josten said it was a complete surprise to them.

Farewell Party Held

About ninety people met at Liberty No. 8 School Monday evening for a farewell party in honor of those families moving away from the community this spring. The families moving are the Paul Stromer, Art Knoke, Joe Mehuis and Emery Schaefer families.

Games were played after which a nice lunch was served. Each family was presented with a nice thermos jug as a gift from their neighbors.

New Legislative Setup Is Effective

Congress Putting Its Reorganization to Test

By BAUKHAGE
News Analyst and Commentator.

WNU Service, 1616 Eye Street, N. W., Washington, D. C.

WASHINGTON. — The 80th congress has been operating long enough under the new reorganization plan to note some of the latter's virtues and shortcomings. The first hotly debated issue in the senate had a fortunate effect on the plan. I refer to the fight over retention of two of the standing committees — the committees on war investigation and small business. Despite the fact that the 80th congress had expressed the intention to abide by the reorganization plan accepted by the 79th congress, and that one of the purposes of this plan was to eliminate the special committee, the senate Republicans fought hard to extend the life of these two "specials" —and they won.

Baukhage

But so much attention was directed toward the issue that Senator Taft hastened to make it clear later that creation of further special committees would be a very difficult job Net result of the whole discussion was to strengthen rather than weaken the reorganization.

One of the most important steps toward increasing efficiency of congress was elimination of overlapping committees but, like attempting to abolish the seniority rule, it just couldn't be accomplished. As a matter of fact, when the bill finally was passed, the house rejected the senate-approved provision which did away entirely with special committees. It was admitted at the time the reorganization act was passed that it fell considerably short of the original recommendations by the various bodies which had made unofficial studies of the situation. Indeed, the act did not carry out all the recommendations of the report of the joint congressional committee created to examine various recommendations and then to make its own.

FOLLOW OLD ADAGE . . . Believing in the old adage about the way to a man's heart, 16 Chicago war brides are learning to cook "the American way" in a Red Cross nutrition class. Their No. 1 request is to learn to bake apple pie. War brides from Scotland, England and Egypt are shown above with a Red Cross instructor.

Experts To Advise Solons

Probably the most important change yet to be made is to provide additional help for members. That is, providing additional experts to advise committee chairmen and committeemen. I recently heard it remarked that: "Senator Taft usually knows what he is talking about when he takes the floor. You may not agree with his policies but when it comes to facts he seldom makes erroneous or misleading statements. This is largely because Taft has the best staff of advisers in congress —he hires and pays for them out of his own pocket."

It is impossible to expect that more than a few members of either house can devote enough time to any single subject to become expert on it. It is true that we have had some outstanding examples of men and women who have been able to specialize and still carry on their other duties. For example: Senator George on finance and Mrs. Rogers on veterans' affairs, to name two widely different fields.

It is natural that most congressmen got into politics by way of the legal profession, which is a good basic training, but today, when many of the most important issues are economic rather than political, no professional training is in itself broad enough.

The staffing, however, that has been done is invaluable. Now for the first time there will be experts instead of a new inexperienced set brought in with each chairman. More are needed.

Some phases of the reorganization plan probably will prove impractical. One of its objectives was to reduce the number of measures passed by unanimous consent. This was recommended because frequently important legislation was adopted in this manner with only a small number of senators on the floor. The roll is not called — merely "no objections." Various steps were taken to check this custom but there is a human element involved that has to be taken into consideration.

One thing which helps attendance considerably is the reduction of the number of committees upon which a senator serves. This gives him time to participate in debate.

It is not improbable that the filibuster will be curtailed, perhaps this session, if not entirely ruled out. But there never will be "a limit to debate" and "debate" easily can become largely a monologue when addressed to few hearers except a patient visitor or two in the gallery.

More Reforms Recommended

George B. Galloway, staff director of the Monroney - LaFollette congressional committee which drew up the reorganization legislation, recently proposed seven new fields of congressional reform:

1. Avoid legislation deadlocks and promote better teamwork between congress and the President.

2. Create unified, clearly located, responsible leadership in congress for the legislative program.

3. Reduce the non-legislative work load on congress so as to free congressmen from errand running and permit them to concentrate upon their legislative duties.

4. Choose committee chairmen other than on the basis of seniority.

5. Eliminate the filibuster in the senate.

6. Solve the problem of the powers and procedure of the house committee on rules.

7. Establish adequate safeguards against extension of the patronage system to the new professional committee staffs.

It will be a long time before all these suggestions are adopted. Meanwhile some of those already in the law will be modified slightly in use, just as an automobile or ship "shakes down" after a certain amount of mileage has been achieved.

One thing that simply won't work now and probably never will in the senate, at least, is the printing of the schedule of the next day's work in advance. There is too much freedom of action, too much deeply inrooted senatorial courtesy to prevent a senator from obtaining "unanimous consent" to lay aside what was planned and introduce an entirely different matter.

But this is a small point. It is agreed that the advantages outweigh the minor disadvantages. The staffing alone even though not carried out to the full is a tremendous gain. Expert guidance of specialists who know their jobs and are not subject to political interference is invaluable.

Makes Farming Pay

Gideon E. Mettler, wearing a fatigue cap and fondling milo maize, cleaned up $40,000—$20,000 for himself and $20,000 for his father—on 240 acres of irrigated land near McFarland, Calif., in his first year out of the army.

NEWS REVIEW

Packers Equalize Wages; U.S. Withdraws China Aid

LABOR:
Pay Equality

Announcement by the department of labor that a special commission had simplified job classifications and ironed out rate inequities in the Big Five packing plants pointed up the growing acceptance of the principle of equal pay for equal work in U. S. industry.

Consisting of representatives of the public, government, industry and labor, the commission cleaned up differences between Swift, Wilson, Cudahy, Armour and Morrell and the AFL, CIO and independent unions over rate inequalities. The companies and unions had agreed on conditions for 90,000 jobs in collective bargaining procedure, and the commission acted on the remaining 10,000 jobs.

The number of labor grades carrying varying pay rates was cut from 250 to 25 under the negotiations and wage boosts averaging 1.8 cents an hour were awarded to approximately 75,000 workers to iron out inequalities. In general, packing house employees doing the work in the same geographical area now draw equal pay.

Previously, the CIO-United Steel Workers and U. S. Steel corporation had ironed out wage inequalities for 175,000 employees. Retroactive to January 4, 1944, the cost of readjustment was estimated at 30 million dollars, with many workers receiving the equivalent of a 1½ cent an hour wage increase.

CHINA:
U. S. Out

Diplomatic eyes turned anxiously to the Orient following the U. S. decision to abandon its peace-making in China and withdraw most of the 12,000 marines on duty there.

Concern was expressed lest U S. withdrawal would invite Russian intervention in China on behalf of the Chinese Communists. While Secretary of State Marshall had diligently sought to bring the Nationalists and Reds together during his special peace mission, the U. S. had proceeded on the assumption that the Nationalists constituted the legal government. In supporting the Nationalists, the U. S. has advanced an estimated 1½ to 3 billion dollars of lend-lease, and also provided technicians for training their military forces.

Since the U. S. pulled out of China without making any strategic arrangements, the Russians maintain a distinct advantage in view of their half-interest in the Manchurian railroad and their joint control of Port Arthur and Dairen. Russia's strategic position thus leaves Moscow in a key position if it wishes to supply Chinese Communists entrenched in the north or actually intervene on the pretext of stabilizing conditions in the Orient.

CONGRESS:
Retain Luxury Levies

Bent on trimming income taxes, the Republican congress moved to preserve other sources of revenue to carry the huge 1947-48 budget and reduce debt by extending wartime rates on luxury items.

As a result, taxes on liquor were scheduled to remain at $9 a proof gallon; 20 per cent on furs, luggage, jewelry and toilet preparations; 1 cent for each 5 cents charged on theater admissions; $8 a barrel on beer; 25 per cent on long distance telephone calls and 15 per cent on local service; 15 per cent on transportation, and 20 per cent on light bulbs and tubes.

Meanwhile, Republican ranks were split on the proposal of Chairman Knutson (Rep., Minn.) of the house ways and means committee to reduce income taxes 20 per cent on earnings up to $300,000. Increasing favor was shown for the suggestion of Representative Engel (Rep., Mich.) that exemptions be increased to cut the taxes of low income groups rather than offering broad relief which might chiefly benefit the upper brackets.

Declaring there are nearly 86 million people dependent on individual or family income of $2,500 or less a year, Engel said that Knutson's bill would result in a tax cut of only 72 cents a week for a man earning that much or less On the other hand, a person drawing $300,000 a year would gain $942 a week. "If the Knutson bill is passed," Engel said, "it will place into the hands of the Democratic party the most effective campaign argument any party can have, an argument which will appeal to 86 million people in the low-income group . . ."

FREIGHT:
Want More Cars

For the fifth time in three years Senator Reed (Rep., Kas.) acted to alleviate the shortage of box cars in the West caused by the retention of rolling stock in the East by seaboard railroads.

As elevators and millers clamored for cars to move grain stacked in the West, Reed threatened to draw up permanent legislation to relieve what has developed into a perennial problem in recent years. On previous occasions, the railroads shifted cars west upon Reed's demands

The shortage of rolling stock resulting from inadequate additions during the war years has figured in the scramble for cars between East and West. Once cars roll in from the West with agricultural products, eastern railroads have sought to hold onto them as long as possible for shipment of industrial goods to seaboard points. Because the railroads also are loath to send the cars back empty, valuable time is lost by shunting them westward with short loads.

BIGGER 'BURGERS

Increase Seen in Meat Output

WASHINGTON.—Meat production this year will approximate 23 billion pounds, providing 150 pounds for each civilian after allowing for military requirements and exports, according to a department of agriculture prediction.

The estimate compares with a 1946 production of 21,900,000,000 pounds, or a per capita civilian supply of 145 pounds. Average output for the 1937-41 period was 18 billion pounds while highest production on record was set in 1944 with 24,700,000,000 pounds.

The department said beef output in 1947 may set a new record and is likely to be large in 1948 and possibly 1949. But lamb and mutton, which usually account for less than 5 per cent of total meat supplies, are likely to be smaller this year than last year.

Pork production will not be greatly different from last year, the department said. It predicted, however, an increase in the 12-month period beginning October 1.

The department said prices of fed beef cattle, especially top grades, are expected to decline somewhat from early January levels. On the other hand, prices of lower-grade fed cattle and stocker and feeder cattle probably will continue relatively high, reflecting seasonally small supplies.

The department said hog prices are expected to remain near present high levels in the spring and summer, as marketings will decline more than seasonally.

Meat purchases by the armed forces and other war agencies last year were estimated at about 870,000,000 pounds compared with 3,600,000,000 in 1945 and a peak of 4,200,000,000 in 1944.

IN THESE UNITED STATES

Unique Library Started With 'Bible and Prayer'

WNU Features.

MOUNT SHERMAN, ARK.—Started 12 years ago with "a Bible and a prayer," the Wilderness Library in the deep Ozarks hill country along the Buffalo river in Arkansas now ranks as one of America's most unique educational and recreational projects.

Hillbillies, some of whom previously were 100 miles away from the nearest library, now trudge daily over the rugged, wooded trails to the log cabin library perched atop Mt. Sherman. For many of the men, women and children, the library, which serves as a community gathering center, is the only educational facility available.

Founder of this novel library is James Ted Richmond. The inspiration for his project came in France, where he remained after service in World War I to study at University of Toulosse. While there he organized a small library designed to acquaint the French with the American way of life.

Lives Atop Mountain.

After returning to America, Richmond reentered newspaper work, and while writing radio plays in Little Rock became interested in hillbillies. Deciding to live as one of the mountain folk, Richmond staked a claim for a homestead atop Mt. Sherman. Friendly mountain folk helped the newcomer build his cabin in a log raising bee.

One of Richmond's first impressions of his neighboring hillbillies was that they were deprived of educational advantages but hungry for reading matter. To fill the void, he at first began circulating his Bible. A plea to Little Rock newspaper friends netted some books, with which he started a free library in a hollow tree outside his cabin.

From this meager beginning, the Wilderness Library has grown until it now contains more than 10,000 volumes. Newspaper friends boosted Richmond's cause and books began coming in from all parts of the country. The hollow tree overflowed, forcing Richmond to move the library into his small cabin. Now the cabin is lined with shelves, with books stacked high to the rafters.

Ambitious Plans.

Improvement and enlargement of the library to convert it into a community recreational center are among Richmond's plans for the future. First, however, he hopes to build another log cabin home for himself. The encroaching book shelves have practically forced him out of his humble abode During the summer time he even does most of his cooking on an outdoor stove, but, as the hillbillies' librarian explains, his principal foods are goat's milk and "garden sass."

Richmond also envisages that some day he will be able to use the Wilderness Library as the nucleus for a new College of the Ozarks to provide higher education for mountain boys and girls. He would like to have a jeep and library trailer to permit taking his books to homes beyond walking distance over the rough trails. He also wants the roads improved and other advantages brought to his mountain people.

Last fall Richmond decided he could achieve these objectives by political action. He announced his candidacy on the G I. ticket for representative from Newton county in the Arkansas legislature. In his platform, he pledged himself to work for better schools, building of farm to market roads, improvement of the dairy industry, equalization of taxes and abolition of the poll tax. He was defeated, however, by the long-entrenched political machine in Newton county.

Pledges Future Fight.

"This fight for good government is only starting," Richmond insisted, adding that "there's another election coming."

On his wild homestead lands, Richmond earns his livelihood by milking about a hundred goats, raising pigs, chickens and turkeys, and growing potatoes and vegetables. If he receives $10 for goat milk sold to the creamery several miles away, he gives a dollar "as a tithe to God," $4.50 to his library and the remaining $4.50 for his own upkeep. Often he deprives himself of necessities so he can finance his rapidly expanding Wilderness Work.

In addition to the free library, the Wilderness Work includes a number of other activities launched by Richmond to improve the lot of the mountain folk.

One of the major projects is the annual Wilderness White Christmas, launched in 1933 in memory of his mother, Mrs. Etta E Richmond. Without any compensation for his work and paying all personal expenses, Richmond directs the collection of clothing, toys, medicines and other household articles for distribution to the poor Ozark families at Christmas time.

Seeks Medical Aid.

Another objective for the hillbillies' librarian is to secure proper medical services for the mountain people. Injured and ill persons, isolated from the larger communities, have died for lack of prompt attention, Richmond reports.

"First aid is a necessity here," he says. He lists a hospital cot complete for first aid, antiseptics, surgical powders and sickroom supplies as articles most sorely needed.

"I am sure that churches, schools, clubs and individuals everywhere would help if they only knew the predicament of these people," Richmond maintains.

He is considering the possibility of establishing a non-profit educational foundation to raise money for financing the expanded Wilderness Work. Main difficulty is that he's not versed in the procedure, so he is seeking advice on the subject. His address: Ted Richmond, Wilderness Library, Mount Sherman, Ark., via Twilight Trail.

LATEST STYLE NEWS . . . For the first time in 20 years, marine corps uniforms have been modified. Left to right are new winter "greens"; old style; new dress "blues"; old style.

Alger Stories Are Read No More

NEW YORK. — The man whose name symbolized an entire era in American history has faded into oblivion. The man, Horatio Alger Jr., whose tales once made him a childhood hero, is practically unknown to New York boys and girls from the ages of 8 to 14, a recent poll disclosed.

Ninety-two per cent of the members of the seven boys' and girls' clubs sponsored in New York by the Children's Aid society — a total of 20,000 children — reported that they never had heard of Alger. Less than 1 per cent admitted having read any of his books.

In fact, the survey showed only 60 per cent of the children read books, and most of them preferred comic books.

The society claims a close relationship with Alger, for he once lived at its newsboys' lodging house.

STORY IN MINIATURES . . . Crowded into the 4,000 square feet of Roadside America, world's greatest indoor miniature village, is the panorama of American history: (1) Sleepy Hollow is typical of the pioneer days of the West; (2) Shrine church is a replica of a memorial chapel in the Alps; (3) a pioneer village of 300 years ago is reconstructed; (4) the airport, laid out like a real field, lends note of modernity; (5) an idea of the scale on which the miniatures are built is obtained by comparing Laurence Gieringer with the figures he is placing on a railroad station platform, and (6) the village of Fairfield represents the modern era.

Picturesque Miniature Village Depicts History of America

WNU Features.

Childhood disillusionment at the shattering of a dream did not deter Laurence Gieringer; instead, it embarked him on a hobby which over a span of 44 years has resulted in creation of a picturesque miniature village which has attracted nation-wide attention and lured millions of visitors.

With the passionate covetousness of a child, the 5-year-old Laurence used to sit nightly in the window of his home in a Pennsylvania valley and gaze longingly at a house on the mountainside—a toy house, it seemed to him, as its lights blinked invitingly in the distance He wanted that tiny house, wanted to pick it up in his hands and bring it home to play with. But his repeated pleas to set out for the crest of his house were ignored. One day the little boy finally became desperate and, stuffing a banana and a few crackers into his pockets, started off up the mountainside in search of the little house Search-parties were out all night and at daybreak in the morning the frantic parents finally discovered the grimy but undaunted boy two-thirds the way up the mountainside. Bitter at being overhauled, the boy was comforted only when his parents agreed to take him to the end of the road

Dream Shattered.

Disillusionment clouded Laurence's eyes when he beheld just another ordinary sized house with no magic at all in the bright morning, no enchantment, no magic lure

But Laurence Gieringer's dream was not ended; in fact, it had only begun. Today, at 54, he has countless lighted houses that he can pick up in his hands, together with churches, barns, bridges, highways, railroads, lakes, fields, grist mills, factories and scores of other miniature models depicting the architectural and industrial panorama of the America of the last few hundred years.

Collectively they are known as Roadside America, which is situated four miles west of Hamburg, Pa., on U. S. Highway 22 between Harrisburg and Allentown

Roadside America had its beginning four years after Laurence's abortive attempt to bring home the little house from the mountaintop to his younger brother, Paul, he climbed another mountain near Reading. Far below them Reading looked like a city inhabited by doll people. Fascinated by the sight, Laurence excitedly said eagerly: "Paul, wouldn't it be swell to build little houses the same size they look from here?" Thus was born the idea which was to grow into a project enchanting millions of visitors every year

Delving into their venture with enthusiasm, the boys scoured the library for books on American architecture from the pioneer days to modern times A kindly art teacher gave them drawing lessons at three cents for plain sketching, five cents for pastel work, the fees covering only the cost of material.

Early difficulties soon induced Laurence to adopt an arbitrary scale of three-eighths of an inch to a foot, a scale he has employed through all the intervening years.

Pictures and stories of the way the early settlers in America had lived induced Gieringer to build history into his miniatures. His models, he decided, could show the development of American home and business life as exemplified in the structure of homes and business buildings.

As a result, there now are three separate sections, one depicting the life of the early settlers, another that of Pennsylvania at the turn of the century and a third showing a modern setting Gieringer plans a fourth eventually—his version of the village of tomorrow

Built From Scraps.

Scraps of wood, discarded tin cans, wire, pieces of metal, pipe cleaners, paper and numerous other odds and ends have been utilized as construction materials for Gieringer's intricate models

An idea of the scope of the exhibit may be gained by noting some of the materials which have gone into its making. They include 9,520 feet of board lumber, 4 000 feet of building paper, 1 728 feet of railroad and trolley track, 11,080 feet of electric wire, 513 light bulbs, 12,000 pounds of plaster, 4.000 miniature figures 10,000 miniature trees and shrubs, 250 pounds of nails, 42 gallons of paint, two barrels of green sawdust, six tons of stone, 8,000 pounds of sand, 145 miniature railroad cars and 1,700 feet of tracks for trains and trolleys.

Highlight among the miniatures is a high-spired church with hand-painted windows, a task that required months of exacting labor as Gieringer sought means of creating stained glass As visitors mill about the village, the lights are dimmed and from the open door of the church pours religious music from a tiny organ. Outside the church a ragged tramp leans lazily against a white fence a dog at his heels

When the organ strains fade, a different type of music issues from a large barn, in which an old-fashioned barn dance is progressing. Nearby planes seem about to take off from an airport while a few feet away people are packed into a grandstand watching a baseball game.

Animation marks the exhibits There are youngsters walking on narrow curbstones, a boy whose feet are tangled in an electric wire, dogs sniffing at fire hydrants, women hanging out their washing or gossiping over back fences, trolleys and train in operation, water wheels turning grist mills.

Receive Wide Acclaim.

The Gieringer exhibits have been widely heralded as the world's greatest miniature village and the most unique and detailed masterpiece ever evolved.

A staunch exponent of hobbies as a means of preventing juvenile delinquency, Gieringer insists that "hobbies keep children off the street," adding that "if youngsters' hands are busy, they don't get into mischief." His dream is to see establishment of a national hobby center where exhibits of all kinds can be shown to inspire other hobbyists.

Throughout the years both Mr and Mrs Gieringer have worked with countless children from nearby schools and orphanages

Although Gieringer allows boys training in his workshop to use mechanical equipment, all of Roadside America has been built completely by hand and with ordinary carpenter tools

Originally set up as a Christmas display in the Gieringer home for showing to neighbors and visitors, the miniatures later were exhibited in a Reading fire house and in a local park, all earnings going to charity The present Roadside America was established in 1941, a portion of the proceeds still going to charity. Although wartime gasoline rationing shattered attendance, a record number of visitors viewed the displays last season and still larger crowds are expected this summer.

Circuit Rider Travels 954 Miles Weekly To Reach Parish

KANSAS CITY, MO. — Traveling nearly a thousand miles every week-end to preach to his congregation, Rev. E. V. Johnson, 33-year-old ex-army chaplain, ranks as the modern version of the old-time circuit rider. A train, however, supplies the horse as his mode of transportation.

Every week from Tuesday through Friday, Mr. Johnson attends classes at Central Baptist Theological seminary here. On Friday he hops a train for his pastorate at Locust Grove, Tex. Leaving Kansas City at 9 p. m. Friday, he has a 12-hour train trip before reaching Canadian, Tex., where his wife and two children, Sharon, 8, and Mary Vesta, 4, are waiting to take him the 16 miles to Locust Grove by car.

On the return trip, Mr. Johnson leaves Locust Grove on Monday to catch a train back in time for opening of classes Tuesday morning. The round trip is 954 miles. A railroad pass is a big lift for Mr. Johnson's weekly trip.

Locust Grove is a small community where church services are held in a schoolhouse, but the young minister is spearheading a movement to build a church.

Before entering the army as a chaplain, Mr. Johnson was pastor of the Boswell, Okla., Baptist church.

Sportlight

By GRANTLAND RICE

FOR some odd reason, proving they are new members of the magnate tribe, neither Bing Crosby nor Bob Hope has claimed any pennant for the Pirates or the Indians.

Bing Crosby

As you may know both are now closely involved in the standings of these two clubs and both will need some slight improvement before they reach the gonfalonic heights.

At the moment, magnate Hope already has wagered a golf ball with magnate Crosby that the Indians finish higher up in the American league race than the Pirates finish in the National. Hope wanted to make this a box of golf balls, but Crosby demurred, recalling the spots both occupied last fall.

No one can blame Crosby for this careful attitude although he already has strengthened the Pitt roster with a player by the name of Greenberg. But after all, the Indians have Bob Feller. They also have a shortstop-second base combination in Lou Boudreau and Joe Gordon that will be worth watching.

"Joe Gordon is too fine a ball player, too strong a competitor to have another off year," Hope tells you.

"Joe was just another war-athlete victim. Before that he was one of the greatest defensive second basemen in baseball history and a dangerous hitter. Like many other baseball and football players he had something of a slumping spell after leaving the army, but it will be a different story this next season. Joe is still young and in good physical shape. Boudreau is also young. He is one of the star shortstops of baseball. This pair will put on plenty of fireworks together."

Gordon's Future

We look for the same result. Gordon has been too fine a ball player and too much of an athlete to be placed on the waning list. There is a good chance that he will have one of his best seasons Strength through the shortstop-second base position can make a big difference to any club and this Cleveland combination may easily match the Red Sox pair or the Cardinal-Dodgers outfits.

Anyway, "Hope still springs eternal in the baseball breast," where Hope is still hopeful of big days ahead.

Apparently Crosby and Hope had to find some way to keep busy and kill time.

All Bing does is to handle a big radio job, make motion pictures, do a world of recording and put on golf tournaments. All Bob Hope does is work on radio, make pictures and appear at practically every luncheon and banquet function along the west coast. Now they are in baseball. It might be remembered that only recently in tournament play, Bing shot a 75 at golf while Bob is around 78 or 80. If word gets out they are likely to spend most of their rounds signing autographs.

Both are red hot baseball fans and both hope to drop in on their respective teams when spring training starts. Bing's Pirates have a long way to move before crashing the first division. The Cardinals and Dodgers are the first two road blocks. The Cubs will be better, and probably luckier than they were last season. The Braves and Phillies will be stronger teams. So will the Giants If Bing had a pitching arm, the Pirates could use that better than his golf swing.

• • •

Eagle vs. Lion

No matter how you may figure it all out, the two top international rivals in sport are the United States and Great Britain. They remain the two great sporting nations of what we call the world today

In all fairness it must be admitted that England and Scotland are outnumbered by United States about 3 to 1, so the odds should belong our way. But without England and Scotland there would be no international competition. Not with Russia, not with France, Italy, China, Japan, Germany or Britain. It could be different with Sweden and Finland in distance races.

The point is that the British isles provide the U S their only competition at this date By that I mean that England and Scotland can supply their share of trouble in golf—including the Walker cup matches next May. They may even win this test if the winds come up and the rains arrive.

• • •

British Golfers

In Dai Rees they have one of the best golf professionals I have seen. Rees would be an even bet against Hogan or Nelson on any British course. If the Ryder cup matches were played over a seaside British links, the odds would be even. That's how good he is. It is certainly no part of a push-over that the U. S., with the strong team now picked, can get by with the next Walker cup matches. The British have an even chance over their own terrain

The Washington MERRY-GO-ROUND

By DREW PEARSON

REDS MAY HAVE A-BOMB

WASHINGTON. — It took breath-taking Bob Gros of California to do what no diplomat or newsman so far has done regarding the A-bomb and Russia. He got a hint from Soviet Ambassador Novikov that Russia has either the secret of the A-bomb or an adequate defense against it.

Gros, a California lecturer who annually interviews more Washington bigwigs in 24 hours than the average newsman does in one week, called on Ambassador Novikov the other day and at the end of his interview asked: "Do you have anything you wish to say to the American people?"

"Yes," replied the ambassador. "You Americans should not rely too much on the A-bomb. Against France, Italy, Germany, yes. But against Russia, No. You should not depend on it."

"That, Mr. Ambassador," suggested Gros, "sounds as if the Russians have developed a defense against the A-bomb."

"Yes," replied Ambassador Novikov, "this and more. I do not wish to say anything furthter."

This significant statement ended the interview.

• • •

MORE WOMEN IN GOVERNMENT

President Truman's failure to appoint more women to high office was tactfully laid before the President by a group of women.

Mrs. La Felle Dickinson, president of the General Federation of Women's Clubs, headed the delegation and told Mr. Truman quite frankly that women generally were disturbed because he hadn't appointed as many women to government jobs as Mr. Roosevelt had. She reminded the President that the state department had built up a roster of 80 well-known American women capable of handling important government work and urged him to bring the list up to date.

Dr. Katherine McHale of the Association of University Women, was equally strong in urging appointment of more women to government.

Mr. Truman replied that he would like to appoint more women to jobs but it was difficult to get the right person for the right job.

"I watched President Roosevelt work for a long time," Truman continued. "I knew then, but didn't realize fully, just how large a portion of the President's time was taken in finding the right people for the right job. I want you to know that nobody makes my appointments for me. I make them on the basis of my own judgment."

Mrs Dickinson strongly urged appointment of a woman to the existing vacancy on the Federal Communications commission, but didn't suggest any names The women's club leader pointed out that women make up the overwhelming majority of daytime radio listeners, yet had no representation whatsoever on the FCC.

Mrs Dickinson also proposed that a woman be named assistant secretary of state, because of the enormous interest and great stake that the women of the country have in keeping the peace. Mr. Truman said the suggestion was interesting.

NO LAME-DUCK JOBS

Here's some bad news for Democratic congressmen and senators defeated in the last election who have been priming the White House for federal jobs

President Truman has adopted a new policy — no lame-duck appointments, barring exceptional cases

This is the story behind the hope of Sen. Jim Mead's friends to land him a diplomatic post or some other top job.

Truman and Mead are old and close friends, fought shoulder to shoulder in many senate battles and when Truman became vice president in 1944, Mead succeeded him as chairman of the war investigating committee. However, several times recently when White House advisers raised the question of putting the able New Yorker somewhere on the federal payroll, Truman replied with a flat "no."

"If the people of a state or a congressional district have decided that they don't want a man in Washington by voting him out of office, why should I go against their judgment by appointing him to some job as a reward for being defeated?" the President said.

So far, none of Truman's advisers has thought up a good answer.

• • •

MERRY-GO-ROUND

Civilian secretaries of state who for years have ridden in ordinary Pullmans are wondering how come the military get the use of private railroad cars—in peacetime. General Marshall rode in a private car from Chicago to Washington after his army plane was forced down by bad weather, whereas Henry L. Stimson, two times secretary of war and once secretary of state, never got any higher than a drawing room. . . . General Eisenhower also has a yen for private cars.

Improved Uniform International SUNDAY SCHOOL LESSON

By HAROLD L. LUNDQUIST, D. D.
Of The Moody Bible Institute of Chicago.
Released by Western Newspaper Union.

LESSON FOR FEBRUARY 23

Lesson subjects and Scripture texts selected and copyrighted by International Council of Religious Education; used by permission.

THE GOOD SHEPHERD

LESSON TEXT—John 10:7-18.
MEMORY SELECTION—I am the good shepherd: the good shepherd giveth his life for the sheep.—John 10 11.

An open door! How inviting! Jesus had just been talking to the man once blind (John 9) who had seen the temple door closed against him. It shut him out from all the sacred traditions of his people, but it turned him to Jesus, who presents himself in our lesson as "the door of the sheep."

I. The Door of the Sheep (vv. 7-10)

The preceding verses of chapter 10 are important, for they identify Jesus as the true Shepherd. He speaks of his people as his sheep.

Flocks were sometimes kept in the field at night, as was the case on the night when Jesus was born in Bethlehem But ordinarily they were brought into a sheepfold, where many flocks gathered for protection A shepherd was on guard at the door Thieves would climb the wall to steal sheep, but the true shepherds, when they came in the morning to lead forth their flocks, entered by the door. They called out their own flock by name.

It is said that only sick sheep will follow a stranger, which may explain why so many false isms of our day appeal to the sick and lead them away from the Good Shepherd.

Do you know his blessed voice? Have you responded to his call? Will you follow him? Decide now.

Consider the beautiful figure of the shepherd as the door of the sheepfold When the sheep enter the fold to rest, he is the door. When they are ready to go out to feed in green pastures again, he is the door.

Note that they go in and out. Belonging to Christ is not bondage. If any man enter in by Christ, the Door, he is free to go in and out, to find pasture, to live for and to serve him

"The Door"—what a striking figure! It is a means of entry, the only way in. Every door has two sides and the side we are on determines whether we are inside or outside—saved or lost. Children often sing:

"One Door and only one,
And yet its sides are two—
Inside and outside;
On which side are you?"

Then repeating the two first lines comes the direct testimony, and question,

"I am on the inside;
On which side are you?"

II. The Keeper of the Sheep (vv. 11-13).

We think of sheep as peacefully grazing on the hillside—an idyllic picture in the summer sunshine. But there were dangers to meet. It is so with Christ's sheep too, and then he is there to keep them. The wolves come out as the shadows gather. They come to kill and to scatter. Where then is the shepherd? If he is only a hireling, serving for what may "be in it" for him, he will flee.

How perfectly this pictures religious leaders, who, in spite of their swelling words and ingratiating manners, desert the flock in the hour of adversity. Fair-weather friends are they, who disappear when darkness and danger appear.

In the darkest hour Jesus is nearest at hand. He never fails. He has no fear, for has he not tasted the bitter death of Cavalry's tree for you and me? He is the Good Shepherd. He gave his life for the sheep. Those who have put their trust in him shall never be put to shame.

III. The Saviour of the Sheep (vv. 14-18).

He laid down his life for the sheep Ah, yes, it is all too true that evil men laid wicked hands on him and crucified him. Their guilt is awful. But it is clear from Scripture that until the hour had come for Jesus to be made sin for the redemption of man, they could not touch him (see Luke 4:29, 30; John 8:59).

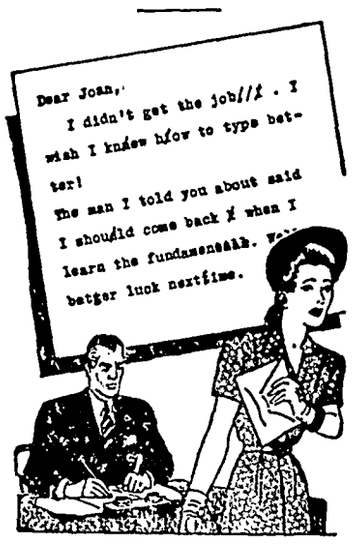
When the time came, Christ laid down his life in accord with "the determinate counsel and foreknowledge of God" (Acts 2 23). He died for us, not as a martyr to a cause, or the victim of an accident or miscarriage of justice, but willingly and for the glory of God.

Yes, he died for us, but he also died for every lost soul who will hear his voice. There are "other sheep" about whom the Lord is deeply concerned. Are we?

He "must bring" them—but remember, God works through yielded believers—through men and women. We ought to be eager instruments in his hands to reach these other sheep, whatever their race, creed, or condition.

Do not miss the note of unity in verse 16. "There shall be one fold." Sometimes one wonders as Christians fight one another how they will ever be brought into the unity of one fold. Only the Lord can do it—he "must bring" us together—but let us not contribute one iota to the confusion and division which must so grieve his Father-heart.

Touch-Typewriting Self-Taught at Home



Dear Joan,
I didn't get the job!!! I wish I knew how to type better! The man I told you about said I should come back if when I learn the fundamentals. Better luck nextfime.

NO, "hunt and peck" typing has no place in a busy, efficient office. If you're after a good job you must know touch-typing.

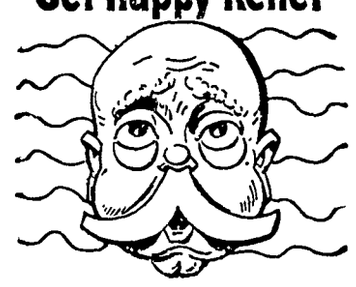
What to do? With a chart of the keys and a few simple instructions, teach it to yourself at home—it's easy Learn, too, the simple rules of typing form that employers expect you to know

The valuable booklet "Touch-Typewriting Self-Taught," gives touch-typewriting chart, instructions and exercises for home lessons. Explains rules for typing correct business, social and official letters and tables of figures

* * *

Send 25 cents in coin for your copy of "Touch-Typewriting Self-Taught" to Weekly Newspaper Service, 243 West 17th Street, New York 11, N Y. Be sure to write plainly your name, address and name of booklet.

How Sluggish Folks Get Happy Relief



WHEN CONSTIPATION makes you feel punk as the dickens, brings on stomach upset, sour taste, gassy discomfort, take Dr. Caldwell's famous medicine to quickly pull the trigger on lazy "innards", and help you feel bright and chipper again.

DR. CALDWELL'S is the wonderful senna laxative contained in good old Syrup Pepsin to make it so easy to take.

MANY DOCTORS use pepsin preparations in prescriptions to make the medicine more palatable and agreeable to take. So be sure your laxative is contained in Syrup Pepsin.

INSIST ON DR. CALDWELL'S—the favorite of millions for 50 years, and feel that wholesome relief from constipation. Even finicky children love it.

CAUTION: Use only as directed.

DR. CALDWELL'S SENNA LAXATIVE CONTAINED IN **SYRUP PEPSIN**

STRONG HUSKY YOUNGSTERS thanks to this **HIGH ENERGY TONIC**

Many doctors recommend good-tasting Scott's Emulsion because it's rich in *natural* A&D Vitamins and energy-building oil children need for proper growth, strong bones, sound teeth, sturdy bodies. *Helps build up resistance to colds too* if diet is A&D deficient. Buy Scott's *today!* All druggists.

SCOTT'S EMULSION YEAR-ROUND TONIC

No Better Aspirin for **PERIOD PAIN** (functional), headache relief, and painful miseries of colds **St. Joseph ASPIRIN** Still only **10¢**

Relief At Last For Your Cough

Creomulsion relieves promptly because it goes right to the seat of the trouble to help loosen and expel germ laden phlegm, and aid nature to soothe and heal raw, tender, inflamed bronchial mucous membranes. Tell your druggist to sell you a bottle of Creomulsion with the understanding you must like the way it quickly allays the cough or you are to have your money back.

CREOMULSION for Coughs, Chest Colds, Bronchitis

BACK ACHE TORTURE?

SORETONE Liniment's *Heating Pad* Action Gives Quick Relief!

For fast, gentle relief of aches from back strain, muscle strain, lumbago pain, due to fatigue, exposure, use the liniment specially made to soothe such symptoms.

Soretone Liniment has scientific rubefacient ingredients that act like glowing warmth from a heating pad. Helps attract fresh surface blood to superficial pain area

Soretone is different! Nothing else "just like it." Quick, satisfying results must be yours or money back. 50c. Economy size $1 00.

Try Soretone for Athlete's Foot. Kills all 5 types of common fungi—on contact!

First And Second Grade News

—Miss Halfwassen, Teacher.

Those in Second Grade receiving 100 in Spelling are:
Fonda Beier
Berleen Bridges
Janice Stokesbary
Eva Thiemann
Robert Larson
Martin Brinkman
Sharleen Swanson
Ronald Trampel
Beverly Christiance
Gark Baack

Friday afternoon the First and Second grade enjoyed a Valentine party Those who visited our room during our Valentine party were, Paige Patterson, Mrs Donald Christiance and Colin Bridges.

The First Grade have started reading in their new Readers, "Our New Friends." This is their fifth reading book this year

Third And Fourth Grade

—Miss Heinrich, Teacher.

Third Graders who received a perfect Spelling lesson in the last two weeks are
Margaret Haefner
Warren Terhufen

Fourth Graders who received a perfect Spelling lesson in the last two weeks are
Graydon Barz
Lois Boland
Dick Dulmes
Terry Koerner
Carole Ann Montgomery
Donald Thiemann
Faye Janssen

Friday afternoon we had our Valentine Party

Donald Kramer treated the room on Tuesday to oranges as his birthday was February 10th Carol Bridges treated the room to frost sticks on Monday Her birthday was during the snow vacation.

Fifth And Sixth Grade News

—Mrs H G Voetberg, Teacher.

We all had a nice time at our Valentine party on Friday afternoon. Calvin Bridges was a visitor at our party

We were happy to have a perfect attendance Thursday This was the first time since our snow storms. Everyone seemed glad to get back to work.

Richard Baack, Dennis Ridder and Janice Swanson had perfect scores in 5th grade Spelling this past week.

Margaret Boland, Elaine Neuberger and Galen Gruis had perfect scores in 6th grade Spelling this past week.

Seventh and Eighth Grade News

—Clara Smith, Teacher

Even though the stormy weather affected our March of Dimes contributions, we turned in a total of $5 90 for our room

We have just completed the unit on the Civil War in 8th grade history Tuesday we had a debate on the topic, "Resolved; that the South suffererd more from the plan of reconstruction than from the war itself."

In seventh health we have completed the unit on "The Care of the Ears, Nose, Throat, and Eyes."

We have been trying our skill at constructing angles and circle graphs in seventh arithmetic this week. Most of us were worried about using compasses and protractors, but have found them interesting On Monday we worked out interesting designs which we colored.

Everyone enjoyed the Valentine treats and valentine box Friday.

Mr. and Mrs. L. W. Wesenberg Of Goodell To Return Home

Word comes from Mr and Mrs. L. W. Wesenberg, who have been visiting relatives in Long Beach, California, since Dec 1, that they left there February 3 and enroute are visiting her brothers, Harold Emerson at Tyler, Texas, and the Rev Glen Emerson in Roanoke, La They expect to be home at Goodell about February 20.

GRASSES, LEGUMES MIXED WORK BEST

They Make Superior Pasture Feed And Are Likely To Improve

Iowa farmers who plant mixtures of grasses and legumes for pasture have a much better chance of getting good stands than do farmers who use either alone. One reason, says C. P. Wilsie, Iowa State College agronomist, is that the hazards of seeding do not affect all crops alike. Alfalfa and red clover may fail on acid and poorly drained spots that will produce alsike clover and grasses sucessfully.

Control Erosion

Mixtures of grasses and legumes also are effective in controlling erosion than are pure stands of legumes. In addition legume-grass mixtures provide a better balance of materials for livestock feed than either grasses or legumes alone.

A recommended mixture of alfalfa and bromegrass for hay and pasture is 8 to 10 pounds of alfalfa and 4 to 6 pounds of bromegrass. In western Iowa the bromegrass may be increased. But where rainfall is heavier, planting too much brome will result in a mixture that is mainly grass.

Clover Or Alfalfa

For farmers in the eastern half of the state, 4 or 5 pounds of red clover can be used to replace that much alfalfa in the mixture. Wilsie says the old clover-timothy mixture also is good, especially in the southern and eastern parts of the state.

Where seedings are to be mad mainly for pasture, sweetclover may be used to replace much or all of the alfalfa in the mixture. On acid soils, however, the sweetclover should be omitted and the bromegrass, red clover and alsike increased slightly.

If a more permanent pasture is desired, a mixture of 5 lbs. of timothy, 4 pounds of Kentucky bluegrass, 6 pounds of red clover and 2 pounds of alsike is suggested.

FLY MAY BE CAUSE OF INFANTILE PARALYSIS

Iowa's 1947 fly control campaign, now being mapped and organized in the various counties throughout the state, comes appropriately at a time when the "March of Dimes" has placed renewed emphasis on the threat of infantile paralysis, says Harold Gunderson, Iowa State College entomologist.

Funds for the latter program are being collected to aid victims of the dreaded infantile paralysis which became a very real menace to Iowans last summer Fly control, on the other hand, may be a means of preventing the disease.

While the fly has not yet been positively established as the carrier of infantile paralysis, Gunderson says there is increasing evidence to support the theory that it is

Wether or not the fly is finally proved the culprit as far as infantile paralysis is concerned, Gunderson says it hardly seems wise to take achance. Flies now can be controlled easily and inexpensively. Even if infantile paralysis is not considered, the other benefits which accrue from getting rid of flies are more than enough to make the program worthwhile, the entomologist says. In addition to the many annoyances caused by flies, they are known to carry many diseases which include tuberculosis, typhoid, dysentery and summer complaint.

The fly-control program will be carried out by county arganizations this summer, with a committee appointed in each county to direct the program. The county extension director will be in charge of setting up the organization.

Only Three Oat Varieties Can Be Certified In 1947

Only three varieties of oats--Clinton, Benton and Marion, will be eligible for certification in Iowa in 1947 All other varities were scratched from the eligible list at a meeting of the certification committees of the Iowa Agricultural Experiment Association.

The committee believes that sufficient seed of these three superior varities will be produced this year to plant the entire oat acreage in 1948.

From where I sit ... *by* Joe Marsh

Where Cissy Spent Her Honeymoon

Most of the young newlyweds in our town spend their honeymoon at Roundstone Lake or Jackson Falls; why the Martins even went as far as New York City.

But when Cissy Cupper married the young Carter boy, they allowed as how they were going to spend their honeymoon right here.

"There's no place better than our town," Cissy says. "And I'd like to start married life at home, with things Bud and I are used to."

Makes sense, come to think of it. Folks naturally left them alone; and except for occasional visits to the Garden Tavern for a glass of beer, they stayed at home, getting used to married bliss.

My missus prefers traveling—and that's her right. But from where I sit, there's no place better for a honeymoon—or *second* honeymoon—than right at home—with your own possessions, good home cooking, and a friendly glass of beer or two—with the best companion in the world.

Joe Marsh

PROTEIN FEED IS GOOD BUY NOW

Farmers Who Have Supply On Hand May Avoid Higher Prices Later

Farmers who can anticipate their protein feed needs for the coming season may find it profitable to lay in a supply now, says Francis Kutish, Iowa State Colable to lay in a supply now, says lege farm economist.

Kutish points out that soybean meal looks like a good buy at present- wholesale prices. Soy bean meal is about the only "cost" item that has tumbled in price during the past few months and the drop has been big.

$60 a Ton

Last November, soybean meal was selling wholesale at between $95 and $100 a ton Now it can be bought for around $60 a ton, which is slightly under old ceiling prices. The reason for the drop, Kutish says, is that some feed companies apparently loaded up too heavily on the meal last fall when everyone was scrambling to get protein feed supplies lined up. But more ample feed supplies and some reduction in livestock numbers eased the demand, and buyers refused to pay the high prices being asked for soybean meal.

With buyers holding back, feed companies started to cut prices to avoid being stuck with a large supply of meal and the downward move was on its way.

Price May Go Up

Kutish says that the demand for protein feed may pick up when baby chicks and spring pigs start arriving The export demand for protein feeds also has strengthened. This may mean a strengthening of prices. Farmers who have their supply on hand will be protected against a possible price advance.

As for the rest of the feed picture, the total out-put of by-product feeds probably will be around 5 percent higher during the first half of this year, compared with last year Most of this increase will come from an expansion of wheat mill feed production.

Grain Exports

Because of world food shortages, the goal of grain exports has been increased. Kutish says much of the grain exported will be wheat, and if the goals are reached, wheat stocks next July 1 will be lower than anticipated, but because of the large supply corn prices still are expected to remain close to loan rates until prospects for the new crop became evident.

The United States in 19038 consumed 130,000,000 gallons of alcohol spirits, of which 5 per cent was scotch.

Columbus reported that in 1498 some Haitian cornfields were 18 miles long.

AROUND IOWA

30 YEARS

When Rudy Guderian passed the 30 year mark recently of continuous service as linotype operator for the Kossuth County Advocate at Algona, the fellows around he shop thought it called for a little publicity. Mr. Guderian's life history was set up secretly by another operator and his first knowledge of the "news story" came when he read it in the paper for which he had set type for three decades.

RECALLED EARLY DAYS

Dr. H. S. Bezman of Traer made a trip in the recent blizzard to visit a sick child that recalls stories of early pioneer days His car reached impassable snowdrifts while still some distance from the farm and the neighbors came to the rescue with a tractor. After a little progress had been made, a second and larger tractor come to the rescue. Eventually the neighbors provided a team and wagon for the finish of the journey. The patient, Donald McKinney, 2, ill with pneumonia, was soon out of danger.

STORK MADE IT

Dr. W. S. Balkema of Sheldon was "grounded" by the blizzard there recently. He found that the stork still flies in any kind of weather, and presided by telephone at the birth of a baby daughter, born to Mr and Mrs. Henry Verberg, with neighbor women acting as mid-wives Dr. Balkema made it part way to the Verberg home before he became stalled in the snowdrifts and then started telephoning his instructions, one step at a time.

FED BIRDS

Fearful that the blizzard would result in starvation of much wild life, conservationists at Postville prevailed upon flyer Oscar Hanson to scatter feed in places where wild birds, including pheasants, would find it. Feedman L. R. Jackson donated 50 bags of feed and with Eliot Schroeder as bombardier made his errand of mercy.

EXAGGERATED

Ed Cannon phoned his home newspaper, the Herald-Journal, at Clarinda recently, asked them to tell folks that he was still alive A rumor confusing him with a Shenandoah man prompted the phone call to deny the exaggerated report of his passing.

FIFTY-FIVE

Mr. and Mrs. Henry Kuelper of Belle Plaine recently celebrated their 55th wedding anniversary. 41 of the 55 years were lived in Belle Plaine.

WRONG MAN

At Mt. Pleasant, a Chariton man who was an inmate of the hospital there, took "French Leave" of that institution and decided to thumb his way home to Chariton. He didn't quite make it. The last man to give him a lift was Sheriff Paul Laig, of Lucas County, who recognized the Chariton man after learning by radio that he had escaped from the hospital. Sheriff Laig turned him over to authorities of Monroe county.

In Mexico and Central America, roasted pumpkin seeds are sold from stands the way peanuts are in the United States.

Statistics Show U. S. Has a Sweet Tooth

Americans prefer five-cent candy bars to all other forms of confections, surveys show. Studies also disclose candy to be the sixth largest food business in the United States, which in 1945 produced 2,700,000,000 pounds of sweets valued at $640,000,000 wholesale.

Last year, in spite of curtailed supplies of sugar and chocolate, and the fact that 20 per cent of all candy manufactured went to the armed forces, Americans ate an average of 19 pounds of candy apiece compared with 16 pounds per capita in 1938.

The candy industry, comprised principally of 1,300 manufacturers, was overwhelmingly a nickel-bar business last year. Fifty-two per cent of all candy produced was of the bar type, and of that 90 per cent was sold for a nickel over candy counters. Of other kinds, a notable increase was observed in fancy packaged sweets. Penny goods, which had constituted 20 per cent of the candy manufacture during the depression-rid thirties, dropped last year to only 5 per cent of the total volume.

Three main factors determine the cost of life insurance to policy holders, the interest earned on invested funds and the cost of operating insurance companies.

A record well drilling dept of 16,668 feet was set in California, in 1946.

It feels so-o-o-o good to relax tired, aching muscles under the soothing warmth of a G-E HEAT LAMP. Dries hair and nail polish quickly, too.

Charity Pays Off

The lady in the apartment house window was pitying the poor man standing on the street corner. He was evidently too proud to beg openly, but every now and then someone would walk up to him, whisper a few words, and give him a dollar or two. The lady smiled at him, and he smiled back, so she decided to do her share of charity. Taking a two-dollar bill, she put it into an envelope with a card bearing the words· "Take courage," and tossed it to him. A bright smile was her reward.

But that was not all of it. That evening her doorbell rang and there was her acquaintance of the street corner. "Here's your forty dollars, ma'am, Take Courage won at 20 to 1."

Properly Identified

Two of the little town's most disreputable characters met in the early morning and became embroiled in an uproarious fracas, which awakened half the village and landed the two contenders in the calaboose. Chief witness against them when they came to trial was Uncle Wash, an old Negro handyman.

"Now, Uncle," said the prosecutor, "tell the court what conversation occurred between the two prisoners."

"Ah doan just rightfully remember," replied the old man, "'cept dat each one was callin' de other whut dey wuz."

LITTLE MISTAKE

Dad wrote to his son at college: "I'm sending you the $10 in addition to your regular allowance as you requested in your last letter, but I must again draw attention to your incorrect spelling: '10' is written with one naught, not two."

Said It All

Chauncey M. Depew had an old friend at Peckskill who, after courting the same woman for 20 years, married her.

"Josephus," said Chauncey, "why did you not marry that splendid woman long before now; why did you wait all these years?"

"Chauncey," explained the other, "I waited until she talked herself out. You see, I wanted a quiet married life."

Substitute

A doctor received an urgent telephone call from a father who said his small son had swallowed his fountain pen.

"I'll come at once!" cried the doctor. "What are you doing in the meantime?"

"Using a pencil," came the answer.

Experienced

Smith was watching the local hockey team getting ready. At the last minute it was found that the referee was missing.

"I say," shouted one of the players to Smith, "do you know enough about hockey to referee?"

"I know enough about hockey," replied Smith, "not to referee!"

Trying Isn't Enough

Candidate—I want to assure you, fellow citizens, that I have constantly labored in your behalf to the best of my ability.

Heckler—We know it. That's why we want someone with more ability

YOUNG CRITIC

The young playwright was complaining to the famous producer that his three-year-old son had torn up the manuscript of his newest play.

"Ah," mused the producer, "the child can read."

Noisy Neighbors

Tenant—The people upstairs are very annoying. Last Monday they were stamping and banging on the floor till after midnight.

Landlord—Did they wake you?

Tenant—No, I was practicing on my tuba.

Fair Warning

First Visitor—My dear, these cakes are hard as stone

Second Visitor—I know. Didn't you hear the hostess say, "Take your pick."

They All Want It

"At last," said the ambitious young novelist, "I have written something that will be accepted by the first magazine it is sent to."

"What is it?" asked his friend.

"A check for a year's subscription."

Character Builder

Football Coach (to players)—And remember that football develops individuality, initiative and leadership. Now get out on the field and do exactly what I've told you to do.

Report by a Scout From Mars

(Being from the papers of Xygox 367, a prominent Martian explorer.)

Sire: My visit to earth was necessarily short. I am especially rugged but not rugged enough to stand a prolonged stay in this madhouse upon which you asked a report. It is, as indicated by the reverberations heard on Mars, a place of great confusion, disorder and strife. Everybody seems fighting, about to fight or just ending a fight. A vast number of languages are spoken but evidently only about nine words are really required for understanding in all tongues. These are "Liar!" "Take that back!" "Forward, march!" and "Surrender or else. . . ."

—•—

Most of my visit was limited to a place called the United States. They were evidently united at one time. This is a very strange land where something called the radio is going all the time. It drowns out everything else, and is, I think, tied up in some way with the mint and the educational system. Vast sums of money are distributed every minute to people of all ages who pass oral examinations, using a contrivance called the microphone.

—•—

These sums are staggering. For giving the right name of a song that has been played in every home for half a century an adult is given 10 silver dollars minimum. I observed a woman from Butte who was paid $36 for stating that a volcano was an erupting mountain and not a Cuban musical instrument.

—•—

For a child to win $350 in something called a jackpot for stating how many colors there are to the keys on a piano is common, but what bowled me over was that grown adults, some as old as 50 years, were paid even larger sums for telling an interrogator which were predominant, the black or the white keys.

—•—

Great symphony orchestras, statesmen, artists and civil leaders all put in time and effort to promote tonics, balms, ointments, etc., from which it is my deduction that the condition of the people is more alarming than I can well describe. as for myself, I found it impossible to listen to the radio a half hour without being overcome by a great feeling of compassion for the inhabitants. I left with a conviction that I had been exposed to many plagues and that an immediate quarantine would be wise upon my return to Mars.

—•—

It is my belief that a more accurate report on the place is impossible without a prolonged stay, and I do not feel that any Martian, tough as they are, could stand it.

Faithfully, Xygox 367.

• • •

The National Collegiate Athletic association in convention duly assembled has voted for a purity code in football. The only problem is how to ice the idea over the summer.

• • •

NOTING THINGS

Forgetful? Who, me?
Why, brother far from it;
For keenness I garner the votes;
The secret? Write everything
Down that needs doing. . . .
Say, where in the deuce
Are my notes?

—Pier.

AVIATION NOTES

COLORADO SURVEYS NEEDS

Approximately six million dollars will be required to build an adequate system of airports in Colorado outside the metropolitan areas of Denver, Pueblo, Colorado Springs and Grand Junction, a Colorado Aeronautics commission survey shows This system will be required by 1955 to handle the more than 4,000 planes expected to be owned by Coloradans by that time, Henry B Moore, director of the Colorado university bureau of research, declares.

Engineers and economists from the university have visited nearly every airport in the state and every town with a population of more than 750 in their survey of Colorado's airport conditions.

The survey disclosed that there are 157 towns in Colorado under 1,000 population with 44 landing areas, 44 towns from 1,000 to 2,500 with 31 landing areas, 13 towns from 2,500 to 5,000 with 12 landing areas, 9 towns from 5,000 to 10,000 with 12 landing areas, 8 towns over 10,000 with 21 landing areas.

• • •

Special religious services were held in the First Baptist church of Minneapolis, Minn., to dedicate a two-passenger airplane to be used by Minneapolis Hospitality house for expanding its youth work. The plane was dismantled and brought to the church sanctuary for official dedication ceremonies in front of the congregation.

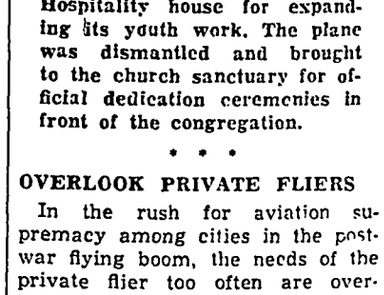
• • •

OVERLOOK PRIVATE FLIERS

In the rush for aviation supremacy among cities in the postwar flying boom, the needs of the private flier too often are overlooked. This condition is leading private fliers, particularly in rural areas, to take a more active interest in aviation development in their home cities.

The attitude of cities varies widely in regard to the private flier In Burbank, Calif., for example a $2.50 landing fee has been instigated for single-engine, private planes A $5 fee is assessed for twin-motor jobs landed at Lockheed air terminal there. On the other hand, Milwaukee, Wis., has spent $350,000 on Maitland field, a downtown landing field, and is contemplating spending another $200,000. This field is intended primarily for private fliers and there is no landing fee.

• • •



NEW JET FIGHTER . . . Latest of jet fighters is the Ryan XF2R-1, which is serving as the navy's flying laboratory to test prop-jet engines. This Fireball-type fighter is the first navy combat plane to be powered by a gas turbine turning a propeller.

• • •

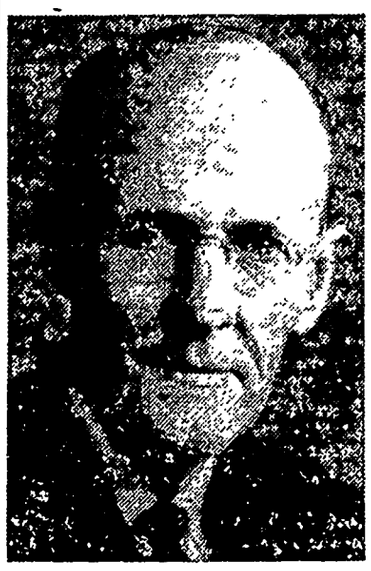
SHOW DATES SET

The national airport show and institute, originally scheduled for April 22-25, has been postponed until November 4-7 at Cleveland, according to Frederick C. Crawford, president of Air foundation. The show and institute, sponsored by the foundation and National Aeronautics association, will cover all phases of airport finance, construction, operation and maintenance. Special classes will be conducted in planning, economics and other fields.

ONE MAN ARMY WANTS TO RE-ENLIST . . . Former Maj. Arthur W. Wermuth, Hill City, S. D., who killed 116 Japanese single-handed before being made a prisoner, is shown talking to Lt. Col. Maynard B. Weaver, Denver recruiting officer, who is trying to secure authority so that the hero may re-enlist in the army as a master sergeant. Under existing rules Major Wermuth would have to re-enlist as a staff sergeant. Wermuth, before being commissioned in the army, had served as a master sergeant. He turned down several movie and stage offers with the belief he would be happier to remain in armed service.

SPARTAN PULCHRITUDE . . . Members of Michigan State college's championship coed swimming team, left to right: Joyce Zilliker, Detroit; Ursela Weicken, Detroit; Helen Holm, Lansing; Alberta Powers, Ann Arbor; Corrine Dixon, Detroit; Elaine Healey, East Jordan; Barbara Wright, Saginaw; Gloria Leclercq, Teaneck, N. J.; Dolores Sullivan, Wayne; Joan Faust, Shamokin, Pa.; Jane Zimmerman, Traverse City, and Virginia Annas, Detroit.

TO HONOR GREAT WARRIOR . . . Suzanne Silvercruys Stevenson, New York sculptress, has designed this proposed bronze statue of the late Gen. George S. Patton Jr., wartime commander of the U. S. 3rd army. Statue of General Patton will be erected at West Point.



ROTARY FOUNDER . . . Paul P. Harris, founder of the first Rotary club, died at his home in Chicago at the age of 78, following extended illness. He also served as the first president of Rotary International and president-emeritus at time of his death.

SEWING CIRCLE PATTERNS

Brief Sleeved Shirtwaist Frock
Date Frock Has Keyhole Neckline

Fresh Shirtwaister

THE most popular of all styles, the shirtwaister, is shown here with a fresh, new look. The wide extended shoulders are comfortable as can be, the neat set-in belt fits just right. You'll wear it all summer long—why not make up several in different cottons to have ready.

• • •

Pattern No. 8037 comes in sizes 14, 16, 18, 20; 40, 42, 44 and 46. Size 16 requires 3½ yards of 35 or 39-inch fabric.

Popular Junior Frock

A CLEVER junior date dress with a wealth of eye-appeal. Note the pretty keyhole neckline and crisp yoke treatment—the way the belt whittles your waist to doll-like proportions. It will be stunning in a gayly striped fabric, used in contrast for yoke and cap sleeves.

• • •

Pattern No. 8052 is designed for sizes 11, 12, 13, 14, 16 and 18. Size 12, 3⅛ yards of 35 or 39-inch

Send an additional twenty-five cents with your pattern order for a copy of the Spring FASHION Contains 52 pages of style, color, easy to make patterns for every woman who sews Free hat pattern printed inside the book.

Household Hints

If your vacuum cleaner belt breaks when you are in the midst of cleaning, put a rubber jar ring in its place temporarily.

—•—

To make gloss paint flow more readily, place the container in a pan of warm water for ten minutes.

—•—

Try baking biscuits for meat pies separately in one pan, while the filling cooks in another. If the baked biscuits are placed on filling just before serving, there will be no sogginess.

—•—

To prevent lime from forming in the tea kettle, place a piece of muslin in the bottom of the kettle. The lime will stick to the muslin instead of to the kettle.

—•—

Wet walls inside a home should cause the householder to check the flashings. Also examine the exterior walls for holes or breaks.

—•—

Build your rural mail box just high enough so the carrier can reach it conveniently without getting out of his car. Underneath the box construct a small platform for the reception of packages. An ideal platform size is 14x18 inches.

—•—

Ash trays carelessly dumped are often the cause of fires in waste baskets.

END LAXATIVE HABIT THIS EASY WAY!

Millions Now Take Healthful Fresh Fruit Drink—Find Harsh Laxatives Unnecessary

It's lemon and water. Yes—just the juice of 1 Sunkist Lemon in a glass of water—first thing on arising.

Taken first thing in the morning, this wholesome drink stimulates bowel action in a *natural* way—assures most people of prompt, *normal* elimination.

Why not change to this *healthful* habit? Lemon and water is *good* for you. Lemons are among the richest sources of vitamin C, which combats fatigue, helps you resist colds and infections. They also supply B_1 and P. They alkalinize, aid appetite and digestion. Lemon and water has a fresh tang, too—clears the mouth, wakes you up!

Try this grand wake-up drink 10 mornings. See if it doesn't help you! Use California Sunkist Lemons.

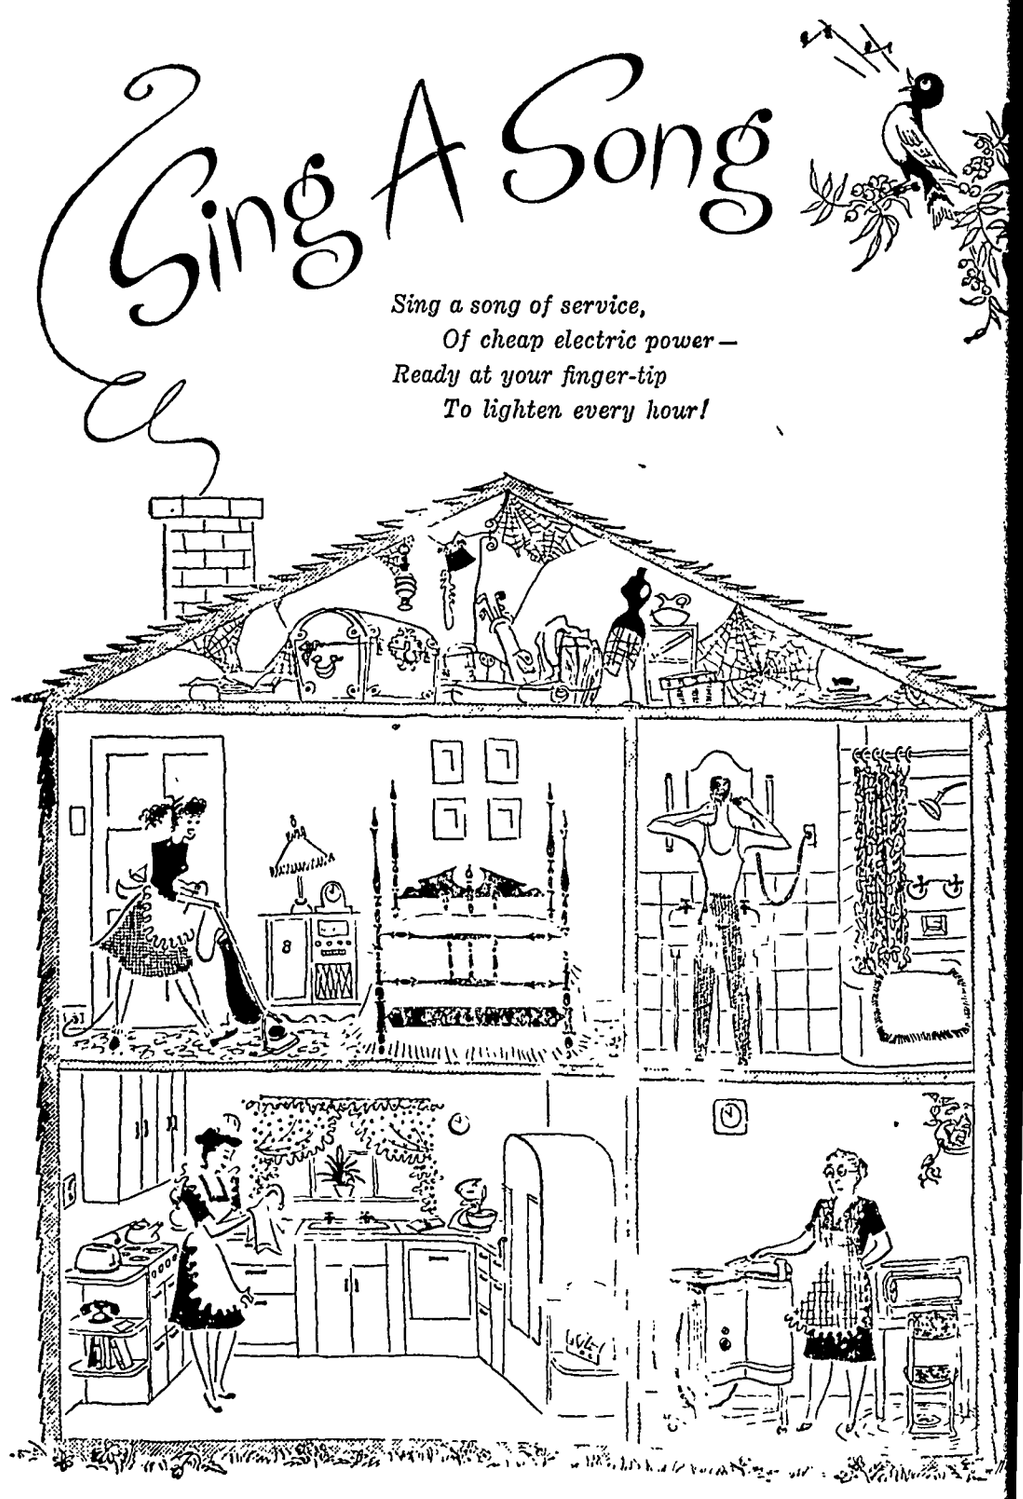
Sing A Song

Sing a song of service,
Of cheap electric power—
Ready at your finger-tip
To lighten every hour!



MOTHER'S in the kitchen, dreaming up a meal. Grandma's in the laundry, busy washing clothes. Dad plugs in his razor, and whisks off his whiskers. Lights shine, the radio plays merrily, and Sister skims the cleaner across the bedroom rug.

This is a house with dozens of servants—dependable, willing electric servants—ready day and night to make work easier and life more comfortable. This is living the modern way—the electric way!

Yet how little it costs! Grandma can spin the dirt from six heaping tubs of wash—for only a penny! A few more pennies get Mother through her meal and Father through his beard, too. Sister can clean that rug and five others like it before her cent's worth of electricity is used up.

Dollar values for penny prices—that's the story behind every electric switch in your home. That's *our* song of service!

• *Listen to the* New Electric Hour—*the* HOUR OF CHARM. *Sundays, 4:30 P.M., EST, CBS.*

4-H Members With Good Records Eligible For Awards

Hancock County 4-H boys enrolled in agricultural projects this year again have a chance to receive a number of awards, Paul Henderson, county extension director, announced this week.

The recognitions include gold and silver medals, a watch, U S. savings bonds, scholarship, trophies, credit on the purchase of purebred breeding stock and trips to the National Club Congress.

County award winners will be selected in September by the county 4-H boy's committee This committee will review the record books of the members and recognize boys who have done outstanding 4-H work.

Members who receive state awards are picked by the state 4-H staff. The selections are made from the records of the county winner. Similarly sectional and national awards are picked by the National Committee for Boys and Girls Club Work from the records sent in by the states.

Henderson says that all 4-H leaders have been given a detailed schedule of the awards. Members are being advised of the requirements to receive an award by these leaders.

The medals and other awards are given by commercial, livestock bred associations and other institutions.

Donors are: Thomas E. Wilson, Chicago; the Chicago Producers' Commission Association; Kraft Food Company; Swift and Company; the Portland Cement Association; Republic Steel Corporation; the Iowa Horse and Mule Breeders' Association, and the Horse and Mule Association of America.

The Iowa Poland China Breeders' Association; Allis-Chalmers Manufacturing Company; Firestone and Rubber Company; The International Harvester Co; General Motors Corporation Corporation; The Farm Underwriters Association and the Mutual Reinsurance Association; The Westinghouse Educational Foundation, Standard Oil Company (Indiana), Ak-Sar-Ben Livestock Show, Radio Station WNAX and Mrs. Charles Walgren, Chicago.

COUNTY MEETING HELD KLEMME SATURDAY

The annual meeting of the Hancock County T. B. Association was held Saturday, Feb. 22nd at the Klemme Methodist Church. Corcle No. 3 of the WSCS served dinner to the guests.

A report of the year's work was given and plans made for the coming year. Speakers were Dr. W. F. Missman of Klemme, Supt. Chas. Whitney of Garner, and County Nurse Miss Oxley.

Legion Auxiliary Meets

The Legion and Auxiliary will meet at the hall March 4th. Dr. and Mrs. D. P. Anderson and Mr. and Mrs. Benn Coobs will serve.

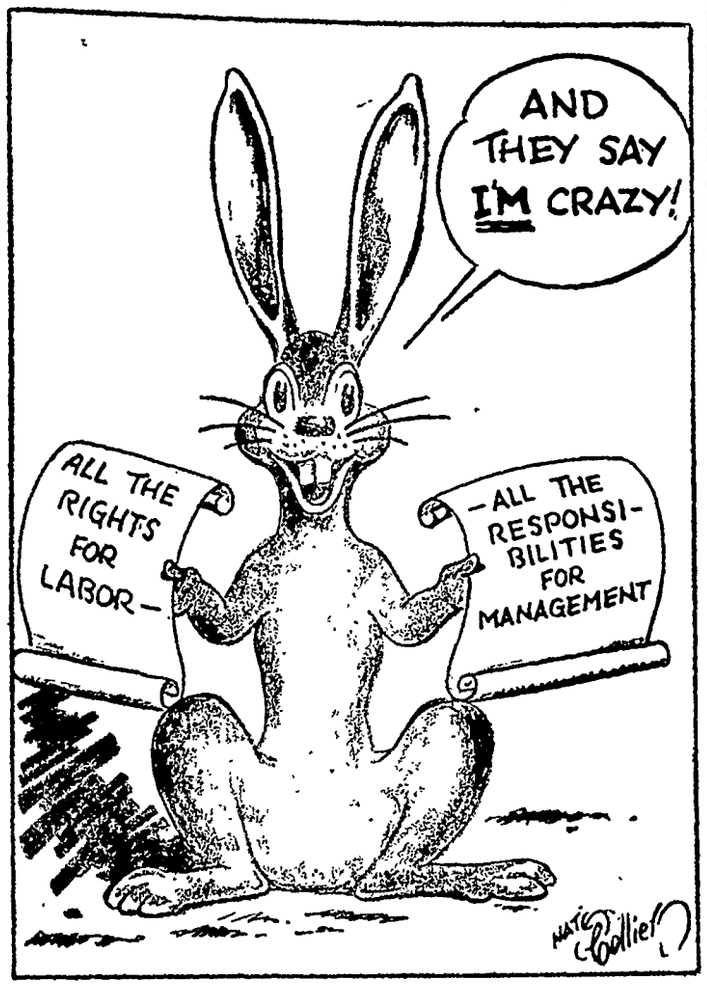
The date of his demise was Wednesday, February 19, 1947. He reached the age of 80 years, 8 months and 6 days.

Erick Josten had five brothers and one sister. Two brothers survive, John Josten and Henry A. Josten, both of Klemme, Ia.

The following preceeded him in death: His one sister Christina, Mrs. August Haberkamp, also his three brothers, Hans C., Valentine and Peter.

He also leaves to mourn his passing a large circle of nieces and nephews and other more distant relatives and friends.

THE MAD MARCH HARE? By COLLIER



Fun And Free Entertainment For Everyone Thursday

NORTHERN LUMBER CO. IMPLEMENT DEPT. TO STAGE SHOW

Thursday, February 27 will be a big day in Klemme as the Northern Lumber Company Implement Department will have a big free show at the Community Hall beginning at 2 00 p m Everything is free and there will be movies and stage acts galore. They extend an invitation to everyone to attend.

Remodeling Store Room

For the past two weeks, Mr. Jennings, manager of the Northern Implement Department, has had a crew of carpenters busy enlarging the display room at the implement store The added room is about 15x40 feet in size, in addition to the already large display room. This will give Mr Jennings ample space for the display of merchandise and light farm equipment The office has been moved to the rear of the display room

FAREWELL DINNER HELD FOR MR. AND MRS. FRANK WARD

The Adult Bible Class of the Klemme Methodist Church held a dinner Sunday in the dining room in honor of Mr. and Mrs. Frank Ward, with forty-three present.

Ray Schaefer, vice president of the class presided and after the dinner a program was carried out.

All san "Bring Them In," and a scripture was read by Mrs. Roy Schaefer and a prayer by J A Chambers.

Readings and talks were then given by Mrs. J. A. Chambers, Iris Cchaefer, Mrs. D. P. Anderson and Mrs. E. J. Arnold gave an interpretation of, the song "Beautiful Isle" This was also a memorial dedicated to the late Erick Josten a former member and teacher of the class.

Special music was enjoyed by a mixed quartet; E. G. Beier, Mrs. Otto Lemke, Mrs. George Schoenwetter and E. A. Zeidler.

The class presented Mr. and Mrs. Ward with a nice gift, and both responded with short talks.

The balance of the afternoon was spent in visiting.

CAPACITY CROWD SAW THE WORLD CHAMPION NEGRO TEAM HERE

Hundreds Of Fans Turned Away From Exhibition Basket Ball Game

One of the largest crowds ever to attend a basket ball game in the Klemme high school gymnasium got their money's worth when they saw the World Champion Negro basket ball team, the New York Globe Trotters play against the Klemme Vagabonds here Friday night. It was the largest "gate" ever taken in and fans spent a total of $470.00 to see this game.

The Globe Trotters were everything as advertised and kept the crowd in an uproar throughout the game with their clever shooting, ball handling and floor work. However, the Klemme Vagabonds gave the negroes a good run for their money throughout the game which ended in favor of the Trotters 59 to 50.

The Trotters have promised a return appearance on the Klemme Court again next year as this was the best crowd they had played before in the last 75 games. They praised the local independent Vagabonds for having a fine team.

MARCELLA VRBA AND PAUL THUL MARRIED TUESDAY, FEBRUARY 11

Miss Marcella Vrba, only daughter of Mr. and Mrs. James Vrba became the bride of Paul L. Thul, eldest son of Mrs. Mary Thul and the late Pete Thul of Clarion, Tuesday morning at 9 o'clock at the St. Wencelaus Catholic church at Duncan, with the Rev. Msgr. Hradecky officiating at a double ring ceremony.

The bride wore a white satin floor length gown with sweetheart neckline and long sleeves and a gathered skirt. Her finger-tipped veil was edged with lace and held in place with a beaded crown. She carried a bouquet of red roses and white sweet peas. She wore a gold cross and carried a white pearl rosary, a gift of the bridegroom.

Miss Marie Wellik, cousin of the bride, was bridesmaid. She wore a pink floor length gown with gathered skirt and three-quarter length sleeves. She carried a bouquet of pink carnations and lavender sweet peas.

The bridegroom wore a brown suit and a white boutonniere.

Patrick Thul, only brother of the bridegroom, was bestman He wore a grey suit and a white carnation boutonniere.

Mothers of the bride and groom both wore black dresses with sequin trim and corsages of red roses and white sweet peas.

The bride attended rural schools of Hancock county. The groom attended St. John's school at Clarion and graduated from Clarion high school in 1940. He is a member of St. John's choir.

At high noon a reception was held at the private dining room of Hull's cafe at Garner for 30 relatives. A three-tiered wedding cake decorated in pink with a minature bride and groom, served as a center piece at the brides table.

A wedding dance was held at the Klemme community hall with Malek's Accordian Band furnishing the music. A large crowd attended.

The couple will farm northwest of Clarion, where the bridegroom has been farming for the last three years.

Klemme Churches Will Help Starving People

March First Deadline Date For Farmers To Request Potato Goal

March 1st is the deadline for farmers who plan on planting three acres or more of potatoes to request a potato goal, if they have not already done so, for 1947, according to Alfred V. Josten, Chairman of the Hancock County AAA. Requests for the goals should be made to the County AAA Office at Garner.

Only producers that have requested a goal and plant within the goal will be eligible for price support under the Steagall Amendment price support program, Mr. Josten explained.

The U. S. D A. has lowered the National goal for potatoes for 1947, downward 152,000 acres from the original 2,669,800 acres to 2,517,000 acres. Iowa goals are now at 27,000 acres. Individual and county goals will be set in the near future. Producers shold check with their A AA Committees, if they have not already requested a potato goal for 1947, before making plans for potato planting.

Mr. Josten further explained that the reason for cutting the the present figure was to enable the Government to keep production goals as near to consumption needs as possible.

Recent data has provided more accurate information on the trend of potato yields, showing that the acreage has been declining while yields have been increasing. This is due to the use of improved seed, better farming practices, and better insections.

Dr. D. P. Anderson Has New Office Quarters

Dr. D P. Anderson, who has had office space in the Implement Store now has his office in the office room of the garage building on West Main Street which is used as a warehouse for the Jacobs Hardware.

Local Church Cooperating In Gathering Corn And Oats For World Relief

The Iowa Inter Church Council and Christian Fellowship is sponsoring a gathering of grain for shipment abroad. This grain will be sent to the Purina-Ralston Mills at St. Louis and where it will be processed and sent to foreign lands in the form of cereals. This distribution of this food is in the hand of the Christian Churches of America.

In Warsaw for instance, 1000 hungry people are fed daily in a soup kitchen established by the World Council of Churches, from funds contributed by American Churches. Many of these people are getting their first full balanced meal that they have had for many long years.

Our local churches, the Methodist and the Evangelical and Reformed, are sponsoring the local drive. All who wish to donate shelled corn or oats or money for the purchase of grain may bring their donation to the Farmers Elevator here in Klemme. If enough grain and money is contributed for a carload, it will be shipped to the Purina-Ralston Company in St. Louis. If the amount is less than a carload the local elevator management has consented to buy the grain and send the money to the Purina Company in payment for the same amount of grain to be purchased by them in St. Louis.

The time for this drive has been set from February 10-27. Since this would hardly give us time to bring this request to all the people of our community the time for the local drive has been set for the 15th of March.

The World Council of Churches has now established stations in practically all of the foreign countries that are in need, and all who make a donation may rest assured that the food thus given will be used to feed the hungry and bring relief to the suffering.

Baptized His Own Granddaughter Sunday At Melbourne

Rev and Mrs. Calvin Grosshuesch, Gertrude and Eddie and Grandma Sila Grosshuesch were all at Melbourne, Iowa, Sunday where Rev. Grosshuesch baptized his first and only granddaughter, Judith, the daughter of Rev. and Mrs. Ruben Grosshuesch.

Rev. Ruben Grosshuesch is the son of Rev. and Mrs. Calvin Grosshuesch, and Mrs. Sila Grosshuesch is Judith's great grandmother.

Hancock County AAA Reports 84 Loans On '46 Corn Crop

As of Saturday, February 21, Alfred V. Josten, Chairman of the Hancock County AAA, reports 84 loans covering 126,879 bushels of 1946 corn crop have been completed in Hancock County.

During the month of Jan. 91 counties in Iowa placed 4,984,209 bushels of corn under seal.

This indicates that over 5 million bushels were sealed in January. With 2½ million bu. sealed in December, the total stands at over 7½ million bushels.

Moisture content allowance at present time is 19.50 percent for 8 ft. crib. Moisture allowance will be changed as of April 1 to 17.50 percent. Shelled corn may be sealed starting June 1. The sealing program will close on August 1, 1947.

This corn loan program will assure a stablized price of corn, stated Josten.

Labor Legislation Holds Spotlight

Union Rank and File Ask Only for Extended Peace

By BAUKHAGE
News Analyst and Commentator.

WNU Service, 1616 Eye Street, N. W., Washington, D. C.

WASHINGTON. — Sitting in the committee room where the hearings on the forthcoming labor bills have been taking place I often have wondered how closely they were being followed by the ranks and file of the union members. Of course, the leaders were listening with cocked ears to every syllable—were they listening with the same ears as the men?

Baukhage

The reason I ask that is because of a letter I received which asked:

"How can the thousands of union members like myself make people understand that what the leaders of our unions do are not the views of the small fry rank and file members?" He goes on to claim that these "international officers are elected at a convention attended by a certain few. And we who stay at home and pay their salaries by our monthly dues have nothing to say about who our national officers are to be or what policies are to be followed. The first inkling we have of what is going on is when we read it in the paper."

He points out that people like himself have no huge financial reserves, no way to make themselves heard.

"All we want," he insists, is to be "left alone. We want to work. We want to work hard because we are all financially broke. It is our fervent wish that everybody let us alone and let us work in peace."

When I read that letter on the air, another 59-year-old automobile worker (member of a CIO union) wrote in immediately to agree with the sentiments. He says: "All I ask for is 52 weeks' work in a year (including one week vacation with pay), no strikes, no lay-offs and no increase (underlined by the writer) in wages. Industry and farm prices would take away all and more of any increase I might get. I too, wish we could get a secret poll of CIO members on such matters as above, but that is quite improbable — the union leaders would discourage any such vote."

Another listener reminded me of the so-called "Barnes bill" in Massachusetts to compel unions to file certain statements with the Commonwealth — a bill fought by union leaders — which was carried by so large a majority that observers figured that more than 50 per cent of the members of unions in the Bay state had voted in its favor.

A woman correspondent added her voice in support of the first worker. She wrote: "Men looking for work are trying to avoid jobs where they have to join unions."

Of course, there were many who disagreed. One of the most vehement was a 78-year-old Virginian who began work on the railroad in 1886. He described early days when unionization was just getting under way. He said: "When I joined the Brakemen, it was a crime. In fact, you had to keep it a secret or off went your head." He characterizes the union man who criticizes his leadership as "a parasite glad to get a raise and better working conditions, but who will let the other fellow pay for his fare."

An Ohio union member concurs, saying: "When anyone tells you that they do not have a say in what their officers do, they show no respect whatsoever for the truth. They should attend their meetings and help shape their policies, and don't blame their officers for what is done because it is their own fault."

Obviously, situations differ in different unions.

When the bill is written by congress, I believe it will be so phrased that it will make it possible for the majority of union men, if not the majority of the leaders, to vote without qualms for the men who wrote it. That seems common political sense.

New Book of Wonders

When I was reminded that there was going to be an Agricultural Yearbook this year (the first one since 1942) I hot-footed it over to the editor because the Agricultural Yearbook is news Bad news when they don't have one and good news when they do, which is every year since 1863 when Abraham Lincoln signed the bill authorizing establishment of the department of agriculture and outlining its functions.

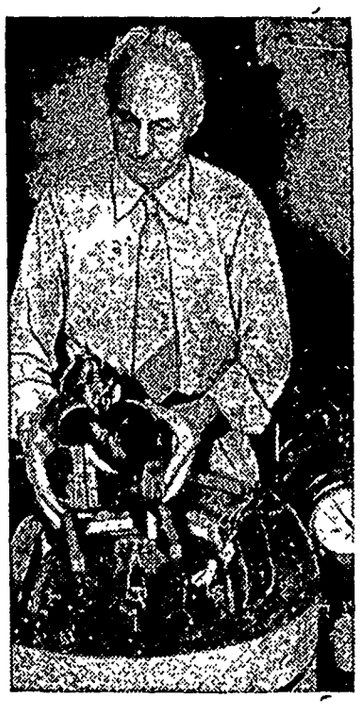
At this writing the book is still in galleys but will be out soon. Circumstances which interrupted the annual publication of this work have combined to make it perhaps the most interesting in the history of the department. Its title is "Science in Farming" and it will reveal some of the tremendous advances which have affected the products of agriculture during and because of the war. The editor is Alfred Stefferud and the authors of the some 150 odd articles which it contains are mostly scientists in the department. Some are staff members of state colleges, state agricultural experiment stations and other government laboratories. As editor Stefferud says, this yearbook will furnish "a wealth of information on how to live better and work better, information about food, clothing, housing, gardens, pests, forests, new processes and many other things."

There isn't room here to list all of the contents but the articles which deal with plant and animal genetics recount tremendous strides made in breeding, feeding and care, and combating insects and diseases. The hen getting her respiration measured in the picture is an example of the studies of conditions favorable to health and well being of poultry, cattle and horses which have been studied.

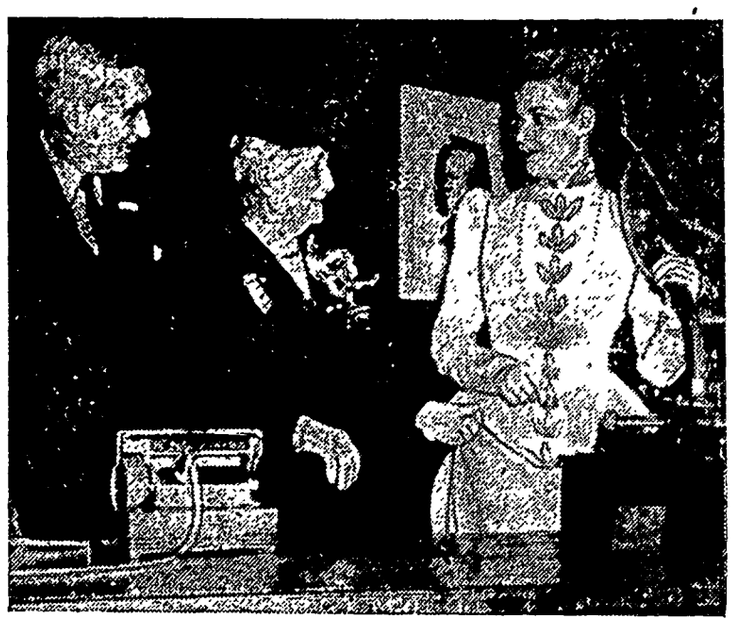
Then there are the new products which have been created out of old ones: Utilization of corn-cobs and stalks and straw; the manufacture of vegetable meals that used to be dumped; chapters on penicillin and rutin showing the new bond between agriculture and pharmacy. I never guessed that rutin can be made from some 35 different plants and the richest in yield is the one that produces those tasty buckwheat cakes that I used to drown in maple syrup in my youth.

Then there is the story of "velva," the toothsome product made of over-ripe fruit. You may or may not know that one of the most difficult flavors to preserve is that of the apple. It was never captured even in candy, successfully. Now, however, it has been anchored and there is an apple flavor as satisfactory as vanilla. Incidentally one of the most fascinating articles is the result of a survey which reveals what Americans eat and why.

After even a rather hurried glance at the contents of this volume I realize how lucky are the people who have a friend in congress from whom they can obtain a copy of "Science and Farming." Under the law 260,000 copies of the yearbook are printed as congressional documents and nearly all of these are delivered to congressmen. It is left to their discretion to distribute them. They also can be purchased from the superintendent of documents of the U. S. government printing office. The price has not been announced at this writing but I imagine it will not exceed $2 this year.



Bio-physicist H. G. Barott of department of agriculture places hen in respiration calorimeter to measure intake of oxygen and output of carbon dioxide and heat.



EDISON KIN AT CENTENNIAL . . . Former Gov. Charles Edison and his mother, Mrs. Thomas A. Edison, wife of the inventor, tour the Menlo Park, N. J., plant during the Edison centennial fete. Mrs. Kitty Jones, dressed in 1890 costume, demonstrates one of Edison's first phonograph inventions.

NEWS REVIEW

New Polar Lands Mapped; Disarmament Plan Balked

ANTARCTICA:
New Discoveries

The vast frigid Antarctic lying at the bottom of the world began to take clearer shape as a result of the Byrd expedition. No less than 125,000 square miles of hitherto uncharted wasteland were mapped by naval explorers in the first five weeks of polar operations.

Fliers photographed and charted 4 great bays, eight major mountain ranges, more than 20 islands, 3 important peninsulas and 2,000 miles of coastland. Most important single discovery was a vast bay cutting deeply into the continent from Franklin Roosevelt sea. It measured 180 miles in length and 120 miles in width.

Now on his fourth antarctic expedition, Byrd remained sold on the white-capped continent. He asserted that it contains a treasure-house of raw materials which could supplement U. S. resources depleted during the war

U.N.:
How to Disarm?

Sick of war, the U. S. and Russia remained sold on world disarmament, but as the two great powers in conflicting camps, they locked horns on procedure.

The atomic bomb remained the nub of the problem. The U. S. insisted that no adequate system of collective security could be devised until establishment of effective control over A-bombs, long-range rockets and other mass destruction weapons. The Russians, on the other hand, wanted the U. S. to surrender the A-bomb and disarm at the same time.

U. S. military experts reason that should the U. S. give up the atomic bomb without securing effective control and scrap ships, airplanes and tanks simultaneously, Russia would have a distinct advantage in case of future hostilities since she could quickly remobilize her ground forces. Thus, stripped of effective communication and power, the U. S. would stand empty-handed at the other end of the world.

No responsible official could stomach that prospect.

PRESIDENCY:
Rush Curb

Mustering its full strength, the Republican majority in congress pushed for passage of a bill by Representative Michener (Rep., Mich.) for limiting a president to two terms. Denying Democratic charges that the measure was "anti-Roosevelt," the GOP contended it was designed to curb the growth of autocratic power and put a historic U. S. tradition into law.

Michener urged speedy action on the measure to allow state legislatures now in session to ratify it as a constitutional amendment. In addition to congressional approval, three-fourths of the 48 states must ratify before it becomes effective. Should congress delay, Michener said, many legislatures may adjourn to 1949 before being able to act upon the proposal.

Meanwhile, President Truman injected himself into discussion of the presidency by proposing that congress change the rules of succession to permit the speaker of the house to take over when the chief executive gives up office and no vice president exists. Under present law, the secretary of state succeeds in such a situation. Elevation of the speaker would permit the advancement of an elective officer, Mr. Truman said.

STATE DEPARTMENT:
Legislative Aims

While Secretary of State Marshall called for early congressional action on his request for full aid to the hungry in war-stricken areas overseas, the senate foreign relations committee indicated it would hold off consideration until receiving ex-President Hoover's report on food requirements for Germany.

Marshall made his request in a statement to the committee listing the department's legislative program. Other action sought included:

—Senate approval of the Balkan peace treaties signed in Paris February 10.

—Authorization for the St. Lawrence seaway.

—Legislation for entry of displaced persons into this country.

—Tax exemptions for persons making gifts to the U.N.

FINANCE:
A Comer

Canny 49-year-old Robert R. Young continued to shake Wall street with his aggressive advances for a transcontinental railroad line.

Young, a former New York stockbroker who catapulted into the national limelight by joining in purchase of control of the vast Van Sweringen railroad empire for only $510,000, heads the Alleghany corporation, which dominates the Chesapeake and Ohio, the Nickle Plate and Pere Marquette.

Robert R. Young

Operating through Alleghany, Young is said to have increased his holdings in the New York Central to 309,000 shares and bought up almost $18,000,000 in Rock Island securities. Control of these two lines would give him a run from New York to Chicago to New Mexico, from whence he could bargain for track rights to the Pacific coast, completing his dream of a transcontinental line.

An aggressive champion of railroad modernization to keep up with other competitive modes of transportation, Young repeatedly has assailed carrier interests for failure to improve their properties.

'KILLED IN ACTION'

Accident Toll Soars to 100,000

CHICAGO. — Accidents took a death toll of 100,000 persons in 1946 with additional millions injured and economic loss as a result of mishaps soaring to $5,600,000,000, according to National Safety council.

Fatalities represented an increase of 4 per cent over the 1945 toll of 95,918. The 1946 figure was significant because the motor vehicle death toll for the first quarter of the year was up 45 per cent, the council reports.

Home accidents accounted for the greatest number of casualties, 34,000, while motor accidents ran a close second with 33,500 dead. Occupational mishaps killed 16,500.

The report shows that major causes of death included falls, 27,800; burns, 18,200; drownings, 7,300, and firearm accidents, 3,100.

Motor traffic fatalities were up 19 per cent over 1945. The 89 railroad passenger deaths represented a 26 per cent drop. Regularly scheduled airline passenger flight deaths totaled 75, a decrease of 43 per cent.

Estimated economic loss due to accidents included wage losses, medical expense, production delays and damages to equipment and property.

Motor traffic deaths declined during the latter part of 1946 until they leveled off at the 1945 rate. The improvement was attributed by the council to a "concerted safety program by public officials and safety organizations instituted after President Truman's highway safety conference last May."

New York led in traffic deaths with a total of 700, an increase of 53 over the preceding year. Chicago ranked second with 484 casualties, a jump of 12 over the 1945 total.

IN THESE UNITED STATES

Old Leisure Time Diversions Still Prevail at Farm Parties

The old familiar phrase, "a good time was had by all," is still the best yardstick for a successful party, says W. R. Gordon, extension rural sociologist of Pennsylvania State college, who concludes from observations on 100 extension demonstrations that there is, "no lack of enthusiasm among farm people for recreation."

Good times in the country and on the farm suggest "the leisure time experiences of our grandparents—the literary meeting, spelling bee, box social, maple sugar party and barn dance," he says. Most of these diversions have stood the test of time and are still popular. One of them, the spelling bee, staged a lively comeback last year throughout the state under sponsorship of the Pennsylvania State grange with the state-wide finals at its annual meeting in Wilkes-Barre last October.

"Owing to man's inherent weakness for eating," Gordon notes, "the box social has never completely lost its appeal. The barn dance, although it has moved from the barn to the school gymnasium, the fire hall or the community center, attracts young and old, just as it did generations ago."

But, he thinks today's good times in the country have even more recreational variety. In addition to parties and square dancing, groups come together to sing and for roller skating. Contests include the traditional horseshoes, corn husking and log sawing, with baseball and softball added. Hay rides and hikes to nearby places for cook-outs, doggie roasts and suppers divide attention with more extended trips, some of them by chartered bus, to places of interest.

One of the best features of rural recreation, as Gordon points out, is that "almost everyone is participant; there are few spectators."

Old Age Pension Provides Funds For Free Library

TULSA, OKLA.—A philanthropist on an old-age pension. That is the unusual position of 80-year-old J. W. Black.

Black doesn't have enough heat in his apartment to keep it cozy and his rooms are devoid of electric lights. But his basement living room is lined with 1,100 books which he has dedicated to the 2,000 children of his suburban Glenwood community, which has no other public library.

By skimping on his pension checks, Black recently managed to buy a new set of children's books. Many of the volumes, however, are gifts from persons who desired to help keep his private philanthropy alive.

"When I'm gone, I figure I will have returned $2 for every $1 I received from the state," Black contends.

Although no cards are kept in this unusual library, Black has missed few books from his shelves, crudely fashioned from apple crates. There is only one rule: "Read and return to 5244½ Sand Springs Road and thank the dear Father for our library."

The library is a happy place, Black points out, adding that "the little folk fill it with their laughter and they can play games here too if they take the notion."

"You see, I know something about people," Black says, "and one thing I realize is that if we don't take care of these little fellows we will live to regret it."

Observance Sparks Defense Problems

CHICAGO.—With the purpose of focusing attention on national defense problems, the annual observance of National Security week is being revived this year after a lapse during war years. Dates for the observance are from Lincoln's birthday anniversary, February 12, to Washington's birthday anniversary, February 22.

The observance, which has been given official recognition of both the war and navy departments, is being sponsored by the Reserve Officers association of the United States. The sponsoring agency is a nation-wide organization composed of reserve officers of all the armed forces interested in promotion of national defense. Officers of the association point out that graduates of officer candidate schools comprised 98 per cent of the army's officer strength during World War II.

Money Problem

NEW YORK.—Money problems come in big measure to the Corn Exchange Bank & Trust Co. A directors' report showed the bank handled $45,958,750 in coins during 1946. Total weight was reported at 2,632 tons, enough to fill 133,400 ordinary money bags.

Time Payment

HERRIN, ILL.—Sixteen years after his wrist watch was stolen, Lester Turner received a $20 bill in payment. The money was sent in an anonymous letter which stated "the watch is long gone but here is approximately the value of it."

Parking Meters Net Jack Pot of Coins

NEWBURGH, N. Y.—People will put all sorts of things into parking meters, reports Kenneth D. Jones, city coin collector. In addition to coin of the realm, the parking meter take has included washers, tiddley winks, OPA red points, bingo chips, a Sing Sing penny and a coin from the Konungur islands. The Sing Sing penny bears an inscription: "Do Good—Make Good."

"Off We Go" AVIATION NOTES

'FLYING FOOD'

Rapid strides are being made to bring the day of sky farm-to-market roads into the scope of everyday reality. From all indications it won't be too far in the future when the farmer will rely on air transport to fly an appreciable amount of his perishable produce to market.

Several of the nation's major airlines are conducting extensive experiments in connection with the speedy, efficient and economical handling of "flying food."

Guy M. Springer, a son of the fertile agricultural lands of Texas and the Midwest, who is general cargo manager for Capital Airlines, says: "We've been flying almost every type of farm cargo imaginable—but admittedly in small quantities. Recently we flew shipments of baby chicks from hatcheries in one large city to customers scattered throughout the South. This shipment proved it was economical to "sky-ship" chicks because of virtual elimination of the usual high mortality rate in moving baby chicks.

"Then, too," says Springer, "we've flown a live bull calf from Birmingham, Alabama, to Washington where it was presented to President Truman. We've operated an aerial milk route from Milwaukee, Wis., to Knoxville, Tenn. And we've hauled about as many mushrooms as anyone would care to eat."

Despite these varied ventures, sky produce hauling still is an experiment. Definitely on its way to becoming another factual accomplishment of the airline industry—but still just an experiment.

The "aerial milk route" is a case in point:

From Milwaukee cow to southern distributor in six to 12 hours was the achievement of the initial deliveries. From morning milkings in Wisconsin, 40 gallons of fresh milk were moved by truck to Billy Mitchell field, Milwaukee's airport. Loaded on a plane, the milk was flown to Knoxville, where it was delivered less than eight hours later.

The movement of the fresh milk was accomplished with no extraordinary preparations. The liquid was cooled to about 35 degrees at point of origin and it remained cool throughout the flight. The same method has been used successfully in movement of seafood.

About the cost of sky-shipping milk?

At present, the bill for moving 10-gallon cans of milk with jackets by air is approximately five times the cost of moving them in baggage cars by rail—but mass shipments and a more efficient and light means of holding the milk (perhaps by cardboard containers) could cut the cost down appreciably.

The "flying stockcar" that winged a three-month-old Aberdeen Angus bull from the Deep South to Washington definitely was the forerunner of things to come. Presented to President Truman as a gift from Alabama livestock producers interested in developing stock breeding in the South, "Alabam's" trip was more of a stunt than anything else —but it proved that stock could be transported by air; efficiently, safely and economically

Most farmers won't consider mushrooms as part of their produce—but it is "bread and butter" to one man near Pittsburgh. An extensive producer, he found that other means of transportation just were not fast enough to deliver his highly perishable cargo. So he turned to the airplane for help.

Meantime, airlines are continuing a program of developing cargo routes which will enable them to carry farm produce at rates in keeping with those of other transport methods currently used by agriculture.

The aura of California sometimes may fade, but it never dies. The subtle influence of El Dorado today is not as vague as the imagined golden treasures of long ago. California is the dream-illumined land of America where dreams come true.

The treasure of good living in a healthful land where there is opportunity beckons strongly today just as the discovery of gold at Sutter's sawmill in 1848 beckoned. There is a promise of new life, of a kinder providence, in the sight of citrus groves against a background of snowy mountains. There is somehow a rebirth of faith in oil wells spouting black gold, in ships going to the Orient through the Golden Gate, in airplanes and factories, and in desert lands made to bloom.

The yearning for El Dorado, now known as "California fever," has attacked many men of many nations. California is not one state, one climate, one altitude, one picture, or one people. It is the second largest state in the nation. It is scorched earth of parched desert and cool Lake Tahoe in the mountains. It is Mt. Whitney, 14,522 feet above sea level the highest peak in the United States—and Death Valley, 200 feet below sea level, both in the same state. It is bathing beauties and movie stars as well as cattle ranches and dairy farms. Fine beaches of sweeping ocean beaches, rugged and rocky mesas, subtropical valleys, frozen Sierra peaks—all are California.

To California may mean farming, mining, cattle raising, trapping, shipping, fruit growing, movie making, lumbering, manufacturing, fishing, hunting or a hundred other occupations. It may be the lonely life of herding sheep or the gay rounds of night clubs, society, yachts, race tracks. Or it may mean Hollywood, Palm Springs, Hollywood, big redwood trees or chaparral!

The average Californian, whether he is a native or an adopted son, will boast—with justification—that his state has the tallest trees, the highest mountains, the fastest-growing population and the most promising future of all the states. And the aggressive Californians really mean it.

State of Progress.

Water energy has built aqueducts through the mountains to make great agricultural areas out of deserts. Men have strung power lines from mighty dams to bring energy to cities and factories, dredged great areas from mud flats and flung the world's biggest bridges across a bay. They have developed cotton plantations below sea level and found hopes for oil and gas. Irrigation ditches have turned waste land into grain fields and pastures, citrus gardens and orchards. The shifting areas of a century ago are green and fertile, with comfortable homes where families dwell.

Gold was the first natural resource to be exploited in California, the discovery turning a Spanish pastoral country into a Yankee land. And the Yankees haven't stopped hunting for treasure—minerals, timber, gas, petroleum, silver, copper, lead, zinc, platinum, tungsten, magnesite, potash, stone, soda, cement and the soil itself. They harnessed the water power and put it to work. They turned to manufacturing and shipping, and dared to start new ventures such as the moving picture industry. California fired their imaginations, and gave them scenery and a wonderful climate as well.

NATIVE SON . . . Gov. Earl Warren of California is among the state's few native sons. He was born in Los Angeles in 1891. His law practice in San Francisco and Oakland was interrupted for service in World War I. Engaged in politics since 1919, he served as Alameda county district attorney for many years. In 1938 he was elected attorney general and in 1942 was elected governor, a post to which he was reelected in 1946.

No Gamble in Farming.

California has been unlike any other state in development and sequence of agriculture. The first industry was cattle, derived from herds driven from Mexico by Viceroy Galvez in 1769 for the Mission establishments. Crops were planted, but there was the annual gamble with drouth. Since 1885, California's farms have grown smaller in size, and irrigation has become widespread. Farming is no gamble now!

In 1873 two seedless orange trees from Brazil were sent to Riverside, and from these two has sprung the modern orange industry of California. The state produces limes, tangerines, citrons, figs, olives, avocados, pomegranates, dates and other fruit. California is the only state producing lemons in commercial quantities. Pears, apples, peaches, plums, prunes, cherries, grapes and small fruits and berries are grown widely in the state. The sensational achievements of California's great wizard, Luther Burbank, are well known.

California was the first state to grow sugar beets. It is a leader in truck and vegetable growing and produces enormous quantities of Persian and English walnuts, almonds, pecans and other nuts.

El Dorado is still California. It is a young state, eager to stretch its muscles and do bigger things. "How many Californians will there be in 1950?" is asked. Los Angeles county expects to have 3,371,000. The San Francisco Bay area expects to have 2,000,000. The state expects a total of 9,000,000 people to be fed, housed and employed in 1950. The answer? Factories and new industries!

Almost every California town has ample electric power and other utilities—and a vacant space to put a factory. Santa Clara, San Bernardino, Pomona, Riverside, Gridley, Oroville, Lodi and dozens of other California towns are looking for footloose factories that can be located where there are raw materials on the spot.

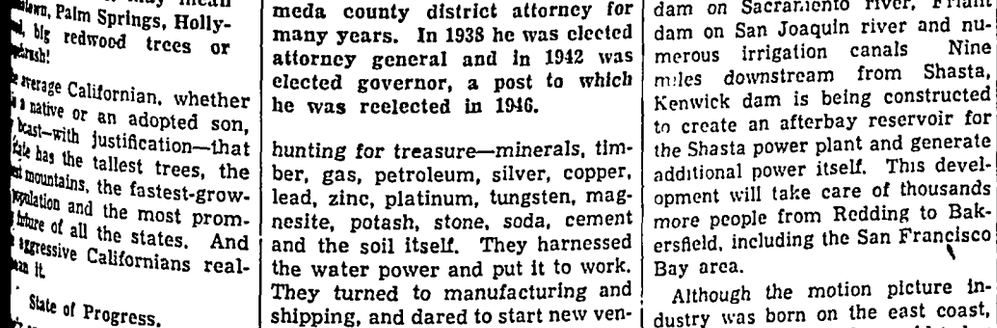
New Developments Noted.

And if factories won't do all the job, what about the new developments in the great Central valley? A new irrigation, flood control and power project there includes Shasta dam on Sacramento river, Friant dam on San Joaquin river and numerous irrigation canals. Nine miles downstream from Shasta, Kenwick dam is being constructed to create an afterbay reservoir for the Shasta power plant and generate additional power itself. This development will take care of thousands more people from Redding to Bakersfield, including the San Francisco Bay area.

Although the motion picture industry was born on the east coast, the movie capital of the world today revolves around Hollywood and its environs — Culver City, Universal City and Burbank. The atmosphere there is so clear that pictures can be taken on about 350 days of the year, while topography and flora afford varied "locations."

Perhaps California has been praised too lavishly, cursed too loudly, loved too greatly and hated beyond all reason. Not many misfits, or modern adventurers, will find California all it is advertised to be. But the strong, the sensible, the industrious, the substantial ones may find in California a greater selection of vocations, interests and opportunities than they have ever known before.

Remember, they do the impossible right along in California!



Caverts Lassen park into a veritable fairyland.

1 MINUTE FICTION — LILAC TREE

By Ruth Thompson

WNU Features.

VIC strode ahead into the depot with his suitcase and Mary's grey tweed bag. Last night this had seemed such a perfect idea. Vic and she were dancing when he suggested it.

"We can be married right away over the line—no waiting around. Don't fuss about a lot of clothes," he had said. "Just wait. I'll dress you like a doll."

The first time he said that, Mary felt tingly from head to toe. She hated her job in the noisy restaurant. Every day the trays seemed heavier and clumsier to manage. Vic's cheery flirting at the counter had been a welcome diversion.

Vic set the bags down beside a long empty bench and she watched him hurry to the ticket-window. How queer, she thought, just two years ago, when she left Pine Creek—it was April then, too—she had entered the city through this same station.

Then Mom had tucked a spray of purple lilac in the strap of the suitcase—"So you'll not be forgetting the lilac tree."

Mary smiled. She was remembering how she had called even the tiniest shrub a lilac tree. Someone came and sat close to her. Vic, it was, with the tickets in his hand. "What are you grinning about?" he asked. "Oh, nothing," she answered.

He let it go at that. He laid his arm across her shoulders, drew her close, while his pudgy fingers kept squeezing her arm. His lips almost touched hers.

Mary turned her face away, trying to ignore him. She noticed a woman who had entered the depot

Vic's cheery flirting at the counter had been a welcome diversion

The woman carried an armful of hauntingly sweet lilacs. She brushed past Mary. One spray fell near her.

"Vic," she said, touching his coat sleeve. "Pick up that lilac for me, won't you?"

"You're crazy. That weed! Why would you want that?" he asked. "Just you wait. I'll get you roses, a roomful of red roses."

MARY did not answer. She was seeing lilac trees, purple and white, all in bloom back home. She could almost smell their sweetness. Vic swore under his breath. Startled, Mary turned to him. A swarthy man, with hat pulled low, was approaching them. His face was vaguely familiar.

"Who is he, Vic?" Mary whispered, as she tried to recollect where or if she had met him. Vic paid no attention to her. Instead he spoke sharply to the man.

"What's the big idea, following me here? Didn't I tell everyone to lay low? I meant it. Mary and me are going away to—going away to be hitched."

Mary noticed uneasily how he hesitated as he spoke. The stranger's eyes shifted to Mary. She caught a glimpse of a scar high on one cheek, of shifty, dark eyes.

Something clicked. That picture in last night's paper. The column about another hold-up. Mary shivered—like when someone dropped a lump of snow down her back when she was a kid.

Then—"It's like this, boss—" He was whispering something in Vic's ear. "Boss." Startled, Mary tried to listen closer.

Vic swore again. His voice was harsh. "No!" he shouted.

Mary shivered. She looked around, hoping no one heard him.

"Listen, Baby," he said, turning to her. "I've got some business, some mighty important business to tend to. You wait here. I'll be back, pronto."

MARY watched them step into a large flashy car. At first she was frightened. Then there was no feeling in her body but a queer numbness. Only her brain stirred. It was clearing, like a mist rising after sun-rise.

Suddenly she grabbed up her grey tweed bag and almost ran to the ticket window. There were only two ahead of her. Breathlessly she asked the agent about the train to Pine Creek.

"Yes, Ma'am! In three minutes, better hurry," he said as he stamped her ticket.

Clutching the bit of paper in her fingers when he handed it to her, all of a sudden she felt as if she had been running through a dark, dense forest and had that minute stepped out into the warm clean sunlight.

The Specialist Versus The Old Family Doctor

Dr. Willard C. Rappleye, dean of the Columbia college of physicians, says the day of the general practioner is gone. What he means is that the era has passed when a sick man could get anybody to listen to him for $2.

—•—

The age of the specialist has been sweeping over us at high speed and today the doctor's bill at times brings more pain than the ailment. The old-time family doctor who was no one-line marvel but who could make you feel better without financial complications has about disappeared, as Dr. Rappleye says. And it saddens us.

—•—

The old-fashioned doctor was often wrong and frequently stumped but he was always deeply and personally interested. He lacked the specialist's brain, but his heart was in the right place. His greatest virtue was a sense of obligation to any sick call, regardless of money, time or distance.

—•—

He lacked plenty of stuff but he would answer a call in the middle of the night and get to a patient through mud up to his buttocks and snow up to his chin.

—•—

He would go wherever a man could carry a bag, a stethoscope and a smile.

—•—

Even when he wasn't very good as a doctor he cheered you up as a fellow man.

—•—

He would see you at the office most any time without preliminary palaverings or negotiations, and there was no pay-as-you-enter system, no portal to portal contacts with outlying secretaries and no impression that you were in luck to gain admittance.

—•—

The first words of the old time general practioner were "Lemme see your tongue." The specialist doesn't want to see it. It over-simplifies the matter and is strictly a two-dollar routine.

—•—

The old-fashioned "sawbones" knew you from the cradle to the grave, not from the cradle to the bank. When he felt your pulse you knew he was using his own watch.

—•—

And when he applied the stethoscope to your chest he never forgot himself and said "Very good. You are up an eighth since yesterday's closing."

—•—

Not that we are belittling the specialist. He is a necessity and often a blessing. He saves a lot of lives by substituting knowledge for guesswork. But we wish family doctors were still easy to find. They didn't make one so skeered of being sick.

—•—

Dr. Rappleye makes a fine proposal. Realizing the difficulties many sick people have in getting a specialist he suggests that the specialists in all communities get together in a spirit of group responsibility and coordination. What he means is that they pool their knowledge in a pinch so that the patient won't have to see more than one with the consequent financial entanglements. Second the motion!

* * *

CAN YOU REMEMBER

Away back when the salesman could say "I'm losing money on this?" with a straight face?

—•—

When whatever our high courts might lack, it was seldom horse sense?

—•—

..And back when people would stoop to pick up a lost nickel?

* * *

Don't Kill a Voter!

President Truman has appealed to all autoists to drive carefully in 1947. He clearly thinks the situation has reached a point where every voter counts.

—•—

What we would like to know about the President's appeal for safer driving is whether he would carry it to an extreme where a Democratic driver is expected to slow down for a Republican pedestrian.

* * *

Returning to Normal

To buy stocks now, only 75 per cent of the purchase money is required. This is about the same thing as winning the right to take off from a ski jump with the last 50 yards negotiated on notes.

* * *

A woman bank robber has been caught out West. She just entered banks, whipped out a small vial and threatened to blow everybody through the roof. They all assumed it was some of that cheap perfumery and gave in at once.

* * *

Having tossed a few rocks at Hollywood for pictures that have nothing but an evil influence on the kids, we herewith throw our hats in the air for "The Yearling," a tremendous example of what the movies are capable of.

SEWING CIRCLE PATTERNS

Junior Dress, Gay Button Trim

GLOWING buttons circling one shoulder and one hip highlight this enchanting junior dress. It has a gala spring air and will fit handsomely into your spring-through-summer wardrobe plans. Use a soft solid tone, flower-sprigged fabric, or all white.

Pattern No. 8080 is designed for sizes 11, 12, 13, 14, 16 and 18. Size 12, cap sleeve, 3⅛ yards of 35 or 39-inch.

The Spring Issue of FASHION contains a wealth of sewing information for every home sewer. Fashions by top-flight designers, easy to make styles, tips on closet problems, free pattern printed inside the book. Price 25 cents.

CENTRAL STATES ELECTRIC COMPANY

Attended Convention

Ernest Lewis and Byrnes Lemke of the Lewis Radio Shop last week attended a Shellane Distributor's Conference in Minneapolis.

This conference featured demonstrations by manufacturers of stoves, refrigerators and hot water heaters using bottled gas.

CLEANER MILK NEEDED AS DEMAND SLACKENS

With the purchaser beginning to replace the producer as boss of the dairy market, many Iowa farmers are now finding the dairies demanding cleaner milk, says C. Y Cannon, head of the Dairy Husbandry Department at Iowa State College.

During the war years when the demand for dairy products exceeded the supply, almost any quality of milk was absorbed into the trade. This situation is rapidly changing The change is reflected in falling prices for butter and fluid milk in many areas.

If this shift of control from producer to purchaser continues, believes Cannon, handlers of milk will become more and more discriminating as to the quality of milk they receive Government inspectors are already beginning to put some pressure on Iowa producers for cleaner milk.

Farmers must keep their premises clean, must have adequate facilities for cooling milk and must learn to protect all equipment and utensils from contamination of any sort. Even the small amount of dust that is whipped up by a breeze can cause appreciable amounts of sediment to show up in the milk where utensils are not adequately protected.

Cows should be brushed and kept thoroughly clean around the flanks, hind legs and udder Farmers should guard against feed flavors that get into milk, and should be sure that milking machines are cleaned regularly.

STIFF COMPETITION FOR TURKEY RAISERS IN '47

Turkey raisers face plenty of stiff competition this year, says Francis Kutish, Iowa State College farm economist. And the outlook is equally cloudy whether you raise early birds or late ones.

Kutish points out that storage holdings of turkeys hit a new high Jan. 1. The holdover from this heavy storage may effect prices of early turkeys, while the late birds will be competing against a larger supply of beef and pork.

The United States Department of Agriculture, however, has stepped in to help the turkey raiser. A program has been announced that will support prices for toms of the 1946 crop These support prices for the country as a whole will average 27.7 cents per pound which will mean about 25 cents here in Iowa. Only toms are covered by the program.

GAVE HOUSE

At Sheldon, children of Mr and Mrs. J. H. Archer have given the 12-room family home, long a landmark in Sheldon, to the Congregational Church. The church will sell the house, use the money to buy a pipe organ.

Black Market Now Is Ruled by Widow

Relict of Mob Leader Takes Over Tokyo Job.

TOKYO — A 30-year-old widow wearing western-style clothes—and an Oriental air of assurance to match—has moved in as queen of Tokyo's Black Market.

Yoshiko Matsuda claims the high office in the underworld by right of succession. An ex-member of her husband's mob rubbed him out and made her a widow.

The defunct husband, Giichi Matsuda, was the boss of Tokyo's underworld up until the time he announced that henceforth the Black Market would be "legitimate, ethical and businesslike."

Those who didn't want to live under his new ukase of honor among thieves could go back to honest toil, he said—in effect.

One, however, forthrightly decided that bumping off the king of the Black Market could be counted as an honest day's toil.

The killing caused great consternation in Matsuda's empire, whose main place of business is right out in front of Shimbashi railway station in downtown Tokyo.

Oriental aplomb was quickly restored, however, among Tokyo's estimated 5,000 Black Marketeers who had banded together as an association under Matsuda.

They voted to make Mrs. Matsuda the new ruler, and she accepted with alacrity

In an interview in the room where the last rites were performed for her husband, Mrs Matsuda—flanked by flowers and funeral wreaths—declared "I will try to do what my husband failed to do."

Eventually, she said, the Black Market could go legitimate, buying and selling at equitable prices.

Meanwhile, Mrs Matsuda added with confidence, she would handle both her "association" members and rival racketeers, even if she was the first female ruler Tokyo's tenderloin ever had.

Plane, With Jet Aid, Breaks Speed Mark

DAYTON — The army air force's XA-26F, powered by one jet and two conventional engines, streaked nonstop from Wright Field to St. Louis and back at 413 miles an hour—a new speed record for an airplane carrying a 1,000 kilogram (2,204 pound) payload over a 1,000 kilometer (621 mile) course. The time of the flight was 1 hour, 30 minutes and 51 seconds.

The record was made under National Aeronautical association rules, topping the previous record of 369 miles an hour set last May by Lt. Edward Grabowski of the Strategic Air Command over the same course with the same payload. The XA-26F was piloted by Lt. Col. T. P. Gerrity, 32, of Chicago

Tells How Nazis Drafted French Slave Laborers

NEURNBERG — Fritz Sauckel admitted to the international war crimes tribunal that he forced the Vichy government to impose the death penalty on any Frenchman who attempted to interfere with drafting slave labor for Germany.

The former Nazi labor chief said he made such "suggestions" and that Pierre Laval carried them through Sauckel said he meant them to be applied, though, only to "serious" cases.

French prosecutors also drew from Sauckel under cross-examination statements that he organized a special force of terrorists to recruit workers for transport to the Reich, and that he had ordered recalcitrant laborers placed in shackles.

The prosecution also charged that Hitler had threatened to take over the rule of France himself unless more slave labor was forthcoming.

Hug by Fiance Is Fatal To Girl, Coroner Finds

LONDON — Florence Quarrel's fiance hugged her so ardently she collapsed and died, a London coroner said recently.

During an inquest, Leslie Bowner told the coroner that he and the girl, who was 22, had been kissing when she collapsed in an arm chair, rolling her head and gasping for breath. She died a short time later. He had been engaged to her seven months.

A government pathologist testified that during an embrace Bowner exerted pressure on a vulnerable nerve center in his sweetheart's neck which caused immediate paralysis of the lung and heart functions. The coroner ruled that the death was accidental and freed Bowner of responsibility.

Wider Range Is Seen in Radar and Television

WASHINGTON. — Navy scientists predicted that the operating range of ultra-short-wave radio, radar and television some day will extend 2,000 miles. The predictions came from an abandoned air base in the Arizona desert, near Gila Bend, where navy scientists are studying the effect of weather changes on high-frequency radio transmission.

KLEMME SCHOOL NEWS

Kindergarten News

—Miss Seim, Teacher

Edna Heginger treated us with candy bars in honor of her birthday on Tuesday.

This week we made Washington hats and hatchets .

Some new poems we have learned are:"My Pets," "A Surprise" and" My Bunny."

First And Second Grade News

—Miss Halfwassen, Teacher

Mrs. Howard Baack and Harlan Lee were visitors in our room Thursday afternoon. Connie Jo Bisom came back to school this week. We were very happy to see her back.

Those in First Grade receiving 100 in Spelling for the week are:

Roslie Rosendahl
Marvin Katuin
Joan Christie
Gordon Johnson
Diana Masterson
Merle Marshall
George Smith
Marcella Nuehring
Jeanne Barz
Sandra Medin
Larry Ulrich
Vernadean Ter Hark
Joyce Lassahn
Harlan Block

Those in Second Grade receiving a 100 in Spelling for the week are:

Fonda Beier
Martin Brinkman
Ronald Trampel
Berleen Bridges
Barbara Thompson

Third And Fourth Grade News

—Miss Heinrich, Teacher.

Third Graders who received perfect Spelling lessons this week are:

Robert Arnold
Carol Bridges
Margaret Haefner
Ione Rosendahl

Fourth Graders who received perfect Spelling lesson are:

Graydon Barz
Carole Ann Montgomery
Donald Thiemann
Faye Janssen

Fifth And Sixth Grade News

—Mrs. H G. Voetberg, Teacher.

Ronald Karsjens treated us with frost sticks Friday afternoon. It was his birthday.

The following fifth graders had a perfect score in Spelling this week:

Richard Baack
Roger Terhufen
Tommy Heivelin
Daisy Schaefer
Janice Swanson
Margy Ter Hark

The following sixth graders had a perfect score in Spelling this week.

Galen Gruis
Billy Waddingham
Margaret Boland

In sixth grade geography we have been studying the Mediterranean countries and found that people use olive oil in place of butter. Sharon Bridges brought some olive oil to school and each of us tasted it. We decided we like butter for our bread.

Seventh and Eighth Grade News

—Clara Smith, Teacher

We have had a perfect attendence in our room this week.

In eighth Arithmetic we are working on various kinds of tax problems. Thus far our work has covered property taxes and how to find rates.

We have been studying the Constitution in our Civics work.

The seventh grade has been working on adjectives and adverbs in English. Most of us can distinguish them in sentences now.

From where I sit ... by Joe Marsh

Bert Solves the Labor Problem

You hear a lot about capital and labor nowadays, as if the two could never get together. But look at Bert Childers—who has 320 acres of producing land, a fair-sized herd of cattle, and two farm hands working for him.

If you called Bert a "capitalist" he wouldn't know what you meant, and neither would Spike and Sandy, the hired men. Bert works side by side with both of them; and in the evenings they sit around the fire together—sharing a friendly glass of beer or two.

If anybody has a beef—whether it's about wages or hours or equipment—they talk it over at those friendly evening sessions.

I don't say all labor problems are as simple as Bert's. But from where I sit, the basic principle applies to any farm or factory or business: A principle of confidence and mutual respect, of daily talks together in a friendly and congenial atmosphere.

Iowa Farmers Approve

Telephone Rate Increases

Realizing that the present rates were not high enough to provide good telephone service and needed improvements, the 200 members of a Farmers Cooperative Company in Northwest Iowa voluntarily released Central Iowa from a contract that would keep telephone rates the same on their lines until 1950.

It was easy for these fair-minded farmers to see that wage scales are higher all over America — average Central Iowa payrolls have been upped 150% since 1939 — because of higher wages and an increase in the number of persons employed. They know that material costs are higher . . . such things as telephone poles are up 85 percent; copper wire is up 41 percent, and switchboards 35 percent.

They recognized the fact that Central Iowa was faced with a real problem and voluntarily agreed to a 20% increase in their contract.

Central Iowa Telephone Company

10 PERCENT BOOST IN IOWA BEE COLONIES

Iowa beekeepers will attempt to increase their colonies by 10 percent during 1947 to aid in the production of legume seed, says Floyd Paddock, Iowa State College bee specialist.

Goals have been established based on legume goals Units need bees need to be located where they will be effective in increasing seed.

Demonstrations have established the value of bees as legume pollinators, Paddock points out. Past tests in Iowa in 1945 revealed that four strong colonies per acre in the field are required for maximum seed set of red clover to overcome competition from other plants, especially sweet-clover.

Iowa showed a loss of as much as 50 percent in seed obtained from seed set by pollination in bees. This was due to ineffective harvesting methods used to combat the weather

MIGHT BE WISE TO HOLD SOME CATTLE

Market Seems Favorable For Keeping And Feeding Up To Their Grade

Iowa farmers who have cattle that will grade good now but are the kind that can be brought up to average choice in 60 days might well consider holding them and feeding them up to their grade.

That's the suggestion of Rex Beresford, well known Iowa State College beef cattle specialist.

Beresford says heavy marketings so far this season probably have relieved a good deal of the pressure anticipated for later in the spring And considering the present cost of gains, it seems a fairly good gamble that the market will not break enough to offset the value of the increased gains and lift in grade

Have Been Cautious

So far, cattle feeders have been playing a "cautious hand," Beresford says They've preferred to take the bird in the hand instead of looking for two in the bush"

The bulk of the slaughter cattle marketings still is made up of steers and heifers which grade top medium to average good Common to average medium steers and yearlings are scarce The supply of choice beeves still is barely equal to specialty trade demand, while the percentage of choice to prime grades in the weekly slaughter steer runs at Chicago has been only 3 to 4 percent, compared with a normal 18 to 25 percent for this season.

Price Decline

In spite of this shortage of top-quality cattle, prices of those grades declined in January Beresford says grapevine reports attribute this to a falling off of night club and restaurant business. But, he says a more important factor probably was that total inspected slaughtered of cattle in January was heavy, 39 percent above January last year. As marketings go up, prices of the higher grades normally decline. The low point usually comes in late spring, and some further price decline in the top grades can be expected.

Early Tests Indicate Success of Inbreeding

Early results seem to indicate that skillfully controlled crossing of dairy breeds promises to dairymen much the same kind of benefits from increased production that hybrid corn has afforded to corn growers. Starting in 1939, dairy scientists set up a crossbreeding experiment to test the possibilities of cross breeding—not at random, but carefully planned to realize the full value of sires proved for high production. Results have been highly encouraging.

As this system would apply in a dairy herd of high-producing Holsteins, the first step would involve introduction of a proved sire of another breed, say a Jersey. Then the cross-bred heifers from these matings would be retained and when they came to breeding age would be mated with a proved sire of a third breed. In the Beltsville experiment, the third sire was of the Red Dane breed. Heifers of this three-way cross will next be mated to a Holstein and their daughters, in turn, to a Jersey sire.

From long experience with proved sires, dairy specialists have been able to estimate closely the increase in production to be expected in purebreds from proved sires In the first round of this crossbreeding experiment the results were in the order of the calculated increase—and 20 per cent more. The 20 per cent more spells an increase in dairy returns It also suggests strongly that the crossbred producers are improved by "hybrid vigor," as in the case of corn, but there has not yet been time and a large enough number of animals tested to make results conclusive.

Dress Industry Establishes System for Labor Disputes

The revolution in labor relations in the dress industry began in 1924 when the union and the dress association established closer co-operation after many strikes The union and the association decided to set up a permanent system of arbitration.

The settlement of every dispute would go through three steps First, the shop chairman would take it up with the foreman. Second, the union local would take it up with the dress association to which the company belonged. As a last step, the dispute would go to the final authority to which the company belonged—the impartial chairman

The establishment of the impartial chairman was a turning point. It meant that the union and the companies were willing to settle disputes by the decision of a third party who had been picked by them and who was financed by them. It meant the end of all strikes during the life of a contract. Today, the impartial chairman holds a unique position. In effect, he is a supreme court of one Before him pass as many as 3,000 cases a year. He must make decisions quickly, deciding each case on its own merits.

Frozen Asparagus

As is true of all frozen foods, the time between harvesting the asparagus and freezing it should be as short as possible Two hours from the garden to the freezer is a good rule to follow Only the young tender stalks should be used. Cut asparagus in lengths to fit the carton you are using. If there are tender short lengths left, they may be cut in one or two-inch lengths and packed in a separate carton, to be used for soup or seasoned with butter or bacon fat. Wash thoroughly and remove any large scales. Tie in bundles and stand upright in kettle with stem ends in boiling water to about one-half the length of the stalks. Cover kettle and precook three of four minutes Cool immediately in cold running water Pack in cartons Seal and freeze as soon as possible. The precooking or blanching stops the action of the enzymes in the vegetable and insures good flavor in the frozen food even though it may be kept stored for several months.

Preserve Specimens

The world's most populous area for insects—some 400,000 specimens at the last inventory—is a room containing only 250 square feet in the entomology department of Ward's Natural Science establishment, for more than 83 years suppliers of natural science specimens for schools, museums and collectors. Butterflies, moths, caterpillars, flies, beetles and thousands of other insect species are "filed" neatly in drawers and cases in this room, in readiness for the requests received daily from schools, research scientists and collectors for anything from a rare beetle measuring 7 inches long to complete collections of insect pests

Brazil Extensive

Brazil was discovered by the Portuguese 120 years before the Pilgrims landed on Plymouth Rock. It is larger than the United States, without Alaska, is three times larger than Argentina and 63 times the size of England. Summer is from December to February, and the winter months are June, July and August. The mouth of the Amazon river is 180 miles wide and ocean liners navigate 1,000 miles up the Amazon river. There is sufficient land in Brazil to accommodate nearly half of the world's population.

AROUND IOWA

JUST IN TIME

Recently Clark Cutler of Wayne County decided to go visit an aged relative in Washington township whom he had not seen for some time. He got there just in time, finding the relative, Albert Keller, 72, in a weak and exhausted condition due to illness, hunger and cold. He had lived for two weeks on dried prunes, being unable to summon aid.

NOVEL FINISH

When Mr. and Mrs. William Shirrah drove from their Montana home to visit her father, Chris Kylh, near Britt, they got stuck in the recent snow storm about a half mile from the Kylh home. Nothing daunted, Mr Kylh hitched up a team to a wooden gate, hauled his daughter and her family home in style.

NEARLY 105

At Waukee last week, death took Mrs. Sophia Leonard, oldest resident of Dallas County and one of the oldest women in the nation. She would have been 105 years old on May first. Almost 100 years of her life was spent in Iowa. She was a native of Ireland.

BROKE LEG

Larry Dale, 3, of Storm Lake was riding in the family car with his father recently and expressed a desire to get into the front seat. Before Mr. Dale could slacken speed, Larry turned the handle on the rear door Caught in the wind, the door swung wide and catapulted the surprised youngester right out of the car before he could let go, he received a double compound fracture of the leg. His only concern at the time was because he had lost his cap.

HOME FOR DOCTOR

Tired of being without a physician, business men of Luverne have joined forces to attract a doctor for the town First step in the campaign was to buy a home and offering it for use, both as a residence and an office, of any physician who will settle there. The deal was financed by selling shares of stock at $100 each.

BADGER GAME

Basketball players of Morehead caught a badger on the streets of Earling, Iowa, recently and took it home for a pet. When the badger showed signs of being tame, they called Earling to find out if any one had lost a badger. The badger is now back with his original owner, Paul Kenkel.

The average American today uses as much petroleum in 4 minutes as he did in a year in 1859.

Rabbit Season Closes March 1st

The season on cottontail and jack rabbits closes March 1st, after what has been described by conservation officers as a satisfactory season. Field officers in areas of heavy rabbit populations report a noticeable increase in 1947 in the number of hunters and in the number of rabbits taken Although the rabbit population during the past season was described as spotty, Commission employees consider rabbit hunting poor in only twelve of the ninety-nine counties.

Damage To Evergreens From Pine Leaf Scale

If you have evergreen trees, check them for pine leaf scale, advises Harold Gunderson, Iowa State College entomologist. The scale is appearing on pine, spruce and fir trees in Iowa and may severely damage any of the 3.

You can identify heavily infested trees because they look as if they had been sprayed with whitewash.

In controlling pine scale, use an oil spray which is manufactured specifically for evergreens. It should be applied at the rate recommended by the manufacturer and when the temperature is above 40 degrees.

PLOWING IS BEST FOR CORN GROUND

Holds Edge Over Three Other Methods Of Tillage In New Experiments

Plowing, as a method of preparing corn ground for planting, continues to hold the edge over tillage methods tested whether or not fertilizer is used.

That was pointed out this week by George Browning, soil conservationist at Iowa State College, on the basis of experimental results just compiled. The tests were conducted on five different soil types in western Iowa. They were Marshall, Monona, Ida, Marcus and Lamoure silt loams.

Average Yield

During the past 3 years, the average yield for the plow on these soils was 75.3 bushels per acre where no fertilizer was applied. Hard ground listing, under the same conditions, resulted in an average yield of 70.1 bushels. Subsurface tillage netted 69.4 bushels. And disking gave a yield of 69.2 bushels per acre

In similar tests where 167 pounds of 3-12-12 commercial fertilizer were applied per acre, yields for the 3-year period averaged 77.9 bushels per acre for plowing, 75.4 bushels for hard ground listing, 72.8 bushels for subsurface tillage and 72 bushels for disking.

First-Year Tests

Browning said first-year tests were conducted on the conventional plow versus the commercial TNT plow, which stirs the soil below normal plow depth. The results showed no significant differences in yield or the stand on Marshall silt loam, the only soil on which tests were made.

Three-year results also were announced on the effect of various tillage methods on soybean yields. Plowing resulted in 23.5 bushels per acre; hard ground listing, 23.3 bushels; subsurface tilling, 21.9 bushels; subsurface tilling and disking, 22.2 bushels; and disking, 21.9 bushels.

MOVED PAPERS

At West Des Moines, E. Westphal stacked some papers and cartons under his electric meter, planned to move them later. A short circuit set fire to the pile of papers while the family was away, burned the joists and the flooring of his new brick home. The fire department helped him move the papers and cartons.

The Liberty Busy Bees Met

The Liberty Busy Bees 4-H club met at the home of Marjorie Bredlow, Saturday, Feb. 22. Seven members answered roll call by telling the color scheme of their room.

A talk "Choosing Wallpaper" was given by Marjorie Bredlow.

Picture studies were given by Vivian Stromer and Sheryl Bredlow on the pictures "Winter in Russia" and "Sunflowers."

Our leader gave us some clever suggestions for trimming pillow covers, scarfs, and curtains with bias tape and ric rac. Vivian Stromer had charge of entertainment after which a lunch was served.

WOI To Air State Basketball Tournament In March

Radio Station WOI will do another of its public service broadcasts in airing the 1947 Iowa high school boys state basketball tournament at Iowa City next month.

Dale Williams, sports announcer for broadcasting service of Iowa State College, will describe all 16 games in the final meet March 19-22. His program, aside from play-by-play description of the games, will include an analysis of each game and interviews with coaches, officials and writers from over the state.

The first commercial glue plant was founded in Holland in 1690.

Trimming Costs and Taxes Difficult, Congress Finds

A POLL of editors of Home Town newspapers throughout the country, a tremendous force in the nation's economic fabric and who reflect the thinking of some 70 million rural and small town citizens, shows the first thing they want this congress to do is to pass legislation which will stop crippling strikes

The second thing these editors want is slashing of the cost of government and balancing of the budget. As a matter of fact, the budget is in balance right now. And it is certain that the cost of government will be cut some. Senator George of Georgia, who probably knows more about government finances than any man in either house of congress, says the President's budget of 37½ billion dollars can possibly be shaved by 2 billion dollars. Senator Taft says 5 billion, maybe. Congressman Taber, New York, says 6½ billion, sure. And he says the government can cut off one million employees and not miss them. Perhaps that's true.

There's no question about the need of a reduction in governmental costs, since the government currently is taking too large a proportion of the taxpayer's income. But in the opinion of experts there is no quick, easy way to reduce government expenditures by any across-the-board method, such as a horizontal 20 or 25 per cent cut, as many are suggesting. A look down the budget statement indicates that a huge volume of government outlays are the consequences of legislative policies approved by congress, and however unwise some of these policies may be, they have loaded the government down with financial obligations which must be honored. After 15 years of depression and war the scope of government has so broadened that the public has come more and more to regard the government as a protector of its economic interests.

What Can We Do Without?

So a common sense approach to the problem, it seems to this reporter, would be not a hit or miss slash of various funds, but a careful scrutiny of the entire government setup to learn what government services the public can and will do without. For certainly any slash in government funds will mean that some service now performed in behalf of the people must go by the boards.

Appropriations for the Export-Import bank, for relief and administrative outlays in occupied countries, for the United Nations, for the International Monetary fund, for FAO and other such items, are commitments which this government has made, with the approval of congress, and which we are honorbound to keep. These appropriations total some four or five billions of dollars. Shall we slash these?

There is 330 million dollars for the Commodity Credit corporation, allocated to support farm prices for the next two years as the government has pledged itself to do. Shall we cut it 25 per cent?

About cutting personnel . . . the civil service commission says there are now 2,286,600 on the federal payroll. Only about 235,000 of these are in Washington. Of the total, post office has 491,000; Veterans' administration, 176,000; war department, 600,000, and navy, about 400,000. So war, navy, post office and VA employ 70 per cent of the total federal personnel, the other 30 per cent being scattered throughout the scores of other federal agencies. War agencies, except War Assets administration, which are going out of business soon will lop off about 50,000 employees but that's far from a million. General Eisenhower and the secretaries of war and navy say they are operating now on a skeleton force, below security. Shall we cut the post office and Veterans' administration service?

Savings Would Be Offset

Although this congress is economy minded, these same "economy minded" congressmen have introduced new spending measures which if enacted into law would more than offset the 6½ billion dollars which Congressman Taber says can be cut from the budget.

Take aid to states for teachers' salaries. Several bills are in, calling for annual appropriations of 150 million dollars to 200 million dollars. This is more than the entire annual cost of the Internal Revenue bureau and its 46,000 employees, or the administrative cost of Veterans' administration.

So to slash costs and bring the budget into balance, to include debt reduction at a lower level than now, will require some radical revision of legislative rather than administrative policy. What are you willing to do without?

Walter Winchell

(WNU Service)

The Broadway Scene:

White Housers hear Mr. Big has an offer from a famed mail order firm to serve as chairman if he doesn't make it in '48. . . . The Elliott Roosevelts are miffed with the mag which published their Stalin interview. Allege several Q and A's were omitted. . . They say Fred Astaire's sister, Adele (Lady Cavendish), will wed a Chicago businessman. . . Earl (Madman) Muntz has purchased a fleet of 600 cabs for shipment to Tokyo . . . They say King George of Greece hasn't a drop of Greek blood in him. . . Site for the new Hotel Astor will be 53rd and Park . . . Eisenhower boosters shelved the idea when they learned that Willkie buttons cost $90,000. . . . Freda Hempel, the Met star, is going into the cosmetic biz, while famed cosmeticians are going out of their alleged minds.

"Governor" Herman Talmadge and his first wife were guests of the Japanese government (on an all-expenses paid honeymoon) before the Pearl Harbor attack. The Japs paid for it in exchange for pro-Jap writings, ads, etc., which his father printed in his Georgia paper, "The Statesman." It all came out in Georgia at the time, and on other occasions—and was never denied.

The Stage Door: MGM is planning to sue Lana Turner for "damages" as the result of her hopping to Mexico without permish. They're not optimistic about collecting but they hope it will discourage Lana and others . Ed (Archie) Gardner, the radio star, is trying to persuade Ethel Merman to be his summer replacement on "Duffy's Tavern." He also has a radio format for her, if she will only listen. . . . Among other standees at the revival of "Sweethearts" was composer Victor Herbert's daughter, Ella H. Bartlett. Not a seat left. . . . To persuade Dorothy Ross to star at the new Club Bagatelle, the owners built her an apartment there. . . . The day after Grace Moore was killed, local phonograph shops were besieged for her recordings.

Former Secretary of State Byrnes was flying to Cleveland to appear on a program sponsored by Henry Luce's newsmag. . . . A reporter on the plane asked Byrnes how he felt about George S. Messersmith, U. S. ambass to the Argentine. . . . Byrnes said he didn't care for him; in fact, he didn't like anyone who wore a red carnation in his lapel. One of his pet aversions, added Byrnes. . . . Then the plane landed and the first to greet the party was publisher Henry Luce, their host. . . . With a red carnation in his button-hole!!!

The Press Box: Just when everybody was getting indignant about the elections in Poland, Georgia's lower house passed the white primary bill disenfranchising a million Americans. Oh, brother Will Pravda have a holiday with that one! . . . The N Y. Newspaper guild's replacement director, Carmen Henry, warned out of town scribes to shun New York for jobs. Because staffs are bulging with returned servicemen and their wartime replacements. "Don't," she cautions, "get stranded in the Big Burg" . . . Tip to feature editors See if you can get that beribboned air corps vet to gab. He peddles hot chestnuts from a little cart at 47th and Broadway.

Eavesdropped at the Park Avenue: "I'm warning you, at the rate you're going, you'll die broke!" . . . "That's not what's worrying me," sighed Wingy Grober, "I just don't wanna live broke!"

The Airistocrats: Dust off a halo for "The Greatest Story Ever Told" via ABC. The program came up with a revolutionary commercial style: The sponsor is merely identified at the start and conclusion of the show—there are no tiresome plugs. . . . Van Johnson should save his singing for the bathtub. His dueting with Dinah Shore was as musical as gears being stripped. . . . Henry Morgan's twitting of the digest mags was an elegant spoofformance. . . Peter Lind Hayes' chuckler: A movie star celebrated her silver wedding—she just married her 25th husband. . . . Jane Russell's thrushing on Kay Kyser's stanza proved that she can entertain with a song as well as a sweater.

ER 'FIRST'

shington's Early Ventures ed Key to Farm Progress

WNU Features.

embered as "First in War, First in Peace, First in the s of His Countrymen," George Washington could lay to still another honor. He also was "First in Farming." America hails the 215th anniversary of his birth, agri- e acknowledges its debt to him. For Washington made utions to farming's progress that benefit millions of today.

"Father of His Country" was a keen student of farm- pioneered in soil conserva- championed crop rotation al- fore anyone else in the col- ized it. He was one of the first on experiments with clover building crop. He introduced lay to this country and was the first Americans to grow

Revives Old Soil.

as plenty to be done at ton. One of Washington's ces was the rundown con- the soil, due to the poor followed by overseers dur- sence.

gton began to experiment er and other grasses as a rvation measure. He was to do this by Noah Web- ster, newspaper writer, editor and compiler of a dictionary

In his experiments Washington tried every kind of legume known to Virginia farmers, and imported many other kinds of seed from England. Thus he introduced timothy to his countrymen. He found that clover and peas had a soil enriching power.

In an English journal he read about a new legume—alfalfa or Lucerne—which had been brought from Switzerland. He found that alfalfa, too, could enrich the soil.

Imports New Strains.

Washington found some time to keep an eye on his farming operations at Mount Vernon even during his terms as President from 1789 to 1797. He had extensive experiments conducted in grain and livestock breeding. He imported new strains of wheat from South Africa and Siberia. He sent to England for sheep and, by crossing with Virginia breeds, increased the wool clip by two pounds per sheep. He bred fine draft horses and had the best trotting, riding and field animals in Virginia.

Crop rotation occupied a good deal of his attention. One rotation he noted "favors the land very much; inasmuch as there are but three corn crops (i.e. grain crops) taken in seven years from any field, and the first of the wheat crop which is to succeed it; and which by being laid to clover and grass and continued therein three years will afford much mowing and grassing, besides being a restoration to the soil."

Washington was one of the first Americans to use farm machinery. He was especially alert for better methods of threshing grain than the age-old practice of treading and flailing. In 1797, two years before his death, he built a thresher on plans evolved by William Booker, who came to Mount Vernon and directed construction.

Thresher Fails.

The machine failed to live up to Washington's hopes. At first it threshed about 50 bushels a day, then fell to fewer than 25 and finally broke down completely.

The disappointing experience with the threshing machine did not deter Washington from trying other implements. He furnished his farms with every kind of improved tool that might do better work. Among these were a wheat drill, a corn drill, a machine for gathering clover seed and one for raking up wheat.

"As a farmer, Washington was generations ahead of his time," declares Zenas H. Beers, executive secretary of Middle West Soil Improvement committee. "His progress toward scientific farming set an example that any modern farmer might follow with profit. Washington's success in devising good soil management methods mark him as one of America's first conservationists."

During his Presidency, Washington was eager to improve the lot of agriculture. In his last message to congress he recommended establishment of a "board of agriculture to collect and diffuse information, and by premium and small pecuniary aids, to encourage and assist a spirit of discovery and improvement." That recommendation foreshadowed establishment of the U. S. department of agriculture three-quarters of a century later.

Along Texas-Mexico Line Urged

which would stretch for also would be useful ootleggers, Cavness points

mmendation came as an of an incident in which two Mexican bootleggers brought 150 quarts of liquor across the Rio Grande into Texas to sell.

Tick infestation spread over 765,810 acres of southwest Texas ranchland in four counties, resulting in quarantine for 24,950 head of livestock.

The official state report recommended an appropriation to meet such emergencies until the fence is erected.

Sportlight

by GRANTLAND RICE

BASEBALL has grown restless. Especially in the spring. This time they will be playing and training as far apart as Hawaii and Cuba. Teams will be shifted all over the spring map.

The Giants move from Miami to Phoenix and travel as far westward as Hawaii

Grantland Rice

The Cleveland Indians shift from Clearwater, Fla., to Tucson, Ariz. The Yankees tour Cuba and sections of Central and South America before landing at St Petersburg, Fla The Dodgers leave Florida for Cuba and other Latin turf The new slogan ought to be—"Join a ball club and see most of the world."

The Cardinals are firmly set at St. Petersburg, the Red Sox at Sarasota and the Tigers at Lake Wales. The Yankees hit St. Petersburg around March 12. The Reds report back to Tampa. Arizona gets its first big league training test with the Giants at Phoenix and the Indians at Tucson, where a warm, dry sun ought to help.

But we like the training idea of the Cardinals, Red Sox and Tigers best. They go directly to one spot, from which point they have only a short traveling range to meet high grade competition.

Smart ball players begin working out their legs before spring training starts through golf or hunting. Ball players could use better legs Watch a pitcher after he hits a triple He winds up at third, puffing like a volcano and it often takes him an extra inning or two to retain his pitching form.

The Cardinal System

The St. Louis Cardinals have the best idea of the qualities that go into the making of a good ball player Their farm system was arranged on the general idea of giving experience to young players who could run and throw For the past 20 years the average Cardinal could run and he had a good arm. Hard hitters or big hitters who were slow, rarely stayed around. Ball players with bad arms were not wanted, no matter how good they might look otherwise.

The arms of Terry Moore and Country Slaughter in the past have been as deadly as twin rifles—and both were extremely fast on their feet. When a Cardinal starts from first to third he usually makes it. And when some rival starts from first to third he is quite often cut down short of the bag.

Branch Rickey and Sam Breadon were the pair who worked out this selective plan and now Rickey is using it for his Dodgers. Experience is a big factor but a brace of young legs and a young throwing arm are also useful.

Dodgers Are Younger

Eddie Dyer and Durocher are both banking on speed and good arms this season The Dodgers have this advantage—they are younger More than one Cardinal star is now deep in the veteran class and speed doesn't increase with the years—not even with a Terry Moore and an Enos Slaughter.

If Robinson makes good at third, or wherever he is used, his addition will increase Dodger speed.

Teams in the National league hoping to crowd out either Brooklyn or St. Louis will need more speed than they have shown so far A large number of ball players can get in better condition and stay in better condition than many do. For any daily competition that runs through 154 games demands the best sort of physical condition. This can be obtained much better by sticking as long as possible to one spot, rather than through extensive traveling around

* * *

College and Pro War

There is now an underground, undeclared war between the colleges and pro football which may break into the open any day or any week.

The colleges are charging that the pro leagues are taking away star football players, who have from one to two years left for college football—a direct violation of promises not to take any man who is eligible for the college game.

The pro leagues are charging that college football coaches and college athletic associations are holding players in college, or trying to hold them, long after their classes have graduated.

This argument or feud of course dates back to the war. I happen to know that when the war came along, many southern coaches were something more than mildly upset over the fact that Army and Navy had taken away their best players.

Unless he actually wants to finish a college education above everything else, I can see no reason why a man of 25 or 26, especially those with families, should stay on in college to play football. Under these circumstances. I would say that he is entitled to leave college and get the best job available.

Improved Uniform International SUNDAY SCHOOL

LESSON

By HAROLD L. LUNDQUIST, D. D. Of The Moody Bible Institute of Chicago. Released by Western Newspaper Union.

LESSON FOR MARCH 2

Lesson subjects and Scripture texts selected and copyrighted by International Council of Religious Education; used by permission.

JESUS SUMS UP HIS CLAIMS

LESSON TEXT—John 12 12-16, 20-32. MEMORY SELECTION—And I, if I be lifted up from the earth, will draw all men unto me.—John 12 32.

The last week of our Lord's ministry on earth comes before us today as we consider two events—one of which occurred on Sunday and the other on Tuesday. One sees here the attitude of men toward Christ, of God toward men, of the Father toward the Son, and the majestic drawing power of the Saviour.

I. Believing Men Honor Christ (vv. 12-16).

God says, "Him that offereth praise glorifieth me" (Ps. 50:23), and the believer recognizes that "praise is comely for the upright" (Ps. 33:1). Jesus is entirely worthy of the praise of every heart and voice.

Presenting himself as their Messiah, Jesus received the enthusiastic acclaim of his disciples and friends, who were probably joined by others drawn by the excitement.

The Pharisees did not join in (see Luke 19.39, 40), nor did the city, not even knowing who he was (Matt. 21:10, 11). So it is today; some love and praise him, some hate him, others just ignore him. Of which class are you?

He gave Jerusalem and the nation a final opportunity to receive him. It was not yet too late, but it was their last chance. Such a time comes in the life of every one of us. They rejected him. Do we?

But even though some did reject, let us not forget that there were those who shouted, "Hosanna"; who cast their garments down before him and waved palms of victory and joy. Thank God for their holy enthusiasm. Pray God that we may have a little more of it.

II. God Honors Men Who Serve Christ (vv. 20-26).

It is good to note that whatever prompted the coming of the Greeks, they wanted to see Jesus.

A man has progressed far on the road to blessing when he makes known his desire to see Jesus. Coming to him means coming to the One who has the words of eternal life.

Note that the disciples were wise enough to bring the men to Jesus. The true function of every Christian worker is to bring men to him.

The reply of our Lord to the Greeks, and to the disciples who brought them to him, seems a bit singular at first glance. Did he not wish to receive them? They had probably come to see the great religious leader, the King of the Jews—why did he talk about death?

The words of our Lord are clear. Men do not need an example, a leader, a teacher; they need a Saviour. It is as a sacrifice for sin that Christ will draw all men unto himself.

III. The Father Glorifies the Son (vv. 27-30).

The awful blackness of the burden of the world's sins which he was to bear pressed down upon our Lord in an agony of soul beyond our ability to understand. But even his troubled soul did not turn from the hour of death for us.

The question of verse 27 is essentially this: "Should I ask the Father to deliver me from this hour? No, I came to be man's Saviour." He did not look away, nor wish to turn back. He knew why he had come, and he was faithful even to death (Phil. 2 8; Heb. 2.9).

He had only one desire—that the name of God the Father should be glorified (v. 28). Do we who bear his holy name follow in his footsteps? Do we have an eye single to his glory—or do we seek our own?

Then came the voice from heaven; the Father had glorified his own name in the Son, and would do it again—yes, again and again.

Jesus knew the Father would do it, he did not need any assurance (v. 30), but for the sake of the people the witness was given. Notice the reaction of the listeners—some recognized that a heavenly message had been given; others had only heard some thunder.

May God give us grace to hear his voice when he speaks, and not consider it merely the rolling of some deep voice of thunder!

IV. The Son Draws All Men to Himself (vv. 31, 32).

Because Christ was lifted up on the cross and died, there is victory over sin and death, declared by his resurrection and ascension to the Father.

Satan is still at liberty in the world, but he is defeated (John 16:11). Death still comes, but the sting is gone for the Christian (I Cor. 15:55-57). The world is still fighting our Lord, but he is drawing men to himself here and there throughout the world.

One day he will come as King of kings and Lord of lords, to declare in its finality the victory which has already been won.

We should be reminded anew that it is Christ the Saviour who will draw men if we will only exalt him in our preaching and teaching. Let us do it!

Easy and Inexpensive to Make Hooked, Woven, Braided or Crocheted Rugs

HOOKED rugs are among the simplest to make yourself. Inexpensive, too! The foundation may be burlap or discarded linen; material for hooking can be salvaged from old clothes and blankets.

* * *

Our 40-page booklet gives instructions for making hooked, woven, braided, crocheted and other types of rugs. Send 25 cents (coin) for "New Ideas for Handmade Rugs" to Weekly Newspaper Service, 243 W. 17th St., New York 11, N. Y. Print name, address, booklet title and No. 94.

Rocket Brakes

The jet power of rockets, which has so far been employed almost wholly as a propulsive force, is expected to be used soon in the opposite way—to brake the speed of planes and trains in cases of emergency, says Collier's.

Experts estimate that a train which travels 1,500 feet after the air brakes are applied could be brought to a stop in 375 feet, or one fourth the distance, by the additional braking force of forward-firing rockets installed on the locomotive.

Beware Coughs from common colds That Hang On

Creomulsion relieves promptly because it goes right to the seat of the trouble to help loosen and expel germ laden phlegm, and aid nature to soothe and heal raw, tender, inflamed bronchial mucous membranes. Tell your druggist to sell you a bottle of Creomulsion with the understanding you must like the way it quickly allays the cough or you are to have your money back.

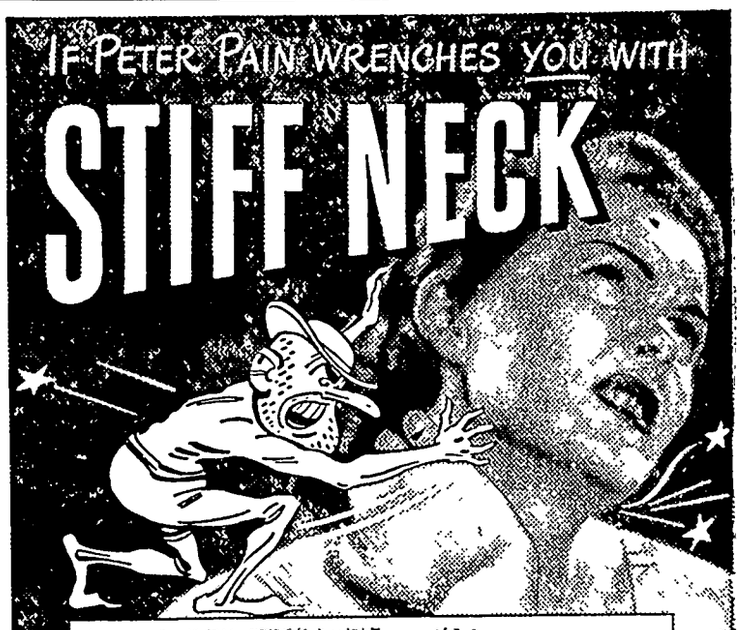
CREOMULSION
for Coughs, Chest Colds, Bronchitis

GIRLS! WOMEN! try this if you're NERVOUS
On 'CERTAIN DAYS' Of Month—

Do female functional monthly disturbances make *you* feel nervous, irritable, so weak and tired out—at such times? Then *do* try Lydia E. Pinkham's Vegetable Compound to relieve such symptoms. It's *famous* for this! Taken regularly — Pinkham's Compound helps build up resistance against such distress. Also a great stomachic tonic!

LYDIA E. PINKHAM'S VEGETABLE COMPOUND

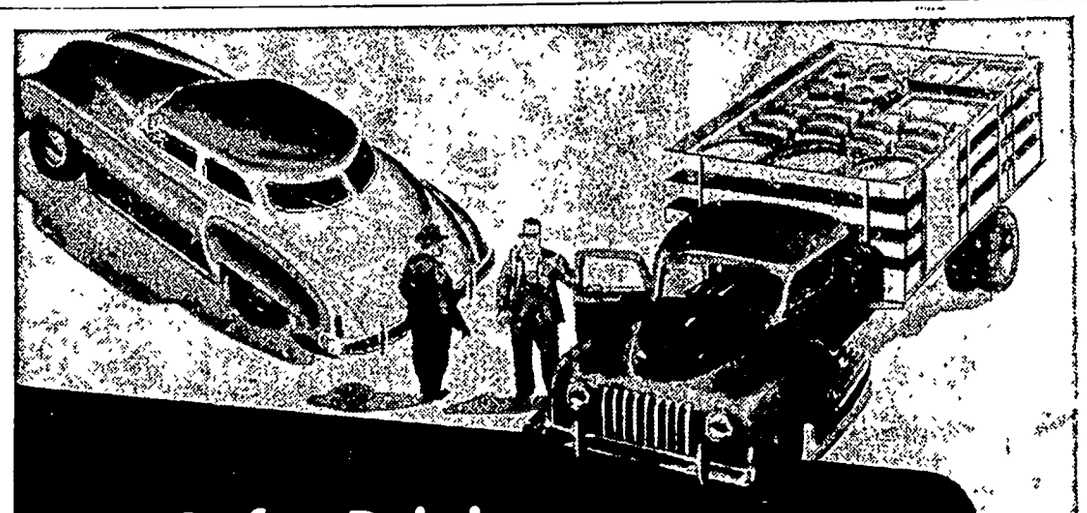
IF PETER PAIN WRENCHES YOU WITH **STIFF NECK**



● Rub in Ben-Gay for welcome, fast relief from stiff-neck pain. Gentle, soothing Ben-Gay contains up to 2½ times more of those famous pain-relieving agents known to all doctors—methyl salicylate and menthol—than five other widely offered rub-ins. Insist on *genuine* Ben-Gay, the original Baume Analgésique. It acts fast where you hurt.

Also for Pain due to RHEUMATISM, MUSCLE ACHE, and COLDS. Ask for Mild Ben-Gay for Children.

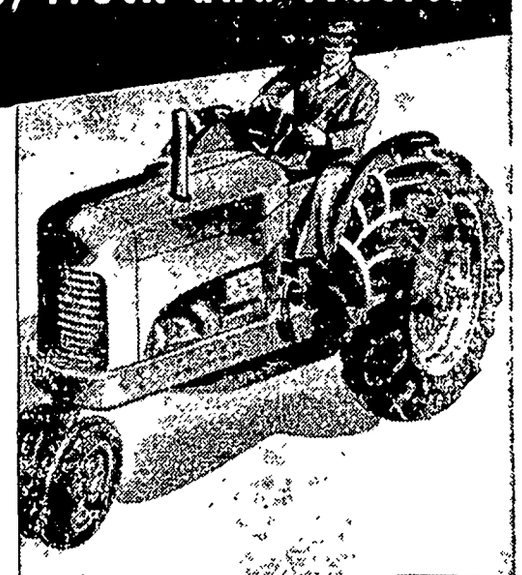
QUICK... RUB IN **Ben-Gay**



FOR *Safer Driving... Longer Mileage... Better Traction* USE

Firestone TIRES

On Your Automobile, Truck and Tractor



FIRESTONE tires . . . for your automobile . . . for your truck . . . for your tractor . . . and for your every other farm use . . . are specially designed by engineers familiar with your needs to give you safer driving, longer mileage and better traction.

Firestone tires are built by the finest craftsmen using modern equipment and the best materials. They are the result of Firestone's never-ending research program which has as its goal to build the best today . . . still better tomorrow. The new Firestone Champion Ground Grip for your tractor . . . the new Firestone De Luxe Champion for your automobile . . . and the new Firestone Rayon Transport for your truck . . . are outstanding examples of advanced tire design.

You can save time . . . and money, too . . . if you insist that it's a "Firestone" every time you buy a tire for your farm. They're safer. They pull better. And they last longer.

Listen to the Voice of Firestone every Monday evening over NBC

The Army Ground Forces soldier is famed for his ability to carry out any assignment with resourcefulness and initiative—the qualities that make leaders in civilian life as well as the Army.

The Ground Forces not only teach you leadership—they equip you with fine job training to go with it. In peacetime, the Army is a gigantic school-going organization—with training available *in many skills and trades.* Courses offered range all the way from automotive mechanics to welding—designed to help you find the work you like and do best.

Increased Army pay scales are now in effect, and you receive 20% additional pay for overseas service.

Thousands of outstanding young men, able to meet the new higher standards required, are enlisting in the Regular Army. They are beginning interesting, useful careers by learning leadership along with special skills. Visit your nearest U. S. Army Recruiting Station for details.

HIGHLIGHTS OF REGULAR ARMY ENLISTMENT

1. Choice of any branch of service which still has quotas to be filled, and of certain overseas theaters which still have openings, on 3-year enlistments.
2. Enlistment age from 18 to 34 years inclusive (17 with parents' consent) except for men now in Army, who may reenlist at any age, and former service men depending on length of service.
3. Educational benefits under GI Bill of Rights for men who enlist before official termination of war and remain in service 90 days or more.
4. Family allowances for dependents of men enlisting or reenlisting continue until 6 months after official termination of war.
5. Enlistments for 1½, 2 or 3 years. (1-year enlistments permitted for men now in the Army with 6 or more months of service.)
6. Option to retire at half pay for the rest of your life after 20 years' service—increasing to three-quarters pay after 30 years of service. All previous honorable active federal military service counts toward retirement.

NEW, HIGHER PAY FOR ARMY MEN
In Addition to Food, Lodging, Clothes and Medical Care

In Addition to Column One at the Right: 20% Increase for Service Overseas. 50% Increase, up to $50 Maximum Per Month, if Member of Flying or Glider Crews. $50 Per Month for Parachutists (Not in Flying-pay Status) while Engaged upon Parachute Duty. 5% Increase in Pay for Each 3 Years of Service.

	Starting Base Pay Per Month	MONTHLY RETIREMENT INCOME AFTER: 20 Years' Service	30 Years' Service
Master Sergeant or First Sergeant	$165.00	$107.25	$185.63
Technical Sergeant	135.00	87.75	151.88

OFFICIAL COUNTY PAPER

THE KLEMME TIMES

Volume 52. KLEMME, IOWA, MARCH 5, 1947 Number 16.

Many Farmers Moved To New Locations March 1

MOVING NOT AS HEAVY AS IN SOME OF THE PAST YEARS

Only A Few Farmers Are Leaving Klemme Trade Territory

Each year it has been the custom of the Times to gather a list of moving changes in the trade territory and to acquaint our readers with new folks and to let them know where the farmers are moving.

It is all a sort of "ring around the rosie" and it does not make much difference as to where we start the story.

Elvira Lass, who has been employed at the General Mills cafe at Belmond is starting out farming this year and he and family moved to a farm southeast of Klemme, where the Harm Klein family resided The Kaisers moved to a farm near Garner

Mr. and Mrs. Herman Back have retired from the farm and moved to the former Merkel home in Klemme Their son, Richard and family have moved to the Back farm east of Klemme and are now farmers.

Erwin Rasmus, Jr and family left north of Garner moved to the Julius Priebe farm at the northwest edge of Klemme where Gerald Koerner and his family had lived. The Koerners moved to the Tanner farm west of Klemme.

The Jensens Christians and family moved to a farm near Northwood. They have been on the same place the past year

Harold Christians and family, who farmed the Paul Havlik farm northeast of Klemme moved to the John Christians farm.

Leland Kropp of near Garner, moved to the Havlik farm.

Albert Tibbet and family are starting farming near Clear Lake.

Melvin Groesbeck is starting farming and will be on the farm vacated by Dover Kramer. The Kramers purchased a farm south of Ventura where they now reside.

Mr. and Mrs. Lowell Mau, who had farmed the past year with Lowell's father south of Clear Lake, will start farming the Pringnitz farm southwest of Klemme vacated by Fred Kotenbrink, who has retired from farming and is now living in Garner.

Mr. and Mrs. Art Knoke removed from their farm southwest of Klemme and moved to a house recently purchased in Klemme. Their son-in-law and daughter, Mr. and Mrs. Donald Mourlam of Osmond are now living on the Knoke farm.

Glenn Larson and family, who rented the Melvin Schlei farm west of Klemme, moved to the Ben Larson farm west of Klemme. Mr and Mrs. Larson, however, will continue to reside in the new home they built a few years ago and Jim and family will occupy one of the other houses on the Larson farm.

Mr. and Mrs. Franklin Buseman are starting to farm for themselves on the Schlei farm.

Mr. and Mrs. Werner Lewis and family, who have lived in one of the tenant houses on the Mrs. C. A. Arnold farm, have moved to the Bellamy farm east of Klemme Mr. Lewis will work for Mr. Bellamy.

Mr. and Mrs. James Fredin, who lived in a tenant house on the Arnold's farm, moved to Mr. Dodge, as Mr. Fredin was unable to do farm work because of his health. Mr. and Mrs. Harold Lassahn have moved to Mrs. Arnold farm and Mr. Lassahn will work for Mrs. Arnold.

Mr. and Mrs. Paul Stromer moved to Rapid City, South Dakota, and they rented their farm west of Klemme to Mr. and Mrs. Forest Cutshall who are now living on the stromer farm. Mr Stromer has a ranch near Rapid City which he will look after.

Joe Mchus and family, who lived on the Klaus Kielman farm, better known as the August Lau farm in Liberty Township, have moved near Thornton Mr and Mrs Francis Buseman have moved to that farm

Paul Whitesell and family who lived on a farm 2½ miles north of Klemme the past year, moved to a place near Armstrong. Mike Kurtz and family who were on the Dave Schwichtenberg farm southwest of Klemme moved to the farm vacated by the Whitesells. The Schwichtenberg sons will farm the home place

Arthur Conners who worked for Mitchell Bock have moved to the Harold Johnson farm about a mile and a quarter east of Klemme.

Some time ago Harold Abele moved to the Wm. Stille farm west of Klemme to farm for himself. Lester Stille had farmed the place several years.

Cecil Blank moved to the Ben Blank farm west of Klemme They had farmed near Wesley

Mr. and Mrs. Cecil Katter and family are starting up farming on the Fred Becker farm east of Klemme, which was vacated by Elmer Schneider, who moved to a farm northwest of Goodell, vacated by Mr Kemp who had retired.

We understand that Syavanius Wacker will farm the Herman Ax estate farm north of Klemme. Mr. Ax died a few weeks ago in an auto accident.

The Gerald Swyter family of Kanawha moved to the A X. Carpenter farm about half way between Klemme and Goodell on the highway Mr and Mrs. G. H. Blakeswell who have lived there for the past 6 years moved to a farm south of Clear Lake which they purchased. Their son Clai and family also moved to a farm near Clear Leke.

The George Smith family of Central Heights, Mason City, have moved into the tenant house on the Mitchel Bock farm east of Klemme. Mr. Smith will be employed by Mr. Bock this coming year.

Harold Radloff and family have moved from a farm near Hanlontown to the Victor Meyer farm northeast of Klemme.

KLEMME FLYER ADVANCES IN NAVY FLYING COURSE

Keith Stille completed his Navy Primary aviation training course at Corpus Christi, Texas, Friday, February 21st and entered Basic Training Monday, February 24th.

Keith went through the Primary Training with flying colors and was one of the top flyers in his class. He racked up 89 hours in the Stearman trainer and in his basic course will be flying heavier and faster ships. This course will take from 8 to 10 weeks, after which he will go to Pensacola, Florida's big navy base for final training and upon graduation will receive his coveted wings and a commission

Mrs. Stille is with him and they reside at 4614 Vestal, Corpus Christi, Texas.

Schoolmasters Club In Session At Britt

The Hancock County Schoolmasters' club met at the high school in Britt Monday. The recent county tournament was discussed as well as modern methods of adult education. The discussion on adult education was under the direction of G. E. Holme, director of adult education from the state department of public instruction. Supt. L. J. Thies of Britt was host to the group.

Shamrocks Move Up Toward Sub-State

KLEMME SHAMROCKS WIN CLASS B SECTIONAL AT FOREST CITY

Will Enter District Play At Mason City This Week

The Klemme Shamrocks added another trophy to their growing collection by winning the Class B sectional state tournament held at Forest City this past week.

Coach Patterson's Shamrocks started their climb on the championship by meeting Crystal Lake whom they defeated 48 to 27 Hanlontown, rated a strong Winnebago team next fall to the Shamrocks 43 to 29. Eddie Grosshousch lead the attack in this game by scoring 19 points. They met Joice in the final round and held the upper hand throughout the game gaining a 20 to 8 lead in the first quarter and then coasted to an easy 60 to 40 win. Dean Jacobs lead the Shamrocks attack by racking up 26 points against a team that was supposed to be one of the best in the tournament.

The Shamrocks take another step toward the State Tournament this week in the district at Mason City.

Shamrocks Win In District

The Klemme Shamrocks moved into district play Tuesday night at Mason City and defeated the fast Armstrong team 35 to 31. The Shamrock scoring was well divided with Grosshuesch leading with 11 points, Jacobs with 10, Carolus with 8, Ridder with 4 and Schmidt with 2. Baack was too busy guarding to do any scoring.

The Shamrocks meet the fast Rudd team Friday night at 7:30 and if they win this game they will then compete in the Sub-State.

Rudd defeated Holy Family of Mason City to earn the right to meet Klemme.

Read "The Man Who Comes To Breakfast" by Peter Levins, a true mystery thriller about a man whose specialty was murdering redheads. In The American Weekly, the magazine distributed with The Chicago SUNDAY HERALD-AMERICAN.

SCHOOL ELECTION WILL BE MONDAY, MARCH 10TH

The regular election of the Klemme Independent School District will be held on the second Monday in March, which is March 10th

Voting will take place at the Community Hall and the polls will open at 12.00 o'clock noon and close at 7:00 p. m.

One director will be elected for a term of three years to succeed Glen Bridges, and treasurer for a two yeas term will be elected to succeed F. A. Arnold.

Both candidates have filed and will be on the ballot for re-election.

ALUMNI GIRLS DEFEAT THE HIGH SCHOOL IN BENEFIT GAME

Klemme Vagabonds Defeat The Woden Independent Team

In a double header game at the high school gym Monday night the Alumni girls defeated the high school girls in a close game that ended 34 to 24 in favor of the Alumni.

The Klemme Vagabonds defeated the Woden Independent team in a rather loosely played game 54 to 33.

The gate receipts all went to the Alumni to help build up their treasury.

Ell 4-H Boys And Girls Held Meeting At Addis Greimans

The Ell 4-H boys and girls met at the Addis Greiman home on Tuesday night, February 25th. The girls meeting was in charge of Miss Ruby Schram, assistant leader.

The boys discussed record books, Soil Conservation activity, and a demonstration program for their club members. Lawrence Radloff, local leader, and Paul Henderson, county extension director, assisted with these discussions. The club welcomed three new members to their group. They were Gerald Quintus, James Quintus and Verle Lenz.

The next meeting will be held March 11th.

ANNOUNCE JURORS FOR MARCH TERM HANCOCK COUNTY DISTRICT COURT

Helm, Crystal Lake; Herman Buns, Woden; Clara Smith, Woden; Mrs John Bleich, Britt; Harold Jacobson, Britt; Howard Champion, Britt; Marjorie Benzler, Britt; Harold Abele, Britt; Helen Stille, Klemme; Chas. Grau, Garner; Verner Stromer, Klemme; Mrs. Oscar Greiman, Garner; Anson Avery, Goodell; Winnie Nall, Britt.

Marie A. Doughan, Britt; Clarence Faust, Kanawha; Edith Ward, Wesley; Harold Pommer, Britt; Gladys Wilkie, Kanawha; Edith Schroeder, Kanawha; Eleanor Hauptman, Corwith; Carl Long, Corwith; Arthur Livingston, Corwith.

The following grand jurors are to report for jury duty on March 18th at 10:00 a. m .

Clint Irvin, Garner; Clarence Hall, Garner; D. W. Senne, Woden; Adam Schmidt, Garner, Herman Gast, Klemme; Herbert Koehler, Goodell; Roy Volding, Crystal Lake; Chas. Botsford, Britt; Mark Miller, Britt; Joe Kudej, Kanawha; Emery Long, Corwith; Chas. Rankin Corwith.

Judge W. P. Butler will preside at the March term of court.

Klemme, Rake Post Lopsided Victories

Klemme and Rake, the two favored B clubs in the sectional meet at Forest City, both came through with wins Thursday evening. Klemme downed Hanlontown 42-30 after leading 20-10 at the half. Eddie Grosshousch paced Klemme with 18 points while Holstad and Hansen each made 8 for the losers.

The strong Rake team downed Kanawha 55-35 in the 2nd contest. Rake had a 25-16 lead at intermission Lyle Quam and Heath each dropped in 14 points for the winners while Medgarden caged 9 for Kanawha.

Annual Red Cross Drive Begins In County

LIST RED CROSS DRIVE WORKERS

Campaign Opened In Hancock On March 3

The 1947 American Red Cross campaign opened on March 3 in Hancock county, according to Maynard Schoneman, of Garner, who has accepted the fund chairmanship for the eastern one-half of Hancock county.

Organization plans are completed and workers supplied with materials in order that the residential and business solicitation can be made promptly with the opening of the drive.

Everyone can help the Red Cross solicitors by being ready when they call. When the worker calls remember the great Red Cross work though the war is over, the Red Cross has a tremendous load of responsibilities to carry on.

Township and ward chairman are as follows:

Klemme

Mrs. George Lawhorn, chairman, Mrs. Ray Jorgenson, Sr., Mrs. Vera Dulmes, Mrs. Irene Barz, Mrs. Ruth Bridges, Mrs. Maybelle Kudje.

Goodell

Mrs. L. W. Wesenberg, chairman, Mrs. Anthony Boller, Mrs. Ernie Kurtz, Mrs. Leo Barkema and Eleanor Ruka.

Ell

Mrs. V. A. Stromer, chairman, Mrs. Roy Quintus, Mrs. Roy Swanson, Mrs. Alvin Goll, Mrs. C. Lackore, Mrs. Fred Goll, Mrs. Ed Thieman, Mrs. Alfred Jurgemeyer, Mrs. Leon Goll, and Mrs. Edmund Josten.

Liberty

Mrs. Ben V. Greiman, chairman, Mrs. F. Bredlow, Agnes Psotka, Arthur D. Fisher, Ben Ridder, Mrs. Albert Kehl, Mrs. Lester Stille, W. H. Lemke and Miss Mabel Griffen.

Hancock D. H. I. A. Hold Annual Meeting, Feb 27th

The Hancock Dairy Herd Improvement Association held its annual meeting Thursday night, February 27th. The group elected Mitchell Bock, president; C. J. Wille, vice-president; Elmer Abele, secretary-treasurer; Roy Jacobs and Pat LaFavre, directors. John Ward in the supervisor for the group.

Lyle Jackson, Extension Dairyman, from Ames assisted with suggestions for improving the association.

The supervisor can use a few more members before the association has its full quota of 26 members. Anyone wanting their herd tested should contact one of the officers, directors of the county extension director's office. The present cost was set at $4.50 per herd plus 10 cents per cow.

The slogan "Test, don't Guess" is more important today than ever. Why spend your valuable time milking a low producer when it doesn't take any longer to milk a good producer?

Important Business Changed Owners March First

MR. AND MRS. FRED NEUHRING OBSERVE THIRTY-FIFTH ANNIVERSARY

Friday, February 28th was the Thirty-Fifth wedding anniversary of Mr and Mrs. Fred Neuhring of Klemme and in honor of the event relatives and friends came to their home and surprised them. They brought well filled baskets and enjoyed a nice lunch later in the evening.

Those present were Mr. and Mrs. Wm. Neuhring of Mason City; Mrs. Clara Barz and Mrs. Eldon Hagen of Klemme; Mr. and Mrs. Dale Schlei; Mrs. Bertha Schlei; Mr. and Mrs. Geo. Theiman; Bud Murray and family; Erwin Neuhring and family, Earl Neuhring and family; and Mr. and Mrs. Ervin Haupt

Mr. and Mrs. Neuhring were presented with some nice gifts.

ETCHEN TWINS RETURN HOME FROM OVERSEAS SERVICE

Sgt. Carroll Etchen and Sgt. Merle Etchen, twin sons of Mr and Mrs. Albert Etchen returned home Friday from 12 months of service overseas.

Both Carroll and Merle were in Band and Orchestra work during their time in the army overseas. While in the States the boys served in the Armored Division and drove half-tracks.

They are now on terminal leave awaiting their final discharge from the service.

Evenson Sells Store At Goodell To Veteran

O. C. Evenson has sold his general store at Goodell to Roy Ahlstrom, with possession to be given March 1 Roy is a former resident of Goodell and enlisted in the navy many years ago, serving as a warrant officer. He was recently discharged and brings to Goodell a bride, a native of Detroit, Mich.

WILSONS RETIRE FROM BUSINESS AFTER TWENTY-TWO YEARS HERE

Mr. and Mrs. R. A. Jorgenson, Jr. New Owners Of Drug Store

On Saturday, March 1st, Mr and Mrs. P. M. Wilson retired from business after serving the people of Klemme in the drug store for twenty-two years. A deal was completed last week whereby Mr. and Mrs. R. A. Jorgenson, Jr. purchased the stock, fixtures, building and extra lots from Mr. and Mrs. P. M. Wilson.

Mr. and Mrs. Wilson came to Klemme in February of 1925 from Vinton, purchasing the Drug Store in Klemme from Glenn Seney. Mr. Wilson is a graduate of Drake University and then worked in a drug store at Vinton before coming to Klemme. Their daughter, Gladys, graduated from the Klemme High School and later from the Drake University and then she taught school until her marriage to Robert Risser of Des Moines.

Mr. and Mrs. Wilson have no definite plans for the future but expect to take a well earned vacation. They will remain in Klemme, however, for a few weeks settling up their business and helping the new owners get started.

The new owners need little introduction to our readers. Ray Jorgenson, Jr. is the son of the Editor and Mrs. Jorgenson and graduated from Klemme high school. He attended Mason City, Junior College, U. S. Naval Academy at Annapolis, Md. and Simpson College at Indianola. He served five years in the U. S. Army Air Corps, the greater part of that time he served as an instructor of pilots on bombers and later commanded a section of the field as supervisor of instructors. When the war ended he was pilot and commander of a B-29 crew and would have gone overseas in another two days if the war had not ended. The past year he has been flying with the Continental Air Lines at Denver, and the past few months was assisting his father in the printing business.

Mrs. Ray Jorgenson, Jr. is an Amherst, Texas girl and met her future husband at Lubbock, Texas while she was attending the Texas Tech College They have a daughter, Judy, age 3½ years.

Mr. and Mrs. Wilson have made many freinds in Klemme and the surrounding territory who wish them well and who hope they will decide to make Klemme their future home.

The new proprietors will call their place of business "The Corner Drug."

Liberty Busy Bees Met

The Liberty Busy Bees met at the home of Marjorie Bredlow, Saturday, February 22nd. The meeting was called to order by the president. Roll call was answered by eight members. The minutes of the previous meeting were read and approved.

Marjorie Bredlow gave an illustrated talk on "What to Consider in Choosing Wallpaper for Your Room." We had picture studies, one by Sheryl Bredlow and one by Vivian Stromer, which afterward our leader showed us some ways in which to put different designs, etc., on feed sacks for curtains, chair covers, pillow covers, etc.

Entertainment was enjoyed by everyone. Lunch was served by the hostess. The next meeting is to be held at the home of Mary Joan Haberkamp, Saturday, March 15th.

The number of births in Sweden this year has been higher than any time since 1920, with the exception of 1945.

Long Fight for Freedom Continues

Korea a Sore Spot in Far Eastern Politics

By BAUKHAGE
News Analyst and Commentator.

WNU Service, 1616 Eye Street, N.W., Washington, D. C.

WASHINGTON. — "Reveal the secret clauses in the Yalta agreement and the American people will demand a free and independent Korea." That is what you hear from the earnest group of Koreans and Americans who will be waving a tearful but hopeful farewell to their beloved leader and friend —the venerable Dr. Syngman Rhee—as he departs for "the land of the morning calm" for the second time since his exile 40 years ago. Dr. Rhee's followers consider him the legitimate head of the provisional Korean government set up by those leaders fortunate enough to escape when Japan dealt Korea its final, crushing blow in 1905.

Baukhage

Presidents of the United States since Theodore Roosevelt's time, state department and other government officials have been consistently sympathetic and stubbornly uncooperative with the effort of this unflagging patriot to obtain recognition of his country. They did not frown on his return to Korea when it was "liberated" by the defeat of Japan. They put no obstacles in the way of his choice as head of the group which set up a provisional government of Korea. They permitted that group to send an observer to the U. N but when Dr Rhee returned from Korea in December of last year his efforts to make his voice heard before the international body were blocked by the state department ukase, "No official standing."

Today Korea is a nation bisected by the 38th parallel. The North, under Russian control, is separated by the Asiatic model of the Iron Curtain and no real Korea government exists in the Southern half, still administered by the U S military government. This is due, Dr. Rhee says, to the same lack of official sanction from the state department which the aging doctor has sought since Pearl Harbor.

"All we ask is that we be allowed to hold elections to set up in the American zone of Korea a national government just as the Russians have set up what they call a 'democratic government' in their zone. We only ask that the United States do for us what they have already done for Japan.

"The other liberated countries have been given this privilege. We never fought against the Allies. For more than 40 years we have carried underground work against our Japanese oppressors."

I asked if he thought the people were ready for a democratic government.

He paused a moment and said: "You may be surprised, as I was, to learn how familiar the Koreans are with the democratic system."

The Japanese, it seems, when they made their various levies upon the Koreans found they had to deal with a system that had already been set up, based on the democratic choice of a leader for a group of perhaps 20 homes which, in turn, chose their representatives for larger groups. Dr. Rhee said he found his people were much more familiar with these processes than he thought they could be even though he had followed their activities so closely through all these years. Then Dr. Rhee went on to explain that with cooperation of the military government, at least five attempts had been made to set up a national government; that each time the Communists had blocked it by refusing to join and because of the directives under which the military government was forced to operate—no government was permitted in which the Communists did not participate.

"They (the Communists) claim they have 20,000 members in the

Syngman Rhee Wants to Tell Secrets

southern area—what right have 20,000, if there are that many (which I doubt), to interfere with the rights of 18 million Koreans in the southern zone?" asks Dr. Rhee.

In the secret agreement at Yalta, Dr. Rhee asserts: "President Roosevelt agreed that Manchuria and Northern Korea be placed in the zone of the Soviets. This was contrary to the spirit of the Atlantic Charter and the other agreements up to that time. When the American people realize this, I am sure sentiment will develop that will make it possible for Korea to become a nation again. I am going back to Korea with that hope."

★ ★ ★ ★

Bathed in Mutual Admiration

There is a distinctive brand of political humor often buried in that remarkable and largely unread (and frequently turgid) document, the Congressional Record.

The Republican recommendation that senators meet in formal session only three times a week, Monday, Wednesday and Friday, devoting the other two days to committee work recently touched off a typical exchange between Republicans and Democrats on the senate floor. Both parties conjured lightly with the names of founding fathers.

Majority Leader Wallace White of Maine began by opining that an exception to the Monday-Wednesday-Friday rule should perhaps be made for Lincoln's birthday (which falls on Wednesday this year) so that Republican senators could, as he put it, "have opportunity to go to their homes and elsewhere to make their customary, and I think, proper, speeches on Lincoln's birthday." He added that provision, too, might be made for Washington's birthday.

Senator White then recalled that the Democrats usually have either a Jackson Day or Jefferson Day dinner, for which they might want to be excused from the senate.

Minority Leader Barkley was agreeable. Said he: "So far as Lincoln Day absenteeism is concerned, we have no objection to any deviation from this program (the MWF rule) that would permit our friends to get back to Lincoln."

The Record records as follows:

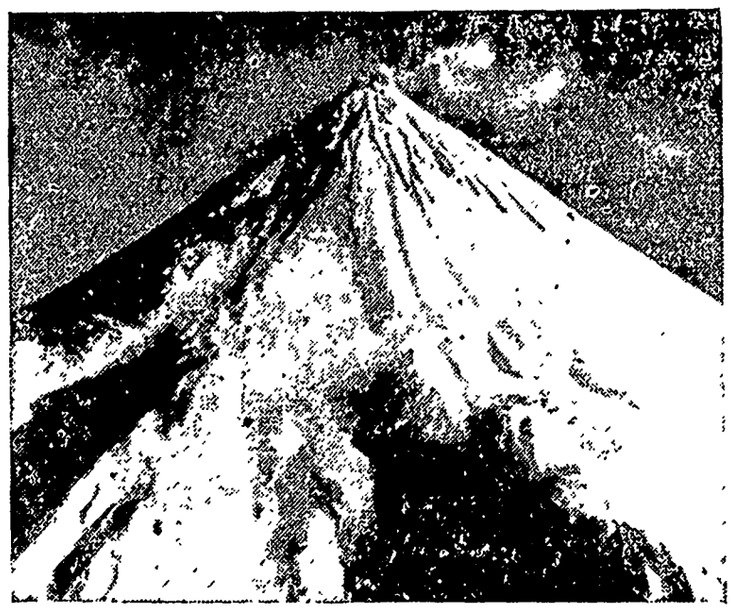
Mr. Barkley: I think the closer the party gets back to Lincoln the nearer it will come to Jefferson. I think there will be no difficulty about arranging for Washington's birthday and for Lincoln's birthday. So far as Jackson is concerned, the Democrats have always celebrated Jackson Day on the 8th of January, today, which is the day of the Battle of New Orleans.

Mr. White: I think the senator from Kentucky is celebrating it now.

Mr. Barkley: But in April I think it is planned to have a number of Jefferson Day celebrations throughout the country and I am sure that Jefferson and Lincoln and Washington and Jackson will all be maintained upon an equal footing.

Mr. Tobey: I'd like to say for the benefit of my friend the senator from Kentucky that I hope his statement which I shall designate as Exhibit A, is evidence that the great party to which he belongs, of which he has been majority leader in the senate for so many years, and so successfully, will be bound to return to the principles and teachings and tenets of Thomas Jefferson.

Mr. Barkley: I will say to the senator that we have never departed from them, because Jefferson was the outstanding liberal of his day, and we have always adhered to the liberal policies which were advocated by the original liberal, Thomas Jefferson, which were not altogether dissimilar to the liberality of the founder of the Republican party, Abraham Lincoln.



FROM THE FAR NORTH . . . Presenting a majestic picture of symmetry and winter at war with the earth's inner force, towering Mt. Shishaldin on Unimak island in the Aleutians is plumed by smoke emitted by the seething volcano concealed in the cone-like mountain.

Knutson

Taber

With the Republicans cautious about paring military expenditures because of the unsettled world situation, President Truman's budget did not leave too much room for tinkering. As a result, GOP leaders planned to concentrate on the income cut estimated at 3½ billion dollars and continue the current high excise levies on liquor, furs, jewelry and other items.

Representative Taber (Rep., N. Y.), chairman of the house appropriations committee, asserted the budget could be reduced at least 3 to 4 billion dollars, still assuring essential expenditures and allowing for a payment on the national debt. Such a cut would bring the budget in line with the decrease in revenue resulting from the 20 per cent tax slash.

FORD:
Production Lead

Declaring that the high standard of American living was based upon mass production, Ford Motor company slashed the price of nine models from $15 to $50 to stimulate a cautious buyers' market.

Thus did Henry Ford II, youthful president of the famed auto company, steal a march on organized labor on the eve of negotiations for new contracts and set the pace for industry generally. As labor was to clamor for higher wages, Ford inferred that they could be paid out of increasing production of goods, with workers sharing the rising profits.

With prices away up and buyers hesitant to pay for inflated values, American industry stands at the crossroads, Ford said. Bring prices within reach of the average consumer through mass production and the U. S. may well avoid a business recession, he declared. With employee efficiency on the rise, Ford revealed that his company is turning out about 4,000 units a day, exclusive of buses and tractors.

ALLIANCE:
Britain-France

Traditional allies against Germany, Great Britain and France renewed their old bond in London by agreeing to a treaty of alliance to guard against a rebirth of an aggressive reich.

Though the alliance ostensibly was directed against Germany, observers saw in the pact a strengthening of the western European powers against the expanded influence of Russia on the continent. With Britain and France serving as a core, smaller nations like Holland and Belgium might adhere to the western bloc to check the threat of communism.

In concluding their alliance, Britain and France agreed to work for the orderly development of western European economy to promote mutual prosperity and at the same time prevent establishment of a strong industrial base for war in Germany Emphasis was placed on harmonizing the British and French economies to remove trade conflicts and harnessing essential German industry, like coal, to the needs of neighboring countries.

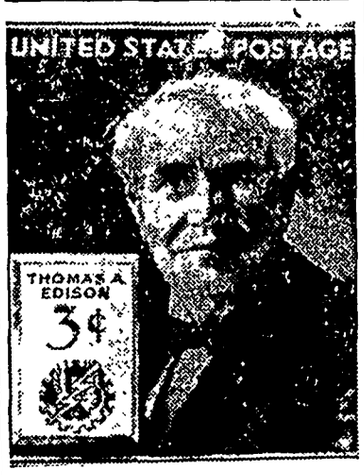
GEORGIA:
Chip Off Old Block

With "Old Gene" gone, "Young Herman" kept alive the fiery Talmadge tradition in Georgia politics.

When his father died before he could be inaugurated, young Talmadge mustered sufficient support in the legislature to have himself named governor; then, defying incumbent-Governor Arnall, who held his election illegal, he set up his own offices in the state capitol

Meeting young Talmadge's bold challenge, Arnall carried the issue to the state supreme court, dominated by his own appointees But again Herman struck back by threatening to ignore an adverse court decision on the grounds that the constitution empowered the legislature to elect a governor and a denial of the right represented judicial encroachment upon the legislative branch of government.

Amid the hub-bub, one sure fact emerged: Young Talmadge had demonstrated political leadership and was a power to be reckoned with in Georgia politics.



COMMEMORATIVE STAMP . . . This special postage stamp will be placed on sale at Milan, Ohio, February 11 to commemorate the 100th anniversary of the birth of Thomas A. Edison.

HOPE FOR HOMES

Million Houses To Be Started

WASHINGTON. — Construction will be started on a million new permanent dwelling units and about 800,000 units will be completed by private builders during 1947, it is estimated by the department of commerce. The estimates compare with 675,000 units started and about 450,000 completed during 1946.

Prospects for meeting the nation's construction industry goal of 15 billion dollars, representing an increase of 50 per cent over last year, were termed favorable by John L. Haynes, chief of the commerce department's construction division.

An additional outlay of 6½ billion to 7 billion dollars will be made for repairs and maintenance, according to Haynes.

Haynes points out that the estimates are based "on the assumption that increases in the cost of construction will be moderate in 1947 and that any increases in the price index of materials and labor rates will be offset, in part at least, by the increased volume of building materials."

It also is assumed, he adds, "that present remaining controls on nonresidential construction will be eased and that there will be no general business recession in 1947 severe enough to impede construction."

Haynes' estimates show that 6 billion dollars will be expended for private residential construction, exclusive of farm homes, for the largest outlay in any class of construction.

Private construction of all types, he adds, will make up the bulk of the year's new construction spending, amounting to 11,700 million dollars or 49 per cent more than last year.

'DON'T GET UPSET'

Soaring Winter Accident Toll Sparks Plea for Safe Driving

WNU Features.

CHICAGO.—When pelting snow and treacherous ice clog the highways, "don't get upset." That is the plea of National Safety council in its campaign to reduce the hazards of winter driving.

On an average, two-thirds of the cold weather mishaps last winter occurred on snowy or icy roads, it is revealed in a special study of winter traffic accidents recently completed by four typical snow-belt states in co-operation with the safety council. States making the special accident analysis were Connecticut, Indiana, Minnesota and Wisconsin

This fact, combined with the knowledge that traffic death rates in the northern half of the United States increase from 24 to 53 per cent in winter as compared with summer, prove the need for greater driver caution in winter months, the council said.

Mishaps Increase.

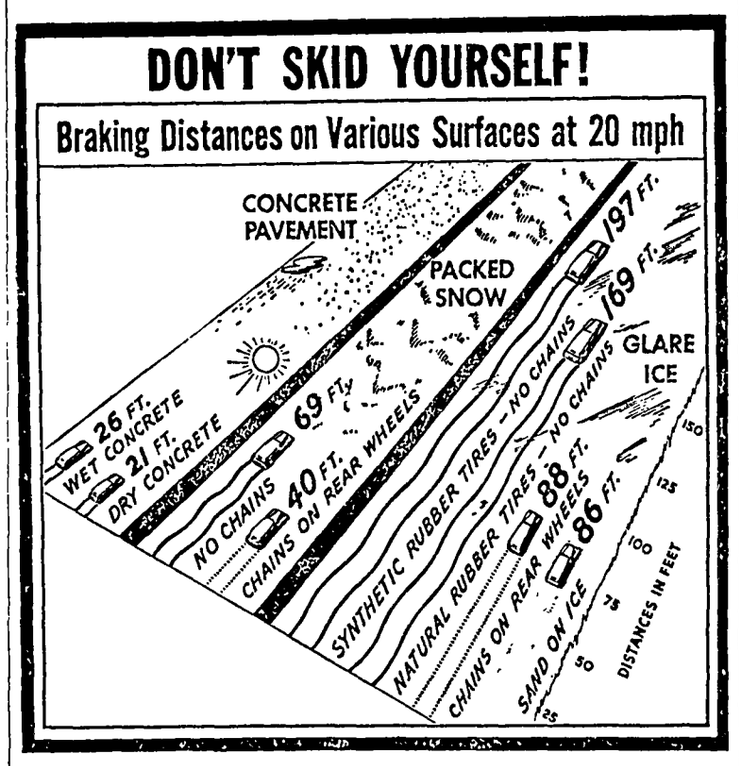
Inadequate traction and poor visibility are the special hazards which send winter accident rates soaring, according to Prof. Ralph A. Moyer of Iowa State college, chairman of the council's committee on winter driving hazards.

Moyer recommends that vehicles which must be operated under severe snow and ice conditions be equipped with tire chains and devices to aid visibility, such as windshield wipers, defrosters or frost shields and good lighting equipment.

"Modern methods of distribution, vital to our economy, require that commercial vehicles and many passenger cars operate in all kinds of weather," he said, "and the amount of such traffic is increasing. The greater the number of vehicles on the road the more need there is for improved winter road maintenance, safety equipment for the vehicles, and extra care on the part of drivers."

Lists Driving Rules.

He urged drivers to follow these rules, which are based on actual winter driving tests on frozen Michigan lakes:



1. When starting out, get the "feel" of the road by lightly applying brakes while driving slowly and when no other vehicles are near.

2. Reduce your speed so that you can stop in time in an emergency. Ice may be found on bridges or on shaded sections of an otherwise clear road surface.

3. Don't jam on your brakes suddenly. Apply them lightly and intermittently to avoid a skid.

4. Keep windshield clear of snow and ice outside, fog and frost inside.

5. Use tire chains on ice and snow. They may reduce braking distance as much as 40 or 50 per cent and provide needed "go" traction.

6. Synthetic rubber tires, equal or better than natural rubber in many respects, do not provide quite as much stop-and-go traction on snow or ice.

7. Remember days are short. Plan your trip for as much daylight driving as possible.

8. Deflating or "softening" tires will not add to your safety, and it will cause excessive tire wear.

9. Beware of carbon monoxide gas. Never warm up a car in a closed garage, and check exhaust system, floor boards and manifold-type heaters for leaks.

Majority of War Veterans Finding Jobs or in School

WASHINGTON —Of the 13 030,000 men veterans discharged during the last 16 months, only 700,000 are listed as unemployed, according to a labor department survey of veterans' status An additional 550,000 are listed as on vacation, unable to work or retired

Nearly 12 million of the veterans now are employed, in training, or in school or college, the survey discloses. Of this number, 1,100,000 men veterans of World War II are enrolled in educational institutions.

Two major tasks for the future are emphasized in the report. The first is to find better jobs for many veterans who have demonstrated a desire for jobs with advancement. The other is to find jobs for the student veterans as they are graduated.

Woman Has Studied All School's Courses

PITTSBURGH, PA.—School bells still ring for Mrs Margaret Dick, 62. When she moved to Pittsburgh from New Jersey 29 years ago, Mrs. Dick longed for new friends and, at her husband's suggestion, she enrolled in night school.

A student ever since, Mrs. Dick has exhausted the curricula of two night schools. She has studied bookkeeping, chemistry, dressmaking, cooking, public speaking, millinery and commercial law.

Talk About Your Operation? Now Movie Shows It

NEW ORLEANS, LA.—No longer do you need to grope for words to describe your latest operation Just have it photographed—even in technicolor, if you like.

W. Branks Stewart of New Orleans earns his living photographing operations. He'll do movies, stills or even paintings of your appendix

Of course, Stewart does most of his work for doctors and for Louisiana State university medical school, where he works. If a surgeon finds something different in an operative case, he places a hurry call for Stewart, who photographs or sketches the operation. Sometimes doctors want new techniques recorded by the movie camera.

Stewart has all types of weird looking equipment to do his work. One of the special cameras takes a stereoscopic picture of the human eye. Another is a photomicrography instrument which takes pictures through a microscope.

Real Salesman

ROBINSON, ILL.—Marley Harrison reversed the usual procedure when he left the hospital after an operation and presented it with a bill. An appliance dealer, he used the time while he was recuperating to talk the staff into buying a deep freeze unit.

Vet Quotes Bible in Plea to Truman

HAWTHORNE, N J.—By quoting the Bible, Charles Quatt, former soldier, hopes to enlist the aid of President Truman in getting his German bride, whom he married secretly in 1945 in Regensburg, Bavaria, into this country.

"I put it up to you, Mr. President," Quatt said he wrote. "Did I do anything that was not correct according to any concept of morals, common sense or the Holy Bible. . . .

"The Bible says, 'Thou shalt go forth into the world and seek a wife.' Look as I may, it did not say what nationality she could and should be."

Quatt said his marriage was kept secret because of the army's ban on fraternization at that time. The state department has agreed to admit their infant son as an American citizen, Quatt said, but has refused to permit his wife to enter.

Gems of Thought

IF YOU ever expect to get where, start today right where you are. Those who a more favorable sign se get started.

NO 'DOG'S LIFE'

Old-timers of Canine Kingdom Boast of Interesting Careers

WNU Features.

It may be a "dog's life," but it's still a good life, it is revealed in a series of unusual animal stories compiled by Gaines Dog Research center of New York in connection with its quest for the oldest dog in America.

Pampered oldsters of the human race command no more attention than do their counterparts in the canine realm and occasionally, too, their owners sadly admit, even doddering old dogs are inclined to "go to the dogs."

The homesick dog which traveled 1,800 miles through strange territory to find his family, the talking dog, the dog credited with killing more than 600 coyotes, the dog which went to school daily and after his mistress' graduation, accompanied her to the office every morning — all these and many other yarns of a sensational character were uncovered by the Gaines center in response to its query concerning the oldest dog.

Reports on more than 200 dogs were received from 43 states and Canada.

Ranks as Oldest.

Oldest is Laddie Boy (named after the late President Harding's dog), a 25½-year-old male owned by Mrs. E. C. Baynard of Rocky

Mount, N. C. His ancestry is "dubious," Mrs. Baynard explains, his mother being a Pekingese and his father a "traveling man." Laddie Boy's age is equivalent to 135 years in a human being.

The exceptional attention and care which he has received from his mistress for more than a quarter century are credited with Laddie's longevity. Although a dog half his age is considered old, Laddie still can amble about. He prefers, however, to spend long hours in his wicker basket, barking vigorously when he wants his dinner or other attention. Laddie's eyesight is very poor but his health remains good as he has required no veterinary attention for four years. Despite an almost complete absence of teeth, Laddie has a big appetite. He is devoid of all his hair save for the head, legs and a narrow furrow on his back.

Besides Laddie, there were reports on 19 other dogs 20 years of age or older. The average dog has a span of life of 10 to 12 years.

Not all of the owners who submitted data mentioned the sex of their aged pets. Of those who did, however, 106 reported males and 78 females, indicating that the male dog's longevity is greater.

The North Central states of Michigan, Wisconsin, Illinois, Indiana and Ohio reported the most aged dogs—40 in all—with the Middle Atlantic states of New York, New Jersey and Pennsylvania trailing with 39. Among individual states, New York led with accounts of 18 dogs

Country Dogs Healthier.

Although city dogs generally are believed to be healthier and longer-lived than their country cousins, by far the largest number of reports on old dogs came from small and medium-sized centers

One of the most sensational reports came from Mrs Robert E. McKinley of Federalsburg, Md. In describing her 17-year-old mixed terrier, Buster, Mrs. McKinley insists, "He can actually talk, saying such words as 'I'm hungry' and 'I want to go out.' "

One of the most remarkable feats in the dog kingdom was accomplished by Jiggs, now 21 years old, owned by Mrs Oscar Bengtson of Anaheim, Calif In 1934 the Bengtson family moved from Truman, Minn , to Anaheim, leaving Jiggs, a large crossbreed, half shepherd, half St. Bernard, with a friend. Jiggs stayed with the friend eight weeks and then vanished

Two and a half years later Jiggs appeared at the Bengtson home in California, having traversed half the continent in covering a distance of 1,800 miles to rejoin his family. Jiggs, who was in his 10th and 11th years when this exploit was achieved, has not been separated from his family since.

Still Active Hunter.

A plutocrat is Zippy, 19-year-old male toy black and tan terrier His

owner, Mrs. William E Griffith of Somerset, Pa., told the Gaines center that Zippy "has traveled extensively, stopping at the very best hotels in the country "

An ardent hunter is Susie, now 16, owned by Al Johnston, government trapper of Logan, Mont. Susie, who still goes hunting with her owner every day, is credited with pulling down more than 600 coyotes Her major accomplishment, however, involved helping to capture a wolf weighing 103 pounds

At the age of 12, Ritz Rachmaninov, a purebred Samoyede owned by Mrs. Daniel McKnight of Vallejo, Calif., distinguished himself by siring a litter of four healthy puppies Twelve years in a dog's life are the equivalent of 75 in a human's. Ritz is now 15 years old.

Although 16 years of age, Buddy, a shepherd of the collie type belonging to Mrs. Stoddard Porter of Grahamsville, N. Y., still works for a living. His main job is to bring the cows home from pasture every afternoon and, his owner points out, he has never come in without all of them. In addition to his herding duties, he has completely eliminated woodchucks from the Porter farm.

Follows Mistress.

Duplicating the story of Mary and her little lamb, Mrs Martha V Albers of Arthur, Ill., reports that her fox terrier, Rex, now 17 years old, daily accompanied her and her two brothers to grammar school and then to high school. When Mrs. Albers finished high school and went to work, Rex accompanied her to the office every morning.

A real old-timer is Foxy, a collie owned by Capt. William Penn Lodge of Long Beach Island, N. J. Now 22 years old, Foxy can credit his longevity to an active youth. Foxy was found as a young wild dog running at large in the woods of Pennsylvania. Captain Lodge captured the dog and tamed him. For years, Foxy, grown from a wild puppy into a "dignified citizen," has been a familiar sight racing along for his exercise at the side of the Lodge car.

Show Motherly Traits.

Motherly instincts prevail among the queens of the canine world, the Gaines survey discloses.

From Mrs B. J Blackburn of Roseville, Mich., came a picture of her sporty-looking purebred wire

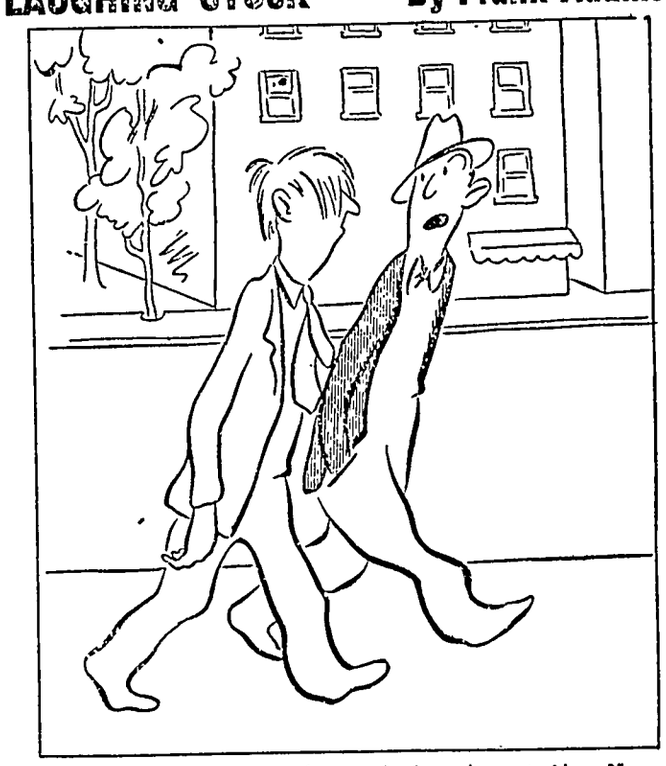
fox terrier, Acelona Wire Girl (Acie), now 12 years of age and still svelte of figure. Acie has produced 10 litters of puppies and raised all of them. Besides nursing her own offspring, she has acted as foster mother on three different occasions for other dog mothers who were unable to care for all their puppies. This super-mother, Mrs Blackburn reports, still has perfect teeth, hearing and eyesight.

Fred Oertel of Keokuk, Iowa, relates that his white female spitz, Midgie, had a litter of three healthy puppies in May, 1946, when she was 16 years old. On other occasions when she has had no puppies of her own, Midgie has mothered a litter of white rats, some chickens, another dog's four puppies and at still another time simultaneously nursed a puppy and a kitten

Numerous owners reported 16 and 17-year-old dogs who are refusing to act their age by ratting, chasing cats and picking fights with other dogs. One bewildered owner remarks of her 18-year-old terrier, "She plays and rolls on her back, chases cats and chickens and behaves disgracefully in general. Perhaps she is in her second puppyhood."

MOPSY by GLADYS PARKER

LAUGHING STOCK By Frank Adams



"Can you think of any personal reason why she won't go out with you?"

Sick Rabbits

"Say, Tony, those rabbits you sold me all have the hiccoughs."

"Sure, boss, dey are Belchin' hares "

Useless Study

Teacher—And why have you decided to give up the study of French?

Willie—It's a waste of time trying to do something the French do so much better.

Raw Cracks, Eh?

Grandpa—I never see a girl blush any more. It was certainly different in my day.

Grandson—Good gracious, grandpa! What on earth did you say to them?

Catching On

Jackson—How's your wife getting along learning to drive a car?

Jixson—Not bad—the road is beginning to turn now when she does.

And Tightly

The kind old gentleman had stopped the little boy, who was on his way home from school. "Tell me, little boy, how do you like school?" he asked. The little boy fired back this answer: "I like it closed, sir."

Direct Current

Jane—So your husband calls you "Dynamo." Magnetic personality, I suppose?

Joan—No. Because everything I wear is charged.

HEFTY HAULS

Crooks Specialize in 'Big' Jobs—Even Houses

Thieves operated in a big way during the past year, the crop of crooks finding few jobs too hazardous to handle.

In the line of big jobs, the San Fernando, Calif., valley thief probably rates the year's laurels. Undoubtedly cognizant of the housing shortage, that enterprising thief stole a three-room house

A close second was the light-fingered but strong-backed thief who stole a country schoolhouse at Quesnel, British Columbia

There may have been a reason for stealing living accommodations —but no one can figure out what even a thief wanted with a road grader, complete with 12-foot blade However, when one was left unguarded a few weeks near Vancouver, Wash., it disappeared.

Demonstrate Efficiency.

Not only the outside jobs proved big, however. In Boston, a thief carefully rigged up a block and tackle to steal a piano from a third floor apartment. The piano probably was out of tune; police recovered it later in a pawnshop.

Efficiency is the keynote in the burglary realm, it seems. An enterprising second story man out in San Bernardino, Calif., rigged up a labor-saving electric hoist to steal a quarter-ton safe.

A couple of holdup artists in Washington, D. C., got off with the right foot. It paid dividends, too, for the foot contained $1,692. These boys held up a one-legged man and grabbed his artificial leg, which he had been using as a private bank.

Bandits in Newark, N J., are a nervy lot. Witness the case where two operators robbed a man of all his cash. A few minutes later, after it started to rain they returned and demanded an umbrella

The clothing shortage probably was as acute in some localities as the housing shortage That may have prompted a Nashville, Tenn., thief to steal a mackinaw, two pairs of boy's overalls and a dozen or so diapers from a parked car.

Only one piece of loot proved "too hot to handle." In Chattanooga, Tenn., a thief grabbed a package from a parked car, dropped it and ran. The package, he discovered upon inspection, contained a Bible.

Some thieves still have a sense of decency although one in Pottsville, Pa., had a warped sense of proportion He stole an automobile, but left the owner a bicycle in its place.

Caravan To Follow Mormon Trek

SALT LAKE CITY — Retracing the route of Brigham Young and the first band of Mormon pioneers just 100 years ago, a caravan of 43 canvas-topped motor cars will carry 143 men, 3 women and 2 children half way across the United States

The journey, extending from Illinois to Utah, will be one of the 69 major events which Utah residents have planned as attractions for the Beehive state's centennial celebration.

Starting at Nauvoo, Ill., July 14, the automobiles will journey 1,500 miles to Salt Lake City, following as closely as possible the route traversed by the original Mormon settlers.

Each night the 1947 "covered wagons" will draw up in a circle at the site of one of the camping spots where in 1847 the original 148 sought shelter Plans call for the caravan to reach Salt Lake City July 22.

Prime objectives for the trek, as well as for the entire year of centennial activities, are to bring enjoyment to those participating and to focus attention on early history of the state.

Traffic Violators Attend School and Write Essays

LINCOLN, NEB. — An unusual method of dealing with traffic violators is practiced by Municipal Judge Edward C. Fisher as a means of promoting traffic education to replace the customary "fine-and-forget" procedure.

When youngsters break traffic laws, the magistrate gives them a choice of two punishments. One is the customary fine. The other is attendance at a juvenile traffic school held twice monthly on Saturday mornings.

At the traffic school the teen-agers (18 and under) view a safety moving picture, hear a lecture by a city official and write a 1,000-word essay on "Why I Won't Do It Again."

Two-thirds of the youthful traffic violators elect the second means of paying their debt, with a little prompting from parents, who also must attend the Saturday sessions of the school.

Fisher also gives adult violators, except drunken and reckless drivers, the alternative of paying a fine or penance through voluntary license forfeiture, attendance at the school and essay writing.

The judge believes too many traffic courts are a "joke," regarded by the public "as a source of amusement or a racket to get their money."

Small-Home Planning, Financing, Building

Old House—New Face

WITH building materials for new homes still scarce, it's often good sense to face-lift an old house. Make sure before going ahead, however, that the structure is sound.

And how about the interior of your house? Is it dated by dark woodwork, ugly exposed radiators, ungainly archways? Often a few simple improvements can change the whole appearance of your home.

Whether you're planning to build, buy or remodel a home, our Reader Service booklet will give you many valuable suggestions Illustrations galore! Send 25c (coin) for "Small Homes-Planning, Financing, Building" to Weekly Newspaper Service, 243 W. 17th St., New York 11, N. Y. Print name, address, booklet title.

Look! Muffins Made With Mincemeat!

Easy on shortening and sugar, too!

Kellogg's toasted All-Bran and mincemeat taste like Christmas cake!

1 cup Kellogg's All-Bran	¼ cup sugar
¾ cup milk	1 egg
1 cup prepared mincemeat	1 cup sifted flour
2 tablespoons shortening	3 teaspoons baking powder
	½ teaspoon salt

Combine Kellogg's All-Bran, milk, and mincemeat. *Let soak about 5 minutes.* Blend shortening and sugar. Add egg, beat well. Stir in All-Bran and mincemeat. Add sifted dry ingredients. Stir only until liquid and dry ingredients are combined. Fill greased muffin pans two-thirds full. Bake in moderately hot oven (400° F.) about 25 minutes. Makes 12 luscious muffins.

Good Nutrition, Too! All-Bran is made from the VITAL OUTER LAYERS of finest wheat — serve daily as a *cereal.*

WHY BE A SLAVE TO HARSH LAXATIVES?

Healthful Fresh Fruit Drink Has Restored Millions to Normal Regularity!

Here's a way to overcome constipation *without* harsh laxatives. Drink juice of 1 Sunkist Lemon in a glass of water first thing on arising.

Most people find this all they need —stimulates *normal* bowel action day after day!

Lemon and water is *good* for you. Lemons are among the richest sources of vitamin C, which combats fatigue, helps resist colds and infections. They supply valuable amounts of vitamins B_1 and P. They pep up appetite. They *alkalinize,* aid digestion. Lemon and water has a fresh tang too—clears the mouth, wakes you up, starts you going.

Try this grand wake-up drink 10 mornings. See if it doesn't help you! Use California Sunkist Lemons.

Beware Coughs from common colds That Hang On

Creomulsion relieves promptly because it goes right to the seat of the trouble to help loosen and expel germ laden phlegm, and aid nature to soothe and heal raw, tender, inflamed bronchial mucous membranes. Tell your druggist to sell you a bottle of Creomulsion with the understanding you must like the way it quickly allays the cough or you are to have your money back.

CREOMULSION for Coughs, Chest Colds, Bronchitis

That Nagging Backache

May Warn of Disordered Kidney Action

Modern life with its hurry and worry, irregular habits, improper eating and drinking—its risk of exposure and infection—throws heavy strain on the work of the kidneys. They are apt to become over-taxed and fail to filter excess acid and other impurities from the life-giving blood.

You may suffer nagging backache, headache, dizziness, getting up nights, leg pains, swelling—feel constantly tired, nervous, all worn out. Other signs of kidney or bladder disorder are sometimes burning, scanty or too frequent urination.

Try *Doan's Pills. Doan's* help the kidneys to pass off harmful excess body waste. They have had more than half a century of public approval. Are recommended by grateful users everywhere. *Ask your neighbor!*

KLEMME SCHOOL NEWS

Seventh and Eighth Grade News

—Clara Smith, Teacher

We are looking forward to our six weeks tests this coming week with some of us studying extra hard Most of us thought that this last 6 weeks has gone rather fast. Most of us don't mind going to school on Saturday, but it does seem different.

The 7th grade in Arithmetic have been finding areas. In Hygiene they have had some first aid.

In 8th grade Arithmetic we have been finding Income tax rates. In Civics we have been studying our state government, and will start on our national government soon. We have covered 324 pages in our Civics this last 6 weeks. In English we have been writing and telling stories.

Dick Gilpin and Dean Burgess have been absent part of last week.

—Reported by Jo Ann Hummel

Farm Bureau Calendar Of Coming Events

March 6:
Fly Control meeting with the Kanawha Lions Club.

March 6:
District School Lunch program meeting at Titonka.

March 7:

March 13:
Ell Township Farm Bureau meeting, No. 4 school.

March 15:
Bingham 4-H Boys Club tour at 1 00 p. m., Schutjer's.

Josten Says Need For Flax Seed Is Very Acute

Alfred V. Josten, Chairman of the Hancock County AAA Committee, called attention again to the need for raising flaxseed due to acute shortages of fats and oils, including linseed oil Support price for flaxseed on Minneapolis basis, for 1947 is $6 00 per bushel.

Mr Josten explained that linseed is the major drying oil used in paints and varnishes, and is also required in production of all types of mechanical equipment used on farms and in household appliances. This will make the increased production of flax of prime importance to farmers as well as to other industries.

Mr Josten further explained that flax production could be a profitable crop, under favorable conditions and that the added advantage of federal crop insurance available in the flax area, would remove fear of crop losses.

"A limiting factor," said Josten, "in maximum production is the seed situation and Hancock County farmers are asked to aid the County AAA Committee in getting the following data:

1 The intended 1947 flaxseed acreage.

2 The amount of seed on hand.

3. Any surplus seed on hand.

This information may be given either to the township AAA committeemen at the township sign-up meetings, or may be sent directly to the County AAA Office."

Mr. Josten concluded that Hancock County farmers can help offset the scarcity of fats and oils by making a real effort to increase flax plantings this spring. Seed should be secured at the earliest date possible.

Nearly 30,000,000 persons get their mail from U. S. rural mail carriers.

Honored At Farewell Party

The Roy Halfpops of Goodell were honored with a surprise farewell party Tuesday evening in the Bill Sheriff home. The Halfpops were presented a purse. They have lived 17 years on this farm 1 mile west of Goodell and are moving to a farm northeast of Kanawha. A brother, John Halfpop and family, of Latimer will be the new tenants on the farm they vacate.

County-Wide Meeting On Livestock Diseases Is Planned For Tuesday Nite, March 11th

A county-wide Livestock Disease meeting will be held by the Iowa Farm Serum Company at the C. D of A. Hall in Garner, Tuesday nite, 7:30 p. m., March 11th. The Serum Company will distribute dividend checks on the 1946 business. There are some 180 checks to be distributed amounting to $1,390.00. Forty-seven of the checks are for more than $10 00, the highest one being in the amount of $41.51. This is proof that it pays to trade with your Farm Bureau Company.

Attend this Livestock Disease meeting and hear the discussion on the control of disease

John Paul Jones was the first naval commander to fly the Stars and Stripes as the American flag.

To assure a good fit in a home-made dress, necessary alternations should be made on the paper pattern before cutting the material.

THIS MAY BE DIRTY, BUT . . .

. . . we're talking about dirt! Despite statements of "self-washing" in many milking machine ads, NO machine can wash itself. *Not even the Surge*—which has *fewer* parts and *less* rubber to wash than any other! Those are FACTS . . . and we repeat what we've been saying for 14 years:

"In order to produce clean milk, the machine must be washed clean after every milking—not simply rinsed and placed in a strong sterilizing solution. You cannot buy any magic compound that takes the place of thorough washing.

"It takes a clean machine to produce clean milk; don't let anybody tell you different!"

Dishes and other utensils have to be washed. So do milking machines! Washed first, then sterilized. If you don't wash the machine EVERY DAY but simply sterilize it—just remember that DIRT IS STILL DIRT even after it's sterilized! You can wash SURGE easier and quicker than any other machine AND be sure of producing clean, low count milk.

Should Plan Permanent National Farm Program

Local community discussion groups are being urged to take up the problem of a permanent national farm program in their March meetings, says W. H. Stacy, Iowa State College extension sociologist.

Pointing out that while the Steagall support prices will guide farm policy for 2 years, Stacy emphasizes that these 2 years should be devoted to the ironing out of problems affecting a long-time program

In the March Program Service, which is sent to rural leaders in the state, Stacy persents an outline to be used in dicussing the question "Is comething wrong with parity?" While the present support prices are based upon a 1910-14 parity basis, there seems to be a growing realization that changes in the parity base or a completely new system of establishing support price will be needed if supports are used in a permanent program

The outline for the March discussion groups consist of a series of statements regarding farm policy. Individuals at the meetings are asked to indicate whether they agree, disagree or are undecided about the statement. Typical of the statements is the one that reads "Adequte dies should be provided for all people in America and this is the first consideration in shaping a national farm policy"

On the specific question of parity, the statement reads "Price relationships of 30 years ago are out of date and any continuation of a parity price relationship program between farm costs and farm prices should reflect changes since 1901-14 in consumer choices, changes in farm costs and changes in cropping systems."

A total of 18 such discussion statements are included in the outline Local groups which do not now obtain the Program Service may obtain it by writing the Extension Service at Iowa State College.

TREAT FLAX SEED, SOW EARLY ON CLEAN GROUND

Iowa farmers who are planning flax for the first time this year are reminded by Iowa State College agronomists to treat their seed and sow it early on clean ground

Seed treatment is an aid in controlling weeds because it helps in obtaining good field stands. Using a half ounce of New Improved Ceresan per bu. for treating has increased yields from 1 to 3 bushels per acre compared with the same seed not treated.

The best time to sow flax is at oatseeding time or just as early as soil can be worked. Early sowing puts the flax ahead of the lategerminating weeds, the agronomists say, and usually enable flax to blossom and fill before hot weather

Flax should be planted on fields where clean-cultivated crops were grown last year In preparing the seedbed, following corn, the field should be disked too deeply Deep disking turns up new weed seeds. And flax does best on a solid seedbed Soybean stubble usually requires rolling for best results.

The agronomists say that many farmers who have been able to get seed are sowing flax because $6 support price, Minneapolis basis, guarantees a good price and because there is a scarcity of oat varieties which resistant to Helminthosporium blight. Flax offers less competition than oats as a nurse crop for clover and alfalfa

Recommended varieties for Iowa if they can be obtained are Redwing, Biwing, Koto and Bison.

SATISFIED

At Indianola, Leland Gillis, a second grade pupil, was curious as to what would happen if he stuck his foot into a storm-cave ventilating pipe Unable to remove his foot, he was pinned there until his teacher came to the rescue, untied the shoe and released Leland His curiousity was satisfied.

Graduation Watches

* • *

There is definite shortage of good watches and there will continue to be all this year at least For the past two months we have been building up our watch stock and while we have a fair stock now we do not have as many as we would like. Therefore we suggest that if you have a graduation watch to buy it would be well to do it soon while the selection is larger.

As we have always done in the past we are still consistantly refusing to buy any watches which do not meet our rigid requirements Our expert watchmakers inspect all makes of watches which are put in stock thus assuring our customers the best watches we can get.

There is always something new at Kyseth's

GOOD WRECK

When his car stalled on a railroad track at Lemars, with a passenger train coming, E. Swanson got out of the car, calmly walked back to watch a good collision. He reports that the chrome work flew through the air like pieces of glistening ice or diamonds, and made a very pretty sight. The engineer stopped the train and came back and shook hands with Mr. Swanson for his good judgment in abandoning his car in time.

AROUND IOWA

SAVED LIFE

At Algona, Albert Stewart, St. Paul truck driver, looked up at a railroad crossing to see a fast freight bearing down upon him. He jumped from the cab in time to save his life. His truck and semi-trailer, loaded with plaster board, were demolished in the collision.

SLED ACCIDENT

At Chariton, Marion Peter, 22, was coasting down hill on a sled and collided head-on with another sled on which Caryl Storms, 21, was riding Peter was killed and Storms seriously injured.

EXPENSIVE DICE

In Plymouth county district court, Emil Beeler has filed suit to recover $1,775 lost by him in a crap game.

TRIPLETS

At Storm Lake, "Spotty," a cow belonging to Fred Zinn, has on two occasions given birth to twins. Last week Spotty rose to new heights and delivered triplets calves. The proud owner says the triplets will apparently survive, giving him "three of a kind" to add to Spottys original two pair, or a full house.

NEW CARS

Jefferson, Iowa, residents are still shuddering about a highway calamity near that city recently. A semi-trailer, loaded with four new automobiles, upset. The cars were returned to Detroit.

NO TRUCK

Art Welch, farmer of near Clarinda, lost his fram home as a result of fire recently, now he wishes that his township had had a fire truck. The proposition for a truck came two years ago, lost by two votes.

Lice Reported On Many Feeder Cattle In Iowa

Iowa farmers are reporting the heaviest infestation of lice on their feeder cattle in years, says Harold Gunderson, Iowa State College entomologist. There also have been numerous reports of lice on dairy cattle.

One sure sign of lice, Gunderson says, is when cattle begin scratching on feed bunks, buildings or other places where they can relieve the lice. When they do that, it's high time to spray with DDT or use rotenone.

If your cattle have grubs, rotenone will get rid of both pests. But it requires two applications of either spray or dust from 10 to 18 days apart.

One application of DDT will take care of lice. If you prefer a spray, use 1 pound of 50 percent DDT wettable power in 12 gallons of water A gallon per animal, applied thoroughly around the tail, head, ears and other parts hard to reach, is sufficient. For dusting, use 10 percent DDT dust applied with a garden dust gun.

CONTRACTS LET FOR TWO BRIDGES

Hancock County Supervisors awarded a contract to the Pittsburg Des Moines Steel Company for material in the construction of two bridges spanning the Boone River near Corwith, and awarded a contract to the States Construction Company of Des Moines for the construction of the same. County Engineer C. F. Merten advises that the approximate cost of the two structures will be $28,000.

Fractures Wrist

Mrs. John Pannhoff had the misfortune to fall Saturday morning at her home northeast of Klemme when she slipped on the ice. Her right wrist was fractured in the fall.

After Hannibal crossed the Alps in 218 B. C., the Romans held possession of Gaul (ancient name of France) until 428 A. D., when the Franks, a Germanic people, expeled them as a governing class, and began the Kingdom of France, which then included Beligum and the Rhine valley to the sea, as well as much of Germany.

Turkey meat consumption is becoming a year-around habit, as a larger proportion of birds are being eaten in the off-season from February to August.

NO PROSPECT FOR POOCHES!

An Ames, Iowa newspaper contained the following article on the dog situation in that town·

"Prof. I. W Arthur of the Department of Economics and Sociology is reported to be somewhat concerned over the Ames dog population. Ames requires a $1.50 license for male canines and a $3.00 fee for females According to licensing statictics there are 472 dogs in Ames: 471 males and ONE female With these figures, we feel safe in predicting a rapid decline of local dogs. Literally speaking, that is."

Wyomng was one of the first states to maintain at its own expense a service for the placement of teachers.

From where I sit ... by Joe Marsh

A Definition of Our Town

Somebody defined our town just the other day as "A place where the people talk about you behind your back, and come to wait on you when you're sick."

I've got to admit there's something to it. A lot of our folks are inclined to be pretty outspoken and quick to criticize . . . even about little things, like a woman's hat, or a man's preference for a glass of beer, or the color of Cy Hartman's new barn.

But when anyone's in trouble, those differences and points of criticism are forgotten . . . and folks become neighborly and helpful, like they really are.

From where I sit, criticism never did much harm to anybody, so long as folks don't let it guide their actions . . . so long as they respect our individual preferences, whether they apply to hats or beer. That's the way it is in our town, anyway, and I hope that it's the same in yours.

Joe Marsh

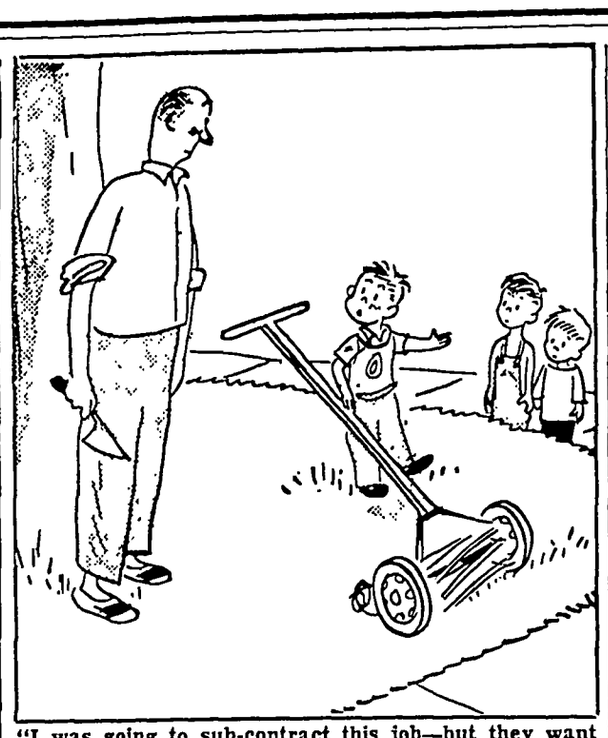
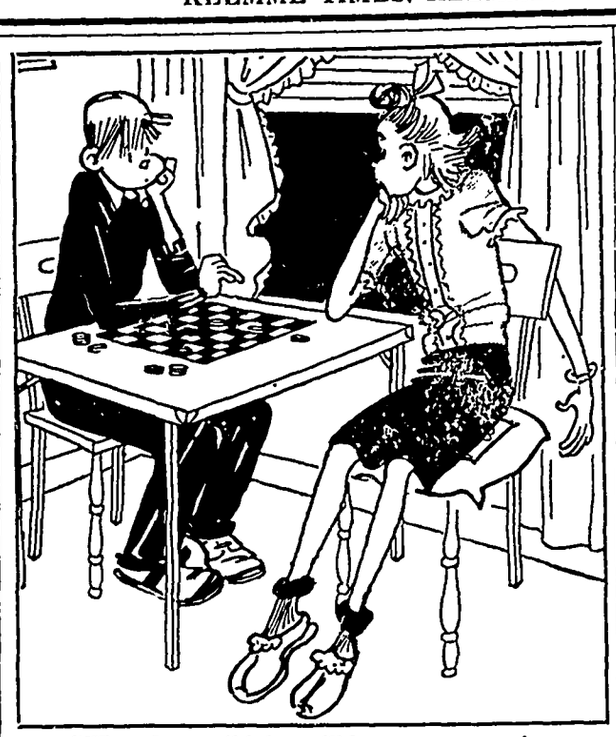
CROSS TOWN
By Roland Coe



"I was going to sub-contract this job—but they want more than you're payin' ME!"

BOBBY SOX
By Marty Links



"When do you think you'll have money again—so we can go to a show?"

Fatal Ignorance

Mike Clancy had been working on New York harbor tugboats for 50 years when he fell overboard and was drowned. This brought about a very fine wake, at which the highest praise was given the deceased and all the traditional ceremonies were observed.

During the proceedings, a friend of the widow asked her: "Did Mike leave you well fixed?"

"Shure, an' he did that. 'Tis fifty-thousand he's after leavin' me."

The friend rolled her eyes heavenward. "Tch tch tch," she said. "Think of that. And him that couldn't read nor write."

"Yes," agreed the widow, shaking her head seriously, "nor swim."

Half and Half

"Hello, Henry," said Joe to a friend he had not seen for several months, "how's everything?"

"Ain't you heard, Joe?" Henry replied. "I'se been divorced."

"Do tell!" said Henry. "What did you and your woman do with dat house you-all owned?"

"Oh, we divided it up."

"Divided yo house?" rejoined Joe, looking slightly puzzled. "How?"

"Fifty-fifty!" said Henry. "She takes de inside an' I takes de outside."

BURNING ORBS

Asked by the irate cop, "Where's the fire?" the pretty miss replied. "Why officer, in your great big beautiful eyes."

Information

When the conductor came through the train to collect fares, mother explained: "Sonny is only five years old," as she handed the conductor her fare.

When the conductor had reached the far end of the car it occurred to the boy that a very important bit of information had been overlooked, so he shouted to the conductor: "Mother is 36!"

Who's Crazy Now?

An attendant in a mental home was making his evening rounds when he came upon one of the patients industriously fishing in a washbasin with rod and line.

Wishing to humor the man, the attendant asked him if he had caught anything.

"What!" said the patient. "In a washbasin? Are you crazy?"

Reassurance

A stew was staggering along Main street with one foot on the pavement and the other in the gutter.

A passerby disgustedly said: "Brother, you're drunk!"

The stew's expression of gratitude was profuse. "Oh, thank you, thank you!" he said tearfully. "I thawt my leg was off!"

Get Set First

"Have you asked your husband's advice about it?"

"Not yet, but I'm going to as soon as I decide what I intend to do."

LONG EARED LAMBS

"Yes, sir," panted the new shepherd, "I got all the sheep in, but I had to run some to get the lambs."

"Lambs, you idiot! Those 14 little ones are jack rabbits!"

Back Talk

"You seem to have plenty of intelligence for a man in your position," sneered a lawyer, cross-examining a witness.

"If I wasn't under oath I'd return the compliment," replied the witness.

What a Play!

Playwright — That suit you're wearing looks as if you had slept in it.

Critic—I have. I wore it last night to the opening of your play.

Bag of Bones

Mrs. Smith—I wonder if you would be so kind as to weigh this package for me?

Butcher—Why certainly. It weighs exactly three and a quarter pounds.

Mrs. Smith—Thank you. It contains the bones you sent me in that four-pound roast yesterday.

Judicial Error

"Her husband was a judge, wasn't he?"

"Everybody thought so till he married her."

THE HEART WAY

Plan some home-made Valentines to send to the gals and the guys in your life. They're lots of fun to make, and more fun than the ready-made ones to receive. We asked our Hi-Styles scouts for some ideas—and they came through with inspirations.

Best Wishes—Do you wish he'd be your Valentine? Then, send him a chicken wishbone that has been dried and then painted with red nail-polish. Tie it to a heart-decorated card with this verse:

"I've decided you're my Dish,
Am I going to get my Wish?"

Piece Work—Cut out a big red construction paper heart; then cut the heart into many small, jig-saw pieces. Send all the pieces in an envelope with this verse:

"My heart is broken; I wonder-whether
You'd care to piece it back together."

Word of Mouth—On a plain white card imprint your own liptograph with dark lipstick. (You just kiss the card and there it is.) Write this verse underneath:

"Who's your Valentine? Take my tips,
And find the girl who owns these LIPS."

Literary Love — Make a fancy bookmark out of cardboard or construction paper with lots of hearts and flowers Clip it to a card with this verse

"A Valentine bookmark like the above means
Please think of me when you're reading the love scenes."

* * *

JABBERWOCKY AND JIVE

Speevy—Don't ask us why, but it can mean anything, depending upon your tone of voice The teens are saying it on the west coast.

Mad Grief!—Your new exclamation when you're in a tizzy about something.

Lanasome—The feminine counterpart of Vansome. (As in Turner, of course)

Sign Guy—Your O.A O.

Spellbound—You don't say you're "crazy" about something anymore; you say you're "spellbound" about it.

Rattle, Rattle, Tilt—They tell us it's the new substitute for Hubba Hubba (Will somebody please tell us where it comes from?)

Clammy—Drippy.

History Book—Your diary, because of your making history every week-end.

Lacy Swiss Blouse

Irish lace was added to a simple little dotted Swiss blouse by Dorothy O'Hara for one of the costumes Diana Lynn wears in "Easy Come, Easy Go."

Minute Make-Ups

By GABRIELLE

An oily scalp may be your curse —but there is no curse without a cure! Hollywood stars swear by the old-fashioned salt cure. Rub common salt on the scalp, then tie up your hair in a bandeau. Next morning brush like mad! Then shampoo. Result—a shiny head of hair.

SUNDAY SCHOOL LESSON

By HAROLD L. LUNDQUIST, D. D.
Of The Moody Bible Institute of Chicago.
Released by Western Newspaper Union.

Lesson for February 9

Lesson subjects and Scripture texts selected and copyrighted by International Council of Religious Education; used by permission.

FEEDING THE FIVE THOUSAND

LESSON TEXT—John 6 25-35, 56-58.
MEMORY SELECTION—I am that bread of life.—John 6.48.

Bread! The cry of the hungry peoples of the world for bread has reminded us anew that it is the simple and elemental things of life which are of most importance. Bread, water, light—such things man cannot do without. How significant then that our Lord declared himself to be the bread of life (John 6 35), the satisfying water (John 4:14), and the light of the world (John 8:12).

Our lesson does not deal with the feeding of the five thousand, but the story of that miracle of our Lord is the background for the discourse on the bread of life which is assigned for our study It is one of the most delightfully simple, yet unfathomably profound, portions of Scripture.

The story of how our Lord multiplied the loaves and fishes of a small boy's lunch and fed the multitude presents him as the Creator and Sustainer of all things. The people having been fed, wanted to take Jesus and make him their King (John 6:15), so he went over the Sea of Galilee to Capernaum. But he could not get away from them, for they followed him thither. Meeting them he gave them the instruction they so much needed as he effectively contrasted the temporal and earthly with the eternal and heavenly

I. The Bread of Earth and the Bread of Heaven (vv 25-27).

They sought Jesus not that they might receive spiritual blessings, but that their stomachs might be filled (v 26). It was not a high motive, but an understandable one. Hunger, or the fear of hunger, threatens so many of the people of this earth that one does not find it in his heart to condemn them too severely.

Yet it was a low motive and one which caused them to entirely miss the greatest and most blessed provision of God for their every need The bread of this earth, bearing the imprint of a human maker, would soon leave them hungry again, and eventually they would die. The bread of heaven, bearing the seal of the Father (v 27), would fully satisfy them for all eternity.

Note the folly of those who labor for the reward which this world can give, but who neglect their eternal welfare (v. 27). How foolish, too, is the Christian who spends his whole life and his talents in the pursuit of money and invests little or nothing of time or ability in the service of God!

II. The Work of Men and the Work of God (vv 28-33).

Entangled as they were in earthly things and desires, they seemed for a moment to reach out toward the things of God. Jesus had been talking about everlasting life and the bread from heaven; they wanted to know what they could do to merit and receive it.

It is quite typical of man even to this day that he thinks there must be some way that he can come through to eternal blessedness by way of his own works. We shall see how effectively Jesus dealt with that folly!

The only work that man can do to meet God's first demands and inherit eternal life is to believe in Christ (v. 29). Men want to add up works of penance, works of charity, deeds of righteousness, character development, the observance of religious traditions and ceremonies, the offering of prayers, and so on without end. Jesus sweeps aside all this with one brief word, saying in effect, "It is not a question of do; it is a matter of believe."

Works is not the answer to any spiritual need, but faith in Christ. We must trust God and believe in the One whom he has sent; then we are ready to go out and do his will!

They (yes, and we too) must now face the alternative

III. The Way of Death and the Way of Life (vv. 34, 35, 56-58).

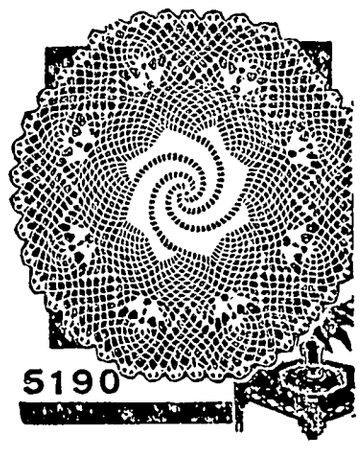
One could wish that the request made in verse 34 could be taken at face value, but the fact that they later turned away and left the Lord indicates that this was again a desire for physical bread. There was probably a vague desire for eternal life, too, but not enough to make them follow through with appropriate action. How much they were like folk today who want the benefits of Christianity, but who will not take up the cross.

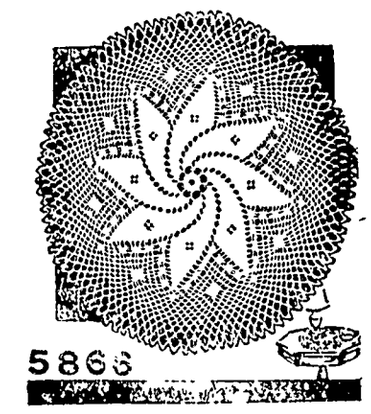
There is here a bold contrast between the things of this earth, which, as we use them, perish (and, alas, we perish with them), and the things of God which are of eternal value and power.

Which shall it be, reader, for you? Are you willing to go on day after day on the way of death, or will you today take Christ, who is the way of life?

NEEDLEWORK PATTERNS

Pretty Crocheted Hood for Tots Doilies in Popular Swirl Motif





Snug-Fitting Hood

BRIGHT red and white wool fashions this pretty snug-fitting hood that's easy to crochet and inexpensive, too Use red or any other gay color wool for the one piece hood section—use white for the edgings on the face-framing ruffle. White satin ribbon ties at the back of the neck.

Thank You!

We would like to thank each of you personally, but as at is impossible, we take this means of thanking our many friends and customers for their patronage and good will extended to us during the 22 years we have been in business in Klemme. We assure you it was greatly appreciated.

It is our wish that you continue to patronize the store under the new management of Mr. and Mrs. Ray Jorgenson, Jr.

Sincerely,

Wilson Pharmacy

Mr. and Mrs. P. M. Wilson

LIKE MY DAD SAYS...

"Put new life in old pasture for more milk"

WE'RE giving our pastures a shot in the arm this spring. And they need it. Last summer we noticed a lot of bare spots . . . weeds were getting ahead of us . . . there just wasn't too much grass for the cows.

Now, we're going to get tough We're going out there with a disk and give the ground a good going over. We limed and we tested to see if the old pasture needed some phosphate fertilizer. After that we'll seed a good grass-legume pasture mixture.

R DRAINAGE IS COSTLY TO FARMER

ffective Drainage System Usually Pays For Self In Few Years

ecent Iowa studies reveal poor drainage cost farmers ne county alone an estimat- 400,000 bushels of corn, 50, bushels of oats and 20,000 els of soybeans during a le year

his, believes R. A Norton, conservationist at Iowa e College, indicates the im- ance of carrying out a good drainage program. In most s, the cost of putting in an ctive drainage system more pays for itself in a few s through increased crop lds.

uch of the damage in the dy studied was found on s supposedly completely ned. Water had remained localized low spots or pockets enough to drown out the Later work on the same ject showed that corn yields reduced considerably at ances greater than 50 feet m tile lines.

Other Studies

Other studies at the experi- al farm in Howard County w that poor sidehill drain- resulted in delays in the paration of land for crops in spring and in expensive and e-wasting machinery opera- problems throughout the on. This farm is a typical e which is underlaid by a , plastic subsoil through ich water drains only with siderable difficulty.

Because drainage is a costly blem, Norton suggests survey- the drainage situation on in- dual farms now before spring s start. Present systems y need additional tile lines or s may be clogged and need ning out. If tile are open haven't been carrying out water in low spots, some m of surface drainway should installed.

CORRECTION

SPARE STAMP IS GOOD FOR SUGAR

10 More Pounds Will Be Allowed April 1

The office of temporary controls announced Monday that spare stamp No 11 in OPA family ration books will become good April 1 for 10 pounds of sugar.

Validation of the 10-pound stamp will mark OPA's change-over from the 5-pound ration procedure for household users. The current stamp, No. 53 good for 5 pounds, will expire March 31.

Stamp No. 11 will be good through September 30 but OPA said a 2nd stamp good for 10 pounds will be validated July 1 providing sugar imports meet expectations.

OPA officials said it is possible that still another 10 pounds, bringing the year's total for household users to 35, may be made available Sept. 30.

OPA emphasized that new stamps being validated include sugar for both regular home and canning use No separate stamps will be issued for canning. Last year household users got 15 pounds of sugar for regular use and 10 for home canning

The Klemme American Legion will have another of their stag parties at the Community Hall on Tuesday evening, March 18, beginning at 8:00 p. m. All servicemen are invited.

Former Klemme Couple Celebrate Golden Wedding

(Ladysmith, Wisconsin News)

A golden wedding anniversary was observed Sunday afternoon, Feb 23, at two o'clock in the Methodist church when Mr and Mrs. Gustaf H Carlson repeated marriage vows of fifty years ago.

As Mrs. Erickson, of Glen Flora, played the wedding march from Lohengrin, the wedding party marched to the candlelighted altar The bride and groom were attended by Mrs. Frank Cresto and Mrs. James Cherry, Jr, sister and sister-in-law of the bride, and Howard Wilson and Weaver Williams, sons-in-law The ceremony was read by Rev Harry Lee who also presided at the program

Dale Riley accompanied at the organ by Mildred Farley, sang "I Love You Truly" A bouquet of yellow roses was presented to Mr and Mrs Carlson by Ronald Wilson, the eldest grandchild present, in behalf of the 25 grandchildren.

In the program following the ceremony, the history of the wedded life of the couple was read by Emma Markison, who also read a report of the wedding as recorded in the Bureau County Republican in 1897 The male quartet offered several hymns Favorite hymns were sung by Carol and Beverly Ellison, grandchildren, and daughters, Mabel, Melda and Clarice Arthur Carlson sang a song dedicated to his grandparents by his maternal grandfather, Arthur Wellmeyer, of Klemme, Iowa.

Harold Van Patter offered an accordian solo and Arne Bergquist played an organ selection Congratulatory messages and poems from friends were read by Nellie Zoeller Informal comments were made by Jim Van Patter. Mrs A O St Clair and Mrs B B Spalding

A reception was held at the village hall, where further music provided by Dale Riley and Arne Bergquist was greatly enjoyed

Mr Bergquist, a native of Sweden, played several piano selections. His presence was especially appreciated since he had come from Mr Carlson's homeland.

The bridal table was beautifully decorated with a three-tiered wedding cake as a centerpiece. Miniature replicas of the bride and groom of 1897 and as of 1947 stood in arches of gold and white.

Over 100 gathered to observe the occasion with the Carlsons.

The nine children, Manila, Alva, Annabelle, Florance, Melba, Edith, Mabel, James and Robert, were present for the event.

Out-of-town guests were Mr. Frank Cresto, Wenona, Ill; Mrs. James Cherry, Jr., Princeton, Ill.; Mr. and Mrs. Weaver Williams, Sussex; Mr. and Mrs. Fredrick Quandt and daughters, Milwaukee; Mr. and Mrs. Robert Carlson and daughter, Waukesha; Mrs. Clarence Bredlow and daughters, Rockwell, Iowa; Mr and Mrs Reeve Ellison and family, Rhineland, Mr and Mrs. Marvin Nelson and son, Ladysmith; Mrs Anna Kipp and Mr. and Mrs L Markison, Eau Claire; Mmes Harry LaTour, Clade Blain, Warren Bartels and the latter's daughter, Weyerhauser, Mrs T Caldwell, Mrs W Henry and daughter, Arne Bergquist; Mr and Mrs Martin Nelson, Mr and Mrs Frank Shesky, Mrs. J Lindoo and Roger Lindoo, Ladysmith

Of their fifty years of married life, the Carlsons have spent 27 of them in Wisconsin They came to Ingram in 1920 from Klemme, Iowa, and operated their farm here until 1936 In 1941 the family moved to Ingram.

TOWN ELECTION WILL BE HELD MONDAY, MARCH 31

An election of town officials will be held in Klemme, Monday, March 31st A mayor, councilmen, treasurer and assessor will be named

Those who have political aspirations should get their names filed with the Town Clerk ten days before the election.

Old Ticket Filed

A complete ticket was filed this morning consisting of the present mayor, councilmen and other officials.

If another ticket is to be filed it must be done so by Saturday midnight this week.

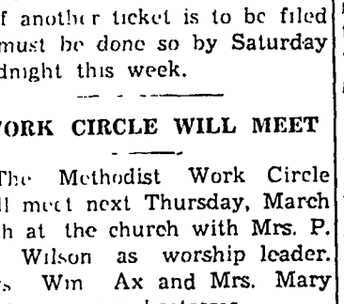
WORK CIRCLE WILL MEET

The Methodist Work Circle will meet next Thursday, March 20th at the church with Mrs. P. M Wilson as worship leader. Mrs Wm Ax and Mrs. Mary Waterman are hostesses.

Mrs Art Wellemeyer's Circle No 4 met at the home of Mrs. Wm Ax last Wednesday A social time was enjoyed and lunch was served

Circle No. 2 met with Mrs. E. G Beer and Mrs. J. C Thomas as co-hostess Tuesday afternoon to celebrate Mrs. Wilson's birthday A social afternoon was enjoyed and a nice lunch was served by the hostess.

HELLO, FOLKS!



Mr and Mrs. Ervin "Bobbie" Blank are the proud parents of a 4 lbs. 13 oz. baby boy born on Thursday afternoon, March 6th at the Garner Nursing home.

Mr. and Mrs. Donald Braner of Goodell are the parents of a son, born Saturday evening, March 1 at the Belmond hospital.

Move To Send Shamrock Squad To State Basketball Tournament

SPRING BURNING UNWISE

With spring cleaning just around the corner the Conservation Commission remids Iowa's farmers and landowners that the practice of burning over woods and fields is in most instances, unwise. Research proves that spring burning does not improve pasture or hay land and it is a serious menace to timber production. Experiments with bluegrass pastures have shown that burning in winter or spring results the following year in from 52 to 71 percent decreaso in grass production. Where the burning is continued year after year perennial grasses and other forage plants are replaced by annual weeds nearly worthless for pasture.

Late spring burning is particularly bad from a game standpoint. At this time of year almost every grassland fire burns alive nests of helpless baby rabbits. These same grassland harbor the homes of ground-nesting birds and even a fast moving fire will invariably destroy the nest and its contents.

John Wakesfield, Superintendent of Forestry, suggests the following rules by which fires can be kept under control where burning of brush piles and debris is deemed necessary

Avoid burning on dry, windy days. Do not burn during the hot part of the day Wait until late afternoon when the wind has died Fires burn more slowly and are easier to control during the evening and early morning.

Have enough help available to control the fire if it spreads. Rake a wide path or fireline around the area to be burned Arrange brush in small piles Burn one pile, then feed on the brush from nearby piles to keep the number and size of burning piles to a minimum.

A FINE EXAMPLE OF WHAT REFEREEING SHOULD NOT BE

Basket ball fans who attended the final games in the district tournament at Mason City were all pretty much set against the referees.

As far as the Klemme - Rudd game was concerned the fans thought the game got a bit on the rough side but felt Klemme got beat by a better team

The Forest City - Mason City game was a different story as the fans were thoroughly disgusted with the referees and felt that Forest City got a raw deal. This game in particular was a very good example of what refereeing should not be.

Followers of the sports again said "You can't beat Mason City in a tournament on their own floor." Look up the past records and it looks like the statement might be true.

As an aftermath of the game the father of one of the Forest City players took a healthy poke at one of the referees. He was arrested and fined $10, but said "It was sure worth it."

MRS. P. M. WILSON HONORED AT PARTY MONDAY AFTERNOON

Mrs. A. J. Kudje, Mrs. Geo. Lawhorn and Mrs. Ed. Jacobs honored Mrs. P. M. Wilson at a bridge party at the Jacobs home Monday afternoon. Bridge was played at four tables.

Mrs. A. H. Dulmes won high score, Mrs. Leo Esbeck, second high and Mrs. W. F. Missman, third high. Out of town guests were Mrs. Chas. Papousek of Belmond, Mrs. Leo Esbeck of Ventura and Mrs. E. G. Schaeffer of Forest City. Mrs. Wilson was presented with a gift. Lunch was served after the games.

MORE, BETTER MACHINERY ON WAY FOR FARMER

While Iowa farmers must continue to cling to much of their wartime machinery this year, they can do it with brighter hope of better things to come, says Dale Hull, Iowa State College agricultural engineer

The peacetime swing accents saving labor and increasing efficiency . . taking the drudgery out of traditionally burdensome farm tasks. The move may not revolutionize farming but it promises some drastic changes.

Among the significant trends in farm machinery, Hull sees a shift from low compression to high compression tractor engines which will burn gasoline instead of tractor fuel. The goal is more efficient and economical farm power **Better Tractor Engines**

With a more efficient engine to power his tractor, finger-tip hydraulic control will make his work easier, get the job done better and faster. Already adopted by several manufactures, Hull sees its eventual use on all makes of farm equipment. The reason: hydraulic control makes depth cotnrol easier, provides a lift for crossing waterways in contouring and provides a drive for such accessories as manure scoops. It can be used on all machines where height of cut, depth of tillage or other major adjustments are importance in the operation.

There's news, too, for the man whose farm has been too small for profitable use of tractor power To meet that need there's a midget tractor already being manufactured by two companies. It's intended to market for less than $1,000, including a set of mounted equipment.

Ease Harvesting

Other innovations cited by Hull are the efforts to lighten the burden of hay making and silo filing Here the answer is coming through self-tie hay balers, bale loaders and field forage harvesters which take the crop from field to storage almost untouched by human hands.

To this list can be added new dusting and spraying machines for DDT and 2,4-D to help in insect and weed control; new equipment for the farm shop; a lister which may bring new corn culture to Iowa.

These are but a few of the developments destined to reshape the working day on the Iowa farm. The return of competitive selling, expected in 1948, promises still more changes. Until then, the Iowa farmer is using what new equipment he can find with an eye on better thing to come.

WEDDING DATE SET

Miss Eva D. Velau

Mr. and Mrs. William Velau of Klemme announce the engagement and approching marriage of their daughter, Eva, to James G. Fatland, son of A. J. Fatland of Clear Lake. The wedding will take place March 22.

LET'S SEND THE SHAMROCKS TO THE STATE TOURNY

The Klemme high school Shamrocks basketball team have a fine record this season, having lost only two games during the regular season and for their going ahead to win the county tournament, a sectional tournament and then going into the district to win one game against Armstrong but were defeated by Rudd in the final game after putting up a real battle.

Klemme lead 8 to 4 at the end of the first quarter and took a 15 to 10 lead at the half. Rudd forged ahead 24 to 20 at the end of the 3rd quarter which they stretched into a 36 to 26 lead to win the ball game. Rudd's tall, heavy players were too much for the fighting Shamrocks in the last quarter but Rudd did not gain a safe lead until midway in the last quarter.

Farmers Started Fund

Klemme has a lot of farmer fans who followind the Shamrocks all winter. Several farmers have "kicked-in" sizable donations to create a fund to send the Shamrocks squad to the State Tournament at Iowa City with all expenses paid. They appointed Orville Stokesbary at the Northern Lumber Company to receive contributions.

Let's send our boys to the State Tournament and let's all kick in a few dollars to show them we have appreciated their fine play this winter. Anyone can contribute to the fund. Just hand your contribution to Orville Stokesbary within the next few days, so that all arrangements can be made for the team.

DEAN JACOBS, EDDIE GROSSHUESCH ON DISTRICT TEAM

Two Shamrocks gained berths on the All-District First Team named by Globe-Gazette.

Dean Jacobs was named center on the first team and Eddie Grosshuesch was named one of the two alternate players.

Others named on the First team published in the Globe-Gazette Monday were:

F-Lundquist, Swea City
F-Saul, Swea City
C-Jacobs, Klemme
G-Bornstein, Rudd
G-Vega, Holy Family
Alt.-Folkerts, Rudd
Alt.-Grosshuesch, Klemme.

MRS. BLOCK RECEIVES LETTER FROM GERMANY

Mrs. Lawrence Block last week received a letter from a refugee women in Germany, Karlsch, Kreis Greshen, U. S. Zone, Germany in which she thanked the Lutheran Church of Garner for clothing sent to the needy refugees. The letter was written in English.

NEWLYWEDS HONORED AT PARTY SATURDAY EVENING

Mr. and Mrs. Kermit Schlei entertained a number of young people at a party at their home southwest of Klemme Saturday evening in honor of Mr. and Mrs. Melvin Schlei, who had returned from their honeymoon trip to Mexico.

The evening was spent playing 500 after which the hostess served a nice lunch. Mr. and Mrs. Schlei were presented with a number of nice gifts.

BASEBALL MEETING CALLED

Those who are interested in having a baseball team in Klemme again this season are invited to attend a meeting at the Northern Lumber Co., Thursday evening this week at 8:00 o'clock.

—Orville Stokesbary

Fete Recalls Strides in Telephony

Bell's Varied Achievements Revealed During Centenary

By BAUKHAGE
News Analyst and Commentator

WNU Service, 1616 Eye Street, N. W., Washington, D. C.

WASHINGTON — Everybody has been talking telephones because of the well-publicized Alexander Graham Bell centenary. Reading the pounds of publicity, I learned more about Alexander Graham Bell than I ever knew before. I had read of how he dreamed of making the telegraph instrument "talk" and how and why his dream came true I didn't know about his father's deep study of phonetics and his own interest in "making speech visible," in teaching the deaf to talk, or that he was an accomplished musician or many other facets of this remarkable man's remarkable history.

I already knew a little about the telephone business from first hand observance.

It was just about 20 years before I ever used a telephone that Bell, thanks to his harmonically trained ear, found on that day in 1875 that what he thought could be done, had been achieved in his own laboratory on Court street, Boston. From then on it was just a question of removing "the bugs." The next year he was demonstrating his instrument before audiences with conversations over several miles of wire. Before he died at the age of 75, people were talking over an underwater cable from United States to Cuba.

I doubt if the great inventor were to return to earth today he would

A study of Alexander Graham Bell in later life shows how he spent many hundred "man-hours" of his time—tabulating statistics concerning the deaf. At one time he produced a "Memoir Upon the Formation of a Deaf Variety of the Human Race."

be greatly surprised at the strides in telephony which have been made since his death, great as they have been. He may not have considered, however, one of the temporary problems (electrolysis) which created many a headache for the telephone companies and which helped, indirectly, to provide the writer of this column (who was to be a future extensive user of telephone facilities) with a part of his education.

To explain the above remark:

(1) 150,000 miles of program transmission circuits now are provided by the Bell system for use of radio networks. (It's "wireless" to your home from your radio station, but it's "wired" between stations.)

(2) The writer has been using a lot of these circuits five days a week for most of the last 14 years.

(3) He worked two college vacations as "electrolysis inspector" for the telephone company.

To explain further:

(1) You know how electroplating is done? The object—say it's a spoon—to be plated is suspended in a "bath" containing the material with which the spoon is to be plated. An electric current is passed through the substance in the bath into the spoon. The substance follows the current as far as it can, which is the surface of the spoon. Anyhow it moves.

(2) You've seen the lead-sheathed cables containing telephone wires being pushed through the manhole into conduits that lie under the pavement. The sheath on the cable protects the insulated wires that carry the current which rings your phone bell and carries your voice.

(3) But other electric currents get loose and run all over the place. You'd be surprised but almost every foot of earth or anything that will conduct an electric current in a city has some electricity flowing through it. When the power companies were careless about preventing leaks in their wires it was worse. Stray currents left power wires or the rails of electric railways and took a short cut back to the power house.

(4) Wherever they found a good conductor like a lead cable, that was like thumbing a ride for the wandering volts and amperes. So far so good But eventually they had to leave the cable, to find their way to a better conductor or just to say "so long" and struggle back to the dynamo

(5) When they did that, "electrolytic action" set in. The lead in the cable sheath followed the current as far as it could (like the substance in the bath) and left the sheath porous. Dampness and destruction came in and soon your telephone line was out of order.

My job consisted of sitting by the hour watching the face of an ammeter (which registers the direction and flow of electric current) and discovering where the current was escaping Then I had to get the power company to do what it could to stop leaks and the telephone company did all it could to keep stray current out or to provide a safe exit for what got in.

In the process I learned much more than I earned—not much about electrical engineering but I had a fine worm's-eye view of several Middle Western cities—bird's-eye views, too, for I worked in cable boxes up on poles, as well as down in manholes, and also learned that it isn't only newspapermen who "meet so many interesting people."

When I ponder on my electrolytic age and also when I "address the mike" Mondays through Fridays now, I am deeply and doubly grateful to Alexander Graham Bell.

Jones Finally Gets Birthday

One day recently I received a telephone call from my friend Capt. E. John Long, USNR, who is assistant curator of the United States naval museum at Annapolis I detected exultation in his voice and, sure enough, when I joined him at the club he was wearing that "Eureka-I-have-found-it" expression which blooms only on the face of a Bell discovering the telephone, a Lord Carnarvon (and-or) Howard Carter exclaiming as he leans over the mummy-case: "King Tut, I presume?"—or possibly you or me when we finally get a firm hold on the end of our vanished pajama cord.

What happened to Long was comparable. He had recorded the confirmation by his chief, Capt. H. A. Baldridge, chief curator, of the long-suspected but never-proved date of birth of John Paul Jones, father of the navy. And it was fortunate he had, for the post office department was demanding it for the next memorial stamp.

Baldridge already had a letter of Jones' containing this sentence: "America has been the country of my fond election from the age of 13." Since it was known he sailed from Whitehaven, England, in 1760 that would make the birth date (1760 minus 13) 1747.

But the birth date was not actually recorded in any authentic writing, not even the early Jones biography by Charles Sands. However, there came into temporary possession of Captain Baldridge a copy of that work, upon whose margins Janette Taylor had written some caustic comment. Miss Taylor was a niece of Jones who had been a close and meticulous student of her uncle's life and many of his papers which she possessed.

One of her holographic statements re the picture of Jones in the frontispiece was this:

". . . it is even too old, making every allowance for his mode of life, for a just representation of his appearance at the time of his death, he was then only 45 years and 12 days." (His death, 1792, is of record.)

That tied it. No wonder the captains tossed their scrambled eggs in the air like graduating midshipmen. John Paul has an official birthday only two centuries late—and his face on a stamp for a present.

• • •

In an attempt to end mess hall griping, the army aims to make kitchen police a respected and respectable army chore. We'll have to wait on the critical judgment of the long-suffering mess lines before we really know; but meanwhile we'll offer a toast of powdered K-ration lemonade to General Ike and his staff—just for trying.

• • •

DIVERSIFIED DIET . . . Anything from Russian borsch to Italian spaghetti is contained in the lunch pails of students at the American school in Tsingtao, China. The reason: Eighteen nationalities are represented among the students.

Clash on Budget Looms; Union Merger Advanced

CONGRESS:
Budget Trouble

As in the case of reducing personal income taxes, the Republican congress divided on the extent of slashing President Truman's 1948 budget request of 37.5 billion dollars.

While GOP members in the house led by Representative Taber (Rep., N.Y.) favored a 6 billion dollar cut, senate Republicans led by Senator Taft (Rep., O.) stood out for a 4½ billion dollar decrease. It was expected that a compromise figure of 5 billion would be reached, permitting a 20 per cent income tax reduction and a sizable surplus to be applied against the national debt.

House Republicans charged their senate colleagues with having succumbed to military and naval pressure against substantial reductions in army and navy expenditures. Declaring there was room for economy "and an end to extravagance" in every federal agency, including the army and navy, they asserted that the services could take a 15 per cent slash in appropriations without hampering national defenses in the slightest.

Taft replied any cut in military appropriations be held to 10 per cent to assure national security and fulfillment of overseas obligations.

LABOR:
Discuss Unity

Divided in 1935 over the issue of vertical (mass) organization of workers, the "House of Labor" was another tortuous step closer to unity with CIO acceptance of an AFL invitation to merge the two great American labor movements with a total membership of over 12 million.

Significantly, John L. Lewis of the United Mine Workers, who left the AFL to head the new CIO and then returned to the AFL, was named on the AFL negotiating committee headed by Pres. William Green. Familiar with the mechanics and personalities of both unions, John L. is in a strategic position to pave the way for unification.

Representatives of two former AFL unions were named on the CIO committee led by Pres. Philip Murray. They included Emil Rieve of the Textile Workers and Jacob Patofsky of the Amalgamated Clothing Workers. As former units in the AFL, these two CIO unions also can bring their combined experience in both labor movements into the discussions to reach a common ground of agreement.

WHITE HOUSE:
Emergency Ending

Continuing to keep abreast of the GOP, President Truman paved the way for an early end to the national emergency proclaimed in 1939 and extended in 1941.

With the Republican congress bent on restoring normalcy, Mr. Truman again anticipated GOP action by asking the legislators to repeal 24 temporary laws, temporarily extend 12 others, permit another 10 to run out their course, and cut back 12 appropriations.

Among the 24 laws the President tabbed for repeal were those authorizing the secretary of agriculture to buy and distribute food for U. S. territories and possessions; disposal of ships under lend-lease and accumulation of 90 days annual leave for government employees. Laws which he said should be allowed to run their course include restriction of active duty of reserves to emergencies; government construction and use of petroleum lines, and temporary maintenance of housing on public lands.

Trimming of emergency laws would reduce the President's wartime powers still in effect to those covering the official war period, which will end with ratification of peace treaties.

POTATOES:
Seek to Avert Loss

Seeking to avert the loss of at least 20 million bushels of surplus potatoes taken over by the government in support of the 1946 crop, the department of agriculture offered them to commercial exporters and processors for 5 cents a hundred pounds. The support price was $2.20.

The department's latest offer compared with a price of 35 cents previously set for export sale. Because of the low food value of potatoes, their perishability and high handling costs, foreign governments have preferred to purchase more nutritious and less cumbersome supplies of grain.

Inasmuch as they can buy wheat flour at five to six cents a pound, the foreign governments also have been hesitant about paying 15 to 20 cents a pound for dehydrating potatoes. Sale of the potatoes to processors at 5 cents per 100 pounds will bring the price of the dehydrated potatoes down appreciably, providing a stimulus for export.

SHORT OF DEMAND

Improved Medical Care Urged

WASHINGTON. — Present-day medical personnel and facilities fall far short of the demand, Thomas Parran, surgeon general of the United States Health service, declared in calling on congress to provide better medical care for all.

In his annual report on the nation's health, Parran asserted: "We have yet to solve the economic problems of medical care. We have yet to make it possible for everyone, regardless of income, to obtain the basic services needed for protection of his own health and that of his neighbors."

The two major problems confronting public health workers were listed as the extension of necessary health services and the battle against chronic diseases, particularly those of old age.

"As we have gained victories over the major communicable diseases, conditions such as heart disease, cancer and diabetes have moved to the fore as the causes of death," he said.

The surgeon general noted three public health milestones in the past year: Passage of the 375 million dollar hospital survey and construction act, the national mental health act and drafting of a constitution for the World Health organization.

He reported a generally favorable situation in checking communicable disease. Outstanding exceptions were a winter epidemic of respiratory diseases, an increase in the incidence of diphtheria, an outbreak of oriental small pox on the Pacific coast and continued prevalence of infantile paralysis on an epidemic scale for the fourth consecutive year.

Parran said research in the year indicated new and better treatments for malaria, tuberculosis, ringworm and shock. He also noted a new treatment to prevent dental cavities and a narcotic which may prove a valuable substitute for morphine.

THE WASHINGTON SCENE

Two Regions Wield Power In New Senate Committees

By WALTER A. SHEAD
WNU Washington Correspondent.

Editor's Note: This is the second in a series of articles dealing with new congressional committees and their chairmen.

WASHINGTON.—North Central and New England regions wield the balance of political power in the senate as a result of the new committee setup in the 80th congress under terms of the congressional reorganization act.

Of the 14 new senate committee chairmen, eight come from the North Central region, including the states of Ohio, Illinois, Michigan, Wisconsin, North Dakota, South Dakota, Nebraska and Kansas. The New England region is represented by two chairmen from New Hampshire, one from Maine and one from Vermont. West Virginia and Colorado are the only other states represented by committee chairmen. The Middle Atlantic, South Central and Pacific regions are entirely unrepresented.

The list of senate committees and chairmen continues:

Banking and Currency

CHARLES W. TOBEY (N. H.), new chairman of the banking and currency committee, is an independent Republican who votes against his party as often as with it.

Tobey broke with the majority of the Republican senators to support reciprocal trade agreements in 1945 and to oppose restrictive OPA amendments that year. (He changed his mind about OPA by July, 1946, however.) He also voted for the loan to Britain, and, like most Republicans, opposed the nomination of George E. Allen to Reconstruction Finance corporation.

Tobey

A business man turned politician, Tobey was at one time president of the F. M. Hoyt Shoe Co. and also has had experience in agriculture, banking and insurance. He is a former president of Manchester chamber of commerce. He served three non-consecutive terms as a member of the New Hampshire house of representatives, including one as speaker, and one term in the state senate. He was governor of New Hampshire in 1929-30 and was elected to congress in 1932. After three terms in the house, he was elected to the senate in 1938.

Tobey was a delegate to the United Nations monetary conference, which drew up plans for the World Bank and the International Monetary Fund, at Bretton Woods, N. H., in July, 1944.

Expenditures

GEORGE D AIKEN (Vt.) is new chairman of the committee on expenditures in the executive departments, which is assigned the function of keeping tab on executive agencies. The committee is likely to be primarily an investigative body and may be used as the vehicle for the Republican majority in the senate to investigate the Democratic executive branch of the government. It also will have jurisdiction over governmental reorganization. Under Democratic control, the committee has been inactive in the past.

Aiken

A Vermont farmer, Aiken is 54 years old and has been in the senate since 1940. Before that he had been active in politics as a member of the state legislature, lieutenant governor and governor. He is the author of "Speaking from Vermont," a discussion of current problems, published in 1938.

During the 79th congress, Aiken cast more votes against the majority of his party than any other Republican. The records show that he voted with the majority of Republicans only 20 per cent of the time on issues where there was a Republican-Democratic split.

Finance

EUGENE D. MILLIKIN (Colo.), new chairman of the finance committee, which handles tax bills, is by no means enthusiastic over plans of house Republican leaders to cut individual income taxes 20 per cent straight across the board.

Writing a tax bill, Millikin says, "is not an exercise in logic; it's an exercise in necessity." Before undertaking tax revision he wants to see the budget balanced and a long-term debt reduction plan adopted. Then, if possible, he wants to make a thorough study of the tax structure before committing himself to any specific tax-cutting proposal.

Millikin's past record on taxation and financial matters shows that he voted to prohibit the $25,000 salary limitation in 1943, against extension of the reciprocal trade act in 1945, and to override the tax bill veto in 1944. (The vetoed tax bill was criticized by President Roosevelt for failing to provide enough revenue and for granting unwarranted tax relief, "not for the needy but for the greedy") On controversial matters Millikin voted with the majority of his party 84 per cent of the time in the 79th congress. He has the best attendance record in the senate.

Millikin

Millikin, who is 56 years old, has been in the senate since 1941.

In addition to taxes, the finance committee has jurisdiction over tariffs, social security and veterans' affairs.

Foreign Affairs

ARTHUR H. VANDENBERG (Mich.) second ranking Republican in the senate and one of the prime makers of American foreign policy, has two top jobs in the 80th congress — president pro tempore of the senate and chairman of the foreign relations committee.

On no other committee will policy be less affected by Republican majorities than on foreign relations, where Sen. Tom Connally (Dem., Tex.) as the outgoing chairman, and Vandenberg, as the leading Republican, have collaborated closely ever since the San Francisco conference of the United Nations in 1945. Besides going to San Francisco together, Connally and Vandenberg have been co-delegates to the first general assembly of the United Nations in London, the council of foreign ministers in Paris and the second general assembly in New York. They frequently have taken occasion to emphasize their complete agreement on foreign policy and their support of former Secretary of State James F Byrnes.

Vandenberg

Vandenberg is 63 years old and before entering the senate was editor and publisher of the Grand Rapids Herald He long has been active in local and state Republican politics and is an authority on Alexander Hamilton, a subject on which he has written several books. He won the 1946 Collier award for distinguished congressional service.

Public Lands

HUGH BUTLER (Neb.), is new chairman of the public lands committee, which combines the functions of the five old committees on public lands and surveys, Indian affairs, irrigation and reclamation, mines and mining, and territories and insular affairs.

A regular, party-line Republican now beginning his second term, Butler easily won re-election last fall after a victorious primary fight in which he was opposed by Gov. Dwight Griswold, who had the support of Harold E. Stassen.

Butler

Butler is 69 years old and operated a flour milling and grain business before going to the senate. In his youth he worked as a construction engineer for Chicago, Burlington and Quincy railroad. He is an ex-president of Omaha Grain exchange and National Grain Dealers association and has been active in Nebraska civic, educational and religious organizations.

Butler was in line for the more important finance committee chairmanship, but passed it up to take public lands.

Blind Girl Quits School To Keep Dog

LOS ANGELES.—Forced to give up her high school classes or part with her seeing-eye guide dog, Patsy Ruth Fergus, 16-year-old blind girl, decided she couldn't part with her dog even if it meant giving up the social life she craved at school.

Despite pleas of Patsy, her parents and classmates, the city board of education decreed she couldn't take Lucky, a pure white German shepherd, to school any more. It promised instead to send a tutor to her trailer home.

"It'll be lonely staying home all alone," Patsy said, biting her quivering lip. "But I can't give up Lucky ever. She's the only eyes I've got."

Her main concern now is to rush through her last three semesters of high school so she can enter junior college, where, she adds, "they let you take dogs to classes."

It has installed what the ...ge fathers describe as ...irst electrically operated ...stam T-bar lift in the east... United States.

...ft pulls skiers up the entire ...ket slope of Gore mountain—a ...erving device that adds im... ...rably to enjoyment of the ...nd vast popularity to North ... as a ski center.

...new electric lift is an ex... ...example of community spirit ...eation. Skiing is a community ...prise in the little town of 703 ...ants, whose pattern of life is ...with it. When it was decided ...t in the new Alpine lift, the ...y as on previous occasions was ...d by the townsfolk.

Form First Patrol.

...k of this venture was the rec... ...n of North Creek's record as ...er sports specialist. It was ...e little Adirondack town that ...nt ski patrol in the United ...s was organized. On Gore moun... ...slopes the first down-mountain ...ail in New York state was ...ct and this small skiing center ...e destination of the first snow ...n the state on March 2, 1934. ...train, as the villagers recall, ...from Schenectady and was ...ed to handle a crowd of 500— ...ll took the trip.

...rth Creek also pioneered ...famous "Ride Up — Slide ...n" slogan, when buses were ...ded to carry skiers from ...bottom of the trails up the ...ing mountain road, which ...s to the noted garnet mines ...s the beginning of five well... ...n trails.

...was this highway that made ... Creek the original "down hill" ...ter in the East, for it is from ...p of the highway that the ...mountain network of downhill ...radiates.

...combined investment in lift, ..., but and other facilities pro... ...by the village entrepreneurs ...aggregates more than $70,000.

Community Endeavor.

Heading the community development program is the town physician, Dr. James A. Glenn, who is president of Gore Mountain Ski club. The manager of the local woodworking mill, Spencer Johnston, is vice president. Dr. H. I. Braley, the local dentist, is executive member of the club in charge of racing The lawyer, Philip C. Brassel; the justice of the peace, Kenneth Bennett, and the lumber dealer, William C Schilds, are directors of the Ski Lift corporation, of which the undertaker, Kenneth W. Swain, is president.

At the top of North Creek's "Ride Up—Slide Down" Gore mountain are the leading garnet mines in the country. Garnets shine like red diamonds in the sunlight and the winter sports fan gets an added thrill out of digging small pieces of the colorful stuff from the snow. From a promontory the skier can look down into the mines and across to the sheer rock walls hung with various hued icicles sparkling in the sun. Close by are the high peaks of the Adirondacks, forming a startling panoramic view of mountain grandeur in winter dress. At his feet are the headwaters of the Hudson river.

Maze of Trails.

A city block from the garnet mines is a 1,400-foot tow leading to trails rated for the novice, intermediate and expert.

Cloud and Garnet trails, which range the higher slopes on Gore's summit, are expert trails which intermediate skiers can use in the spring's corn snow. North Creek villagers assert that nowhere else can one ski on such a jeweled trail with changing vistas of high mountain peaks.

Skiers have been flocking to North Creek for years for the simple reason that snow lies deep on the slopes and especially on Gore mountain, which rises from the village to an elevation of 3,595 feet. Everything the winter sports fan desires is at North Creek.

Children Get Lessons.

Firm believers in controlled skiing and upholding Otto Schnieb's famous statement that "skiing is a way of life," instruction is offered to children from 5 to 18, who gather on the slopes every Friday afternoon to take lessons. Annually there is a children's ski race when the Topping trophy is in competition.

Special awards are made to winners but North Creek enterprise believes skiing should be encouraged and as a result all contestants win a prize for participation.

The Barton trophy race, sanctioned by USEASA, is held annually on the Garnet trail, a mile long and with a drop of approximately 1,000 feet.

Eighty-six members make up North Creek's ski patrol, which is affiliated with the national ski patrol system, and the ages range from the high school years on up.

PIONEER SKI CENTER . . . By snow trains and buses, winter sport enthusiasts flock to North Creek, one of New York state's most popular skiing sites. A wide variety of slopes and trails, ranging from easy novice slopes to expert runs, lure crowds of skiers.

On first listening to the ...hone, though the sound is **perfectly audible, the articulation seems to be indistinct; but after a few trials the ear becomes accustomed to the peculiar sound and finds little difficulty in understanding the words."**

That picture of the telephone, as depicted in the first telephone advertisement of May, 1877, represents a marked contrast to the instrument of today.

The advertisement is recalled in connection with the observance of the 100th anniversary of the birth of Alexander Graham Bell, inventor of the telephone, on March 3, 1847.

Although born in Edinburgh, Scotland, Bell was an American by choice, coming to Boston at the age of 24 to teach the use of "visible speech," developed by his father for training the deaf to speak.

A deep and scientific interest in the mechanics of speech, an inventive streak and the challenge of making the telegraph "talk" led to his experiments which produced the telephone On June 2, 1875, he first succeeded in transmitting sound over a wire and one of his experimental telephones transmitted the first complete sentence on March 10, 1876, just a week after his 29th birthday anniversary.

In addition to being a great scientist, Bell was a man of remarkable vision, which led him only two years after the telephone was invented to foresee the day "when a man in one part of the country may communicate by word of mouth with another in a distant place"

The fulfillment of that prediction has revolutionized communications in the United States and throughout the world Progress has continued uninterruptedly ever since Bell created the telephone In the United States alone there are now more than 32 million telephones in use, more than double the number in 1940. Since V-J Day four and a half million instruments have been installed.

A major phase of the telephone company's postwar program is to extend and improve farm telephone service The telephone, it is pointed out, always has been the farmer's "good friend and loyal assistant"—in business, in time of sickness or emergency, or as a means of keeping in touch with relatives and friends.

These benefits will be extended to more rural families under the 100 million dollar rural expansion program with its objective of a million more farm telephones.

...OGNIZE THIS? . . . This scene of a pioneer rural home shows ... the farm telephone looked like in 1914. Long recognized as a ... to farm areas, telephone service will be extended and improved ...ughout rural United States during the postwar period.

...ouse Sprouts Hidden Cash after Storm Victims Leave

...FOREST, WIS. — Although ...Clement Wolfe doesn't believe ...ers, she insists that she has ...ding money under a vase and ...d a mirror, under a vase and ...e hidden corners of her home. ...bills in cupboards, little ...of silver on shelves, half dol... ...ked every place imaginable ...been retrieved by Mrs. Wolfe. ...is an explanation, however. ..., Mrs. Wolfe is certain, was secreted by more than 60 unexpected guests who spent from two to three days with her during a storm.

The guests started coming in pairs, then in carloads, finally in busloads. When the house started filling up, Mrs. Wolfe was glad she had just brought five loaves of bread from town. She also had several pails of eggs she had been unable to send to market and she served them—fried, scrambled, boiled and poached. It wasn't long, however, before only crackers and mayonnaise were left.

Two of the guests struggled two miles to the village, carrying back all the food they could. By that time Mrs. Wolfe was re-using coffee grounds.

By noon of the third day everyone had been rescued—after the mayonnaise had given out and Mrs. Wolfe was passing out dry crackers.

3 MINUTE FICTION

TEACHER'S PROBLEM

By Chris Matthews

WNU Features.

THE only way to do anything is to go ahead and do it, my daddy used to say. And my daddy is a wonderful guy, Miss Evans. He's the best daddy in the world, and I know That's the reason I'm writing this letter to you—because of my daddy I'm writing to you because I don't want to hurt him. And I know you can help me, if you want to

You will, won't you, Miss Evans?

You've given me a good scolding many a time, but I remember the last one mostly, because it was only yesterday, just before arithmetic class

I had forgotten to do my arithmetic lesson. I was glancing through the problems and saw that if I started on them now I wouldn't get three problems solved before class would begin So I slipped a note to Mary Jane behind me, asking her if she'd let me take her copy Mary Jane is the smartest girl in the class, and we're pretty good friends, so she let me take it

I started copying her work, and believe me, Miss Evans, I really felt guilty doing it. I felt like a traitor I was sure I could have done the problems myself if I had the time because arithmetic is one of my easiest subjects

But I copied the assignment anyway, and when I started to slip the papers back to Mary Jane, that's when you looked up. Your eyes met mine first thing, then moved to the papers in my hand.

I didn't know what to do with myself, then, I was so scared, 'Shamed, too, I suppose. I didn't know whether to drop the papers on Mary Jane's desk, or whether to put them back on mine. I guess you know how I felt

Well, I hurried, and I caught the bus despite the deep snow.

Well, you know what I did, because you told me to do it.

"Dickie," you said, "please bring those papers here to me" I hesitated a second. I felt everybody's eyes on me, and I must've gotten awful red, because that's how my face felt. I got up slowly, and walked up and handed the paper to you

You looked at the first page and you said, 'So—you're copying Mary Jane's arithmetic assignment. Is that the kind of work you make a habit of doing, Dickie?"

"Oh, no, sir," I said I know I should have said "No, ma'am," but I didn't think of it then "I've never copied anybody's work before," I said. And that's the truth.

"All right. But you must learn never to copy someone else's work Dickie. I'm sorry, but you are going to stay in school tonight, and d your arithmetic lesson."

YOU knew what that meant as well as I did. It meant that I would miss my bus—and we live three miles from school. That's a long walk when it's winter and snowing.

I was hardly through with my second problem when you said "Dickie?"

I looked up. "Dickie," you said and you were smiling a little, "get your work together and take it home with you. You're leaving"

My heart started to pound in my chest. "You mean it?" I asked.

"I mean it," you said, and you were still smiling. "You better hurry, if you want to catch the bus."

I never told daddy about that, either. I almost told him a couple of times while he was helping me on my model plane after supper, but I didn't. Finally, he said:

"It's your bed-time, son You want to get up fresh and ready for school, don't you?" And I said "sure, dad dy," and went to my room.

I guess I was half asleep when I heard voices downstairs. It got me wide awake. I crawled quietly out of bed and put my ear close to the floor to listen. And that was when I heard you saying to daddy

"I'm sure that Dickie and I can get along swell together, Dick. I have a feeling that he likes me, and I like him. I like him very much. Matter of fact, probably as much as I love his father."

You laughed then, and daddy said, "I thought I'd better not tell him about us right away, but I suppose now it'll be all right. I'm sure you'll be a wonderful mother to him, Ann, and he a good son to you. He's a good boy. But who should know better than you? You're his teacher You're with him more than I am."

You see?

Please don't tell my daddy, will you, Miss Evans?

The Washington MERRY-GO-ROUND

DREW PEARSON

OTHER SIDE OF UNRRA

WASHINGTON. — All the angry shouting and politicking which surrounded UNRRA during the last two years have given taxpayers the general impression that this global agency was just tossing money down the drain. That, however, was not the case. Here are some little-known facts about UNRRA's remarkable accomplishments.

UNRRA supplied enough grain to make 11,500,000 loaves of bread for Europe, prevented Europe from becoming a disease-ravaged, epidemic-plagued continent, rebuilt health departments all over Europe, supplied them with DDT, penicillin and sulpha drugs. It inoculated hundreds of thousands against typhus and typhoid, thus preventing the type of epidemic that ravaged Europe after World War I.

Last year UNRRA fed at least one meal a day to five million children, helped reclaim 10 million acres of flood land for planting this year. It took care of one million displaced persons, provided them food and shelter, saw hundreds of thousands of them safely home.

Despite its errors on the political side, UNRRA did two things. The agency made nations work together in harmony, made the postwar world a better world for millions who otherwise might have perished. It is only fair to remember this side of the picture.

• • •

GOVERNMENT JOBS

Memo to government workers:

Don't get too excited about those statements by Representatives John Taber and Harold Knutson that the congressional budget committee, of which they are members, favors immediate reduction of government personnel by one million workers.

Inside fact is that most members of the committee, excluding Congressmen Taber and Knutson, are apprehensive that a too-sudden slash in the personnel question will be referred for further study to the senate and house appropriations committees.

When a decision finally is made, the reduction in government personnel will be much closer to 500,000 than one million

• • •

BEATS TRUMAN AT FARMING

La Verne Hall of Westby, Wis., champion 4-H farmer of America, who has made $53,000 at the age of 20, called to shake hands with President Truman, who never was able to make a go of farming in Missouri

GOP Congressman William Stevenson, who escorted his young constituent, told the President how Hall was chosen "national achievement winner" among junior farmers at the International Livestock exposition in Chicago One of the prizes was a silverware set from the White House.

"I'd like to meet more of your type," said Mr. Truman, perhaps remembering how his own farm was sold for its mortgage. "You young Americans are doing great things for the country. It must feel pretty good to be a successful farmer at the age of 20. When did you get started?"

His visitor replied that he started at the age of 11 with one pure-blooded calf and two Poland China hogs. He did not mention that his farm holdings are now worth $53,000.

• • •

QUEER VISITORS

The late FDR once told a visitor he was considering sending an ambassador from the American people to the state department, since that department sometimes seemed so out of tune with the rest of the USA. Unfortunately, that condition hasn't changed.

While thousands of Hitler's victims still sweat it out in displaced persons camps unable to get visas, the state department has been throwing the doors open to various interesting visitors. These include Austria's former premier, Kurt Schuschnigg, Pastor Niemoeller—who reiterates his belief in a powerful Germany—and now, one of the key Fascist operatives of the Near East, Ahmed Hussein.

Hussein arrived ostensibly as a correspondent for Cairo newspapers but he is still head of the pro-Fascist "Young Egypt" party, and an intimate of the infamous "Mufti" of Palestine, whom Hitler chose as his fuehrer of the Middle East. Since reaching these shores, Hussein has cast off his role of newsman and has registered with the justice department as a foreign agent representing "Young Egypt." He has been selling his special brand of pro-Fascist, anti-British venom.

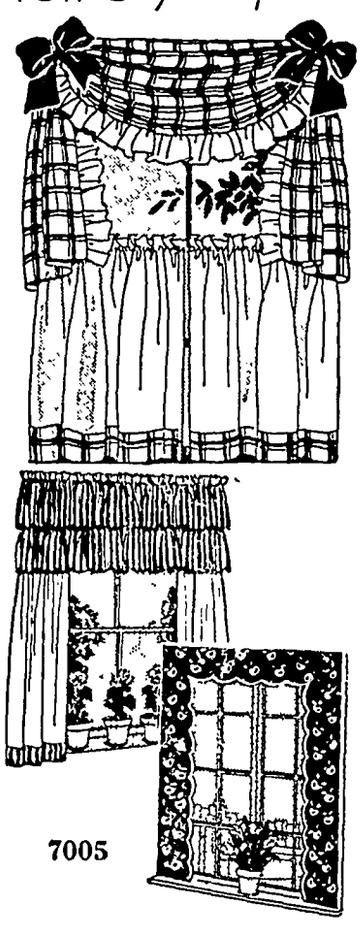
CAPITAL CHAFF

It hasn't leaked out, but Brig. Gen. Elliott Roosevelt was recommended for a permanent reserve commission by the army reserve officers commissioning board, headed by Lt. Gen. Jimmy Doolittle. But when President Truman sent the nominations to the senate, Elliott's name was omitted. On the list, however, were several GOP opponents of the Roosevelts, particularly former Maj. Gen. Pat Hurley, who blasted both the President and the state department a year ago.

NEEDLECRAFT PATTERNS

New Styles for Remaking Curtains



7005

NEW shapes for old drapes is the watchword! Ten to one your curtain material is still good; use it again for any of six new styles.

Save material by remaking your old curtains! Instructions 7005 has directions.

Our improved pattern — visual with easy-to-see charts and photos, and complete directions—makes needlework easy.

Due to an unusually large demand and current conditions, slightly more time is required in filling orders for a few of the most popular pattern numbers.

Send your order to:

Sewing Circle Needlecraft Dept.
564 W. Randolph St. Chicago 80, Ill.
Enclose 20 cents for pattern.

PIED PIPER

The Pied Piper has slipped. At Jefferson, a "salesman" canvassed the business district offered to conduct a rat eradication campaign. He spread his poison in several areas and left town. The poison on test appeared to be corn meal, and the people who bought his services now have more rats than ever before. The Pieper meanwhile is being detained in the Greene county jail.

Cleaning Improves Efficiency of Boilers

Every heating plant needs a good cleaning at the end of the heating season. Cleaning is the basis of heating plant efficiency. Only a clean heating plant can give its owner a full return on the fuel. Whether the owner cleans the heating plant himself, or has a heating contractor do it for him, that's the time to check the system for necessary repairs and replacements. If it is a hand-fired boiler, the grates should be inspected and replaced if they are warped or broken.

If the basement is damp, it is advisable to place some lime in the ash pit and in the combustion chamber of the boiler. Lime will absorb moisture and prolong the life of the boiler.

Boiler doors and dampers should be left open during the lay-up period to help prevent sweating on the inside of the boiler during the summer. It is a good idea to spray the furnaces with a light lubricating oil. Hinges of doors and moving parts of damper regulators, too, should be oiled. If you have an oil-fired or gas-fired boiler, better not try to clean it yourself but have a heating contractor do it. This applies especially to the oil burner and the gas burner and also to stokers. Don't tinker.

New Heating Development Assures Warmer Walls

Among the new developments in heating which are being discussed today is "warm wall heating." The basic equipment for warm wall heating is similar to that for any modern forced-circulation hot water heating system. It consists of a boiler in a basement or utility room and a pump or circulator for mechanically forcing the water.

In addition — and this is the distinctive feature — there is a heat exchanger. The pump forces the hot water from the boiler to the heat exchanger. Here the heat from the water is transferred to air. The air then is permitted to circulate between the studding of the outside walls of the house, thus warming the inner surfaces of the outside walls. The outer surfaces of the outside walls are well insulated to prevent heat loss to the outside.

The fact that the inside surfaces of the outside walls are warm is said to produce a high degree of comfort. Because the heat is distributed over a large area, that is the entire outside wall of every room, uniform heating and freedom from drafts is produced. Another advantage is the quick responsiveness of the system to the demands of the thermostat and changes in outdoor temperatures.

California Coastline

Of the 1,055 miles of California coastline 259 miles are now publicly owned. The state legislature last year appropriated $[illegible] to acquire beaches for purposes of erosion control and development of extensive recreational areas bordering the Pacific. Cities and counties are being allocated this money on a fund-matching basis and are planning to put many millions more into coastal playground projects. New emphasis is being put on the need for such coastal development of recreation facilities by the war-accelerated increase in California's population. The war further intensified the need for shoreline rehabilitation because [illegible] with wartime activities allowed deterioration of some beach areas. Sewage pollution from Los Angeles in 1943, for example, caused quarantine against public use of 10 miles of excellent recreational beach.

Troublesome Beetles

Southern beetle or the spotted cucumber beetle attack beans only until their favorite weeds get ready and then leave. Usually there is no cause for alarm, but when beans grow slowly the relatively large size of the holes may point the need for doing something about them. But this is simple, merely dusting the top-sides of the leaves with rotenone. The control of the Mexican beetle is quite another matter. It feeds only on the lower surfaces of the leaves, never eats through. It lays its eggs on the bean foliage and its young grow there. If the first generation has not consumed all the plants, a new generation is started. A sprayer or duster with an upturned nozzle must be used to put the insecticide where feeding is done. It should be deadly to insects but harmless to man. Such is rotenone, obtainable as ready-mixed dust or as a concentrate for making liquid spray.

Famous Violin Makers

The Guàrnieri or Guarnerius family of Cremona, Italy, was famous for its fine violin makers and Joseph, who lived from 1687 until 1745 was the most renowned of all. He was called "Giuseppe del Gesu" from the inscription I H S (meaning Jesus) which appears on his violins. Joseph, whose master was Gaspar di Salo, produced instruments of bold outline and massive construction, concentrating on tone rather than perfection of visible form. His experiments to obtain perfect tone resulted in a wide variety of violins. To discriminate between an authentic Guarnerius and imitations, of which there are many, a connoisseur should be consulted

Scarce Items In Stock Today

Why freight rates are going up...

Since 1939, railroad employes have had three general pay raises totaling 52 6/10%, and the prices of fuel, materials and supplies have risen 61 6/10%.

But when the war ended in 1945, the railroads were still hauling freight at rates no *higher*, and in some cases *lower*, than when the war began.

Without increased revenues, railroads could not meet these costs and also provide improvements in equipment and facilities—improvements that are essential for the low-cost freight and passenger services which are necessary to America's high standard of living.

Under these circumstances—and almost a year after the last major wage increase—the Interstate Commerce Commission recently approved an average increase in freight rates of 17 6/10%.

Of all the price increases in America today, few have been so little and so late as that in the price of railroad transportation.

How important are healthy railroads to a prosperous country?

Only when the railroads are financially healthy can they provide the new equipment, improved road beds, and better terminal facilities needed for still better service to you.

The defense of the nation depends upon the continuance of the efficient transportation which served the nation so well in the last war.

The railroads are among the largest employers of labor. They buy over 100,000 different products. They pay big taxes—taxes which are spent *not only* for public schools, public health, and police and fire protection, *but even* for highways, airways, airports and inland waterways.

Railroads are America's lifeline—keeping goods flowing among the 48 states day and night in all weather.

They can continue to do this only if there is a reasonable balance between income and outgo. Like yourself, the railroads must make ends meet!

We are publishing this and other advertisements to talk with you at first hand about matters which are important to everybody.

AROUND IOWA

FREE GILTS

In Bremer county, a man giving a fictitious name was the high bidder on six purebred gilts. With the help of other farmers who had also bought pigs, he loaded them up and drove off. Neither he nor the gilts have been heard of since

HIGH MULES

Ernest Fassler of Quibmy topped the market at an Omaha sale recently, selling a span of mules for $800. The mules, 3 and 4 years old, were matched sorrels. The mules were purchased by a Missouri showman who wants to add them to his 30 head used on a round of summer fairs.

NO BABY

The Lloyd Lerdal family of near Belmond was puzzled recently when "baby gifts" began to arrive It turned out that a nearby radio station announced the arrival of an infant at the Lerdal home, through error.

KILLED BY TREE

At Albert City, Richard Johnson, 76, of Alta, was helping cut down a tree. When the tree fell a heavy branch struck Mr Johnson before he could get out of the way, fracturing his skull, and resulting in his death

TWICE

Mrs. Nan Thompson of Storm Lake became a grandmother twice on the same day recently. A daughter was born to her son and wife in Storm Lake Three hours late, her daughter and husband became the proud parents in Arcata, California.

LIKES PEANUTS

Diana, an Angora cat at the Bertram Brown home in Indianola, likes peanuts Each night she climbs up the side of the house on a vine, sitting on the roof until Franklyn Brown and Sherwyn Legg turn on the light in the room occupied by them Then she comes down, enters the window, and heads for the box where the peanuts are kept.

Thanks for sending in your news items.

Franklin Lost State of Early U. S. History

But for history's quirks, the lost State of Franklin might occupy the approximate position of present-day Tennessee, which observed 150 years of statehood on June 1 of this year. Congress, shortly after the close of the Revolution, turned down the coonskin republic's petition for statehood, the National Geographic Society recalls. As a result, Franklin, named for Benjamin Franklin, now is only a small-type footnote in the history books.

Franklin was set up as a commonwealth in 1784 by freedom-loving "mountain men" in what is now northeast Tennessee. The federal government seemed no more anxious than North Carolina to defend from Indian attack the distant settlements along the "western waters." So the Wataugans, as the pioneers were called, placed themselves under the leadership of John Sevier, drew up a constitution, established a legislature and judiciary, and founded the State of Franklin. Their first capital was Jonesboro, oldest town in Tennessee.

After four years of opposition from North Carolina and the federal congress, the State of Franklin died in a clash of personalities within itself. North Carolina took back her western lands and held them until 1790. After six years as a federal territory, the area was admitted to the Union as Tennessee—the 16th state.

Find New Vaccines Effective Against Flu

Three physicians report that vaccination with virus types A and B will exert a protective effect against epidemic influenza.

During an epidemic of influenza B in November and December, 1945, the physicians compared a group of approximately 600 army men, enrolled at the University of Michigan, who were injected with concentrated influenza A and B vaccine with another service unit which averaged about 1,100 men who were not vaccinated. Only 7, or 1.15 per cent, of the 600 men were admitted to the hospital for respiratory infection during the epidemic period in contrast to 109, or 9.91 per cent in the unvaccinated service unit.

Influenza is an acute upper-respiratory infection. The symptoms are usually marked by a moderate fever, headache, general pains, extreme exhaustion, sore throat and an irritating cough. It is not fatal except when it leads to secondary pulmonary infections. The virus of influenza A was first isolated in 1933 A second strain of virus called influenza B was first identified in the epidemics of 1936 and 1940.

Compost Pile

The compost pile is an excellent source of garden fertilizer In starting one select a well-drained spot away from the house and shielded from a front view by shrubbery or an out building. Drive down four stakes in the form of a rectangle or square Space the stakes six to eight feet apart and fasten chicken wire or nail slats to these posts, making a pen The first layer of material to be placed in the pen may be a layer of straw, hay or inverted grass sod. The second may be a few hampers of barnyard manure. The third layer can be weeds and grass clippings that have not gone to seed. The fourth layer may be several shovels of soil. Sprinkle over this layer a few handfuls of lime or two or three buckets of wood ashes These layers may be repeated until the pile is as high as you want it. Each time leave the pile concave so it will catch some rain water instead of shedding all of it. If you start your compost heap during a dry spell, add a few buckets of water to each layer. Turn this mixture every six to eight weeks.

Egg Economy

Medium eggs — averaging 21 ounces per dozen—are as economical as large eggs—averaging 24 ounces per dozen—of the same grade—if the price is at least one-eighth cheaper And small eggs—averaging 18 ounces per dozen—are as economical as large eggs if the price is at least one-fourth cheaper. The test of a fresh egg is a high, rounded yolk, and firm, upstanding white. As an egg loses freshness, the yolk is flatter and the white is more watery The experts say you can't always judge freshness by how recently the egg was laid. If a newly laid egg is not cooled quickly and handled carefully, it may lose its fresh qualities in a day or two. On the other hand, an egg given the right care and storage may keep these qualities even after several months.

Cooked Cheese

Cooked too quickly, cheese gets tough and stringy By heating slowly, the cheese melts completely and spreads the good cheese flavor through the whole dish. You can speed up the melting and blending of cheese by cutting it into small pieces before you heat it. Break it, grate it, slice it and shave it thin and whenever possible mix the cheese into a sauce before you add it to other ingredients. With a smooth cheese sauce as a starter, you can build many kinds of dishes. For you can easily vary the cheese to make the sauce mild, rich, or in-between.

KLEMME HIGH SCHOOL News

ELEVATOR AT GOODELL SOLD

A deal has been closed in which J. Leslie Brown of Meservey sold his Goodell elevator to Carl Greene of Rockwell, possession being given March1. Greene will move to Goodell with his wife and 2 small sons, 5 and one years old. They will live in the Mrs. Tom Cashman house, east of the tracks.

Deadly Anthrax Spores Survive Lab Heating

Durability of the spores that cause the deadly disease of anthrax has been familiar to scientists for years. This is a feature of the disease that makes it dangerous. The spores live long, are able to remain infective in spite of drying and other unfavorable conditions, and are resistant to disinfection processes that kill most organisms

Recent studies in laboratories of the bureau of animal industry show that anthrax spores may be dangerous to scientists studying them in the laboratory even when they take precautions that are sufficient with most other organisms Dr C. D. Stein and Herbert Rogers report that they have boiled cultures of anthrax spores and have found that living spores can rise from the heated culture in the vapor that comes off from the brew This vapor condensing on the walls of a test tube remains deadly and can start new infection.

Ordinarily, scientists think of freshly distilled water as "sterile," that is, free from bacteria and other organisms In experimenting with anthrax, however, these investigators find that this is not a fully reliable precaution. A laboratory could become contaminated from the vapor driven off in trying to kill anthrax spores by heating.

Ancient Valleys

Stretching from the Pacific to the Andes through the desert of northern Peru are fertile, irrigated, densely populated, narrow valleys. They have been inhabited for at least 2,000 years with degrees of culture and prosperity which have fluctuated with wars, politics, and —perhaps most fundamental of all—changes in nature. They have always been more or less isolated, although from time to time parts of overall political systems. Each valley is a cross section of history revealing in its multiple archeological deposits the effects of various changes on a human society. Typical of these is the Viru valley, now about 20 miles long and three to four miles wide, closed in on all sides by mountains and deserts. This valley was the site of a flourishing culture long before the establishment of the great Inca empire which, was overthrown by the Spanish conquistadores.

Water Heaters

There are, speaking generally, two ways of heating domestic water. It can be done directly or indirectly The direct method consists of a heater fired either with gas, coal, oil or electricity The indirect method consists of copper coils connected with the boiler which heats the house The coils may be built into the boiler or they may be separate from the boiler In either case, the boiler water circulates around the coils containing the domestic water There are two types of indirect water heaters, the storage type with a tank and the tankless kind Of the direct-fired water heaters, those utilizing gas as a fuel are the most widely used. The most desirable are the automatically controlled type They are either instantaneous or storage, but the latter are most generally used.

CHEVROLET

Again in 1946...

FIRST IN SALES!

FIRST IN CAR SALES—FIRST IN TRUCK SALES
FIRST IN COMBINED CAR AND TRUCK SALES!

The final registration figures are in, and again in 1946 America purchased *more Chevrolet cars—more Chevrolet trucks—more Chevrolet cars and trucks combined*—than any other make, despite the fact that Chevrolet was out of production entirely during the first three months of the year! A magnificent tribute to Chevrolet production efficiency, as well as to the dollar value of Chevrolet products! It's the best proof you can possibly have that you're wise to choose Chevrolet, the *only* cars giving BIG-CAR QUALITY AT LOWEST COST, and the *only* trucks rating as THRIFT-CARRIERS FOR THE NATION! True, there still aren't enough new Chevrolets to go around, but highest popular demand means *higher dollar value*, just as highest production means *quicker delivery* of your new car or truck. Place your order—*today!*

GARNER, IOWA

CROSS TOWN

By Roland Coe

"I've been trying to jack-up my snow shovelin' pay to meet the increase of candy and ice-cream-cone prices, but I haven't had much luck!"

BOBBY SOX

By Marty Links

"I don't think 'three's a crowd' do you?"

Hogs Like Elephants

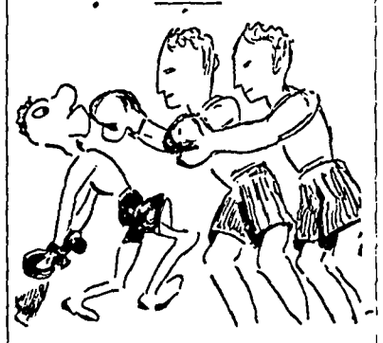
A tenderfoot from the East was inspecting some Texas lowland property with a view of becoming a western landowner. He wanted to know if the land was subject to overflow in the rainy season, and when the agent replied in the negative he pointed to some mud high on the trees and inquired if it did not indicate a high water mark.

"No, sir," replied the agent. "We've got some mighty big hogs hereabouts, and that's where they rubbed the mud off their sides."

The Easterner kept staring at the trees, until finally the agent inquired, "Well, friend, do you want to buy this farm?"

"No," replied the tenderfoot, "but I'd like to buy about five hundred of those hogs."

GANGING UP ON HIM



Second (to his boxer between rounds): "Well pal, you're licked."

Joe Brennan (gazing dizzily around): "Yeah, I should have got him in the first round when he was alone."

Duties of Office

During World War I, the Third Liberty Loan opening in Baltimore was honored by the presence of the President and Mrs. Wilson. On the reviewing stand, the First Lady sat next to the Mayor of Baltimore, who, just before the ceremonies began, leaned over and whispered to her, "Mrs. Wilson, I want to apologize for the absence of my wife. I have received anonymous letters saying this stand will be blown up today."

"But you are here," rejoined Mrs. Wilson.

"Oh, yes," was the brave reply, "I had to be."

Too True to Life

In Whitney Darrow's office at Scribner's a young lady started corresponding with a lad in the navy, and the romance developed to the picture-exchanging stage. The sailor finally came to New York, and the girl was given the afternoon off. "How was it?" asked Whitney the next morning. The girl was not ecstatic. "I think," she said, "that pictures do people too much justice."

Heavy Missile

The bride of a week rushed home to mother and father:

Bride (sobbing in mother's arms): "Oh, it's terrible! I just had to come home!"

Mother: "Of course, darling. Tell me about it."

Bride: "I baked a pie and Charles threw it at me!"

Mother (hissing): "The abysmal brute!"

Father (growling): "The fiend! Why he might have killed you!"

Not Responsible

Two herrings stopped at a neighborhood cafe for a couple of snifters. One of them disappeared for a moment, and a puzzled onlooker accosted the one left at the bar.

"Where is your brother?" he challenged.

"How in heck should I know," replied the herring. "Am I my brother's kipper?"

A Round Oath

"Swear that you love me."

"All right, darn it, I love you."

Spoke Too Quickly

A passenger bought his ticket, picked up his change, and walked away.

He returned a few minutes later and told the agent, "You gave me the wrong change just now."

"Sorry, sir," said the agent. "We make no corrections after you leave the window."

"Oh, that's okay," smiled the passenger as he pocketed the five dollar bill he had received in excess.

Aiding War Effort

"Say, William, I hear dat Mr. Plum, de old miser, is dying."

"Yes, Jake, dat so, I set up wid him last night, and dere was a tallow candle burning upon de stand, which made a kind of flickering flame in de fireplace. All of a sudden he called his son, Peter, 'Come here.' De boy approached his bedside, when de old man faintly whispered, 'Blow out de candle; tallow's most as dear as butter.'"

As Cooks Go

Two ladies were discussing their troubles with servants.

"Was your last cook a good one?" asked Mrs. Jones.

"Oh, yes, she was a good cook, as cooks go; and as cooks go, she went!"

Sure to Return Home

When a Scotsman's pal married and moved in his neighborhood he presented them with a fine pair of his homing pigeons.

Entire Wardrobe For Tiny Tots

A COMPLETE four-piece outfit for your tiny cherub. It's delightfully easy to make — round yoked princess dress is trimmed with ruffling; slip and panties are edged with dainty lace. Make several of the gay rompers for warm weather. An ideal gift for a new arrival.

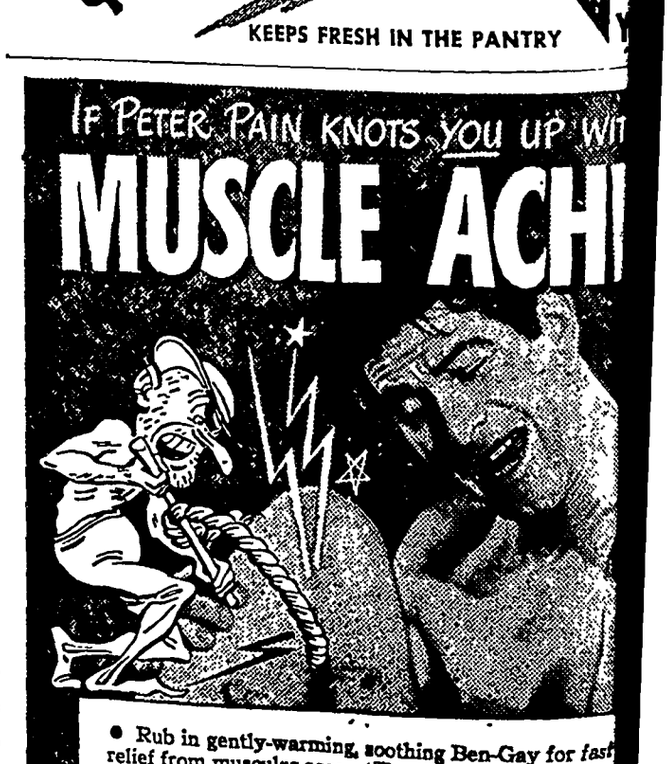
RED STAR DRY YEAST TAKES THE "LU" OUT OF BA



Sweet rolls, coffee rings, crescents are *easy* to make with the new Red Star *Active* Dry Yeast. And, best of all they always come out the same.

Red Star is the dry granular yeast that needs no refrigeration, that keeps fresh and strong on your pantry shelf for weeks. And Red Star gives bread, rolls and sweet goods extra flavor, better crust color and texture . . . and saves time in baking too!

Ask your grocer for a supply of Red Star the next time you're shopping.

KAY ROGERS SAYS "*Write me for new goods recipes, and depend Red Star Active Dry to give uniform results time! Write me at Red Yeast & Products Co., Department WN-3, Milwaukee 1, Wisc.*"

QUICK RISING RED STAR KEEPS FRESH IN THE PANTRY

BETTER THAN PILLS FOR CONSTIPATION

Finds Famous Breakfast Cereal Most Helpful of All

Have you given up hope of being "regular" again? Then read this sincere, unsolicited letter:

"I am a registered nurse and I know what a problem constipation is, especially with patients deprived of their usual physical activities. Where pills brought temporary relief, eating KELLOGG'S *ALL-BRAN* regularly actually prevented irregularity in more cases than I can mention. Your product is a great boon to our modern age." Miss Katherine E. Walsh, Town Hall, Newington, Conn.

Yes, eating *ALL-BRAN* regularly often brings lasting relief from constipation due to lack of bulk in the diet. For best results, eat it for breakfast every day—and drink plenty of water. Try KELLOGG'S *ALL-BRAN* for 10 days! If by that time you are not completely satisfied, send the empty carton to the Kellogg Company, Battle Creek, Michigan, and *double your money back!*

ALL-BRAN is not a purgative but a wholesome food made from the vital outer layers of whole wheat. Eat daily either as a cereal, or in muffins. Ask your grocer for KELLOGG'S *ALL-BRAN*.

Sportlight by GRANTLAND RICE

WHAT brand or breed of athletes make the most money out of professional sport? How do salaries paid out today compare with those of the past?

Red Grange

Those marvelling at the salaries paid to Bob Feller, Charlie Trippi and others fail to recall the total amounts collected by Babe Ruth annually from all of his financial deals. They also overlook the change picked up by Red Grange after he left Illinois to play with the Chicago Bears.

In addition to his contract with the Bears, the Redhead made a motion picture called "Two Minutes to Play." As I recall Grange's conversation at the time, something like two years after he had left Illinois, he was around $250,000 in front, and those were the golden, happy years when they let you keep most of what you made, when there were no 70 and 80 and 90 per cent brackets

The Galloping Ghost at the end of two years had made and kept more money than any four stars could do today. Unfortunately in other deals with C. C. Pyle, Grange blew a big part of his budding fortune.

Babe Ruth averaged far more than $100,000 a year in his prime. There were years when he passed the $200,000 count, including all the sidelines with which he dallied.

Feller and Trippi have ranged into rich pastures, but they won't be so rich when they have paid taxes on their various checks. Don't forget that when Gene Tunney received a a check for more than $900,000 after his second fight with Dempsey, more than 20 years ago, Tunney retained around 90 per cent of his pay. Today the tax department would take 90 per cent and leave Tunney 10 per cent.

In actual cash returns, Feller's $80,000 won't approach Babe Ruth's $80,000, not by $30,000 or more.

Leading Collectors

What are the leading money making sports as far as the individual star is concerned? Byron Nelson passed the $60,000 mark one season in golf prize money and this didn't include his receipts from sidelines. This was worth around $40,000 more. Ben Hogan reached the $44,500 mark in prize money in 1946. Hogan also had other pay checks that golf brought in. My guess would be a total of around $65,000 or $75,000.

So the pro golfer, or at least a few of them, can get along pretty well comparatively A Nelson or a Hogan will do far better than a Coulter, a Trippi, a Buddy Young or any other pro football player. But the golf drop is rather steep after you take in the few crowd pleasers, the few big money makers.

Top baseball salaries have ranged lately from Hank Greenberg's $55,000 to Bob Feller's estimated $80,000. The difference in actual dollar returns won't be large after they have moved into certain brackets where the golden harvest suddenly reaches an abrupt finish. When you figure in the taxes and the present cost of living, the $10,000 that Hans Wagner and Christy Mathewson once drew are not so far away from the $50,000 and $60,000 boys of today.

As far as pro football goes it is an established economic fact that the two rival leagues can't possibly break even, team for team, with the salaries they are paying today. Baseball has 154 games a year, excluding the 30 or 35 exhibition contests.

Against this, pro football can offer only 14 or 16 games a season. As every one knew it would, the new football league took a million dollar beating last fall. Certain National league teams were none too happy. The only happy people were the football players, who frequently were paid double their actual value.

Durocher Tops Managers

Leo Durocher apparently set a new mark for high pay as a manager in 1946. Here guesses have ranged from $60,000 to $70,000. Certainly Leo's unfortunate winter publicity isn't going to help him this spring and summer. He has left himself too wide open for the barb throwers, including rival teams and the umpires. But The Lip is still one of the best managers baseball has known. I've seen him work at close range—and this is no guess. It is also no guess to say that he hasn't made Brother Branch Rickey any too happy this winter.

In the way of pay, such jockeys as Johnny Longden and Eddie Arcaro head the list. Longden's lifetime earnings are rated close to the million dollar mark. Arcaro has known $90,000 and $100,000 years. Longden and Arcaro probably are better fixed financially than other sporting stars.

When they finally quit riding, they have a prospect of long and profitable careers as trainers, track executives, or owners.

After all, it is what you finish with, not what you get, for a year, that tells the story.

SEAL SALE AIDS CRIPPLES . . . Funds derived from the annual Easter seal sale will aid crippled children throughout the nation. Children afflicted with cerebral palsy are shown here learning by supervised play in the curative workshop of the Minneapolis community health service.

HOPE FOR HANDICAPPED

Easter Seal Sale Will Aid Nation's Crippled Children

WNU Features.

"Help Crippled Children" is the message of the 1947 Easter seal, soon to be distributed throughout the nation by National Society for Crippled Children and Adults through its 44 state and 2,000 odd local member societies for the crippled. The drive opens March 6 and will continue until Easter Sunday, April 6

For 26 years the national society has served the handicapped, seeking to fulfill the unmet needs of the hundreds of thousands of persons who are affected by more than 250 kinds of crippling diseases and conditions State and local units provide direct services, determined by specific needs in each community. The wide range of services includes camping, nursery centers, homebound employment, placement, equipment, training, clinics, hospitalization, convalescent care, transportation, curative and sheltered workshops and special education. Services are designed to supplement, not to duplicate, the work of other agencies for the handicapped

Since 1934 the society has sought public support for the work through the annual distribution of Easter seals Copies of the first seal, designed by J H. Donahey, Cleveland cartoonist now are rated as collector's items.

First Easter Seal

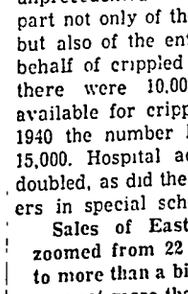
Eight states participated in the first Easter seal sale, which marked the beginning of unprecedented expansion on the part not only of the national society but also of the entire movement in behalf of crippled children In 1930 there were 10,000 hospital beds available for crippled children In 1940 the number had increased to 15,000. Hospital admissions almost doubled, as did the number of teachers in special schools and classes

Sales of Easter seals have zoomed from 22 million in 1934 to more than a billion. Seal sales now net more than three million dollars annually for aid of the handicapped.

More than 90 per cent of the funds remains in the states where contributions are made, less than 10 per cent being allocated to national headquarters in Chicago for its services to member societies and projects of a national scope. The national staff directs cerebral palsy, professional field, informational, administrative, extension and Easter seal services.

A contest for the best Easter seal design has been conducted annually since 1943 among high school students throughout the nation. The winner receives the Michael Dowling memorial award of $500.

The 1947 seal, which pictures a tiny boy with his crutch under his arm walking up a ray of light to a distant star, symbolic of hope for all crippled children, was designed by Frank Gross, a Janesville, Wis., high school student. School children throughout the nation will assist in conducting the month-long seal campaign.



1947 Easter Seal

Waffle Iron Proves Dangerous Weapon

SHOSHONE, IDA.—A waffle iron is a potentially lethal weapon, insists Mrs. Dwight Nicholson. She should know—she was shot by one. A small caliber cartridge accidentally was dropped into the waffle iron, and the top lowered. When the iron was heated, the bullet exploded just as Mrs. Nicholson lifted the lid. The bullet fired from the waffle iron struck her on a finger.

"Off We Go" AVIATION NOTES

AIRPORT CHATTER

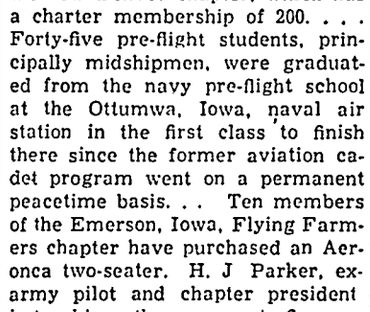
Flying Farmers of Edgar county, organized at Midway airport near Chrisman, Ill., plan air markings for all major towns in the county. . . . Facilities of the Waterloo, Iowa, airport are being expanded with construction of two hangars, 100 by 176 feet, and an administration building, 25 by 48 feet. Costs are estimated at $120,000. Raymond McPeck, Blairstown, N. J., veterinarian, is enthusiastic over the private plane He uses his personal ship to make calls at surrounding farms . The Air Reserve association is becoming active in Colorado, with the Denver chapter recently reorganized and formation of other units contemplated at Pueblo, Colorado Springs, Boulder and Durango Vincent D Eckley, former B-29 pilot, was elected president of the new Denver chapter, which has a charter membership of 200. . . . Forty-five pre-flight students, principally midshipmen, were graduated from the navy pre-flight school at the Ottumwa, Iowa, naval air station in the first class to finish there since the former aviation cadet program went on a permanent peacetime basis. . . Ten members of the Emerson, Iowa, Flying Farmers chapter have purchased an Aeronca two-seater. H. J Parker, ex-army pilot and chapter president is teaching other owners to fly.

* * *

UP IN THE AIR

Congressmen often are "up in the air," constituents believe. Several of them are up there literally as well as figuratively through their membership in the Congressional Pilots association Recently 80-year-old Representative Adolph Sabath of Illinois, now in his 41st year of congressional service, was invited to join the association and learn to fly. The letter inviting him to join explained that Keaney Kopp, veteran navy instructor who is in charge of instruction for club members, recently taught a 75-year-old member of the diplomatic corps to fly.

* * *



NEW LUXURY AIRLINER . . . New giant of the airways, United Air Lines' five-mile-a-minute, four-engined Mainliner 300 will go into scheduled service about April 1. The luxury liner, the new Douglas DC-6, will accommodate from 52 to 56 passengers plus 5,400 pounds of cargo.

* * *

SMALL PLANES ZOOM

Small, two-place personal plane shipments amounted to 30,639 planes during 1946, accounting for 88 per cent of planes shipped to non-military customers, it is revealed in the annual report of airplane shipments compiled by the bureau of the census. The report showed that manufacturer's shipments of civil aircraft and principal military type aircraft, valued together at 363 million dollars, totaled 36,204 airplanes during the year. Military customers received 1,330 planes.

Improved Uniform International SUNDAY SCHOOL LESSON

Of The Moody Bible Institute of Chicago
Released by Western Newspaper Union

LESSON FOR MARCH 16

Lesson subjects and Scripture texts selected and copyrighted by International Council of Religious Education, used by permission.

INTIMATE FELLOWSHIP WITH CHRIST

LESSON TEXT—John 14:1-6, 12-18; 15:1-6

MEMORY SELECTION—Ye are my friends, if ye do whatsoever I command you —John 15:14.

The hour had come for our Lord's final intimate words with his disciples It was indeed a solemn, but also a blessed, hour

It was the night before the darkest day in the world's history. On the morrow the Son of man was to hang on Calvary's tree for the sins of the world—for your sins and for mine. But for the moment he was alone with his disciples.

The last Passover had been eaten together, the betrayer had been discovered, and the Lord has told them that he was soon to go where they could not follow. Peter had, by his bold self-assurance, brought forth the prophecy of his denial.

The disciples were disturbed in heart and mind. Then came from the Saviour's lips the words of comfort, assurance and power which have been the strength and solace of his people through all the centuries. Our life both here and hereafter is in his mighty hands.

We learn in this precious portion of Scripture that

I. The Christian Need Not Be Fearful (14:1-6).

That is indeed a good word—a needed word! Troubled hearts are everywhere—in the palace and in the cottage, on land, in the air and on the sea. There is a place of rest, thank God! There is One who still speaks the majestic words, "Let not your heart be troubled, believe in God, believe also in me"

His comfort is one which covers the future life, for he says, "I go to prepare a place" (v. 2). Concern about future destiny is settled at once when Christ Jesus becomes our Lord and Saviour. We need worry no longer He has gone on before to the Father's house to prepare a place for his own. When we come to that ever-peaceful shore we shall not come as strangers, but as sons and daughters to a prepared place in our Father's house.

His words, "I will come again" (v. 3), gives present meaning to the future promise. He not only prepared the place, but he it is who brings us there. The glorious hope of his coming again is the Christian's greatest comfort and mightiest incentive to useful, holy living.

II. The Christian Need Not Be Powerless (14:12-15).

Christ's followers are not here in a world of sin and need as a little group of hymn-singing weaklings, thinking only of the day when they shall be in a brighter land. Ah, yes, they sing hymns and rejoice in them; they look for a better land; their weapons of warfare are not carnal. But weaklings? Oh, no! God uses them to do great and mighty things for his glory.

Note the blessed words of Jesus, "He that believeth on me" (v. 12). The army of God carries the royal banner of faith in a living Christ. "Greater works . . shall he do" (v. 12). Jesus only began his work on earth; its greatest development was to be the joyous privilege of his followers. We are ashamed that we have not lived up to this great promise, but by his grace we will do better.

"If ye ask . . . I will do" (v. 14) Someone has called this a signed blank check on all the resources of God.

III. The Christian Need Not Be Distressed (14:16-18).

The Holy Spirit, promised by Christ as the abiding comforter, came so to abide in the believer on the day of Pentecost (Acts 2).

The ministries of the Holy Spirit are many, but here the emphasis is on his work as Comforter. What a blessed and helpful ministry, and how much needed by distressed and disturbed souls! The Christian may count on him — and not be distressed.

IV. The Christian Need Not Be Detached (15:1-6).

What is worse than the feeling that one does not belong to anyone else, that one is a detached individual! That is never true of the believer in Christ. We are as close to him as the branch is to the vine. We are in him.

Christ is the vine, and the believer as a true branch is united with him. There is a oneness here which is difficult to express, but delightful to receive and believe. He who is the vine needs no cleansing, but the branch needs constant, daily purification by the word. Are we permitting God's Word to keep us clean? Only if we are reading it, studying it, meditating upon it.

There is, moreover, a severer type of purging to which the husbandman subjects the vine that it may bear more richly, and that is pruning (v. 2).

Some branches must be cut away altogether and burned (v. 6). They lack the evidence of life — fruit-bearing—and must be destroyed.

JOBS—How and Where to Get Them

Look to the Future

Easy Needlework

WHAT kind of future is in store for you? One paved with security, and happiness in the work you are doing, or a lifetime of dissatisfaction?

* * *

Much later disappointment can be avoided by speaking beforehand to men and women in different fields Weigh carefully the bad and good features of each job before choosing

KLEMME LOCAL NEWS

Mr. and Mrs. P. M Wilson were dinner guests Tuesday evening at the Dr. D. P. Anderson home

Frank Hougland is now employed at the Fred J. Arnold machine shop as welder and helper.

Mr and Mrs. P. M. Wilson were dinner guests Friday evening at the Dr. A. H. Dulmes home.

Mrs. D P. Anderson entertained several ladies at a quilting party at her home Tuesday and Wednesday this week.

Mrs. Edna Thada, who underwent a major operation at the Mercy hospital last week, is making a good recovery.

Mr and Mrs D. S Day and Gary and Mr. and Mrs. J. N. Day were Mason City visitors, Sunday.

Dr. D. P Anderson, who has recently moved his office to the garage building on west Main Street, had his office repainted last week.

Mrs Buford Meyer of Mason City visited from Friday until Sunday evening at the home of her sister, Mrs. C. A. Larsen and family.

Mrs. Emma Clements of Estherville came Sunday to spend a few days visiting with her son, John and family. Her son-in-law, Ernest Roben brought her here in his car

Just about the whole town of Klemme and the surrounding country took in the district basket ball game at Mason City on Friday night when the Shamrocks played the fast, big Rudd team, but lost- in the last quarter The final score was Rudd 36, Klemme 26.

Mrs. Dorance Day went to Mason City Friday evening and remained there until Saturday evening, when she came home with her husband. Mr. and Mrs. Dorance Day expect to move to Mason City soon, and have been cleaning up and remodeling a house they purchased

Winter Fish Kill Expected In Some Areas

Serious winter kill of fish is expected in many of the shallow north Iowa lakes; however, conservation officials believe that loss in the major fishing lakes will be no greater than normal. Winter kill is caused by the lack of dissolved oxygen in the water and consequent suffocation of the fish. When the lakes are frozen with heavy opaque blankets of snow covering the ice, light rays are cut off from the oxygen producing plants and fish decaying matter quickly "burn up" available oxygen supplies. Conservation officials have pointed out that no know means of effectively replenshing oxygen supplies in these shallow lakes have been developed. Fish technicians have been keeping an accurate check on oxygen content on many north Iowa lakes and tests indicate heavy loss probable in some.

Farm Sign Up Meetings Being Held

The 1947 AAA Sign-up meetings held throughout Hancock County

Most sign-up meetings will be held two days and farmers are urged to attend these meetings when scheduled as the committeemen will not be able to call on each farmer individually due to a decrease in the appropriation of funds.

All farm plans will be returned to the county office after the two sign-up meetings and farmers who have not attended meetings are asked to call at the county office to complete their farm plans.

Seven practices have been selected on the basis of the total conservation needs in he couny by the county committee with the assistance of the community committmen. The practices are: Contouring Interilled Crops, Establishing Sodwaterways and Terrace Outlets, Tiling, Weed Control on Farmland, Limestone, Fertilizer, and Green Manure Crops.

U. S. rubber consumption in 1946 was 63 per cent synthetic and 37 per cent natural.

KLEMME LOCAL NEWS

Mr. and Mrs. Ernest Helps of Garner were guests at a turkey dinner at the Tom Roths home Sunday.

Mr. and Mres. W. A. De-Merrit of Jackson Junction, Iowa, spent Sunday at the home of their son, Leslie DeMerritt and family.

From where I sit ... *by* Joe Marsh

Mystery of the Rocking Chair

Ma Hoskins has a favorite rocking chair that's worn and shabby, with a noisy creak. Pa Hoskins has listened to that squeak for thirty years . . . and he decided to do something about it. So he bought a new rocker, and hid the other in the barn.

Ma allowed as how grateful she was . . . but when Pa missed her one afternoon, he heard a familiar sound that led him to the barn. There was Ma rocking happily in her old chair—squeak . . . squeak.

No need to tell you how Pa felt.

Quick as a wink he hid the rocker and then brought Ma's chair back to the house. Now when he hears that squeak he looks the mellow glass of beer he's drinking and says to himself. "She's as entitled to her small pleasures as I am."

From where I sit, that's one of the reasons the Hoskinses are happiest, oldest-married, finest folks in our town.

Joe Marsh

The Silver Wedding Anniversary of Mr and Mrs. Fred Schmidt was observed Thursday evening, March 13th, in the dining room of the Klemme Evangelical and Reformed Church.

The evening was spent informally and a short program was presented Miss Gertrude Grosshuesch acted as mistress of ceremonies and Miss Beulah Goll was in charge of the guest book A set of silverware and other silver gifts, along with a purse of money was given to the couple

A lunch was served after the program The four-tier wedding cake, which was given by their children, Arlene(Mrs Irwin D Rasmus), Irene and Marvin served as a centerpiece on the table About a hundred and six guests were present.

March 13th was also the birthday of both Mr and Mrs Schmidt

RETURNED HOME FROM THE SUNNY SOUTH SATURDAY

Mr and Mrs Ted Dutheridge returned home Saturday from Tampa, Florida where they had spent the greater part of the winter. They purchesed a fine trailer before they left and lived in that in a large trailer camp that had a population of some 3,000.

The Dutheridges enjoyed the winter in the south and are already planning to go to Florida again next winter Mr Dutheridge said that next winter they will spend more time traveling through the south.

Mr. and Mrs. Herman Priebe Back From California

Mr and Mrs Herman Priebe returned home Friday from Los Angeles, California, where they have been since January 8th Mr. and Mrs. Priebe stayed with the Ing Lauritzen and Ben Swalve families while there.

They enjoyed the climate and had sunshine every day they were in California, and enjoyed many beautiful drives through the mountains and valleys. They expect to return there next year again for the winter.

Mr Priebe stated that Mr and Mrs. Emil Patet expect to start back for Iowa in about a week

Jolly Workers Club Members Gets Letters From Holland

The Jolly Worker Club met at the home of Wemkie Cavitt on Wednesday, March 12th, with 14 members present. Mrs. Pete Trampel was a visitor.

Minutes of the last meeting were read by Luella Boelman Lily Pearson, the president, ask the members to vote upon a White Elephant Exchange to be had at the April meeting. It was voted to be held in April

Mildred Gruis and Maude Bachman brought letters they had received from Holland. The family wrote that they had received boxes of clothing from the Jolly Workers club and sent their deep appreciation to the club. A box will be sent this week again.

Louise and Irene Waddingham had charge of the Bingo games and crocheted gifts were given to the winners by Mrs. Waddingham

A lovely lunch was served by Wemkie Cavitt and Mae Blumer The April meeting will be held at the Lois Schlichting home with Verbelle Gilpin as co-hostess.

Farm machinery production in 1946 was almost 9 percent higher than in 1945.

THE PLUNDERBUND!

Shamrocks Taking In State Tournament

SHAMROCKS SQUAD TAKING IN STATE BASKETBALL TOURNAMENT

Klemme is mighty proud of the showing the Shamrocks made in basketball this past season and to show their appreciation fans in the community raised a substantial fund to send the squad to Iowa City with all expenses paid The fund was started by several of our fine farmer fans who contributed liberally and the fund was then swelled by contributions from other farmers and town fans so it made it possible for Coach Pat Patterson and eight of the squad to make the trip

Coach Patterson and the following Shamrocks left early this morning for Iowa City to take in the games.

Dean Jacobs, Ed Grosshuesch, Harlan Carolus, Roger Ridder, Marvin Schmidt, Robert Bock, Ervin Osborne, Charles Christie, Francis Sherwood, Ivan Blumer, Mgr and Maurice Buckley

DIES AT BELMOND

Funeral services were held on Tuesday for James A. Wilkinss, 70, who died Saturday at the Steele Memorial hospital at Belmond after a week's illness from heart trouble He is survived by a sister, Lula, postmaster of Goodell and a brother, Lester, also of Goodell. The Rev. Carleton Spencer officiated at the home and in the Evangelical United Brethren Church.

ROAD NOTES

By C. F. Merten, County Engineer.

The following road program for Hancock County secondary roads was approved by the Board of Approval, consisting of one representative of each township and the Board of Supervisors.

It contemplates the grading and graveling of 38 miles of local roads, two miles of truck roads and the construction of 13 wooden bridges on local roads and 2 bridges of concrete and steel on the truck roads. This work will be financed from that part of the state gasoline tax which is alloted to Hancock County for use on the secondary road system.

The proposed program is being submitted to the Highway Commission for approval and if it is approved, most of the work will be advertised for letting in the near future. Some of the proposed work may be done by day labor, and a small amount may not be completed until 1948. The cost estimates given in the report are based on present prices for construction which are now approximately double the prewar prices.

KLEMME PEOPLE CORRESPOND WITH HOLLAND FAMILY

The 50-50 class of the Methodist Church has been sending parcels to the M. F. Dizy family at Weswal 3, Leerdam, Holland and two Klemme families have been corresponding with the Dizy for some time. Mr and Mrs. Clifford Montgomery and Mr. and Mrs. Carl Finders received a letter about once a month from their new-found Holland friends.

Mr. and Mrs. Dizy have 13 children and have sent pictures to Klemme of their family and scenes around Leerdam. Mr. Dizy is employed in a glass factory and makes fine instruments.

One of the pictures showed the after effects of a heavy snow storm in Holland. Snow was piled up to the eaves of the roofs on maby houses. One picture showed a stork sitting on her nest on top of a chimney.

Janice Hummel Received Letter From Sicily

Some time ago Janice Hummel put her name in a package being sent for foreign relief.

The other day she received a nice letter from a young lady, in Catania, Sicily, who said that clothing was greatly needed. The young lady's name was Maria Graziella Fickera. She had been ill since the war, and was a school teacher She told of some of the terrible destruction caused by the war an was very greatful for the things which she had received.

AVERY SUNBEAMS MET

The Avery Sunbeams met at the home of our leader, Mrs. Roy Arnold, on Saturday, March 8th Five members answered roll call by naming one way in making our home more comfortable.

During our business meeting it was decided to donate to the Red Cross.

A committee consisting of Doris Gruis, Iris Rosendahl, and Lillian Wille was appointed for the Home Furnishing scrap book.

Mrs. Arnold gave a lesson on the color wheel.

Iowa picture studies were given by Betty Lacey and Betty Ann Kramer.

An illustrated talk on using feed sack for curtains, dressing tables, skirts, and drapery was given by Lillian Wille.

During the social hour, lunch was served by Mrs. Roy Arnold.

The next meeting will be held at the home of Doris Gruis on April 12th.

Planning is the first step toward successful gardening.

Klemme Creamery Had Good Report For Past Year

Lunch was served after the games and Mr. and Mrs. Wilson were presented with a gift.

TO GROW CERTIFIED BROME GRASS SEED

The Hancock County Soil Conservation District Commissioners have received 180 lbs. of certified Brome Grass seed for seed production in the county. This seed is furnished by the Soil Conservation Nursery at Ames.

At the last meeting of the commissioners it was agreed by the commissioners that each take 60 lbs. of this seed for certified seed production. Each commissioner agreed to certify and return to the Hancock County Soil Conservation District 30 percent of the seed produced on this seed plot. The seed thus returned will be used next year for further seed production in the county.

GOOD CROWD ATTENDED ANNUAL MEETING AT COMMUNITY HALL

Three New Directors Were Elected At Annual Meeting

The annual meeting of members of the Klemme Cooperative Creamery Company disclosed that the local plant did a good business the past year under the direction of Kenneth Medin, as manager.

The total income of the plant totaled $238,728.85 for the year. Of this amount, in round figures, was over $162,000 for butter shipped, butter sold to patrons $15,000 and butter sold to Klemme merchants $29,000.

The plant is a member of the Tri-County Drying Association and buttermilk, which had heretofore been classed as waste product and brought very little, the past year brought in over $3,000. The plant will also receive in addition to the above about a $1,000 rebate.

The plant is a member of the Iowa State Brand Creameries and will receive about $5,000 in rebates from that source for 1946.

The plant employees at present are five men: Kenneth Medin, manager, Karl Huenemann, assistant to the manager; Harvey and Mervin Barkema truck drivers and assistants at the plant and Quentin Stille, truck driver. the meeting and heard a very good talk by Charles Thatcher, West Bend, director of Iowa State Brand Creameries. Paul Henderson, county agent, was on hand and showed interesting motion pictures.

Three new directors were named, Melvin Buseman, Elmer Beier and Fred Klinge. The retiring directors being Carl Wille, Henry Nolte and E. J. Blumer. The other members of the board are C. J. Wille, president, Clarence Lenz, vice president, Werner Schlawin, secretary and treasurer, Alvin Goll, W. H. Lemke, and Marvin Barz.

Mr. Medin's report disclosed that the plant paid an average of about 73 cents per pound for butterfat during the year, and have a savings account of $1,500.

Lunch was served to all at the close of the meeting.

Surprise Party Held For Mrs. Nagel

Many relatives and friends gathered at the home of Mrs. Henry Jost Sunday evening, March 16th. The party was in honor of Mrs. Marie Nagel's birthday.

Those present were Helen Masterson and Fleeda Wooton of Des Moines; Mr. and Mrs. Adrain Bielefeld and children, Charles, Billy, Joann, Pat and Patty of Dougherty; Walter Gast of Ventura; Mr. and Mrs. Hieko Brass and sons, Don and Russell of Goodell; Charles Bielefeld; Atlanta Thompson; Diana Masterson and Phyllis Kirkwood.

Mrs. Jost had prepared a delicious dinner which was enjoyed by all.

Mrs. Nagel received many nice gifts.

W. S. C. S. OFFICIAL BOARD HAD PARTY FOR MRS P. M. WILSON

The Methodist W. S. C. S. Official Board honored Mrs. P. M. Wilson at a party at the home of Dr. and Mrs. D. P. Anderson on Friday evening. Twenty-two ladies attended.

Mrs. E. J. Arnold gave the Scripture services and Mrs. Vern Bisom was in charge of games and entertainment. She presented Mrs. Wilson with a past President's W. S. C. S. Pin.

Lunch was served following the social hour.

'Better Luck Next Year' on Taxes

Experts Needed to Set Impartial Budget Figure

By BAUKHAGE
News Analyst and Commentator.

WNU Service, 1616 Eye Street, N. W., Washington, D. C.

WASHINGTON.—As the wrangle over the budget taxes and national debt continues, about the only comfort I can offer Mr. Taxpayer of 1947, if he should ask me for it, is a hearty "better luck next year."

Baukhage

And that is no vain hope, either. There is a very good chance that government will cost less next year This will not be due to any widely heralded "swing the axe," or so-called "economy drives" which congress often promises and seldom delivers. If the budget is proportionally smaller next year, it will be because figures prepared by the Bureau of the Budget will have been checked by congressional fiscal experts who get their jobs on merit and who are obligated to no political party. These men now are being selected by a professional personnel expert loaned from the business world.

At this writing the house and senate are struggling to find a compromise cut in the budget. Until they determine the size of the budget, they can't be sure of what they ought to do about taxes or reducing the national debt.

If it weren't that the budget were compiled by one party and authorized by another, we wouldn't have as much wrangling. Now there is nothing wrong with having plenty of debate on a subject like this, provided one or both sides are voting on the basis of actual facts which are set forth by a disinterested authority whom the public will accept. Such an authority will be provided, we hope, by the staff of fiscal experts next year.

Without such experts what happens? The house goes on record as to the budget cut it thinks it wants to make. The appropriations committee cuts down the various items. A bill is submitted again to the house and the fight begins, each congressman attempting to restore as much of the appropriation for his pet projects as possible. Log-rolling gets under way and the total is raised.

The same thing happens in the senate where an individual senator's demands are accorded even more weight. Eventually the ante is raised a little more. And if it doesn't get back up to the President's original $37,500,000,000 estimate (which may have been too high itself) there will be a supplemental bill passed later which will absorb any extra dollars that are lying around.

When Senator Taft was asked by Democratic Senator McMahon (who was attacking the Republican cut) if Taft wanted the senate to pass on the question "without having much information as to what we are doing," Taft frankly replied:

"We can only make an intelligent guess. We have no information before us as to the particular items of the $37,500,000,000 budget, in justification of the figure fixed by the budget (bureau) . . . we only know what is requested."

That is the keynote: "We only know what is requested."

Why should the opposition party take on faith the administration's figure? We have two parties to check on each other. Taft admits the Republicans haven't the facts now but he adds that in "ordinary" years "we will have a staff working during the recess"—supposedly composed of these neutral experts who now are being hired—"which can give us more intelligent information than we now have."

There's the hope.

★ ★ ★ ★

Music Is Key to Understanding

Few Russians heard the early state department broadcasts, inaugurated last month, and those who did were critical of the musical selections, objecting to "hillbilly" tunes like "Turkey in the Straw." They complained too about Bing Crosby's singing of Stephen Foster ditties.

This is only one instance where music has segued into world news since the war. I remember visiting the Opera House in Nuernberg when German musicians were first permitted to assemble there. The house had four walls intact and part of the roof, but only part of it. The rest as covered with canvas which kept out most of the falling snow but didn't keep out the cold No protense was made of heating the auditorium, and the place was freezing cold. Yet it was packed. The program however could not be completed. This was not due to the fact that the audience walked out—they stood or sat with the snow seeping in on them. The musicians' fingers simply got too cold to function. That was a year ago last November.

Today with the cooperation of the American military government, orchestras have sprung up in every town in the American zone and a large part of the broadcast programs are musical.

Reeducating the German in the field of music will be a less Herculean task than it is in other fields, for music has always been part of the home training of the German child—not merely something for which the music teacher was alone responsible.

I remember a German home I used to visit before World War I in which the short period after the evening meal and the time the youngest went to bed and the eldest went to his other studies was largely a musical hour. The most interested and active member of the group was the father.

Here in America we leave too much of the child's musical training to the schools. As the Hungarian composer Zoltan Kodaly, who is visiting this country, remarked: "Our ears must be trained to perceive the simpler musical phenomena before being able to follow the more complicated forms, and it is obviously the duty of public schools to give this first training to everybody."

Germany of course has another great advantage that America lacks. Goebbels has been removed. America's musical dictator has not. His organization has a standing resolution which reads: "The federation urges its locals to use their political and economic strength to combat the encroachment of high school bands and orchestras."

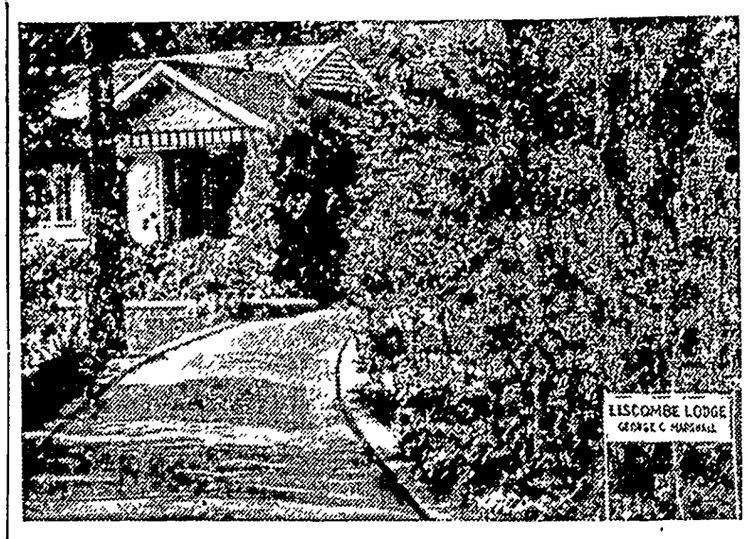
The dictator I refer to is, of course, one Petrillo of the American Federation of Musicians; the resolution is from their constitution which in conferring authority on him uses phrases like this: "It shall be his duty and prerogative—to make decisions in cases where in his opinion an emergency exists; —to issue executive orders which shall be conclusive and binding upon all members—etc."

Such a resolution and such absolute authority runs directly counter to the advice of Kodaly and to the thinking of anyone interested in the cultural development of America or in democracy itself for that matter.

This is one of the many facets of our musical life which touch politics as music touches many of the nation's other activities, past and present.

No, the Russians didn't like the hillbilly American music. And I doubt if the average American could absorb much of the somber and mournful Russian folk dirges although they contain beauty enough to the ear accustomed to hearing them and the mind trained to interpret them.

That must be remembered in considering all cultural relationships to world peace. We must be informed not only about the world as a whole, but specifically about each other. Mature interpersonal understanding implies a knowledge of each other's environment and also the habits, tastes and thinking produced by that environment. Music is a part of everyone's life; an expression as well as an impression. We cannot live peacefully with each other in our homes or on the globe without the establishment of understanding intercommunication. Music, understood, will be part of that necessary intercommunication.



MARSHALL'S RETREAT . . . Far from the madding crowd of Washington, Secy. of State and Mrs. George C. Marshall find sanctuary in this modest home in Pinehurst, N. C. The simple cottage is surrounded by pine, magnolia and dogwood trees.

NEWS REVIEW

Palestine Dispute Flares; Reds Endorse Mandate

PALESTINE:

U. S.-British Rift

While diplomatic observers expected no major rift to develop between the U. S and Britain over the heated exchange on the Palestine question, the outburst pointed up the apparent cross-purposes at which the two allies were working in the strategic Middle Eastern region with its oil-laden lands.

Foreign Minister Bevin's charge that President Truman had disrupted delicate British negotiations for settling the Palestine issue by demanding admission of 100,000 Jews into the Holy Land before the 1946 congressional elections to get votes was immediately denied by the White House. In a prompt reply, it was said that Mr Truman's declaration merely reaffirmed the U. S. position on Palestine taken in the summer of 1945.

Republican senators were quick to rise to the President's defense. Brewster (Rep., Me) said that Bevin was trying to make Mr Truman the "sacrificial" goat for Britain's failure to work out an equitable agreement between Jews and Arabs, and Taft (Rep., O.) pointed out that Bevin had conveniently dropped his proposal for partition of the Holy Land in the face of stiff Arab opposition.

U.N.:

U. S.-Red Harmony

Suspension of Russian opposition to a U. S. trusteeship over former Japanese mandated islands in the Pacific virtually assured U. N. approval of the American proposal to hold on to the territories for security reasons.

Earlier the Russians had threatened to force this country into taking unilateral action on the islands by demanding that the trusteeship question be postponed until formulation of a Japanese peace treaty. While Britain and Australia had joined in the Soviet opposition, it was considered that it would be comparatively easy to adjust differences with them.

In making their about-face, the Russians proclaimed that the U S was entitled to the trusteeships because it had made incomparably greater sacrifices than the other Allied countries in wresting them from Japanese control. Under the U S. proposal, the islands would be held open for U N inspection, except for strategic military installations that may be closed for security purposes

AUSTRIA:

Allies Clash

Indicative of the problems facing the Big Four in Moscow when their conference gets underway shortly, their deputy foreign ministers laying the groundwork for discussion of German and Austrian treaties agreed only half-way on an Austrian pact. Out of 62 clauses, agreement was reached on 32.

Major differences included:

U. S. and Russian disagreement over what constitutes Nazi assets in Austria. The U. S. contends that the Russians have removed important Austrian property as reparations on the grounds that they were Nazi property, seriously impairing the country's economy.

Russian support of Yugoslav claims to the richest and most densely populated provinces of Carinthia and Styria. The U. S., Britain and France object, declaring Austria's prewar boundaries should remain intact.

French insistence upon rigid control of scientific research. The U. S. argues that such supervision would hamper the economic redevelopment of Austria, leading to employment and trade difficulties.

In Washington, Secretary of State Marshall disclosed that John Foster Dulles, Republican adviser on foreign affairs, would accompany him to the Moscow conference In all, the U. S. delegation will include 84 members.

TRADE:

Modify Program

Seeking to soften Republican opposition to the administration's foreign trade program, President Truman issued an order sharply modifying reciprocal trade agreements

Acting after consultations with Republican Senators Vandenberg (Mich) and Millikin (Colo.), Mr. Truman directed that hereafter reciprocal agreements contain escape clauses permitting the President to modify or eliminate low tariff concessions that jeopardize an American industry.

Agreements also will embody a "most favored nation" clause, giving the U. S. the same trade advantages afforded other countries. At present, some states have agreements with others which tend to discriminate against American trade.

'GRIN AND BEAR IT' . . . This 13-month-old baby girl, abandoned in a hallway, learns to take the rough spots in life early at New York Foundling hospital.

EUROPE IN NEED

Wheat Exports Continue High

WASHINGTON. — Demand for wheat by most European countries will continue at a high level throughout 1948, in the opinion of Rep. Clifford R. Hope of Kansas, chairman of the house agriculture committee.

As basis for his statement, Hope cited the fact that the severe cold wave which has swept Europe this winter has killed most of the winter wheat crop. He also pointed out that the French minister of agriculture, here seeking seed wheat for re-sowing in the spring, was unable to buy enough.

Large quantities of wheat are being exported to meet the minimum food needs. While this program will reduce this country's carryover to about the level of last year's, he said, it will not reduce it to a dangerously low point.

Hope said that a good wheat crop is forecast this year and that it is unlikely any adverse conditions will arise which could bring about a crisis. He said the crop will be about equal to the 1,100,000,000 bushels harvested last year.

The committee chairman said it is unlikely that export controls on grains can be lifted on June 30 when present legislation expires. He said that as long as there is a great need for United States and other grains abroad and as long as supply is less than demand, some form of control is necessary.

Food grain exports are about 15 million tons a year short of the demand, according to M. M. Benidt, who has charge of all grain allocations for the agriculture department.

He said that as wheat allocations decline in the coming months, more corn from the 1946 bumper crop will be shipped abroad, although it is not as acceptable for food as wheat. Large quantities of oats and barley, usually not popular export items, have been exported in the last year No rye is finding its way outside the country, because of a poor 1946 crop.

THE WASHINGTON SCENE

Senate Committee Chairmen Are Experienced Legislators

(Editor's Note: This is the third in a series of articles on new congressional committees and their chairmen.)

By WALTER A. SHEAD
WNU Washington Correspondent.

WASHINGTON.—Experienced legislators are at the helm of senate committees of the 80th congress, a survey disclosing that the committee chairmen have served an average of 11 years in the upper house. Their length of service ranges from four years for Sen. Chapman Revercomb of West Virginia to 28 years for Sen Arthur Capper of Kansas.

In age, the new Republican chairmen average 61 years, five years older than senators as a whole Youngest of the group is Sen. Styles Bridges of New Hampshire, who is 48, while the oldest is 81-year-old Capper.

The list of committees and their chairmen continues:

Agriculture

ARTHUR CAPPER (Kas.), chairman of the senate agriculture and forestry committee, is at 81 the oldest man in the senate and ranks second only to Kenneth McKellar (Dem., Tenn.) in length of service. He was elected to the senate in 1919, after serving two terms as governor of Kansas

Now dean of the farm bloc, Capper has been an important figure in agricultural legislation for the last 20 years He voted for the McNary-Haugen bill in 1927, the agricultural adjustment bill in 1933, soil conservation in 1936, crop insurance in 1938. He voted in 1942 to include the cost of farm labor in computing parity prices and for the Russell amendment to the same effect in 1946. Capper was for the Smoot-Hawley tariff in 1930. In 1934 he voted for reciprocal trade agreements but by 1940 he was against extending them He supported creation of TVA in 1933 but is against the proposal for a Missouri Valley authority In a recent speech he announced that the parity price support program needs revision to prevent accumulation of unsalable surpluses.

Capper

Capper has a wide influence in the grain belt through a number of newspapers and magazines which he supervises from Washington He entered the publishing field by becoming a typesetter for the Topeka Daily Capital, which he now owns. His other publications are Capper's Weekly, Kansas Farmer and Mail and Breeze, Household magazine, Capper's Farmer, Missouri Ruralist, Ohio Farmer, Pennsylvania Farmer, Michigan Farmer and Kansas City Kansan He also owns radio station WIBW in Topeka.

Public Works

CHAPMAN REVERCOMB (W Va), still serving his first term, becomes chairman of the public works committee, which will take over the old committees on commerce and public buildings and grounds and non-personnel functions of post offices and post roads

Revercomb is 51 years old He was born in Covington, Va , served in the army in World War I, returned to Covington to practice law and moved to Charleston, W Va , in 1922. He was a member of the Republican state executive committee from 1932 to 1936 and was president of the Young Republican league of West Virginia from 1934 to 1936 He was elected to the senate in 1942. He is a former president of Charleston Bar association.

Revercomb

On public works matters, Revercomb voted against an appropriation to continue the national resources planning board in 1943, against an appropriation of 75 million dollars for a postwar planning fund in 1945, for the full employment bill in 1945 and against an amendment the same year to reduce federal aid for airports from 500 million dollars to 250 million dollars.

On most issues, Revercomb has followed Republican party policy. He voted with the majority of his party on 82 per cent of controversial roll calls in the 79th congress.

Judiciary

ALEXANDER WILEY (Wis.), chairman of the judiciary committee, is a regular Republican who voted with his party 85 per cent of the time in the 79th congress. In the second session he was absent for only 10 per cent of roll call votes.

One of the first problems before the judiciary committee under Wiley will be advisability of repealing emergency war powers not affected by the President's proclamation of the end of hostilities. In a report to the Republican conference, Wiley stated that, in view of the "continued national emergency," the "varied and complex nature" of the wartime controls and the "chaotic effects" of immediate termination of controls, the problem should be studied by the senate committees concerned with the various types of controls before the judiciary committee draws up overall recommendations.

Wiley

Wiley, born in 1884 in the town of Chippewa Falls, where he still lives, is a lawyer. He also owns and operates a farm and has been a director of a local bank. His only public office before his election to the senate in 1938 was that of district attorney for Chippewa county, which he held from 1909 to 1915.

The judiciary committee deals with courts and judges, anti-trust problems, bankruptcy laws, patents, immigration, civil liberties and constitutional amendments.

Interstate and Foreign Commerce

WALLACE H. WHITE JR (Me.), new chairman of the interstate and foreign commerce committee, is one of the few Republicans who have had previous experience as a congressional committee chairman. White was chairman of the house committee on merchant marine and fisheries from 1927 to 1931. In addition to transportation and general bills affecting commerce, White's committee handles radio and communications, civil aeronautics and merchant marine bills

White was also minority leader of senate Republicans in the 79th congress and now becomes majority leader in addition to commerce committee chairman. He was strenuously opposed for the committee job by Clyde M. Reed, (Rep., Kas.) who was represented as having the support of the railroads while White was backed by the radio industry.

White

White is 69 years old and has been in congress continuously since 1916, when he was elected to the house. He went to the senate in 1930 and is the third ranking Republican senator in seniority Before entering congress, White practiced law in Washington and Maine and was a senatorial secretary.

Labor and Public Welfare

ROBERT A. TAFT (Ohio), new chairman of the labor and public welfare committee, has endorsed changes in labor laws to enable "employer and employee to meet on a fairly equal basis." Specifically, he will seek enactment of legislation to hold unions responsible for contract violations, to require union financial reports, to establish mediation machinery outside the labor department to outlaw secondary boycotts, and to exempt foremen from the Wagner labor relations act. Most of these provisions were in the vetoed Case bill last spring.

Taft

Taft, a 57-year-old lawyer, is the son of former Pres. William Howard Taft. He served in the Ohio house of representatives from 1921 to 1926 and in the state senate in 1931 and 1932. He was elected to the United States senate in 1936.

The labor and public welfare committee will handle bills on education, health, veterans' hospitals and medical care, in addition to the subjects covered by its name.

'Building Bee' Solves Housing Shortage

HOLDREGE, NEB —Harking back to the pioneer days, Holdrege is reviving the old-fashioned "building bee" in an attempt to solve its current housing problems.

Early settlers in the plains country always "pitched in" to help their neighbors build a home, D C. Leffler, assistant manager of a local bottling works, recalled in suggesting the cooperative plan.

The idea was accorded a hearty response. The local newspaper printed coupons—one for persons willing to build under such a plan and another for persons willing to donate evening labor. Contractors volunteered to work in a supervisory capacity several evenings each week. Building men gave assurance that work can be done at night.

Desperate home-seekers are envisaging an end to their long quest for quarters.

"Off We Go"

AVIATION NOTES

AIRPORT CHATTER

High school students in the Chatsworth, Ill., aeronautics class have a textbook on wheels—a retired AT-6 plane, purchased for $200 as a war surplus item. . . Two other surplus planes have been purchased by Renton Vocational school of Renton, Wash., for mechanics' training The planes, twin-engined Cessna transports, are being overhauled by the 140 World War II veterans now enrolled at the school. The navy has activated a new air reserve unit at Denver Ultimate goal is to have 400 men, including 70 officers, on full-time duty there, with about 1,500 trainees taking their training at the field. . . . There's no doubt in the Wisconsin state senate that the air age has arrived. It received a bill to allow air minded state employees plane mileage of 10 cents per mile. Persons now using their own planes for state business are reimbursed at the car rate of 4½ cents per mile

* * *

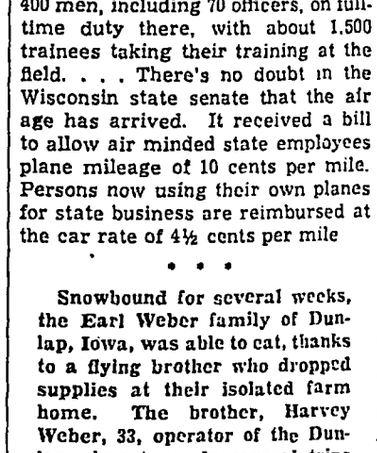
Snowbound for several weeks, the Earl Weber family of Dunlap, Iowa, was able to eat, thanks to a flying brother who dropped supplies at their isolated farm home. The brother, Harvey Weber, 33, operator of the Dunlap airport, made several trips to ease the plight of his brother's family, dropping groceries, fuel and other supplies—even ice cream and candy for the children and the Sunday paper.

* * *

FLYING FAMILY

Mr. and Mrs Wayne Adkins and their two sons of Elmo, Mo., rank as a flying family. Both Mr. and Mrs. Adkins and son, Keith, 17, are qualified as pilots while 14-year-old Donnie is waiting to solo when he's 16 Flying their own Cub plane, Mr. and Mrs. Adkins bagged 29 foxes and 13 coyotes in two months. When the shooting starts, Mrs. Adkins takes over the controls and Adkins handles the shotgun.

* * *

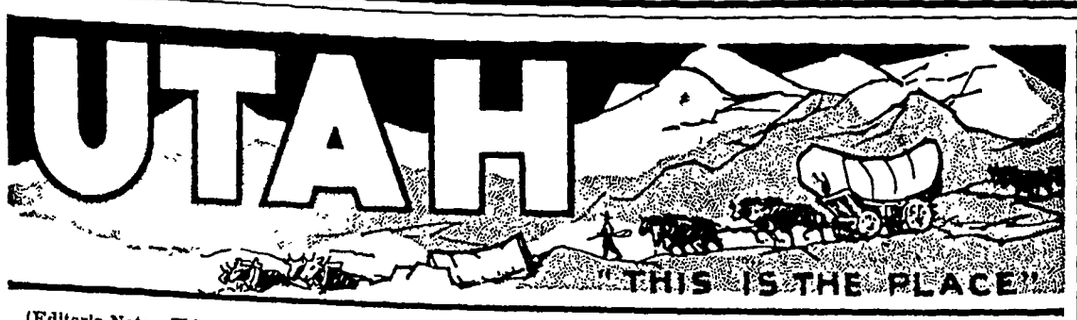


SOLID COMFORT . . . These moose and a deer, flown from Ontario to New York for a sportsmen's show, were perfectly content with their hold in a cargo plane and refused to budge for their owner, Joe Laflamm of Gogama, Ontario.

* * *

SUPERSONIC LAB

Under construction at the Berkeley campus of University of California is the world's first supersonic laboratory capable of simulating atmospheric conditions as high as 100 miles above the earth and speeds as great as 3,000 miles an hour. The equipment will include two ultra high speed wind tunnels—a pilot model that will simulate atmospheric conditions as high as 70,000 feet and speed as great as three times that of sound, and a larger tunnel simulating altitude of 50 miles.



(Editor's Note: This is another in the "Stories of the States" series.)

By EDWARD EMERINE

WNU Features.

Old Jim Bridger, at his lonely fort on Green river, talked to the leader of the strange band and learned these emigrants were headed for the Great American Desert beyond the mountains. He tried to dissuade the leader, a determined sort of man, and pessimistically remarked that he would give a thousand dollars if he ever saw an ear of corn grown in Salt Lake valley.

The emigrants moved on, and a hundred years ago, on July 24, 1847, Brigham Young looked out across a seared and desolate land of sagebrush and alkali, and said:

"This is the place!"

One lone tree clung to life in the entire valley Heat waves danced and hot breaths of air came up the canyon. If there were inward doubts among his followers, none is recorded. Obediently the band moved into the desert.

Mormon Convert.

Brigham Young was a native of Vermont and of Revolutionary ancestry He had become a convert to the Church of Jesus Christ of the Latter Day Saints, the Mormon church. When Joseph Smith, the founder, was killed at Nauvoo, Ill., Brigham Young was chosen to take his place

Rocks and hills and desert did not deter him. They were but the materials with which he would build. In this strange land he and other Mormons would be far removed from religious and political differences. Here they would have a land of their own.

A dreamer was Brigham Young, but he was a doer as well Perhaps his eyes saw more than the mirages on the desert that day He might have envisioned the Territory of Deseret, the beginning of an American epoch, the birth of a vast and productive region The valleys and mountains that his people were to colonize later were before him, and there was a temple to be built, cities and towns to be laid out, industries to be developed, canals and ditches to be dug, and water to be spread over the thirsty soil.

Faith Saves Crops.

The Mormon leader likened the group to a swarm of bees beginning a new hive The Beehive became their symbol, and all men were workers. The hardships of crossing the plains and mountains were as nothing compared to conquering the desert. There were discouraging days when hunger stalked Huge locusts came to eat their crops "Have faith! Have faith! Pray!" And they had faith, and they prayed Out of the skies swarmed seagulls—thousands and thousands of them—and they devoured the locusts!

Brigham Young stated his wants and the group's needs, and builders set to work. The famed Mormon tabernacle was built without nails or steel.

Monumental Effort.

At the ground level of the Salt Lake Mormon temple are huge earth stones, each weighing three tons, and 50 in number A mountain of granite 20 miles away furnished the material. Huge granite blocks were quarried in a canyon, slung with chains from heavy carts and drawn by oxen to the site Over 40 years from the time Brigham Young designated the temple site, the construction was complete, the angel Moroni set in place and 75,000 people took part in the dedicatory services But Brigham Young had been dead for many years

The climate of Utah is dry, stimulating and wholesome. The sky is so clear that no cloud specks it on 300 days a year. Lacking rain, the Mormons pioneered irrigation in America, bringing water from the mountains to irrigate crops in the desert.

Today, Utah's chief crop is sugar beets, but vegetables and fruits are grown in profusion. Other crops are wheat, oats, potatoes, hay, alfalfa, corn, barley and rye

More than two million sheep, 100,000 dairy cattle and a half million beef cattle are grazed in Utah Wool production amounts to 20 million pounds annually.

Manufacturing in Utah began with the Mormon pioneers, who wove woolen clothing, mined coal, quarried rock, canned fruit and vegetables, made sugar from beets, installed grist mills, slaughtered cattle for meat, made butter and cheese, and utilized other raw products at hand The great copper mines came later, with smelting and refining of ores to follow Bingham, Magna, Tooele, Garfield and Provo became mill towns. The Geneva steel plant at Provo is the largest in the West, with a mountain of ore close beside it.

"We cannot eat gold and silver," warned Brigham Young, but many were lured by those and other metals to explore the desert and mountains Mineral resources of Utah are varied, including gold, silver, lead, iron, manganese, gypsum, oil, coal, copper, salt, zinc and many others

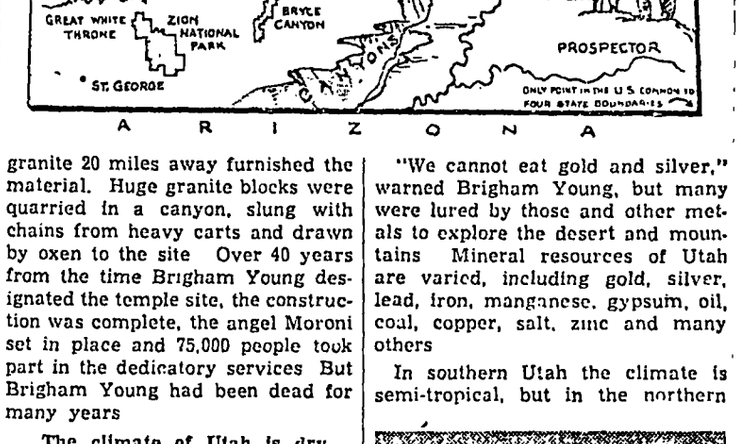
In southern Utah the climate is semi-tropical, but in the northern and eastern parts there are skiing and winter sports at high altitudes.

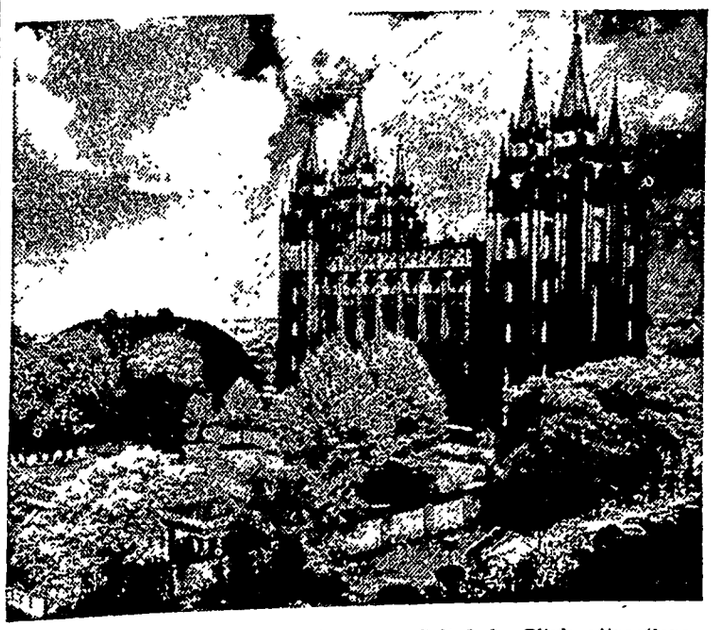
Utah scenery will compare with any in the world. Here are mountains as grand as the Alps, sunsets that rival those of Italy and Greece. Marvelous canyons, mammoth stone bridges, weird rock formations and other master works of nature are found throughout the state.

The mountain lakes and streams provide fine fishing and the forests abound in game—bear, elk, antelope, grouse, deer, prairie chickens and others.

Utah, once a formidable desert, now teems with populous cities and thriving villages. Once parched and burned ground has been changed to green fields, gardens and orchards. Paved highways, airlines and several transcontinental railroads provide transportation. What wonders a hundred years have wrought!

This year every city and hamlet in Utah is preparing a celebration. They will celebrate the centennial of the arrival of Mormon pioneers. Less than 75 per cent of the people are now Mormons, but all will join in that celebration regardless of creed. The building of Utah was the opening of the West. It was an epoch in American history.





MORMON SHRINE . . . Notable among Salt Lake City's attractions is the Mormon temple. Last of the Latter Day Saints temples in Utah to be completed, the Salt Lake City edifice was begun in 1853 and not completed until 1893. The temple is built of granite, many of the larger blocks being carted by ox-teams before a railroad was built in 1873. Seen in silhouette to the left is the famous Mormon tabernacle, noted for its acoustics and organ.

Salt Lake and Flats Lure Tourists, Industries, Racers

There is no need to sink a shaft to find salt in Utah. It is mined on top of the ground where it lies many feet deep on the shores of Great Salt lake and in famous Bonneville salt flats. Naturally the state is a large producer of both common salt and sodium products.

People who go to the beaches of Great Salt Lake find that they float like a cork in the water because of its saline content, which ranges from 22 to 27 per cent. The lake is 4,200 feet above sea level and has no known outlet, except evaporation. It is 80 miles long and from 20 to 32 miles wide. Great Salt Lake has several fine beaches.

Because of its salinity no fish live in the lake, but a small brine-shrimp, no larger than a man's fingernail, exists in great numbers in it.

West of the lake are the Bonneville salt flats where thousands of acres of white salt stretch on either side of the paved highway which crosses the area. The flats are so level that many automobile speed records have been made on them. Ab Jenkins, former mayor of Salt Lake City and famed race driver, prefers the flats to all other courses, claiming the salt keeps rubber tires cooler than a dirt or board track. The flats also are notable for their mirages.

CHIEF EXECUTIVE . . . Herbert B. Maw, native of Ogden, is serving his second four-year term as Utah's governor. A lawyer, teacher, ex-serviceman and legislator, he has been prominent in Latter Day Saints church affairs.

5 MINUTE FICTION

Fixin' Daddy

By R. H. Scanlon

WNU Features.

"DADDY, you're so funny," Carol's shrill laughter filled the room. "There's the salt shaker—right there." She pointed a chubby finger in front of Jim's plate, but his hand had groped past it and was wandering in the middle of the table—toward the milk pitcher. There was a crash and milk flooded the cloth. Janet came running in.

"Daddy spilled the milk! Daddy spilled the milk!" Carol chanted.

"Carol!" her mother gently commanded, "sit down and finish your cereal."

"I can't, there's milk on my chair."

Janet wiped the chair dry. "Now, hurry up or you'll be late for kindergarten.

"I want some more milk first," Carol insisted. Janet took the pitcher out and filled it. When she came back Jim was gone.

She found him standing by the open window seemingly staring into the street.

"Jim, Carol didn't mean anything. You know how youngsters are."

"Yeah, truthful." Jim turned on her. "Is that why you sent Carol over to mother's last week? Were you afraid of what she'd say to her blind father? 'Our second honeymoon'," he mocked, "that's what you called it. 'Keep the kid away for a while, she'll tell him the truth.' Huh, I've been wondering what kind of a spectacle I've been making."

"Mummy, mummy, come here," Carol's voice came from the basement.

"That's not true. You're talking crazy."

"Crazy," he said, throwing the word back. "All right, I'll talk straight, Jan, I'm not going to be pampered. If I'm a blundering idiot, a spectacle to my own child, then don't try to hide it."

They ate lunch together in silence. When Jim finished he abruptly left the table

"Darling." He stopped and turned. "What?"

"I've got to do the shopping after I do the dishes. Carol's coming home around two. Will you keep an eye on her?"

"Sure, both of them," he muttered and turned away.

Janet stared at her shopping list and felt the wall between them growing higher and thicker.

When Carol came in Jim was sitting at the radio She stopped in the doorway eyeing him gravely.

"Hello," she ventured.

"Hello," he said switching off the radio. He leaned forward holding out his hands to her, "Come here, Small Fry."

Carol came forward slowly.

"Mama says you lost your eyes, but you didn't, did you?"

"Wouldn't you like me if I didn't have any eyes?"

Jim started to hug her, but suddenly she pulled free and ran out.

For a moment the blind man stood uncertainly in the middle of the room bewildered and confused, then slowly the expression of bewilderment melted into one of resolution.

When Janet returned the living room was empty.

"Jim!" she called, but there was no answer The house was strangely quiet.

"Carol! Carol!" she cried.

"Mummy, mummy, come here," her daughter's excited voice answered from the basement door.

"Oh, darling, darling," Janet sobbed, but Carol was too busy tugging at her mother's dress to be cried over.

"Mummy, come an' see!"

Janet wiped the tears and basement-gloom out of her eyes and there in the middle of the floor surrounded by screw-drivers and wrenches sat Jim with Carol's bicycle wheel tucked between his knees. He was grinning from ear to ear and had a big smudge of grease on his nose.

"Hi, honey," he said with the old familiar chuckle. "Sit down and watch my mechanics. 'Small Fry' and me are setting up a partnership. She breaks 'em and I fix 'em."

He reached up and pulled her pigtails. Carol jerked her head away, indignantly and regarded her mother wisely.

"Mummy, daddy has too got eyes. See, he's fixin' my bicycle."

Frisco-Oakland Bridge Employs Staff of 264

The San Francisco-Oakland Bay bridge has 264 employees, this large number being required as the span, owing to its eight-mile length and heavy traffic, maintains its own police force and fire department.

The staff also includes 29 mechanics whose sole duty is to service disabled cars, which average 43 a day.

Happy Relief When You're Sluggish, Upset

WHEN CONSTIPATION makes you feel punk as the dickens, brings on stomach upset, sour taste, gassy discomfort, take Dr. Caldwell's famous medicine to quickly pull the trigger on lazy "innards" and help you feel bright and chipper again.

DR. CALDWELL'S is the wonderful senna laxative contained in good old Syrup Pepsin to make it so easy to take.

MANY DOCTORS use pepsin preparations in prescriptions to make the medicine more palatable and agreeable to take. So be sure your laxative is contained in Syrup Pepsin.

INSIST ON DR. CALDWELL'S—the favorite of millions for 50 years, and feel that wholesome relief from constipation. Even finicky children love it.

CAUTION: Use only as directed.

AROUND IOWA

SHAVED

At the start of the basketball season, Mike Miles of the Livermore high team, announced he would not shave as long as his team kept on winning. Livermore won some thirty straight games and by that time Mike had acquired a rather substantial fringe by way of facial adornment. In the state tournament, Pocahontas trimmed Livermore and enabled Mike to get a badly needed shave

BURNING WATER TOWER

The Harla fire department, which has put out all kinds of fires, thinks it has now seen everything when they were called to put out a fire on a watertank belonging to Roy Havick, of near Harlan. The tank was frozen and Havick tried to thaw it out with a blowtorch He was all too successful. The tank burned briskly until the department arrived and extinguished the fire with chemicals.

Send or phone your news to 12 and build your home-town

LOCKJAW DEATH

Stepping on a nail while doing some butchering work recently cost the life of Willard Price, of Earlham His death the result of lockjaw which followed a week later

FIRST EGG IN FIVE YEARS

At Sheldon last week, Gerrit VanDerMeulen enjoyed the first egg he had eaten in five years. Gerrit is an American citizen by birth but in 1928 his mother became ill and the family moved back to Holland While there, he met relatives of the Ike Boerema family of Sheldon and through them started friendship by mail which resulted in his coming to Sheldon to live recently His mother and father spent much of the last five years in a concentration camp Gerrit finds the abundance of things in America still hard to believe

PLANE CRASHES

LeMars residents witnessed three plane crashes laat week Fortunately, the planes were only "models," entered in a model plane show staged by the LeMars Model Club there Over 1,000 persons turned out to see the tiny gasoline-powered craft compete.

EIGHT BURGLARIES

Algona hit an uxpected new high in burglaries one night last week, with eight business houses being "opened" during the small hours. Only a little petty change, less than $15 in cash, was taken, or about $1 90 per burglary Obviously crime in Algona does not pay. At least, not very well

BIG MUSKIE

At Onawa, Ralph Cutler is proudly showing friends a muskie he caught in Canada last fall, which has recently been received by him from the taxidermist's. The big fish measures 45 inches long and weighed 35 pounds Henceforth, Mr. Cutler will not have to rely on his fisherman's memory.

LONG DISTANCE

At Odebolt, the R. D Nobles enjoyed a pleasant telephone call from their daughter at midnight Thursday. The call was being made from Japan at 2 00 p. m. Friday afternoon The daughter, Mrs Robert Perkins, had just arrived in Japan to be with her husband, an AAF major

THINKS FALL PIG CROP WILL BE UP

Need For Iowa Producers To Better Balance Spring And Fall Crops

Iowa farmers should make a rather large increase in the 1947 fall pig crop, believes E L. Quaife, Iowa State swine specialist

Quaife gives two main resons for this suggestion In the first place, he says present signs indicate that the spring crop this year won't be as large as was hoped for. This means a favorable outlook for hog prices well into 1948. Second, there is need for Iowa producers to strike a better balance between spring and fall pigs.

The normal ratio of spring to fall in Iowa, Quaife says, is about 70-30, while last year the ratio may even have been 80-20. In his opinion, pork producers would balance production with a ratio of around 60-40—60 percent of the pigs farrowed from Jan 1 to June 30 and 40 percent from July 1 to Dec. 31 This balance would tend to temper the seasonal ups and downs that farmers find in the hog market

Use Fall Gilts

In order to increase the number of fall pigs, Quaife suggests that farmers who had fall pigs last year might use the fall gilts instead of using the old sows that will farrow this spring These gilts from the crop last fall can be bred in late April or May for August farrowing. This will get the fall pigs earlier than if the old sows are bred late in the spring for the fall farrowings

Farmers who did not have fall pigs last year have two ways of getting started with fall pigs this year. If their spring pigs come early, the old sows can be rebred for the fall farrowing, but if the spring pigs are late, a better bet would be to buy fall gilts and sell the old sows.

Quaife says many farmers will be able to pick up fall gilts from farmers in the neighborhood If this is not possible, farmers can watch the local markets where good fall gilts will be coming within a short time. Arrangements often can be worked out with the hog buyer so that good gilts can be sorted out and purchased at market price.

CROWDING BABY CHICKS COMMON FAILURE CAUSE

A baby chick is a small creature You can hold 2 or 3 of them in your hand, and it isn't hard to get 100 of them in a small box

Perhaps that's why a lot of folks pile 300 or 400 chicks into a brooder house that should only hold 200 or 250. It looks as if there should be enough room for the extras. And there may be for a day or so, but after that the chicks are going to be crowded That means trouble

W R Whitfield, Iowa State College poultry specialist, says the crowding of chicks probably is the number one reason for failure in the poultry enterprise. There are not enough flock owners who will accept the rule that a baby chick should have ½ square foot of floor space at the start They won't believe it, and they load a brooder house far beyond its capacity

As a result, Whitfield says, the chicks simply don't have room to grow They crowd around the brooder or against the walls when they want to get warm They crowd at the feeders when they try to eat, and they shove each other out of the way in trying to get a drink of water All this crowding causes slow, expensive growth, and adds to the danger of disease outbreaks and a high death loss

Whether the brooder house has been built on the farm or purchased commercially, Whitfield emphasizes that the only way to tell how many chicks it will hold is to get out the measuring stick and measure the floor space Since a chick should have ½ square foot of floor space, the capacity of a brooder house equals twice the number of square feet of floor area. That's the number of chicks to buy, and not 100 or 200 "extra."

Ell 4-H Boys Met At Allan Anderson's

The Ell Midgets 4-H club boys met at the home of Allen Anderson Tuesday night, March 11th The Ell club has made a big increase in its membership and now has the largest enrollment of any Hancock County 4- H club with 24 members. If you boys in Ell township between the ages of 10 and 20 years old want to get associated with an active group, just join the Ell Midgets. Leaders are Lawrence Radloff and Donald Greiman

Paul Henderson, county extension director discussed record books, Soil Conservation Activity and showed the film, "A Fast Worker"

The next meeting will be April 28th at Weaver's.

Local Flock Owners May Enter Chicks Hatched Next Week

Local flock owners are reminded that if they are buying chicks hatched next week the birds can be entered in the district and state Chicken-of- Tomorrow contest.

Some interest is being shown in both the contest and the Chicken -of- Tomorrow program which is aimed at improving the quality of poultry meat. Improved quality will assure Iowa poultry raisers of a hold on their markets. And will increase profits from the enterprise

Local hatcherymen, produce station operators, feed dealers, lumber dealers and other allied groups are cooperating in sponsoring the programs and contest.

Chicks entered in the contest will compete for district and state cash prizes this summer

The kits are being distributed by hatcheries, feed dealers and processors These kits include a pamphlet on the program, instructions, and an entry blank. See your hatchery if you are interested.

International Harvester

announces $20,000,000 price reductions

We believe there is nothing more important this country than to lower the prices of the goods that people buy

The American people have insisted that the government withdraw from its attempts to control prices in peacetime. That places the responsibility where it belongs—in the hands of business and industry. Not all business can reduce prices now Not all can reduce by the same amount.

Our company has felt a duty to act as promptly as possible In our case, the business outlook now makes it possible to move toward the goal of lower prices The only way out of the vicious circle of higher and higher prices is to break through.

We have taken this step not because of present competitive conditions nor because of a drop in demand from customers. We have taken it because of our belief that ANY PRICE IS TOO HIGH IF IT CAN BE REDUCED

These reductions, which will save the users of our products approximately $20,000,000 a year, will become effective before April 1st and will apply to a selected list of tractor, farm machine, motor truck, and industrial power products. Since we lose money on a few of our products, and barely break even on some others, these reductions will not apply to our entire line. Reductions will be made individually on products. Some will be cut more than others. Exact details will be announced as soon as possible.

Our ability to maintain this lower level of prices will depend in part on what happens to the prices and flow of materials that we buy from others. Because we believe price reduction is vital, we are willing to assume the risks that are involved.

IH prices had not gone up as much or as fast as many others

Here are Average Price Increases since 1941

All Manufactured Products (U. S. Government Reports)	63.7%
Metals and Metal Products (U. S. Government Reports)	41.2%
Motor Trucks	35%
Industrial Power Products	34%
Farm Machines	25%

These benefits to customers will depend, however, on uninterrupted production at reasonable wage levels. This is not a program that can be carried out if it is hampered by strikes or work stoppages

Our employes have had substantial increases in pay, and wage questions are currently being discussed with many of the unions with which we deal Stockholders have recently had an increase in dividend rate. Having considered the interests of these two groups, we are now making these price reductions for the benefit of the third group—our customers.

Business, to our way of thinking, has a social as well as an economic responsibility. This company has long followed the policy of operating in the interests of three groups—its customers, its employes and its stockholders. The duty of the management is to see that equal justice is done as between the three groups.

This price reduction program is another demonstration of our policy in action.

HANCOCK COUNTY BOARD PROCEEDINGS

6TH ADJOURNED JANUARY MEETING

Garner, Iowa
March 3, 1947

The Hancock County, Iowa, Board of Supervisors, met in session pursuant to adjournment on above captioned date with F J Schoun, John Chambers and George Th Gerdes, present.

The minutes of the last meeting were read and approved

On motion and second the division tax on the SE¼ of Section 13, Township 97, Range 24, between Otto Erickson and Toreif as recommended by Engineer C F Merten is approved.

On motion and second the official bonds of Anson Avery, Township Clerk and Maynard Schoneman, Deputy Auditor, are approved.

WHEREAS, Charles F Merten has filed his report recommending the grading of approximately 30 4 miles in the various townships,

BE AND IT IS AHEREFORE RESOLVED by the Board of Supervisors of Hancock County, Iowa that the report of the engineer be and the same is hereby tentatively approved and the 10th day of March A D., 1947, at the hour of 9 30 A M at the Courthouse in Garner Iowa, is fixed as a time and place for the annual Board of Approval meeting, at which time the representatives from the various township Boards of Trustees will meet with the Board of Supervisors and the County Engineer to formulate the 1947 local road construction program for Hancock County, Iowa All as provided for by law

The county auditor be and he is hereby ordered to notify the respective township clerks in the county of the time and place of meeting

The foregoing resolution was offered and read by Supervisor Gerdes, who moved its adoption, was seconded by Supervisor F J Schoun, whereupon the chairman placed the motion of its adoption and upon roll call the vote thereon is F J Schoun, George Th Gerdes, and John Chambers, aye. Nays, none

Whereupon the chairman declared the resolution duly adopted

On motion and second the report recommending the construction of certain bridges in Hancock County Iowa, is approved.

In the matter of the petition of Vincent Kopacek, et al for the establishment of a drainage district No. 146, a sub-district of DD No. 1 and 2, Hancock County, Iowa, to be located in Section 2 and 11, Township 95, Range 25, West of the 5th PM.

WHEREAS, Wm. Henschen was appointed engineer on June 27th A. D., 1946, as commanded in Section 7432, Code of Iowa, 1939 and laws amendatory thereto, to make a survey, investigation and report on the feasibility and necessity of the establishment of said proposed drainage dirtict and said engineer did file his report on March 3rd A. D., 1947, which report states that he has surveyed the lands of the petitioners and the lands in the water shed of the proposed district and in his opinion the proposed establishment as prayed in prayer of the petitioners will be conductive to public health, convenience and welfare and will be of greater benefit than the cost thereof and recommends that said district be established as prayed.

BE AND IT IS THEREFORE RESOLVED by the Board of Supervisors of Hancock County, Iowa acting for and in behalf of the proposed Drainage District No. 146, a sub-district of DD No. 1 and 2, petitioned for by Vincent Kopacek, et al, that the report of the engineer be and the same is hereby approved as a tentative plan and said report of the engineer and plan shall come on for further hearing at the Courthouse in Garner, Iowa, at 2 30 P M on the 21st day of April A D, 1947 The County auditor be and he is hereby directed to cause notice of hearing on said petition and the report of the engineer to be published in the Britt News Tribune a newspaper of general circulation published in Britt, Iowa, advising all owners, occupants, lienholders and encumbrances of record in the proposed district of the pendency and prayer of the petitioners, the favorable report of the engineer thereon the approval by the Hancock County Iowa, Board of Supervisors of the report as a tentative plan and that same may be amended before final action thereon and that all claims for damages and all objections to such establishment shall be in writing and must be filed with the county auditor at or before the time set for hearing thereon.

The foregoing resolution was offered and read by Supervisor Gerdes, who moved its adoption, was seconded by Supervisor Schoun, whereupon the chairman placed the motion of its adoption and upon roll call the vote thereon is F J Schoun, George Th Gerdes and John Chambers aye Nays, none.

Whereupon the chairman declared the resolution duly adopted.

WHEREAS, there is now in the hands of the treasurer the sum of $21,719 37 credited to the emergency fund, and

WHEREAS, there is now in the hands of the treasurer the sum of $169 02 credited to the Hancock County Memorial Hospital Fund, and

WHEREAS, it is desired to transfer $2,000 from the Emergency Fund to the Hancock County Memorial Hospital Fund, for the following reasons Bonds have been voted but not yet sold, money is needed for current expenses by Hospital Board and

WHEREAS, proper arrangements have been made for the return of this money, same to be returned within one year from date of transfer and

WHEREAS there is sufficient money in the emergency fund to meet all demands thereon until said money can be returned and

WHEREAS all laws relating to municipalities have complied with

NOW THEREFORE be it resolved by the Board of Supervisors of Hancock County Iowa subject to the approval of the State Comptroller that said sum of $2,000 00 be, and the same is hereby ordered transfered from the Emergency Fund to the Hancock County Memorial Hospital Fund and the Couny Auditor Fred C Missal (secretarial officer) is directed to correct his books accordingly and to notify the treasurer of his transfer, accompanying the notification with a copy of this resolution and the record of its adoption

The vote thereon being as follows F J Schoun George Th Gerdes, and John Chambers, ayes Nays, none.

BE IT RESOLVED that the claims hereinafter set out be allowed in amounts designated thereon and the county auditor be and he is hereby authorized and ordered to draw warrants on the several funds of Hancock County, Iowa, in payments of such claims in amounts set opposite each claim

On motion and second the board adjourned to March 10th A D, 1947, at 9 o'clock A. M.

ATTEST:

FRED C MISSAL
County Auditor
JOHN CHAMBERS
Chairmon

Wage-Price Warning

Another round of wage increases inevitably would bring higher prices to absorb the higher production costs, the United States Chamber of Commerce has warned.

"A second round of wage increases will force closely corresponding price increases in the months ahead, unless such increases finally force both labor and goods out of the market," said Emerson P. Schmidt, director of the National Chamber's Economic Research Department.

"Such a collapse of production and employment is a strong possibility because of the disparity between the incomes of workers whose wages have been artificially forced upward while the incomes of others are lagging behind.

"Last winter the Chamber of Commerce of the United States warned that the first round of wage increases would be accompanied by closely corresponding price increases. That warning proved all too true."

New Treatments Cut Mortality in Liver Diseases

Newer and better methods of treatment are reducing the mortality rate of liver diseases, according to Dr George F. O'Brien of Chicago. Animal experimentation, he said, has thrown new light on the relationship of diet, vitamins and toxic substances to degenerative liver diseases. In addition, they have indicated that certain substances have "a definite protective and possibly some curative value" in liver disease characterized by abnormal disposition of fat in the body.

Faulty absorption, storage and metabolism of vitamins in liver diseases are being investigated and the knowledge is being applied in practical therapeutics, Dr. O'Brien said. Basic tissue changes in liver disease, whatever the specific cause, consist of fatty infiltration or fatty metamorphosis.

In studying the results of experiments, Dr. O'Brien said that four factors stood out in causing fat deposits in the liver and ultimate cirrhosis. These were too much fat and too little protein in the diet, deficiency of vitamin B complex and lack of chlorine, a substance of derived from animal and vegetable tissues which prevents deposition of fat in the liver.

Driving Test Reveals Lack of Judgment

Results of an unprecedented test of the driving ability of more than 11,500 motorists conducted at the Franklin Institute of Philadelphia, Pa., reveal that a majority of the drivers examined made mistakes in judgment and attitude in handling a car that might have resulted in serious accidents if they had occurred on the highway.

The experiment was conducted on the driverater, a driver-testing device developed after years of research and installed in the institute as a public exhibit last June. Persons taking the test were divided into three categories — men, women, and persons under 20 years of age. The survey of test results was made from carbon copies of the score cards visitors received after taking their turns at the wheel of the stock-model automobile used in the device.

The testing "run" in the driverater is a three minute drive through normal traffic, simulated by a colored motion picture shown on a screen just in front of the car's radiator. The driver makes his score by the way in which he handles the controls at seven of the traffic incidents that occur during the running of the film.

Varied Insects

Insects are marvelously constructed and colored so that they may survive. They are found literally everywhere except in the extreme north. In Spitsbergen, north of Norway, only one insect has been recorded, but tens of thousands are found in North America. Whether creepers or flying insects—carniverous or vegetarians—brilliantly colored or drab, each species represents nature's handiwork in the highest degree. Brilliantly colored butterflies generally are found in the lush tropics or in the summer season, when the vegetation is in flower. Drab insects blend perfectly in most cases with the background, or hide in the soil, underbrush, bark or in water. Some insects mimic presumably distasteful species, to escape being devoured by birds. Some have terrible weapons, claws, stingers, poison fangs Others have "fake" armament, ineffectual though frightening to their enemies. Some emit stench defenses. Others are swift fliers or hoppers, and run for it when in danger.

Iowa farmers are more than 40,000 bushels short of having enough flax seed to plant the acreage they would like to seed this spring, a recent survey indicates.

Card Of Thanks

In appreciation, we wish to take this means of expressing our thanks to the many who sent us cards, letters, flowers, and gifts and who called on us while at the Nursing Home. Mrs. Irvin Blank and Gary Dean. (1tc)

We want to take this means of expressing our sincere thanks and appreciation to our friends and neighbors; to the Ladies Guild; and for the farewell parties and for the lovely gifts presented to us; and also to everyone who assisted us in moving, and to all those who helped in any way when we left the Klemme community. Mr. and Mrs. Emery Schaefer and Sons. (1tp)

SILENT SAM

By Jeff Hayes

Some Mistake

An old man was reading a tombstone in an early American graveyard.

"Here lies Thomas Ludlow, who was a great lawyer and an honest man," read the inscription.

"Darn it," exclaimed the old man, "they put the lawyer's name on it, so why didn't they put the other fella's too?"

Next in Line

"George," she said, frowning, "this letter from your father indicates that he is an undertaker. I thought you said he was a doctor."

No, dear, you misunderstood. I merely said that he followed the medical profession."

One Scot to Another

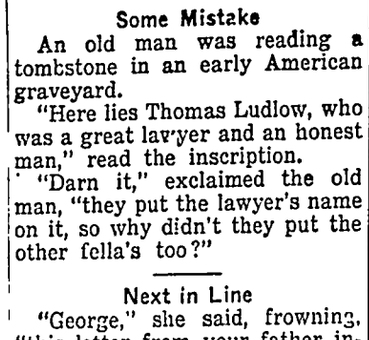
A ragged little boy was sobbing on the streets of Edinborough. He was peering intently into the gutter as he walked along.

"Ha' ye lost somethin', laddie?" asked McTavish.

"Aye," replied the boy. "I canna find me penny."

"Never mind, lad, never mind," said McTavish kindly. "Here's a match to help ye look for it."

RETREATING



"Jimmy, how dare you kick your little brother in the stomach."

"It was his own fault, Mother, he turned around.

Reason for Grief

Undertaker—"Are you one of the mourners, sir?"

Abe—"Of a soitainty. Vhy shouldn't I be? De deceased owed me tventy dollars."

Handicapped

Two New Yorkers were walking one winter day when the temperature was below zero. Isaac had been talking for twenty minutes in an animated monologue. Finally he turned to his companion. "Look Abe, I bin talkink all by mineself for tventy minutes. Vhy don't you contribute something to de conwersation?"

"I can't," replied Abraham. "I forgot mine gloves."

Specialist

"That's a very nice suit you have on, Worthington. Did your wife help you pick it out?"

"No, I picked it myself."

"Does your wife pick any of your clothes?"

"No, just the pockets."

Wholesale Lot

"Our violinist has just died," the piccolo player explained to his friend. "We are trying to get donations for his burial. Would you care to give five dollars?"

"Certainly," replied the man quickly. "Here's 25 dollars. Bury five of them."

Plenty of Nothing

"What are you looking for?" asked the suspicious and experienced wife.

"Oh, nothing," he answered hurriedly.

"Well, you'll find it in the bottle which had the whiskey," she told him.

Stop the Flow

Housewife—"What's the idea of turning off my lights?"

Collector—"Why, if we don't get the currency, you don't get the current, see?"

Still Same Old Desire

A young officer applied to his colonel for leave to go home and be married.

The colonel did not believe in young married officers, so in a fatherly lecture, he said: "You are young, my lad, and there is no hurry. Think it over for a year. If you are still determined then, you shall have your leave."

At the end of the year the young officer again proffered his request.

"You still wish to get married?" asked the colonel.

"Yes, sir," was the reply.

"Very well, then, I suppose you deserve it for your constancy."

"Thank you, sir."

At the door the boy paused for an instant to add: "But it's a different woman, sir."

Changing the Date

"Tickets, please!" said the conductor. After all the other passengers' tickets had been punched, an old gentleman continued to go through his pockets, one after the other, and to evince every sign of nervousness. "Lost your ticket?" inquired a fellow-traveler; then, "Why, you're holding it in your teeth all the while!" Hurriedly the conductor punched the ticket and departed.

"Unfortunate affliction, absence of mind," said one of the passengers, cheerfully, as the train got under way.

"Absence of mind nothing!" said the old man. "I was chewin' off last week's date."

Household Hints

If the collar of a man's shirt is badly worn, cut it off with a razor blade and use it for a pattern in cutting a new collar from the tail of the shirt.

—•—

Cut worn out bath towels into rectangles to put under table place mats. The toweling protects the table from hot dishes which may mar the surface, especially if the mat used is of a thin material.

—•—

Rubber heel marks may be removed from linoleum with a cloth moistened with turpentine.

—•—

After washing your powder puff, pin it to the sunny side of your window curtain and let the air speed its drying. When it is completely dry, raise the nap with a stiff brush.

—•—

Have you ever thought of making cupboards or sliding racks under the stairs? It's a handy place to keep bridge tables, folding chairs, games and other bulky equipment.

—•—

When you paper a room, mark the number of rolls of paper it took inconspicuously behind the door for use the next time.

—•—

Sweep up broken glass carefully and empty it into a tin can. Use a damp cloth or moist cotton to pick up the tiny slivers.

The Washington MERRY-GO-ROUND

By DREW PEARSON

ERA OF FANTASY

WASHINGTON.—It is difficult for the average person to understand the amazing vistas opened up by science during World War II and realize that the unbelievable era of Buck Rogers fantasy is now actually here.

The most obvious development was the atomic bomb. Not as well known but perhaps even more fantastic are the numerous secrets of the earth which the bomb's invention also opened. For the past three years, for instance, geoclastic scientists have been working on a project for setting off a controlled chain reaction in the crust of the earth.

This project is described by scientists as a hydrogen chain reaction, in which the hydrogen in the surface of the earth would be made to burn in a slow but continuous stream. Simultaneously, these scientists are reported to be preparing a means for speedily extinguishing such blazes.

Fantastic as this may sound, it is only a small phase of the field which science opened up at a time when the government, in desperation and out of fear of what enemy scientists might be doing, gave American scientists full freedom to work.

An earth-crust chain reaction now is deemed a reasonable possibility and might mean the end for a country even as large as Russia. A chain reaction of this type could carry across mountains, through ice and snow, searing everything in its path with the relentless force of a gigantic, fire-burning steam roller.

American scientists warn that what they are working on also is being worked on by scientists all over the world. No nation has a monopoly on knowledge What American science has is a head start and the "know-how"

* * *

DISLIKES MODERN ART

President Truman is strictly a conservative when it comes to modern art. "Ham and eggs" art he calls the paintings of the surrealists, the futurists and the cubists. The chief executive wants his art down-to-earth and easy to understand. He likes it to be beautiful, not shocking, and to represent something. Reporters saw an example of the art Mr. Truman loves recently, when he gave them a private showing of "The Peacemakers"—a painting by George Healy which the President had purchased for the White House for $10,000.

* * *

MARSHALL'S 'FILIBUSTER'

GOP congressmen are accusing General Marshall—half-jokingly—of being just as good at filibustering as Senator Bilbo. Members of the house foreign affairs committee say that in their closed-door session with the new secretary of state, he kept on talking until just before the bell rang calling congress into session. By that time there was no chance for them to fire any embarrassing questions.

Several Republican congressmen came to the secret committee session primed with questions on Palestine and Russia. However, Marshall, with one eye on the clock, gave a brilliant monologue on foreign affairs for more than an hour.

Marshall's monologue, however, gave a well-rounded picture of U. S. foreign policy. Here are the highlights:

RUSSIA—The Byrnes policy of being fair but firm with Russia will be continued. Marshall has given this policy careful study and is convinced Byrnes was right.

AUSTRIA—Will be the first treaty to be taken up in Moscow, largely because it is "in the nature of a liberated area"

GERMANY—Within three years the German people should become economically unified and self-sufficient, requiring no more loans or food from the U. S. A.

PALESTINE—The United States must be more cautious regarding Palestine now that Britain has agreed to lay this problem in the United Nations lap. Instead of giving advice regarding Palestine, the U. S. A. now will have to act.

EUROPEAN RELIEF—Food continues to be the greatest stabilizing influence in the world, and the United States must continue to feed the world—perhaps for some years to come.

CHINA—"I am somewhat disillusioned about the Chinese situation," Marshall commented. He spent more time on this subject than any other, remarking with a laugh that he felt more at home when talking about China. His off-the-record discussion, however, included little he had not already stated publicly.

* * *

MERRY-GO-ROUND

Mrs. Eleanor Roosevelt and son, James, have signed contracts to help in the scripting and to give technical advice for a screen biography of the late President. Producers will be Kennedy-Buchman productions, affiliated with Columbia. . . . Allen Dulles and his brother, John Foster Dulles, of the New York law firm of Sullivan and Cromwell, have been retained by Eric Johnston's Motion Picture association as advisers for the Geneva international trade conference in April.

PRAYER FOR CHRISTIAN BROTHERHOOD

LESSON TEXT—John 17 1-11, 20-23.
MEMORY SELECTION—And now I am no more in the world, but these are in the world, and I come to thee. Holy Father, keep through thine own name those whom thou hast given me, that they may be one, as we are.—John 17 11

The voice of the Son of God lifted in audible prayer! What could be more sacred and more blessed? He who had by act and example taught his disciples loving service (John 13), and had spoken to them words of comfort and assurance (John 14-16), now prayed for himself, for them, and for us.

While he spoke most intimately with the Father as his only begotten Son, he prayed aloud that his disciples might hear his prayer and join with him in it.

This prayer is often called the high-priestly prayer of Christ, and rightly so, for here the "one mediator between God and men, the man Christ Jesus" (I Tim. 2:5) spoke as "the High Priest of mankind who begins his sacrifice by offering himself to God with all his people" (Godet).

First we find that he prayed for himself as he spoke of

I. Salvation Finished—Then Glory with the Father (vv. 1-5).

He looked up and said, "Father," that was all No struggling, no pleading, just the recognition of his own divinity, his intimate and unique Sonship to God. Throughout this entire prayer the same close relationship is found. It was not as we would pray "Our Father," but "Father."

Jesus was the Son of God. Yes, he was and is God. He and the Father are one in blessed eternal, infinite unity. But as he is in the Father, we who believe are in him. So the poet well says:

"Near, so very near to God,
Nearer I cannot be,
For in the person of his Son
I am as near as he."

This divine Redeemer, who laid down his glory when he came to earth (Phil. 2.7, 8) to be a Saviour, was now ready to take up that glory again. He spoke of the work of salvation as completed—for in his obedient soul the death on the cross which was just ahead was already accomplished.

Now he was ready for the Father to glorify him even as he had glorified the name of the Father. That prayer was answered, and Christ now sits at the right hand of the Father in heaven. What a glorious Saviour we have!

His prayer was soon turned to those who had believed in him. They were precious to him, for they were given to him by the Father.

II. Out of the World—Then Kept by the Father (vv. 6-11).

There is something powerfully assuring to the believer to read the words of Jesus which declare that these who had believed on him had been given to him by the Father. They belonged to the Father, and he gave them to the Son. They kept the Word of God, and thus they knew the Son as the manifestation of the Father's name. What could be more certain for time and eternity!

Note that they were taken "out of the world"—that does not mean that they left this earth. They lived here as we live here, but they were delivered from that evil world power which opposes God.

Some professed Christians who find their greatest delight in fellowship with the Christ-rejecting world had better read carefully here, for it appears that the one who is truly in Christ is not "of the world."

These disciples had to remain in the world (though they were not of it!) and they needed to be kept. Now that the earthly ministry of Jesus was to be brought to a close, he tenderly placed them anew in the Father's mighty hand. Again we say, what could be more blessedly secure than that!

We must note that our Lord had a special interest and prayer for his own. Verse 9 obviously does not mean that he is not interested in all mankind. He died for them (John 3:16). But here his prayer was for his own, and in that prayer the world was left out. That makes us feel still more assured in him. He, the blessed Son of God and only Saviour, prayed for me, for you!

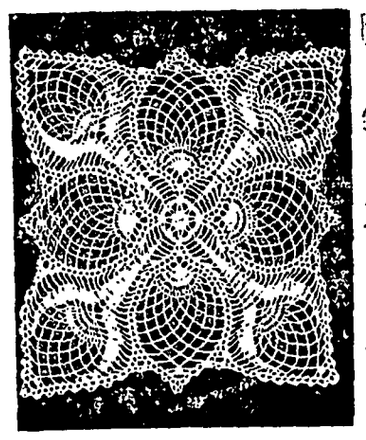
The closing words of verse 11 reach out into the third petition of our Lord, as he prayed for their

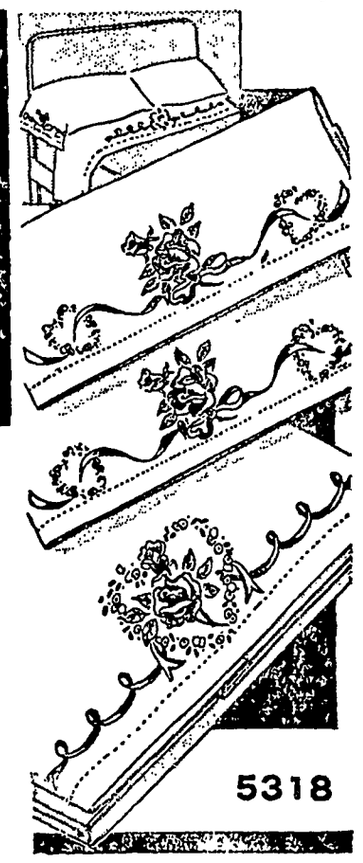
III. Unity in Christ—Then Testimony to the World (vv. 20-23).

The verses between the foregoing division and this one (vv. 12-19) are important. Our Lord was concerned about the hatred of the world for these who had received the Word of the Father, and yet he would not have them taken out of the world. They were to be his witnesses—even as we are to be in our day. They must remain in the world; but being one in Christ and sanctified through the truth, they were to be kept for God and used by him.

NEEDLEWORK PATTERNS

Crochet a Gift Doily or Runner Heart and Flowers Embroidery





5885

Pineapple Design

HANDSOME eleven-inch squares to crochet in the popular pineapple design. Crochet one square and use it as a doily—do three and join them to form a buffet or dresser runner. It will make a treasured gift for a friend who collects this exquisite motif.

DEVELOPS NEW SOYBEAN TYPE

Farmer Near Garner Grows High Producer

Former Hancock County Supervisor Ben F. Greiman, who owns and operates a large farm in Liberty township, recently developed a soybean which shows much promise.

In 1940 Greiman purchased a bushel of Richland soybeans from the Indiana experiment station and after growing them for several years he noticed an occasional stalk that would tower 8 to 10 inches over the average in the field The bean had more pods per stem and had the cluster at the top characteristic of the Richland with the color of the straw resembling the Manchu bean.

Greiman went into the field at harvest time, pulled these plants up, grew them in his garden for several years and in 1944 and 1945 he planted small plots in his field He found they outyielded his Richland beans by an average of about 8 bushels an acre and matured several days earlier with the standing quality excellent

In 1946 Greiman interested a number of growers in the county in his product and test plots were planted in 8 different farmers' fields scattered throughout the county with the reports of harvest time in 1946 excellent The eight farmers who grew this soybean reported yields of from 3 to 16 bushels over other beans planted in the same field. Greiman is continuing his experiment. He has a limited supply of these beans for sale

In addition to his regular farming operations, Greiman is an experienced horticulturist and has a large orchard and garden containing many varieties of fruits, berries and vegetables. Experimentation is his hobby and in the case of soybeans it apparently has paid off

La Favre Sells Purebred Bull To Scranton Farmer

C. E. La Favre, a Brown Swiss breeder of Klemme, has recently sold the bull Daisy's Rollo's Pat, 75754, to H. E. Johnson of Scranton, Iowa, according to a report from Fred S Idtse, Secretary of the Brown Swiss Cattle Breeders' Association at Beloit, Wisconsin.

Is your subscription paid in advance? Check your date, please.

Two Injured When Pile Of Sacked Feed Falls At Warehouse

When loading a truck with feed at the warehouse of the Klemme Food Market Friday morning a large pile of sacked feed toppled over onto Harvey Hubbard who was pinned underneath the pile and sacks fell on Junior Larsen's head.

Mr Hubbard suffered severe bruises on his leg but is hobbling around and able to go back to work Tuesday Junior suffered some injury to his back but it was not considered serious.

Seventh and Eighth Grade News

—Clara Smith, Teacher

La Nelle Harvey will represent our school in the Hancock County Spilling Contest March 22nd Jo Ann Hummel placed second in the eighth grade In the 7th grade Delores Thiemann placed first and Maralee Ridder second. Each winner recieved a prize in money

The following have turned in the required number of book reports for the entire school year Delores Thiemann, and Maralee Ridder have turned in the greatest number.

Judith Brede
Pauline Kramer
Maralee Ridder
Delores Thiemann
Shirley Bisom
Andra Jones

We are working on propositional phrases in seventh English. The eighth grade are studying infinitives, participles, and gerunds.

From where I sit ... *by* Joe Mar

Do Men Like Women?

Maybe you read that recent article in a national magazine, claiming that American men don't really like the company of women. They just put them up on a pedestal and leave them there.

But I wouldn't say that that was so in our town. Look at any married couple—like the Cuppers. Jane wouldn't nag if Dee spent his evenings "with the boys"—but actually Dee likes nothing better than to stay home by the fire, sharing a glass of beer with Jane, playing cribbage, or just talking.

And when he does go out an afternoon of fishing dow Seward's Creek, or for an ev glass of beer at Andy Bot Garden Tavern, Jane is almos ways with him (except when got a spot of baking in the o

From where I sit, re doesn't rule out everyday panionship . . . and never sh They go together—essential p of a successful marriage.

THE KLEMME TIMES

Volume 52. KLEMME, IOWA, MARCH 26, 1947 Number 19

Services Held Thursday For Mrs. Gretchen Schlawin

FUNERAL SERVICES HELD LAST THURSDAY FOR MRS. SCHLAWIN

Funeral services were held at the Klemme Evangelical and Reformed Church on Thursday afternoon, March 20th for Mrs Gretchen Schlawin, 68, who died at 7:00 o'clock Monday evening of a heart attack while enroute home from Mason City with a group of Klemme women Rev Calvin Grosshuesch delivered the funeral sermon and arrangements were in charge of the Wellemeyer Funeral Service of Klemme Interment was on the family lot in the Ell Township Cemetery Mrs Schalwin was carried to her final resting place by Mitchel Bock, Wayne Freiman, Aaron Wille, Lloyd Gordon, Leonard Kaduce and Alvin Goll.

OBITUARY

Gretchen Schlawin, daughter of Henry Wille and Antje nee Janssen, was born on the 24th day of January, 1879 at Surhausen, Emden, Ostfriesland, Germany She was the oldest in a family of six children She was baptized in the Reformed Church at Zurhausen, February 9, 1879 She came to America with her parents at the age of four Her parents settled on a farm in the neighborhood of Klemme and it is here that Gretchen spent her childhood and youth She attended the public school and received her religious instruction in the Ell Town Church She was confirmed by Rev. Hy. Freick. Her memory verse on the day of confirmation was "The world passeth away, and the lust thereof but he that doeth the will of God abidth forever." John 2, 17

She was married to William Schlawin February 7, 1889. They made their home on a farm 3½ miles east of Klemme. Six children were born to this union two of these, a son and daughter, died in infancy A daughter Meta, died at the age of nine, and their son Gerald died at the age of nine.

Her husband preceded her in death July 31, 1936 Since Oct. 1944 Mrs. Schalwin lived in Klemme. She was a faithful member of the Evangelical and Reformed Church, and a Charter-member and regular in attendance, and an active member of the Women's Guild and the Adult Sunday School Class. Her children will remember her as a good mother, her friends will remember her as an example of Christian living.

She died suddenly at Clear Lake at 7:00 o'clock Monday evening, on her way home from Mason City where she and some other ladies had spent the day. She attained the age of 68 years, one month and 23 days.

Surviving her and mourning her death are her two sons, Werner of Klemme and Arthur of Garner. Two brothers, Cornelius and Carl Wille of Klemme. One sister, Mrs. Naska Bock of Klemme and one granddaughter, Miss Vohn Schlawin and many other relatives and friends

Slaughter lamb prices will probably continue high all winter and spring.

HELLO, FOLKS!

Mr. and Mrs. Barnard Pringle are the parents of a baby boy, weight 7½ pounds born at the Garner Nursing home on Wednesday, March 5th. He has been named Duane Francis.

Sugar Stamp No. 11 Becomes Good For 10 Pounds April 1st

According to notice received from the office of temporary controls, spare stamp No. 11 in OPA family ration books will become good April 1 for 10 pounds of sugar

Validation of the 10-pound stamp will mark OPA's changeover from the fivepound ration procedure for household users The current stamp, No 53, good for five pounds, will expire on March 31.

This new 10-pound stamp does not mean a "sugar bonus", nor does it mean definite evidence of a substantially larger food supply The office of temporary controls warns housewives against, overoptimism regarding the supply, and against using the 10-pound supply too fast—so that too little is put aside for later 1947 canning. There will be no canning sugar stamp validated according to present plans.

Changing the value of ration stamps from five to 10 pounds does not mean that consumers will get twice as much sugar It simply means that in order to make the nation's present supply of ration stamps last longer, the remainder of this year's supply of sugar will be available 10 lbs. at a time, instead of five pounds at a time. New ration stamp books for everybody would cost $2,000,000.

The adminstration gives the following points for housewives to keep in mind.

1. One ration stamp must now do the work of two Each stamp will be good for 10 pounds, but stamps will not be validated as often as they were last year. when two stamps were made good for home canning The sugar housewives get when they cash their first 10-pound stamp will have to fill as many needs as two 5-pound stamps did last year

2. There will be no special stamps for home canning this year Housewives should plan the use of the sugar they get from the new 10-pound stamps to make sure it fills both their regular home use and home canning needs

3 In the midwest, where most canning is not until late summer or early fall, there is special need for housewives to save sugar for canning starting April 1 if there is to be enough in households later in the year

April Is The Best Month To Put Up New Birdhouses

In this year more than ever before the cheerful song and the bustling activities of birds around our homes will be welcomed

The conventional bluebird and wren houses may be put near buildings comparatively short distances from the ground, the former on posts in the open from five to ten feet high, and the latter under eaves of buildings and on open porches. The opening in wren houses should be about one inch in diameter or about the size of a quarter. The opening in bluebird houses should be about one and one-half inches in diameter. When erecting the birdhouses, most people immediately think of bluebirds and wrens. However, many other welcome man-made nesting sites. Hallow trees are the nest sites for many different kinds of desirable birds, including the woodpeckers, nuthatches, titmice, chickadees, and crested flycatcrers. Even the beautiful wood duck nests in hollow trees. It is an exciting adventure to build a birdhouse and have one of the uncommon birds claim it for a home.

The name Christopher means Christ Bearer.

'Heed Their Appeals - Buy Easter Seals'

Ask Aid For Crippled And Disabled Persons

Spring is coming some days it seems as if it is actually here, and can't you tell the difference? Yes. most people feel mighty happy these days because spring is coming with its promise of new life and hope

But there's a large part of our people who can't enjoy fully the promise of new life and hope unless we, you and I, give them this promise We mean crippled boys and girls and their parents and crippled adults.

At this time every year, the Iowa Society for Crippled Children and the Disabled sponsors the annual Easter Seal sale Now, these Easter Seals are just little slips of paper they're brightly colored and gay and that is symbolical because they help brighten the lives of the thousands of crippled here in Iowa

You see these seals the money you use to buy them is the major source of funds the Iowa Society for Crippled Children and the Disabled has to carry on its many and varied services to the handicapped This program is wide in scope because the Society serves ALL handicapped not just one segment or one phase

For example, the Society furnishes special needed equipment such as wheel chairs, braces, and artificial appliances, medical and dental care, hospitalization, physical therapy, convalescent care, transportation to and from the schools, clinics, and hospitals. Educational assistance covers home teaching, tuition to private schools, speech correction, hospital instruction, legislation for special education and demonstration cerebral palsy school and staffed with professional personnel The Society's program also includes special camping programs for the crippled, vocational guidance, and sheltered workshop projects . and the services of case workers who go into the field seeking to help handicapped people who have not discovered the Society and what it can do for them.

We could go on for columns about the magnitude of this task and its necessity . . . but we believe the best appeal of all . . . is the warm feeling you get in your heart when you buy Easter Seals and know that you are doing your share to help these handicapped. So, HEED THEIR APPEAL — BUY EASTER SEALS.

Is your subscription paid in advance? Check your date, please.

Local Girl Finished Among Highest In Spelling Contest

The Hancock County Spelling contest was held in the Garner Gymnasium and Auditorium on Saturday, March 22, 1947.

The thirty nine contestants were limited to twelve in a written contest. Those qualifying (in order of rank) to spell orally were

Rose Wellik, Britt No. 6
LaNelle Harvey, Klemme Ind.
Alice Hejlik, Britt 7
Varneil Humphrey, Ell 2
Leah Haberkamp, Liberty 1
Naomi Rasmuson, Garner Ind.
Eileen Langlitz, Goodell, Ind.
Sharlene Johnson, Erin 3
Mildred Urick, Garfield 9
Douglas Clark, Britt Ind.
Arvis Larson, Kanawha, Ind.

The oral winner was Douglas Clark of the Britt Ind. School.

The oral champion, Douglas Clark spelled with the written champion, Rose Wellik, with Clark winning the contest.

This entitles him to represent Hancock County in the state spelling contest to be held in Des Moines in April

The pronouncer of the words was C W Sankey, Supt. of Wright County Schools, Clarion, Iowa

The Judges were L. J. Thies of Britt, Earleen Van Buskirk of Goodell and Mrs. Bella Kurtz of Garner

Prizes of $10 00 in cash were given by the Garner Lions Club to the first five place winners.

DORIS MARY HAMMON WEDS HENRY NOVAK

Garner— Doris Mary Hammon, daughter of Mr and Mrs. Sam Hammon, became the bride of Henry Novak, son of James Novak of Britt, March 12 in the Little Brown Church near Nashua. The Rev. F. L. Hanscom officiated at the double-ring ceremony. Mrs. Hanscom, organist, played nuptial music.

The couple was attended by Miss Nova Chesnut of Mason City and Alton Kobernusz of Manly.

The bride is a graduate of the Garner high school. The bridegroom is a graduate of the Gilman high schoool. He served more than four years in the armed forces, most of the time overseas, with medical corps in Africa and Italy. After a short wedding trip they will live on a farm near Duncan.

We specialize in printing Wedding Announcements.

Only One Ticket Up For Town Election Monday

LICENSES EXPIRE MARCH 31

All licenses issued by the State Conservation Commission, fishing, hunting, trapping, and 12 other miscellaneous licenses including game breeders, bait dealers, fur dealers, etc., expire on March 31. The Commission has purchased some 400,000 licenses for 1947, and they will be in the hands of approximately a thousand agencies authorized to sell them by April 1.

GRADE MUSIC PROGRAM WAS REAL SUCCESS

There was a large crowd present at the school auditorium on Tuesday evening to see the grade Operetta, directed by Mrs. W. E. Patterson. LaNelle Harvey accompanied on the piano, and the several grade teachers assisted in producing the program.

Many said it was one of the best operettas ever staged by the grades in Klemme, and all who attended enjoyed the show.

HERE'S ONE FOR RIPLEY

Last Sunday moring Clarence Neuberger south of town glanced out of the window and saw a tree near the road afire. The fire was about 12 feet up from the ground and the top part of the tree toppled over and was blazing at both points where it had parted.

Clarence examined the tree and noted it was hollow and probably usd by a squrrel, but what is still puzzling him is how the tree caught afire in the hollow. There had been no bon fires in his or his neighbors yards and so the possiblity of a bird carrying a burning twig to the hollow was ruled out.

Maybe Ripley can tell us how the tree caught afire!

Leave Klemme

Mr. and Mrs. P. M. Wilson, who sold their drug store business in Klemme to R. A. Jorgen- Jr, March 1st, left Tuesday for Des Moines for a visit of a few weeks with their son-in-law and daughter, Mr. and Mrs. Robert Risser. The Wilson's have not decided as to where they will locate.

FARMERS WILL RAISE FLAX

Many farmers in Hancock County have indicated that they plan to raise flax this year in response to the request that the total flax acreage over the U. S. be double last year's acreage, according to Alfred V. Josten, Chairman of the Hancock county AAA.

The reason for the higher goal this year is to offset the shortage in fats and oils, and to help meet the increasing demands for linseed oil crushed from flaxseed. Linseed oil is our major drying oil. The increased housing, business building, and the great demand for all kinds of manufactured articles require a great increase in this crop.

However, a number of these farmers have expressed difficulty in getting the seed. Mr. Josten wishes to advise farmers that the Flax Development Committee of the Flax Institute of the United States has sent a list of farmers who have seed for sale to both the County AAA Office and the Farm Bureau Office, and that anyone interested may contact either office.

Most of the seed is being offered by farmers in South Dakota, Minnesota and other western states. Some Hancock County growers have already made contact and find the seed is still available.

Mrs. Kenneth Medin Entertained The Saturday Club

Mrs. Kenneth Medin was hostess to the Saturday club at her home Saturday afternoon. High score in contract bridge was won by Mrs. P. M. Wilson and second high by Mrs. Sumner Trumbel

Polls Will Be Open All Day At The Community Hall

Monday is Town Election in Klemme and the voting place is at the Comunity Hall. Citizens of Klemme can vote any time between 8:00 a. m. and 7:00 p. m.

There was no opposing ticket filed this year and the old officers, W. C. Keraus for Mayor, John Etchen, C. E. Kluckhohn. C. A. Larsen and Lloyd Lau for councilmen; C. G. Waterman for Treasurer and Orville Bridges for Assessor, will be the only names appearing on the ballot. However, there will be space provided so that names can be written in.

Even though there is no opposition, it is urged that citizens go to the polls and give the men a good vote which would indicate that you think they have done a good job in running the town for the past two years.

Spring Arrived In Light Coat Of Snow This Year

The calendar said it was the first day of spring on Friday, March 21st, but the weather man said it was still winter, as there was a light coat of snow on the ground and the weather was rather cold. Saturday and Sunday were both nice warm days, but the thermometer dipped to the freezing mark again Monday morning.

We need lots of warm, windy weather to dry up the fields if the farmers are to get any seeding done by the first of April.

Entertained At Dinner And Bridge Party

Mr. and Mrs. R. A Jorgenson entertained a group of friends at a buffet dinner Friday evening at 6:30, after which contract bridge was played at five tables.

High score for the ladies was won by Mrs. Art Kudje, and for the men, C. G. Waterman. Travel prizes were won by Mrs. Earl Schaeffer of Forest City, and Ed. Jacobs.

Former Klemme Folks Guests Of Tex Ritter

Mr. and Mrs. Carl Nettifee and Stephen Dale, who now live in McAllen, Texas, attended a stage show given by Tex Ritter and his famous cowboys.

A fine show was given and Tex had his famous horse go through his many tricks. The climax came when little Stephen Dale was taken on the stage for a special part of the show. He was greatly admired by Tex and his cowboys.

Will Farm In Partnership

In a recent story The Times stated Lester Neuberger would run the Frank Schultz farm this coming year. We were half right. Robert, son of Mr. and Mrs. Schulz, will farm in partnership with his brother-in-law, Lester Neuberger.

Mr. and Mrs. Schulz have leased the farm to the two young men. They will start building a new house in Klemme as soon as the frost is out of the ground.

Commencement Speaker Here

W. Henry Galbreth of Des Moines, former Klemme superintendent of schools, has been chosen as the Commencement speaker for the graduation exercises of the Senior Class.

Birthday Surprise For The Editor

A few friends staged a surprise party on the Editor, Tuesday night, the date being his birthday. The well-wishers brought along a nice lunch and gifts.

Republican Party Control Shifting

Taft Swings to Right As GOP Senate Leader

By BAUKHAGE
News Analyst and Commentator.

WNU Service, 1616 Eye Street, N. W., Washington, D. C.

WASHINGTON. —Recently the keen ears of the master politicians on Capitol Hill have been tuned to some strange squeaks and rattles developing in the otherwise smoothly running Republican senate machinery It is confidently predicted on the Democratic side of the aisle that "Chauffeur" Taft who had pretty easy going in the driver's seat up until the latter part of February will have to jump out and tinker under the hood more than once.

Baukhage

From now on, observers say, there are going to be a lot more orders from the back seat.

When the gentleman from Ohio took over after the November elections even the old-timers sat up and took notice of the way he assumed charge. He just shuffled the deck and dealt himself the cards he wanted: chairman of the policy committee; chairman of the labor committee which was going to direct labor legislation on what had been almost the No. 1 issue of the day; chairman of the committee which handles the new economic report. Under the reorganization act, this report must

JOHN W. BRICKER
Dark Horse in Leash

be submitted annually to congress by the President's economic council.

With reasonable support from party stalwarts and with these powerful chairmanships in his hands it looked as though the senior senator from the Buckeye state easily could ride herd on the party vote, delivering it when and where he wished.

But, did you ever try to ride a horse or drive a cow with a large sized bumble-bee leaping from forelock to buttock or from cud to rump? Not so easy, and no bumble-bee ever buzzed or stung like the apis presidentia.

Early in January I reminded you of the trouble the presidential bee was expected to cause when I quoted Republican National Committeeman Clarence Budington Kelland's remark:

"I don't think you are going to see the matter (Republican candidacy) jell at all until Ohio decides whether it's going to be Taft or Bricker." And it hasn't jelled. Although it was predicted Bricker would bow out, he has refused to bow Quite the contrary, it is Taft who is bowing—not out, but to the demands of the right wing of the party. (Taft's friends insist Bricker will exit at the right moment.)

But Taft's first obeisance was made toward the end of the Lilienthal hearings. He announced his opposition to the confirmation of the TVA head and did it with such absence of the famous Taft logic that eyebrows went up all over the place. The reason for departing from the common sense path that his superior intellect usually dictates soon became evident. Simultaneously his control of the party in the senate began to slip.

That was seen in the vote on the budget. In that case Taft took what most people considered the sensible, middle-of-the-road course. The four and a half billion cut rather than the six billion urged by the house.

What happened to force Taft's anti-Lilienthal statement? Well, a certain conservative commentator talked with Taft—criticized what he implied was a dangerous lack of conservatism for a prospective standard-bearer of GOP. Then, a well-known columnist came forth with the story that some of the powerful backers of the Republican party enlisted the support of a number of Republican lawmakers in the anti-Lilienthal movement. They began to whisper that perhaps Bricker would represent sounder, safer, saner views for the presidency. Taft heard the whisper and came out emphatically, if not too convincingly, against Lilienthal.

About that time the Roper poll revealed the percentage of preference for various Republican potential candidates, against Truman. And lo, all the rest, Dewey, Vandenberg, Stassen, Bricker, led Taft.

That doesn't mean that Taft will be last in the hearts of the delegates to the Republican national convention in 1948, but wiseacres are saying it does mean that Taft no longer will call the turn on legislation.

Aim To Crack 'Iron Curtain'

If there is much more evidence of the cracking of the so-called "iron curtain," the impression may get about soon that it is a pretty porous protection of the secrets of the Soviets.

Recently I was walking the corridors of the state department with one of its officials. "How long," I asked him, "do you expect the Kremlin to permit you people and the British, with your American and British propaganda magazines and pamphlets and your broadcasts, to poison Ivan and his Tovarishes, with this western poison?"

"Oh," he replied, "they won't stop us."

"Why not?" I inquired. "They can't," was his answer.

British Broadcasting company has been beaming broadcasts on Russia to Russia in the Russian language for a year or more BBC reports that the programs have been well-received and that the effort is worth while. The state department began its broadcasts last month. Some of its officials believe that it is worth the millions it will cost to continue them. The first program had few listeners; it was criticized. It is being tailored according to listener comment. There is no way for the Russians to know about the programs, since notice of them, except by announcement over BBC, appears in no Russian paper.

How is it the Russians permit it at all? And even if they don't put obstacles in the way, will the Russians listen? Are there enough radio sets with short-wave receivers to make up a worth while potential audience?

These are the questions I asked. I'll try to give some of the answers.

As to the Russian attitude, it seems negative. When the British first talked about broadcasting to Russia, a Russian official is reported to have said: "We have tried to cooperate with you. You have your kind of democracy. You believe in freedom of speech. So we have cooperated with you by sending you broadcasts in English from Russia. We have our kind of democracy. We do not believe in freedom of speech. So we hope you will cooperate with our kind of democracy by NOT broadcasting to us."

If that wasn't actually said, it ought to have been. It is too good to be untrue.

The British did not cooperate. Neither did 11 other countries, including Ecuador, which, along with the United States, are all now beaming their programs on Russia. I don't know about the others, but the British seem to have quite a following and since the Russian people are more interested in America than in any other country, I see no reason why the state department's effort shouldn't be quite as successful.

What are the chances? In the first place, radio listening has been developed in Russia. People are encouraged to have sets and they are short-wave sets because short-wave is the communication method used by the Russian government. That's because of the great distance.

How many have sets?

When Averill Harriman was there he made an estimate of 75,000 sets. A later estimate put the figure as 75,000 to a million.

VOICES OF PROTEST? . . . Perhaps the idea of living in the United States doesn't appeal to these English war babies, who put up quite a howl on arrival in New York aboard a transport ship.

NEWS REVIEW

Lewis Conviction Upheld; Pact Aimed at Germany

JUDICIARY:
Curb Lewis

The Supreme court decision against John L. Lewis and the United Mine Workers has been regarded as one of the momentous verdicts in American history, definitely establishing the power and dignity of the courts in civil affairs.

Chief Justice Vinson

By a 7 to 2 ruling, the court cracked down on Lewis' and the UMW's open flaunting of Circuit Judge Goldsborough's order calling for a suspension of the recent soft coal strike to provide additional time for working on an agreement. In his majority opinion, Chief Justice Vinson wrote:

"The interests of orderly government demand respect and compliance be given to orders issued by courts. . . . In our complex society there is a great variety of limited loyalties, but the overriding loyalty of all is to our country and to the institutions under which a particular interest may be pursued. . . ."

To emphasize the gravity of the offense, the court sustained Lewis' fine of $10,000 and placed the UMW fine at $700 000.

EUROPE:
Hem in Reich

Even before determination of the future design of Germany, the major powers are proceeding to build a ring of steel around the reich to guard against a revived German state waging a third war of aggression.

The British and French forged the first link with a 50-year alliance, pledging the two countries to go to each other's assistance in the event of an attack by Germany or any other country. At the same time, the two allies agreed to integrate their economies to build an industrial base for war and promote the exchange of goods.

France's declaration that she would offer the same terms to other major powers led to speculation whether the treaty would implement the U. S. proposal for a defensive alliance of the Big Four against the threat of future German resurgence. Thus far, Russia has shied away from the U. S. proposition, but has been dickering with Britain for a mutual aid pact.

Holland and Belgium were expected to act favorably upon the French invitation to consummate a similar defensive and economic pact. On the other hand, Poland and Czechoslovakia were expected to look to Moscow for instructions on negotiating such a treaty.

CONGRESS:
Doom OPA

Long the whipping boy for public and politican alike, OPA was headed for the discard by June 30 because of congressional limitation of its funds. The office of temporary controls, established last December as the supervisory agency over remaining wartime regulatory bureaus, also was scheduled to go.

With abolition of OPA, it was reported that rent control would be transferred to the department of commerce and sugar control to the department of agriculture. Because of the scarcity of housing and sugar in the face of tremendous demand, legislators continued to favor their regulation to prevent hardship and skyrocketing prices.

While the Republican minority continued to ride herd in the house and threatened to put OPA out of business before June 30 by refusing a deficiency appropriation and chopping nine million dollars from previous appropriations, the senate provided funds for closing out the agency within the next three months As a result of these differences, the bill was sent to a senate-house conference for settlement of terms.

MEAT:
Consumer Pressure

During the extensive debates over decontrolling meat, arguments flew thick and fast whether strict government control or the law of supply and demand constituted the best method of keeping retail prices within bounds.

Little was heard of consumer sense, but consumer sense it is that has been keeping meat prices within reasonable levels in recent weeks, packers report. Much as people like pork, they have been passing it up for cheaper cuts of beef, and many butchers have been following the line of least resistance in serving customers.

NO PLACE LIKE HOME! . . . When the Eskimo family of Toby Anungazuk was brought to New York for a sportsmen's show, the father fashioned a makeshift igloo for son, Okoyohok, in a snowdrift. The fur-clad, 18-months-old Okoyohok objected vociferously to the housing project.

SEEK DIRECT ACTION

Congress Hears 'Little Business'

WASHINGTON —As a means of securing action on resolutions approved during their four-day meeting here, delegates to the national conference of American Small Business organizations tramped capitol corridors to present their views directly to their home-state congressmen.

The 80-odd delegates, some of whom represented "just themselves" while others acted as spokesmen for associations with thousands of members, spoke of diverse difficulties.

An Illinois food machinery manufacturer complained of labor troubles. An Oregon lumberman hoped for a better break from the government on timberland leases. "Big company monopolies" drew the ire of a St. Louis tire dealer, and a New York clothes designer worried about the whole national economy.

Resolutions covering labor legislation, taxes, monopolies, tax-exempt cooperatives, government competition with private business, government economy and federal subsidies were approved by the delegates, representing 260 different lines of industry and more than 600,000 separate small business concerns, before their march up Capitol Hill.

Indicative of the small business man's stand on the labor question, A. L. Hertel, personnel director of the Food Machinery corporation at Hoopeston, Ill., said: "Put the unions on an equal basis with management. I don't want to see the unions smashed, but I'd like to see them under local control, not dictated to by the big shots. If I could thresh out troubles with the 700 workers at our plant, we could always figure out a solution satisfactory to the men and to us."

In backing up his demand for an immediate 15 per cent increase in rents and an end to all controls by January 1, 1948, George W. Profitt of Baltimore, executive secretary of National Apartment Owners association, broached the theory that housing is like any other commodity in that "when it's cheap, people buy more than they really need." "If nylons," he continued, "were selling for 50 cents a pair, every woman in the country would have a dozen pairs. It's the same with housing. I know a woman in Baltimore living all by herself in an apartment with four bedrooms."

THE WASHINGTON SCENE

Political Influence in House Centered in Two Regions

By WALTER A. SHEAD
WNU Washington Correspondent.

(Editor's Note: This is the fourth in a series of articles covering the new congressional committees and their chairmen.)

WASHINGTON.—Political power in the house of representatives, following the same trend as in the senate, is centered largely in the northeastern and north central states in committee assignments under the reorganization act.

Michigan and New Jersey almost usurped chairmanships of the 17 new house committees formed under the act. These two states garnered nine of the committees, Michigan getting five and New Jersey four. Kansas and New York each secured two committee chairmanships, the others going to California, Illinois, Massachusetts and Minnesota. Joseph Martin, house speaker, also comes from Massachusetts and Charles Halleck, majority leader, is from Indiana.

Only one chairmanship went to states west of Kansas, namely Richard J. Welch of California, who is regarded as a political independent as a result of being nominated on both Republican and Democratic tickets for several years.

The list of new house committees and their chairmen follows:

Appropriations

JOHN TABER (N. Y.), new chairman of the house appropriations committee, has been one of the most vocal advocates of governmental economy. While he was the ranking minority member of the committee which he now heads, he consistently introduced amendments to appropriations bills in an attempt to reduce federal expenditures.

Taber

Always a foe of government "press agents," Taber recently recommended that all government information programs be cleaned out in the interest of "American liberty and freedom of the press." Taber, who automatically becomes a member of the joint committee on the budget, has fought for a marked reduction in federal expenditures. He proposes for one thing to cut one million persons from the federal payroll.

According to an analysis of controversial roll calls in 1946, Taber voted with the majority of his party 95 per cent of the time. He has an excellent attendance record, being absent for only one out of 130 roll call votes in 1946.

Taber, who is 66, was born in Auburn, N. Y, where he still lives. After graduating from Yale and the New York Law school, he practiced law from 1904 until he was elected to congress in 1922. The 38th district in upstate New York, which he has represented since that time, has long been overwhelmingly Republican. A third of its population live on farms and the rest in small cities and towns. The Farm Bureau federation and the National Grange are well organized. Labor is not politically significant.

Education and Labor

FRED A. HARTLEY JR (N J.), chairman of the new committee on education and labor, generally has followed Republican labor policy but sometimes has deserted his party on other issues.

The new committee takes over the functions of the two old committees on education and on labor. Hartley was a member of the labor committee.

The 10th New Jersey district, which Hartley represents, includes parts of Hudson and Essex counties and seven wards of the city of Newark. In his primary campaign for renomination last summer, Hartley was opposed by the PAC on the basis of his fight against OPA and was accused of being a representative of the manufacturing and retail lobbies. But he was renominated by a two-to-one margin and won in November.

Hartley

Hartley, who is 44 years old, is the only living person after whom an aerie of the Fraternal Order of Eagles has been named. He was appointed to the Kearny, N. J., library commission in 1923—before he was old enough to vote—and elected municipal commissioner in 1924 when he was 21 years old. The next year he was chairman of the Republican county committee, and in 1928 he was elected to congress.

The committee's general jurisdiction over education and labor bills includes the school-lunch program, which previously has been handled by the agriculture committee.

Banking and Currency

Assumption by JESSE P. WOLCOTT (MICH.) of the chairmanship of the powerful banking and currency committee heralds a violent shift in orientation of that group. Wolcott has been a consistent opponent of government control of business. He was the author of amendments to limit the power of OPA in both sessions of the 79th congress. In the long house debate on the veterans' emergency housing program, he led the Republican fight against subsidies and price ceilings on existing homes. After the November elections, he announced that investigation of the "outrageously bad" veterans' housing situation "must be the first order of business for the committee."

Wolcott also is generally credited with helping to prevent a report by the committee on the Wagner-Ellender-Taft long-range housing bill in the face of repeated requests for action by the President. Wolcott's own 1946 housing bill provided some government support for homes for middle and upper income groups and pointedly omitted public housing.

Wolcott

In one field, foreign economic policy, Wolcott has generally supported the administration. Considered the Republican monetary authority in the house, he was a delegate to the Bretton Woods conference and co-author with Brent Spence (Dem., Ky.) of legislation to implement it.

Wolcott's district (7th Michigan) has been predominantly rural but during the war industrialization increased rapidly in the counties bordering on the Detroit area and automobiles and other iron and steel manufacturing now are becoming important.

Wolcott, born in 1893, practiced law in Detroit before entering the army in World War I. After the war he settled in his present home town of Port Huron, where he served as police judge and subsequently as prosecuting attorney of St. Clair county from 1921 until his election to congress in 1930.

Besides its general jurisdiction over banking and currency, Wolcott's committee handles legislation on housing, price control and certain types of financial aid to business.

Armed Services

Under the legislative reorganization act, a single armed services committee replaces the former house committees on military affairs and naval affairs. This is generally regarded as a boost for the army's legislative program, since seniority gives the chairmanship of the new committee to Walter G Andrews (N Y.), for years the ranking Republican on the military affairs committee Andrews is reported as favoring universal military training, which is No 2 on the army's program On the No. 1 item —unification of the armed forces— Andrews has taken no public stand

Andrews

Analysis of controversial roll calls in 1946 shows that Andrews voted with the majority of his party four out of five times However, he gave the administration more support than did former military affairs chairman, Andrew J. May (Dem., Ky.) on the controversial issue of drafting 18-year-olds, which May actively opposed. Andrews introduced a bill in the last session to require nine months' enlisted service of all appointees to West Point.

Fifty-seven years old, Andrews has a law degree from Princeton, where he was once football coach. He served with the AEF in France in World War I and was wounded in action. He is now a business man and director of Pratt and Lambert. His district (42nd New York) includes part of Buffalo and the city of Tonawanda; it is usually Republican. Principal industries are iron and steel, chemicals and railroading. Andrews has been in congress since 1931.

Name Change Query Stumps Officials

SALT LAKE CITY.—When a girl marries does the law require her to change her name or is this done through custom only?

Stumped by this poser, Secy. of State E. E. Monson, who had received the question by mail from a young woman, appealed to Atty. Gen. Grover A. Giles for the answer.

After a perusal of law books, Giles stated in his reply: "Although Utah statutes do not definitely state that when a girl marries she shall change her name, the law implies (and so does the marriage ceremony) that her name be changed."

Even the attorney general, however, apparently was not too sure of his ground, for he added as an afterthought: "This must be the case as it is necessary for a court action for a girl to repossess her maiden name."

Nut Muffins! Best You Ever Tasted!

Don't take much shortening or sugar, either!

Toasted Kellogg's All-Bran and crunchy nuts make mighty fine eating!

2 tablespoons shortening	1 cup sifted flour
¼ cup sugar	2½ teaspoons baking powder
1 egg	½ teaspoon salt
1 cup Kellogg's All-Bran	½ cup chopped nut meats
½ cup milk	

Cream shortening and sugar. Add egg; beat well. Stir in Kellogg's All-Bran and milk. *Let soak until most of moisture is taken up.* Add chopped nuts to sifted dry ingredients. Add to first mixture. Stir only until flour disappears. Fill greased muffin pans two-thirds full. Bake in moderately hot oven (400° F.), 25 to 30 minutes. Makes 9 tasty muffins.

Good Nutrition, too! All-Bran is made from the VITAL OUTER LAYERS of finest wheat—serve daily as a cereal.

Rural America Has Major Role In Annual Red Cross Campaign

FRIENDLY FLAVOR . . . Typical of the variety of Red Cross services that makes hospital routine take on the flavor of life outside are the various duties performed by Red Cross Gray Ladies at McGuire Veterans' hospital, Richmond, Va.

Farm Leaders Laud Red Cross in Urging Support in Campaign

Paying tribute to the Red Cross as a "good neighbor," Clinton P. Anderson, secretary of agriculture, has urged rural America to support the 1947 fund campaign.

"It is a neighbor who works for a better local community and, at the same time, for a better world community," Anderson declared "Rural people are grateful to the Red Cross. Rural America knows the value of good neighbors and gets real satisfaction from cooperating with them."

Two other farm leaders. A S Goss, master of National Grange and Edward A. O'Neal, president of American Farm Bureau federation, also endorsed the current drive.

Goss characterized the Red Cross service as "indispensable," pointing out that "throughout a large part of the world the suffering and need arising from war are almost as great as during the days of conflict."

"The great work of the American Red Cross, whose principal objective is the alleviation of human misery, has become legendary," O'Neal asserted in his tribute "No matter how great the need," he continued, "it has always been able to accomplish its mission of mercy because of the generosity of the American public."

Agency to Stress Four Main Fields Of Service in 1947

WNU Features.

Rural America—the provision stockpile of the nation—has an especially important share in the current fund campaign of the American Red Cross, officials at the Washington, D. C., national headquarters emphasize.

With a 1947 campaign goal of 60 million dollars, the Red Cross again is relying upon the rural areas and the small towns which center the farming communities for substantial support in attaining its quota

Because 1947 will be in the nature of a "shakedown cruise" for a nation newly returned to peacetime, and because in the uncertainty of the postwar existence many Americans are inclined to question the need to support even the most deserving of organizations, Red Cross officials have related the answers to some of the "whys" of the fund campaign.

Major Red Cross responsibilities will be four-fold in 1947-48. They include service to veterans and their families; to men in army and navy hospitals; to men serving with the armed forces overseas or in this country, and to the community.

During the war period of 1941-46, Red Cross was supported by contributions in the amount of $784,151,000 in five fund campaigns In numbers, rural community chapters—2,908 of them—account for more than three-quarters of all the Red Cross chapters in America With the overwhelming majority of their workers unpaid volunteers the Red Cross said, these smaller chapters were the backbone of the ARC during the war and will continue to be so in peace

Expand Services.

In the coming year, on a greatly reduced budget the Red Cross will conduct a program exceeding any previous peacetime operation in its entire history

Services for veterans and the armed forces and their families will be the major concern of the Red Cross The increasing need for assistance to veterans will continue for years. Approximately 1,100,000 veterans and their families were assisted by Red Cross last year through its workers in chapters alone Thousands more were aided by Red Cross workers in hospitals. Under authorization of Veterans' administration, there are 155 Red Cross field directors and assistant field directors in 105 VA hospitals. Nearly 350 Red Cross claims experts are stationed in VA offices throughout the nation, in Puerto Rico, Hawaii and the Philippines.

On army posts and naval stations in this country and overseas, Red Cross field directors are serving, giving emergency assistance, counseling and helping keep the men in communication with their families at home.

In the field of community service, Red Cross disaster work is a round-the-clock operation the country over. National, state and local governments expect the Red Cross to assume leadership in disaster preparedness and relief, and rural areas know well the work of Red Cross following tornadoes, floods and fires.

Red Cross first aid, water safety and accident-prevention services have been carried on in all communities of this country First aid instruction for young people and adults, swimming classes for children of the community, and spreading the gospel of safety from farm accidents, are several ways these Red Cross safety services function

Aid Rural Areas.

Red Cross home-nursing instruction in rural communities where hospital facilities are scarce is receiving greater emphasis Community nutrition classes teach the homemaker how better to prepare and preserve foods

The American Junior Red Cross, with its 19 million youngsters, provides effective channels through which school children throughout America may put to practice citizenship responsibilities and good neighbor practices with children of nations overseas.

HELPING HAND . . . Red Cross Gray Lady Mrs. John W. Johnson has a long shopping list. She is shown adding items wanted by a patient at Bay Pines Veterans' hospital, St. Petersburg, Fla. She'll buy them at the canteen and downtown.

Churches Utilize Chartered Buses To Swell Crowd

PHILADELPHIA, PA. — As a means of swelling attendance, 15 Philadelphia churches are engaged in a novel experiment of providing "portal-to-pew" transportation services.

The program involves buses chartered by churches to make scheduled stops at pre-arranged street corners to pick up parishioners, carrying them to church and then returning them home after services.

The 15 churches hire from one to four buses regularly every Sunday Clergymen admit they are prepared to "cater" to members as a means of maintaining and increasing attendance

Attendance at Holmesburg Methodist church has been boosted 30 to 40 per cent in the year the church has used chartered buses.

Historic Gloria Dei (Old Swedes) Protestant Episcopal church, situated in a neighborhood formerly residential but now entirely commercial, also has resorted to chartered buses.

Old Swedes bus riders pay a minimum of 10 cents a ride, with "the sky the limit." On a rainy Sunday, one grateful parishioner slipped the driver a $10 bill.

Church officials agree that the transportation problem is more pressing now than ever and that it affects all denominations. Many families have moved from the old neighborhood, yet still desire to attend their old church. In other cases, public transportation is not available to residents of outlying areas and new residential districts.

Small Town Rates Frequent Mention As 'Coldest Spot'

BIG PINEY, WYO. — Although this little cattle-raising community nestled in the Wyoming mountains has only 241 residents, it probably rates mention in the nation's newspapers more often than any other small town in the country.

It's not at all unusual for stories about weather conditions to include the statement that "the coldest spot in the country was Big Piney, Wyo., with 20 degrees below zero"

The dubious distinction of being the "nation's ice box" is blamed by the weather bureau on a "cold air drainage" off the mountains lying to the west of the town, which is situated in a mountain valley of 6,200 feet altitude

"Masses of cold air drain off the mountain range into the valley just like streams of water" the weather bureau explains "There is also an elevation to the east This inclosure prevents the wind from sweeping out cold air and warming up the valley"

Frigid blasts are almost a year-around proposition Big Piney had only a 61-day growing season last year compared with 148 growing days at Cheyenne, some 300 miles to the southeast.

Street 'Strays'

SANTA FE, N M.—Camino de las Vacas—Street of the Cows—has been lost or strayed in this ancient city Notified that the street is 40 feet south of where it was originally established 60 years ago, the city council ordered the street committee "to corral the straying street."

Sawing Proves Easy as Sewing, Woman Insists

JACKSON, MICH.—Although she has made her living for years as a dressmaker, Mrs. Myrtle Ann Dibble is as adept with a hammer and saw as with a needle and scissors. For proof, she soon will have a seven-room house completed practically entirely by her own efforts

Faced with a housing problem, Mrs Dibble decided that if she could cut and sew dresses she also could "run up" a house for herself and her two young daughters

Work was commenced last May when the basement was dug, the only time Mrs. Dibble called in professional help. She mixed her own cement, the two daughters, Lauretta Lee, 13, and Mona Mae, 12, hauling the blocks while she set them. More than 1,000 blocks were required for the basement. A mason, inspecting the work, described it as a "pretty good job"

As the next step, Mrs Dibble purchased green oak logs and had them cut into boards at a sawmill She fitted them herself, displaying blistered palms as evidence that green oak "saws plenty hard" Driving nails into that wood was "the hardest job I ever took on," she adds

Mrs Dibble did all the electrical work in the basement and plans to wire the entire house She also will do her own plumbing.

A divorcee, Mrs. Dibble used her life savings to start the house. With expenses running higher than anticipated, Mrs. Dibble was forced to return to dressmaking to get money to finish the house.

Lack of Sleep Termed Harmful as Too Many Cocktails

CHICAGO. — Lack of sleep can produce the same symptoms as drinking one too many cocktails, declares J. P. Fanning who, as secretary and general manager of National Association of Bedding Manufacturers, has studied sleeping from every angle.

"There ought to be a law against staying awake too long," he insists. Persons who think sleep is a waste of time are as dangerous as those who never want to stop drinking, Fanning warns. Sleeplessness, he adds, slows their reactions and makes it unsafe for them to drive automobiles.

"Anyone who feels sleepy ought to try walking a white chalk line," he says. "They might actually be drunk, even without liquor."

Fanning declares he has scientific proof that sleeplessness is as harmful as drunkenness. A group of scientists, he says, got 35 men "roaring drunk" by keeping them awake four days, after which they were as irresponsible as alcoholics.

The sleep advocate says Hitler probably never would have torn the world apart "if he had gone to bed instead of staying up all night arguing in beer parlors."

"Napoleon also was a shunner of sleep, and look what happened to him," he adds.

3 MINUTE FICTION — GALLANT PEDRO

By Robert Abel

WNU Features.

THE military courtyard was as quiet as only a cemetery can be; and the firing squad at parade rest were as motionless as tombstones.

Pedro Gomez and I stared at each other. I couldn't help but admire that splendid body of Pedro's; so vibrant, so at ease. I noticed the arrogant tilt of his handsome head; the half smile on his lips.

I remembered the first time I had met him. Four years ago I had trailed a killer to a little saloon in Caliente. As I stepped from the blazing glare of the torrid sun into the semi-dark saloon, I was temporarily blinded. I could not see a thing; but not so the killer.

But the movement was never completed for the long black whip coiled around his arm like a boa and yanked him off his feet. I had him trussed in an eye-wink.

I turned to my rescuer, a tall, handsome laughing caballero.

"Captain," he said, "I am Pedro Gomez." He said it as though Pedro Gomez meant a name to be reckoned with. It was. He was the chief lieutenant of that rebel leader Pancho Villa. His fame or infamy was only second to his chief's.

I thanked Pedro for saving my life. "I am Manuel Beuno."

The second he spied me he cocked his heavy gun and raised it to his shoulder for the aim that means a quick death.

Two years ago I ran across him for the second time. I was leaning against the bar of the "Devil's Drink" when the doors swung open and several men entered. They spied me.

"A Carranza! Let's get him!" They were on me before I could turn. I fought for my life. My breath came in gasps My arms felt like I was holding up heavy logs. I can't recall how many times I went down and came up, or how many men I knocked sprawling.

Suddenly a loud roar pierced through the fog that engulfed my dizzy swirling brain. The world had come to a standstill. Only heavy panting and breathing disturbed the otherwise silent room.

Someone lifted me gently from the floor. I could hear his voice scream in anger. "This is my friend. Who dares kill a friend of Pedro Gomez?" He looked like a keg of dynamite about to explode. The men slunk out of the saloon.

It was Pedro, all smiles again, apologizing and asking my forgiveness for the stupidity of his men.

He depreciated his deed with a wave of his hand and a shake of his head "It is nothing."

After a few drinks he again asked me to join his army. "The government is practically in our hands, Manuel." He looked at me sadly. "I might not be able to help you a third time, my friend Your government is always putting Villa's captured men in front of a firing squad."

He gulped his whisky down with gusto. "Pancho says he will put all of Carranza's men against the wall, too."

Another drink and then he told me to leave town. Pancho and the rest of his men would soon arrive, and he shrugged his shoulders, Pancho might not like me like he did.

That was two years ago . . . and here was our third meeting . . . Pedro and I staring at each other.

Come, come, Manuel," he said to me. "Be brave. We all have to die sometime. I know you would rather die when you are young and brave; and not when you become old and feeble and are scared of death."

He was right. That is the way I would rather die.

How tall and proud Pedro looked. I slowly straightened out my body. I thurst my shoulders back and closed my eyes. I could hear a hoarse voice; it sounded as though it came from my very inners. . . . Ready. . . . Aim. . . . Fire!!!

Five shots blended into a single echo. The unerring aim of the firing squad had found its mark.

I opened my eyes in time to see Pedro smile at me.

Slowly . . . slowly Pedro's magnificent vibrant body, so full of life a moment before, wilted like a tottering scarecrow and sagged lifeless to the ground.

AROUND THE HOUSE

Glue pieces of felt under chair legs to prevent scratching painted floors. It's a good way to cut down on noise too.

—•—

How you decorate your hat is more important than the bonnet itself. Ribbons, feathers, folderols and frills are all in order. Wear them on your bonnet to keep up to fashion par.

—•—

Soak clothes in cool or lukewarm water rather than cold. Cold water causes the fabric mesh to close and hold the dirt.

—•—

When removing a pane of glass, or if fitting a new one, it often becomes necessary to give the glass a few light taps to loosen it or to push it into place. If a rubber crutch tip is placed over the handle of the putty knife there will be little danger of breaking the pane.

—•—

Keep a mirror hanging in the kitchen. Glance into it before you go to answer the door-bell.

—•—

Paperhangers always do the ceiling before the walls. Ceiling paper should not run across the windows save in cases where this can not possibly be avoided.

When paints and varnishes fail to dry you can rest assured the trouble is the result of dirty or oily surface or a surface that has been washed with soap and water, some of the soap having remained on the porous surface of wood.

—•—

Cut all the big letters from cereal and other heavy boxes. On rainy days, or when you are very busy around the house, the letters will keep the children happy and busy. Older children use them for playing anagrams and find them fun too.

—•—

Try a "Blue Book," hung on the kitchen wall. In it list all articles that you store, and the place you put them. When Dad or the children tramp in and demand to know where this or that is, tell them to look in the Blue Book. This book also gives you a chance to make notations when and where you store summer or winter clothing, and the date these things should be gotten out and examined.

HANCOCK COUNTY BOARD PROCEEDINGS

7TH ADJOURNED JANUARY MEETING

Garner Iowa
March 10 1947

The Hancock County Iowa Board of Supervisors, met in session on above captioned date pursuant to adjournment with F J Schoun Geo Th Gerdes, and John Chambers present

The minutes of the last me ting were read and approved as read

On motion and second the bond of Wm Henschen Engineer of Drainage District No 146 is hereby approved

Supervisor Schoun is appointed a committee to investigate and cause repairs to be made in Drainage District No 1 and 2 Lateral 4

This being the 10th day of March A D, 1947 a date heretofore set for the annual Board of Approval meeting to consider the local road construction program in Hancock County Iowa for the year 1947 the Board of Supervisors and the representatives from the various Township Board of Trustees proceeded to consider the proposed road construction program for 1947 as directed in Sections 309 11 and 309 12 Code of Iowa 1946 and did review the program submitted by the Engineer Charles F Merten

On motion by A G Pohlman and second by A E Boman said road construction program was approved as amended

On motion by Gus Schulz and second by A E Boman the Board of Approval adjourned subject to the call of the county auditor

This being the 10th day of March A D. 1947 a date heretofore fixed for a letting on the construction of DD No 141 Hancock County Iowa the hour of said letting having arrived the proof of publication on file and the board being fully advised, said letting was held as scheduled The chairman of the board proceeded to open all bids on file and after duly considering all bids on file the board does find the bid of Joe Needles of Greenfield Iowa, to be the lowest and best bid on file for labor and the bid of the Concrete Products Corporation to be the lowest and best bid on file for material

BE AND IT IS THEREFORE RESOLVED by the Board of Supervisors in and for Hancock County Iowa acting for and in behalf of DD No 141, Hancock County Iowa that the bids of Joe Needles of Greenfield Iowa for the labor and the bid of Concrete Products Corporation of Humbolt Iowa for material be and the same are hereby accepted as the lowest and best bid for the construction of DD No 141 and they are hereby awarded contracts All other bids are hereby rejected

Supervisor John Chambers is hereby authorized and ordered to execute contracts with Joe Needles for labor and Concrete Products Corporation for material as by law directed

C F Merten is hereby appointed Construction Engineer and his bond as such engineer is hereby fixed at $500 00

This being the 10th day of March A D, 1947, a date heretofore fixed for a letting on the cleanout of a part of the main open ditch in Hancock County, Iowa Drainage District No 10 Main petitioned for by W A Kirchgatter et al the hour for said letting having arrived the proof of publication being on file and the board being fully advised said letting was held as scheduled The Chairman of the Board proceeded to open all bids on file and after duly considering all bids on file the bid of Sylvan Oleson Construction Company was found to be the lowest and best bid on file

BE AND IT IS THEREFORE RESOLVED by the Board of Supervisors in and for Hancock County, Iowa, acting for and in behalf of DD No. 10, Hancock County, Iowa that the bid of Sylvan Oleson of Forest City, Iowa, be and the same is hereby accepted as the lowest and best bid and a contract is hereby awarded to Sylvan Oleson for the cleanout of a part of the Main ditch of Drainage District No 10 petitioned for by W A Kirchgatter et al All other bids are hereby rejected

Supervisor John Chambers is hereby authorized and ordered to execute said contract in behalf of Hancock County, Iowa, as provided for by law

Wm Henschen is hereby appointed Construction Engineer on said cleanout and his bond as such engineer is hereby fixed at $500 00

This being the 10th day of March A D, 1947 a date heretofore fixed for a letting on the cleanout of a part of the Main open ditch in Drainage District No 26 Hancock County Iowa, the hour for said letting having arrived the proof of publication being on file and the board being fully advised said letting was held as scheduled the Chairman of the Board proceeded to open all bids on file and after duly considering all bids on file the board does find the bid of Sylvan Oleson of Forest City Iowa to be the lowest and best bid on file

BE AND IT IS THEREFORE RESOLVED by the Board of Supervisors in and for Hancock County Iowa, acting for and in behalf of DD No 26 Hancock County, Iowa that the bid of Sylvan Oleson is the lowest and best bid on file and he is hereby awarded a contract for said cleanout All other bids are hereby rejected

Supervisor John Chambers is hereby authorized and ordered to execute said contract in behalf of Hancock County Iowa, as provided for by law

Wm Henschen is hereby appointed Construction Engineer on said project and his bond is such engineer is hereby fixed at $250 00

On motion and second C F Merten Engineer Walter Kuhl and Wm Boehnke are appointed a classification and assessment commission in Hancock County Iowa Drainage District No 144, to classify lands and assess benefits to DD No. 144 all as provided for by law

On motion and second the county auditor be and he is hereby directed to cause notice of letting to be published on the leasing of the Southeast, One-Fourth of Section 27 Township 96, Range 26, for a period of one year from and after the 1st day of March A D, 1947, the printing of the financial report for Hancock County, Iowa, for the year 1946 and medicine and medical care at the Hancock County Home for a period of one year from and after April 1, A D., 1947

Said lettings to be held at the Courthouse in Garner, Iowa, at 1 00 P M on the 24th day of March A D, 1947 The Board reserves the right to waive technicalities and to reject any of all bids.

WHEREAS, C F Merten, Engineer, C. A Frisbee and Wm. Boehnke, were heretofore appointed commissioners to view, classify and reclassify lands and assess benefit in the watershed of Drainage Dirtict No. 8, Hancocok County, Iowa, all in accordance with Chapter 455, Code of Iowa A D., 1946, and

WHEREAS, said commissioners did qualify as by law directed and did view said lands and did assess benefits as by law directed and did file their report on the 10th day of March A. D., 1947, which report sets out in detail the assessment against each tract and parcel of land, highways and railroads in the district, as directed by law.

BE AND IT IS THEREFORE RESOLVED by the Board of Supervisors of Hancock County, Iowa, acting for and in behalf of Drainage District No. 8, Hancock County, Iowa that the report of the commissioners heretofore appointed to classify and reclassify lands in the watershed of DD No. 8, Hancock County, Iowa and to assess benefits for the reconstruction of DD No 8, Hancock County Iowa, is hereby tentatively approved and a hearing thereon will be had at the courthouse in Garner Iowa, on the 12th day of May A D 1947 at the hour of 10 30 A M at which time taxpayers in said district will appear and show cause why said classification, report and assessment described shall not be accepted and assessment taxed against the lands in the water shed of DD No 8, Hancock County Iowa. All objections to such assessment of benefits shall be filed in writing in the office of the county auditor in Garner Iowa at or before the hour set for hearing thereon

The county auditor be and he is hereby directed to cause notice of said hearing to be published in the Britt News Tribune, a newspaper of general circulation, published at Britt Iowa setting out the names of the owners of said lands in DD No 8 Hancock County, Iowa, together with the description of the real estate and the designated assessment each tract, parcel of land, highways and railways in the district is charged with

The foregoing resolution was offered and read by Geo Th Gerdes, who moved its adoption was seconded by Supervisor F J Schoun, Supervisor John Chambers, Chairman of the Chair placed the motion for adoption and upon roll call upon vote thereon is F J Schoun, Geo Th Gerdes and John Chambers aye Nays, None Whereupon, the Chairman declared the resolution duly adopted

On motion and second the Board adjourned to March 24th A D, 1947 at 9 o'clock A M

Janice Stokesbary
Sharleen Swanson
Ronald Trampel

Wednesday afternoon Berleen Bridges treated the children in the room with candy in honor of her birthday which is in June

Friday afternoon Ronald Trampel treated us with popcorn balls in honor of his birthday.

Mrs Glen Bridges visited our room Wednesday afternoon

Fifth And Sixth Grade News

—Mrs. H G. Voetberg, Teacher.

We had two birthdays in our room this past week, Lois Ann Christians and Eunice Helps. Both girls brought treats to school.

Friday afternoon was full of excitement The "Terrible Termites" played against the "Paul Bunyons" The Termites were 5th and 8th grade boys and the Paul Bunyons were the 6th and 7th grade boys. Lots of enthusiasm was shone but the Paul Bunyons got the better of the Termites

We're all busy practicing for our Operetta, The Obliging Clock.

Seventh and Eighth Grade News

—Clara Smith, Teacher

We have been locating cities on the map by means of latitude and longitude in the 7th grade geography On Wednesday each of us tried to give the exact location of various cities by using a wall map We have also been receiving facts about the seasons.

The basketball game between the Paul Bunyons and the Terrible Termties created plenty of excitment Friday. The Paul Bunyons, grades 5 and 8, won the game against the Termites, grades 6 and 7, with a score of 11 to 7.

We were happy to have Dean Burgess and Doris Gruis back in school Friday after several days of sick leave.

AROUND IOWA

ACCIDENTAL

At Emmetsburg, little Patricia Ann Carney got hold of a shotgun and an older brother, 10, attempted to take it away from her before she could "hurt herself." The gun was accidentally discharged, killing Patricia Ann instantly

CORKER DOLLS

At Hampton, Mrs Ada Westcott, 88, has a hobby of making cork dolls. Since 1915 she has produced 1,642 of the novel "corker dolls," most of them being sold to gift shops in New York and Lincoln Six corks several balls of yarn and five bone rings go into the production of each doll, wnich are used as playthings and teething rings for babies.

BABY SITTERS

At Waverly, members of the Girl Scouts have established a baby sitter and help bureau Proceeds will be used to pay transportation to the Girl Scout convention in Des Moines n May

MILLIONS MORE ACRES NEED CONTOUR FARMING

Although more than a million acres of Iowa's intertilled crops were planted on the contour last year, that is only a small part of the sloping land that could be profitably contour farmed, says Iowa State College agronomists. They estimate that from 6 to 8 million acres in the state are in need of conservation farming.

As more farmers begin to realize the increased yields that are obtained with contouring its use is xpected to pick up rapidly. Five years of college research on rolling soil areas show that contouring increased the corn yield by 7 bushels per acre Soybean yields were boosted by more than 2 bushels per acre And soil losses were reduced by 50 percent. Equipment and operating costs also were lowered by working on the contour.

DRILLED SOYBEANS ARE WEED KILLERS

They'll Smother Such Pests As Creeping Jenny And Canada Thistle

The value of soybeans can be increased by using them as a smother crop for European bindweed, (creeping jenny), and the Canada thistle, reports E P Sylwester, of Iowa State College

Sylwester says experimental work with weeds at Cherokee has shown definitely that a heavy stand of drilled soybeans is one of the best smother crops that can be used on land infested weeds. And by following a definite program for 1 or 2 years, farmers also can virtually rid their soybean crop of annual weeds.

Plant, Plow

The first step in using soybeans as a smother crop for European bindweed is to sow the infested area in small grain in the spring, as soon as the ground can be worked satisfactorily Then the crop should be harvested as soon as possible After the stubble has been plowed, the ground should be cultivated at 10-day intervals, or whenever new bindweed shoots appear This cultivation should continue until frost, using a surface or spring tooth harrow, Sylwester says.

Cultivation should be resumed in the spring when the bindweed appears The ground should be plowed about May 30, and immediately after a firm seedbed has been prepared the inoculated soybeans should be drilled in at the rate of 3 bushels per acre A grain drill can be used to plant the soybeans.

For Thistles

The soybean crop can be harvested at the usual time As soon as this is done, the stubble should be plowed and cultivation started at 10-day intervals. This program should be followed each year until the bindweed is destroyed, the plant specialist explains, as it takes more than 1 year to eradicate the weed

The system for controlling the Canada thistle is almost the same as for the bindweed The area should be plowed as soon as the thistles start to grow in the spring, then worked every 10 days or whenever new thistles appear About May 30 the area should be plowed again, this time a little deeper, Sylwester says

The plant specialist points out that it is important that no areas are missed To be sure that no space occurs, he recommends planting half the beans one way and goin back over the area and planting the other half crosswise.

CONTOUR OATS TO BOOST PRODUCTION

If you're planting oats on sloping ground this spring and want to boost production without any additional expense, try contouring

That's the suggestion of Mervin Anderson, Iowa State College agronomist.

Studies show that oats planted on the contour outyield those planted up and down the slope by an average of 5.5 bushels per acre In addition, contour planting gives the added benefits of saving soil and water And where fertilizer is applied with oats seeding, much of it may be washed away on fields that aren't contour planted.

Tourist Wants to Know When Geysers Will Erupt

CODY, WYO.—Secretary Marlin Kurtz of the Cody Club reports happily that the tourists' questions about nearby Yellowstone National park are returning to prewar norms. An Arizona woman wrote recently asking for a schedule on geyser eruptions and Kurtz replied that except for "Old Faithful," it was strictly a case of "pay your money and take your chances."

A want ad in the Times will sell it.

SELL BABY CHICKS ON COMmission. Absolutely no investment. Full particulars sent return mail. Write, Sieb's Hatchery, Dept. A., Lincoln, Ill. (2tc)

Advise Spraying to Control Deadly Dog Tick

Special precautions should be taken against the dog tick, carrier of the dread Rocky Mountain spotted fever.

The tick is carried by dogs, cats, rodents, foxes, woodchucks and other animals that roam in brush and wooded areas. It has been observed by entomologists that ticks are most numerous along the sides of roads and paths. Very few ticks are found more than 400 feet from the roadside. It is believed that the scent of dogs and other animals, and humans, too, draws ticks to the road. Another attraction during the spring may be the reflected heat of the bare surface of the road.

Preference for roadsides makes it easier to control the tick by spraying. A large percentage of ticks in an area may be killed by spraying plants along roads and paths every few days during the height of the tick season. One effective treatment is a nicotine sulphate and soap spray, which is not injurious to plants. Another spray, which has a more lasting effect and doesn't need to be used so often, is an emulsion of DDT in soluble pine oil in water. Any water-miscible DDT preparation should also prove satisfactory. This new insecticide is not harmful to plants if used at the recommended rate of from 2 to 3 pounds of actual DDT per acre.

Money Showers Oregon Town; Starts Buying

GARIBALDI, ORE.—Manna from heaven, or in 20th century terms, "clover from the clouds," was causing a minor buying spree in this little Oregon coast town recently. Dollar bills fluttered from the sky here, shortly after an airplane had flown over the tiny fishing community.

The dollar bills sprinkled down over fishing boats, homes and business houses. Tom Hess, commercial fisherman, had $16 by the time the flurry ended. Some of the fortune sank beneath the waters of Garibaldi bay, but eager harvesters gained a little pocket money before the "windfall" disappeared.

No flying banks were reported operating in Oregon, but the fishing folk here would just as soon their benefactor flew over again.

ONE DANGER

Old Lady—What's the matter with the little boy?

Street Urchin (whimperingly)—Fraid.

Old Lady—Afraid? Well I do declare. I didn't know you street urchins were ever afraid of anything, seen or unseen in this world or the next.

Street Urchin—Yes, we're afraid of each other.

Made to Fit

Triumphantly the new bride placed an oval-shaped piece of covered pastry about 18 inches long and 6 inches wide on the dinner table.

"What is it?" her husband asked.

"Why, darling—it's a pie."

"Rather long for a pie, isn't it?"

"No, silly. It's rhubarb."

How Did He Know?

John—The lipstick my girl uses seems to taste much better than any other girl's.

Tom—Yeh, doesn't it?

AND TIRED OF IT ALL

The downhearted private walked into the orderly room one morning to sign the sick book.

"What's the matter with you?" asked the sergeant.

"I'm ill and sick," sighed the downhearted private.

"What do you mean, ill and sick?" grunted the sergeant.

"Oh, just ill-treated and sick of the army."

Guessing Game

Mrs. M. was riding the bus. A woman, evidently a newcomer, sat next to her and asked:

"How do I find the Red Cross building?"

"Oh, that's easy," Mrs. M. told her. "You just watch me and get off the stop before I do!"

Door Marked 'Exit'

Applicant—Have you an opening for me?

Office Manager—Yes, but don't slam it on the way out.

JESUS LAYS DOWN HIS LIFE

LESSON TEXT—John 18 37, 38; 19:10-16, 25b-30

MEMORY SELECTION—For God so loved the world that he gave his only begotten Son that whosoever believeth in him should not perish but have everlasting life.—John 3 16

The cross of Calvary, from man's viewpoint, was "a paradox. There is something startling and seemingly incredible about the idea of a crucified king, particularly if those who do the crucifying are the king's own subjects. Kingship implies rulership over others, and not suffering and death at their hands. Pilate told the simple truth when he exclaimed, 'Behold your King,' and when he flung out the sarcastic question, 'Shall I crucify your King?' he was speaking more truly than he knew They were, verily, doing the incredible thing of demanding the death of their King, their Messiah, yea, of the very Son of God" (B L. Olmstead).

I. Jesus Said, "I Am a King" (18 37, 38)

Jesus was before Pilate. The Jews had accused him of declaring himself to be king (see Luke 23:2) Pilate demanded, "Art thou King of the Jews?" (v. 33).

Jesus did not answer directly at first, but declared his kingdom to be "not of this world" (v. 36), indicating to Pilate that he was dealing with One who was more than an earthly king.

When Pilate persisted, Jesus openly declared, "I am a king." The expression "Thou sayest" (v. 37) carries the thought, "You say that I am a king and you are right I am a king." It was in no sense a disavowal of his royalty, but a declaration of it.

Pilate, troubled, convinced of Christ's innocency but too cowardly to declare it, hid behind man's proverbial inability to know the truth (v 38), and wrote himself into history as a hypocritical coward

What have we to say—what have you to say, dear reader, to Christ's claim to Kingship over your life? Should we not say, "He is not only king of the Jews, he is the King of my life"?

II. The Priests Said, "We Have No King" (19:19-16).

Pilate, in fleshly pride, taunted Jesus with his power to determine his fate He did have much power as the representative of Rome, but power over Jesus he did not have.

Majestic indeed was the reply of the King. In a brief sentence Jesus put Pilate on trial before the judgment throne of God Only because the time had come for the Son of God to die was Pilate permitted to exercise his governmental power (see Rom 13 1), and he would answer for his decision one day in the presence of God.

Of especial interest to us just now is the statement of Jesus: "He that delivered me unto thee hath the greater sin" It was the high priest Caiaphas who had that guilt.

Yes, and it was the high priests who declared, "We have no king but Caesar," after Pilate, driven by their cunning threat (v. 12), had sarcastically asked them, "Shall I crucify your king?" (v. 15).

The awful declaration which they made then was on behalf of the entire nation, and declared themselves against Jesus and loyal to the pagan Caesar.

No King? Countless are the men and women today who by their rejection of Christ have declared that they would not have him rule over them. And sad but true is the fact that those who neglect to receive his great salvation have rejected him!

III. Jesus Said, "It Is Finished" (19 25-30).

In his time of greatest anguish Jesus, in an act of tender thoughtfulness, provided for his mother, and gave the beloved disciple John a high place of privilege and responsibility. He thus, as he made his last request, brought together the two who in all his human relationships had been closest to his heart.

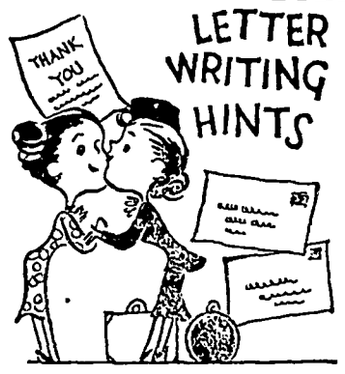
Ready for the final word before he died, Jesus received the refreshment which quenched his awful thirst. Then crying out with a loud voice, "It is finished" (Matt. 27:50), he commended his soul into the hands of the Father (Luke 23:46)

What was finished? The great redemptive work, the work of reconciliation and atonement. The Lamb of God had made his great sacrifice for the world—it is this that was completed. Our great Substitute had paid the great ransom price, paid it to the uttermost farthing.

"It is finished indeed. Others will yet preach and teach, and Jesus will work through them, as the King on David's throne his regal work will continue forever; but the redemptive shedding of his blood once for all is finished, and stands as finished forever (Heb. 7:27; 9:12, 26; Rom. 6:10)" (R. C. H. Lenski).

Hallelujah, what a Saviour! Is he your Saviour? If not, turn to him by faith just now.

Haunted by Unanswered Letters? Here Are Helpful Writing Pointers



Thanks for the Memory

OUR valuable booklet, "How to Write Letters for All Occasions," gives dozens of helpful pointers on vocabulary, grammar, correct form. Has interesting sample letters to help you improve your friendly, social and business correspondence. Includes love letters.

A touch here and a touch there—and your letters will sparkle with personality. Say things vividly

Send 25 cents in coins for our booklet, "How to Write Letters for All Occasions," to Weekly Newspaper Service, 243 West 17th Street, New York 11, N. Y.

Marathon Dance Ban

Among the cases that caused many cities to ban dance marathons over a decade ago was that of 26-year-old Charles Gonder of Bayonne, N. J., who dropped dead in one of these endurance contests in 1932 after dancing continuously for 1,147 hours, or 48 days and nights.

Sign Jams Traffic

No electric sign ever tied up traffic on Broadway as did the one over the Astor Theater which advertised the film Hollywood Revue in the summer of 1929, says Collier's.

Accompanied by an orchestra, 24 chorus girls staged a dance on top of the large letters to attract a crowd for the evening show and were so successful that the police had to stop the act after the fourth night.

Gas on Stomach
Relieved in 5 minutes or double your money back

When excess stomach acid causes painful, suffocating gas, sour stomach and heartburn, doctors usually prescribe the fastest-acting medicines known for symptomatic relief—medicines like those in Bell-ans Tablets. No laxative. Bell-ans brings comfort in a jiffy or double your money back on return of bottle to us. 25c at all druggists.

Let the Ads Guide You When Shopping

How To Relieve Bronchitis

Creomulsion relieves promptly because it goes right to the seat of the trouble to help loosen and expel germ laden phlegm, and aid nature to soothe and heal raw, tender, inflamed bronchial mucous membranes. Tell your druggist to sell you a bottle of Creomulsion with the understanding you must like the way it quickly allays the cough or you are to have your money back.

The Plowing Schogers Choose the NEW
Firestone
CHAMPION GROUND GRIP

CHAMPION FARMERS, and farmers generally, are changing to Firestone Champion Ground Grip tires . . . insisting upon them when they buy new tires . . . specifying them when they order new tractors.

That's because the new Champion cleans up to 100% more effectively; pulls up to 62% more; lasts up to 91% longer. And it rolls more smoothly over highways.

There are sound reasons for this superiority. The curved connected traction bars flare outward from the center, and mud falls freely from the wider shoulder openings. The extra high, curved, pyramid-like bars cut into the soil with a cleaving action, and because they are connected, the bars take a powerful "center bite" in the heart of the traction zone. Extra height, Triple-Bracing, and buttressing at the base give the traction bars greater strength . . . lengthen tire life. The curved connected bars are in continuous contact with the highway, insuring a smooth ride.

Insist upon Firestone Champion Ground Grips when you buy new tires, or order a new tractor. They cost no more than ordinary tractor tires.

Listen to the Voice of Firestone every Monday evening over NBC

They're called "The Plowing Schogers"—and with plenty of reason. Starting in 1930, Carl Schoger won six consecutive years in the National Plowing Match at Wheatland, Illinois. In 1930 and 1931 he won all three National Matches at Wheatland, Lily Lake, and Troy, Illinois. When he retired from competition in 1942, sons Clarence and Harry were ready to defend the family laurels. Last fall, Clarence won the National Matches at Troy and Wheatland. Harry, the younger son, won first in his class at Troy and tied for first at Wheatland.

The Schogers have always used Firestone Tires. You'll find new Champion Ground Grips on their tractors today.

Below, left to right — Clarence, Harry and Carl

Brooder Fires Are Causing Heavy Losses

Hancock county farmers who are using electric pig brooders are urged to check carefully for exposed or deffective wiring, fuses and unprotected bulbs

Paul Henderson, county extension director, says a recent outbreak in fires caused by electric pig brooders, has been reported in Iowa. Such fires have been costly both in terms of pigs lost and buildings damaged

To reduce the danger of such fires on you farm, Henderson suggests making sure the brooder is adequately protected by a guard so the sow can't get to the brooder All wiring should be located so animals can't get to it and chew off the insulation All frayed wiring should be repaired or replaced. And bulbs should be protected with hardware cloth or screen so the open bulb can't come in contact with the pigs and bedding.

Henderson reports that some farmers are using commercial heat lamps instead of making the conventional brooder. When such heat lamps are used they should be suspended from the ceiling and tested carefully to make sure they are far enough from the litter to avoid burning the pigs.

"Agnes Tuverson's Honeymoon." A suspnese-filled sory of a baffling real life mystery. Peter Levins tells it in the Album of Famous Mysteries, one of the many features in The American Weekly, the magazine distributed with the Chicago SUNDAY HERALD-AMERICAN.

George III of England created or revived 254 peerages of the United Kingdom, excluding Ireland.

Mr and Mrs Hans Raum of Phillipsburg, Montana, came on Friday evening and visited until Saturday evening at the Wesley Patterson home Mrs. Raum is a sister of Mrs. Patterson.

TIME TO CHANGE GEAR LUBRICANT IN TRACTOR

Farmers who haven't already changed the gear lubricant in the transmission or final drive cases on their farm tractors should do so now, says Dale Hull, Iowa State College agricultural engineer.

It's not a big job, but it's an important one, Hull says, and one that's easy put off.

Most farmers begin plowing as soon as conditions permit And since plowing is the heaviest farm job, fresh gear lubricants should be put in to prevent wear and avoid an expensive overhaul.

Hull says the used gear lubricant removed shouldn't be used again except for general lubrication It's usually filled with rust, small metal particles or water, which might injure bearings if used on other farm machines.

BIG JOB TO KEEP NEW CROPS PURE

It's Done Through Certifying By Iowa Agricultural Experiment Assn.

Developing better crop varieties is only a part of the problem of increasing the Iowa farmer's income through use of good seed. Providing enough seed for the general crop farmer; distributing the seed throughout the state; and maintaining sufficient pure seed also are important when a new variety is introduced.

The state agricultural colleges and experiment stations, the U. S Department of Agriculture and occasionally an individual or private concern do the scientific research and crop breedng necessary to develop new varieties. But increasing the seed and maintaining its purity usually is not the job of the originator

33 Years Old

To meet these needs the Iowa Agricultural Experiment Association was organized about 33 years ago, and, in 1943, the Committee for Agricultural Development was sponsored A group of progressive farmers, with the aid of the Iowa State College farm crops staff, organized the non-profit Experiment Association to help promote the use of better seed in Iowa In 1922 it became the recognized state agency for certification of crop seed. Certification has since been the chief function of the organization.

The Association sets rigid standards of production for all growers in the state seeking certification, and only varieties recommended for Iowa are eligible Crops eligible for certification in Iowa this year are hybred corn, small grains, bromegrass, reed canarygrass, soybeans, red clover, sweetclover and lespedeza.

Clinton Increase

The Committee for Agricultural Development, composed largely of college and extension officials, was given the task of increasing a few pounds of Clinton oats to an amount sufficient to meet the needs of all farmers in the state, and do it in a short period. It took 25 pounds of seed in the fall of 1943, and by 1948 there will be enough seed for all Iowa farmers.

Crop improvement organizations are found in nearly all of the 48 states. Membership in Iowa Agricultural Experiment Association is open to anyone in Iowa who wants seed certified.

Advise Superphosphate On Flax As Nurse Crop

Farmers who are sowing flax as a nurse crop to clover or alfalfa this spring are advised to disk from 200 to 300 pounds of 20 percent superphosphate into the seed while it is being prepared.

Iowa State College agronomist say this will be a wise move on almost all farms where flax is sown. They recommend flax as a good nurse crop because it offers less competition than oats and other small grains.

Other ways to insure a profitable flax crop are to sow early, provide a good clean seedbed and to treat seed.

Flax should be seeded just as early as the soil can be worked That puts the flax ahead of late-germinating weeds and usually enables it to blossom and fill before hot weather. Weed-free legume sod or clean cultivated corn are probably the best places to sow flax because it competes poorly with weeds. The seedbed should not be disked too deeply. Flax requires a solid seedbed, and corn ground is usually firm if not plowed or disked too deeply Soybean stubble usually requires rolling for best results.

All flaxseed should be treated with ½ ounce of New Improved Ceresan per bushel. Such treatment has shown increases of 1 to 3 bushels per acre and helps in controlling weeds by insuring better field stands.

Plans Made For 1947 10-Acre Corn Contest

Plans for the 1947 Iowa 10-Acre Corn Yield Contest were formulated at Ames recently at a meeting of the Iowa Corn and Small Grain Growers' Association contest committee.

As this is one of the largest contests in the country, the need for uniform procedures by local supervisors was stressed by the committee. The committe is headed by Iver Johnson, Iowa State College agronomist. Local organizations such as the chambers of commerce and farm bureaus conduct the details of the contest.

Largest contest in the state last year was in Sac County with 60 entries.

Goose Flight Most Spectacular In Modern Times

The 1947 goose flight along the Missouri River has been described by observers of the Conservation Commission as the most spectacular concentration in modern times. While apparently there was no noticeable increase or decrease this year in the number, arbitrarily set at 500,000, more than 250,000 concentrated in a single area. In former seasons flocks of more than 100,000 were extremely rare. The usual concentration of a quartr of a million birds was at Forney's Lake in Fremont county, and more than doubled the total of any previous concentration there. In most years the flat Missouri bottom cornfields contain many surface water puddles that attract portions of the flight. This condition was absent during 1947.

Several national magazine and newsreel companies had representatives in the Counsil Bluffs area to witness the flight Ben East, field editor of "Outdoor Life," described the flight as "unbelievably magnificent and one of the most thrilling wildlife spectacles on the North American continent." The peak of the migration has passed but some geese and many ducks are still in the vicinity.

An estimated $13,000,000 worth of children's clothing is returned to stores annually because of wrong sizes.

From where I sit ... *by* Joe Mar

Apple Tree Versus Wheat Field

If you ever visit Jeb Crowell's farm, he'll take you right out on that back porch of his and show you his apple tree.

"There," says Jeb, "is nature's noblest creation—fifty years, and bearin' still the finest cider apples in the county!"

But last fall, when a group of us was there, Lud Denny points across the river to his grain fields and says: "There's an even finer sight! Acres and acres of golden grain you can make dozens of appetizing things with—including wholesome, sparkling beer."

Both of them got so gloom the subject, that the rest worked up quite a thirst. goes to the icebox for bee cider. And when the refresh come, Lud chooses cider, a takes the beer!

From where I sit, that answer to most disputes. Y talk all you want, but w comes to tastes and prefer there's just no argument.

Joe Ma

Klemme Merchant In Business Forty Years

Wellemeyer Came To Klemme In 1907 To Opetate Business

W HAS LARGEST FURNITURE STORE IN HANCOCK COUNTY; WELL STOCKED

Wanted 12 Children nd A Million Dollars!

he month of March is an im- ant *stepping* stone in the of Mr and Mrs Arthur lmeyer but March of 1947 special significance for it s the fortieth anniversary Mr Wellemeyer has been in ess in Klemme During time the name "Wellemeyer" become well known all over h Iowa and esp.ecialliy in the few years Mr Wellemeyer's e has become known as "Han- County's Largest Furniture re."

interviewing Mr Welle- r, the writer, who has wn Mr Wellemeyer for near- thirty years, gained some al Wellemeyer phrases and ate stories of his career we quote some of the things old us which is of special in- st to our many readers

id Mr Wellemeyer, "We e been in Klemme forty years remember the day very well, was in March 1907 and the s were muddy, and I drove town in a top buggy back of am of bay colts I was driv- while my wife held in her s a carefully wrapped bun- our baby boy, Andrew."

We took possession of the ub Store and moved our sehold goods into the rooms r the store, and have been sed to call Klemme our home r since"

e writer here mentions that store at that time stood on lots just east of the present e brick building

gain quoting Mr Wellemey- "We had a notion that mme would be a *jolly good* n to settle down in, and may- raise a family

e had a sort of an under- ding, the wife and I, that n babies should arrive (and ecretly hoped there would be ral) she would take over the responsibility of their care that I would get busy and n a lot of money, maybe a lion dollors or so, just so we plenty for our needs

No Million Dollars

And now, after forty years, discover that our family blment was five children, all grown and all have left parental roof and wandered y to homes of their own, ttered widely over four states. And, as for the *million* dollars ch I was supposed to earn, found out it didn't take near- that much money to do the

But I will say this, it was in- d a pleasure to watch over provide for the little folks they grew up in our home, it was a lot of fun trying to e a million dollars. And thus, all things considered, the wife and I feel that we have had a wonderful time in Klemme for forty years"

Young Man Comes Here

Wellemeyer Age 27

When Mr Wellemeyer took possession of his new business he called it the Wellemeyer Department Store One of the pictures shows the sign very plainly He carried large stocks of Groceries, Dry Goods Cloaks and Dresses, Men's Suits Overcoats Wall Paper, Shoes and even pianos and in addition provided funeral service In the early days the farmers did not come to town very often and when they did come to town in a lumber wagon, they stocked up ahead for several months

Business Was Good

Art says business was good right from the start and after twelve years in the large frame building he built his present fine brick building and moved into it on January 1, 1919

Mr Wellemeyer continued in the general store business until 1930 when he made another important change at which time he remodeled the store and rented out some of the departments Since 1930 Mr Wellemeyer has confined his activities to selling furniture and floor coverings and providing funeral service

Mr Wellemeyer stated that "Through all these years the public has been most loyal to our store, and there are still a few people left who traded with us continuously for forty years, and for all of these favors Mrs Wellemeyer and I are truly thankful

Going back forty years we asked Mr Wellemeyer about the men who were then in business Most of the men were then about an average of 35 years of age and they included August Lau who ran the "north" elevator and Walt Bloom, who ran the south elevator Both men also bought livestock Nels Palmer managed the Northern Lumber Company Alex and Amanda Kirkwood operated the hotel Pat Alex Gries met with an accident Savings Bank Henry Marx of The Klemme Times and Geo Schroeder and son Henry and the butcher shop

Oscar Carlson did a thriving business as operator of a livery barn. (Our younger readers probably dont know what a livery barn is.) Oscar had some horses and buggies for rent and often drove traveling men to nearby towns to catch a train The young men also rented rigs" to take their best girl to a dance or for a Sunday ride There were no autos then

Geo Kluckhohn was proprietor of the restaurant and also did real estate business on the side Lew Lewis did a thriving business as hay merchant and operated a pool room as a side line John George and Frank Gruetzmacher were leading retail merchants Fred A Arnold was at the time Cashier of the First National Bank

Fred and August Ridder, assisted by Wallace Pavey, operated the Ridder Bros Repair and Blacksmith Shop J L Harr was Klemme's first druggist and J P Larsen, father of C A Larsen was a contractor and builder

John Baumgartner was proprietor of the barber shop and the writer recalls a sign John had in his shop, which stated "Only Three Chair Left-Handed Shop In Iowa" A shelf was lined with individual shaving mugs, which was the vogue in those days

Left-Handed Barber Shop

John Waterman operated a general store on the south side of the street, which he later sold to John Day Waterman then put up the brick buildings now occupied by Kluckhohn Bros and the Lewis Radio Shop both buildings a real contribution to our street

Dr Zinn owned a tall black saddle horse, which he kept in the livery barn and used on his calls Dr Spooner always drove a team of horses hitched to a light top buggy

Joe Johnson was the principal buyer of cattle and hogs at that time Albert Koerner began the telephone system in Klemme which is now the Central Iowa Co Henry Lau sold farm machinery and bought poultry and eggs Tom Blank was the "section boss" at that time

Rev Albert Muehlmeir and Rev George Wessel were the pastors in Klemme

Only A Few Business Men Of Forty Years Ago Still Here

Of the thirty-six business men of forty years ago who were then operating in Klemme in 1907 the following still live in our town

Joe E Johnson, retired, Tom Blank, retired, F A Arnold, still in the bank as President; John N Day, postmaster, Wallace Pavey, repair and blacksmith shop A G Koerner, now operating a dairy, and of course, Arthur Wellemeyer, furniture and funeral service

Was Always For Klemme

Mr Wellemeyer has always been a good booster for Klemme he always encouraged young men starting in business, he has been active in the affairs of the town served on the school board and town council and whenever there was some project up for the good of the town, he worked hard to help put it over Mr and Mrs Wellemeyer are both to be congratulated and highly commended for the part they have played in making Klemme a good town in which we live"

The Editor

IN BUSINESS HERE FOR 40 YEARS

Mr and Mrs. Arthur Wellemeyer As They Appear Today

ECHARD ZEIDLER AGAIN FIRST TO OPEN FISHING SEASON

Echard Zeidler, who for several years has been the first to hook and land a fish in the Iowa River near Klemme, came through again to claim the honor on the last day of March

Echard brought his fish to The Times Office Monday evening at 5 30 o'clock as proof of his ability to catch the first fish of the season

FORMER KLEMME WOMAN BURIED AT BELMOND

Mrs Sadie Adams Bloom, of Los Angeles, Cal, a former resident of Klemme, was buried at Belmond Tuesday

Mrs Bloom was born in 1865 and died at her home in Los Angeles in December, where funeral services were held at that time The remains were accompanied to Belmond by Gail and Walter Bloom.

Services were conducted at Belmond by the Rev W L. Patterson with the Wellemeyer Funeral Service in charge

Pall bearers were Lester Stille, Verner and Ernest Lewis, C G Waterman, L. B Oberhauser and W. S Pritchard, Jr

Former Klemme Druggest Died In California

Word has just reached Klemme that Geo A Pabst, former Klemme druggist, died about 2 weeks ago at his home in California

KLEMME LEGION AUXILIARY TO BE ENTERTAINED AT GARNER

The Gifford Olson Post of the American Legion of Garner will entertain the auxiliary units and the various Legion posts of the county at the Garner Opera House on Wednesday evening, April 9th

A number of prominent speakers have been secured for this county meeting and a number of Klemme members of both the Legion and Auxiliary plan to attend the meeting

ATTENDED CONVENTION

Supt A L Kingery and Co Supt. Chas. Whitney attended the one-day session of the North Central division of the Iowa Education association at Fort Dodge Friday.

Klemme Students Rate High In Music Contest

The members of this year's confirmation class are Darlene Etchen, Roger Schaefer, Eugene Bachman, Willie Bock, Rita Janssen, Merlin Brinkman, Luella Priebe, Lillian Wille, Calvin Josten, Marvin Schmidt, Marian Kastler and Dorance Black

MONDAY'S TOWN ELECTION QUIET, OLD TICKET RE-ELECTED

Monday's town election here was rather quiet with only 62 people voting, one ballot being spoiled

There was but on ticket filed with W C Keraus for Mayor, C G Waterman for Treasurer, Orville Bridges for Assessor, and the following councilmen Fred Bell, John Etchen, Lloyd Lau, C E Kluckhohn and C A Larsen All received over 50 votes and there were a few votes written in on the Independent side of the bollot. Wallace Pavey collected 17 for Mayor while Keraus polled 44 votes for the same office

JORGENSON'S CORNER STORE INSTALLED NEW LIGHTING SYSTEM

New florescent lights were installed by the Lewis Radio Shop in Jorgenson's Corner Store the past week Over the week end the entire arrangement of the interior of the store was also changed to give better display of merchandise and to make it handier for the customer

R A Jorgenson, Jr, proprietor of the store plans to have a formal opening in the near future Watch for the announcement in The Klemme Times.

Attended Family Gathering Sunday At Popejoy

Mr and Mrs. Mitchell Bock, Jimmy and Joyce Ann participated in a family gathering at Popejoy Sunday in honor of Mrs Bock's grandparents, Mr and Mrs. Fred Bessman, who were celebrating their 64th wedding anniversary

In the afternoon Mr and Mrs. Bock attended the wedding of her cousin at Steamboat Rock,

GLORIA HAEFNER WINS A 1 RATING

Klemme High School Won Eight Ratings

In the preliminary State Music Contest held at Clear Lake over the week end, the Klemme high school grabbed its share of honors by taking 1 first and 7 two place ratings in a strong field of contestants

Gloria Haefner rated a 1 in piano, while Marcelle Josten won a 2 rating

In bass solo Dean Jacobs took a 2 rating and Jean Kurtz also won a 2 rating in sophrano.

Other Klemme High School students winning 2 ratings were the Madrigal group, Sextette, Mixed Chorus and Charlotte Lewis with tenor saxophone.

Mrs. W. E. Patterson coached all of the above music students. Klemme should feel quite proud of the showing made in the music contest.

MORE RED CROSS DONATIONS

Since the Red Cross donation list was published last week the following contributions have added

G A. Goll	$5.00
Dwight Hummel	$5.00
A L. Kingery	$5.00
Northern Implement	$5.00

Note. The names of Mrs. Emil Beier and Mrs. Wm Ax should have appeared in the $2.00 list instead of the $1.00 list.

There is still time to add your contribution to the Red Cross list. Leave your contributions at The Times office or Mrs. Geo. Lawhorn.

DEAN JACOBS WINS PLACE ON IOWA PRESS HONOR ROLL

Dean Jacobs, speedy, smooth center on the Klemme Shamrock basket ball team, who this year is a senior, won a high rating in the Iowa Daily Press Association All-State Basket Ball teams.

Dean was chosen high up on the Honor Roll as one of the best centers in Iowa high school basket ball team.

Boy Falls From Tree; Result; Arm Fractured

Bobbie, son of Mr. and Mrs. Fred J. Arnold, while playing before noon Saturday, fell from a tree. One arm was fractured, Bobbie's glasses were broken and he received several minor cuts and bruises.

HELLO, FOLKS!

Mr. and Mrs. Geo Dodd of ssett are the parents of a b. baby boy born on March 27 the North Iowa General hos- al in Mason City They also e a daughter, Darlene. The lds formerly lived at the E. Arnold farm:

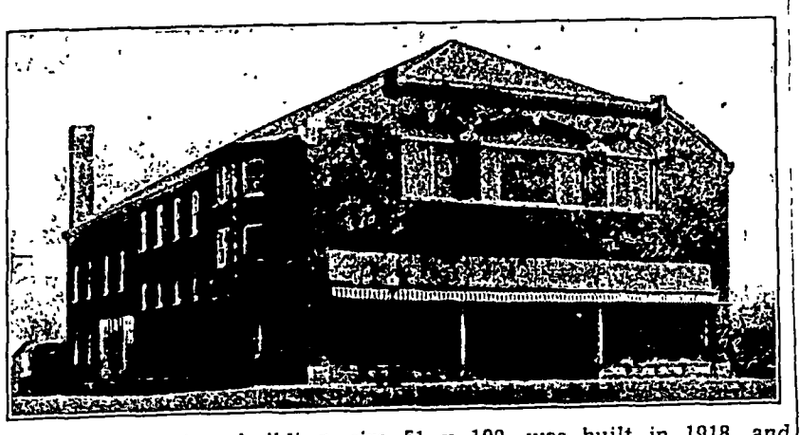
THE OLD STORE HAD THREE FRONTS!

A W painted and hung the sign "Wellemeyer Department Store" made of 1 sheet of galvanized iron from the Gruetzmacher Bros and a 4 in h red frame, painted with a black background and white letters.

The store building covered 3 lots. The one-third on the left was the furniture department

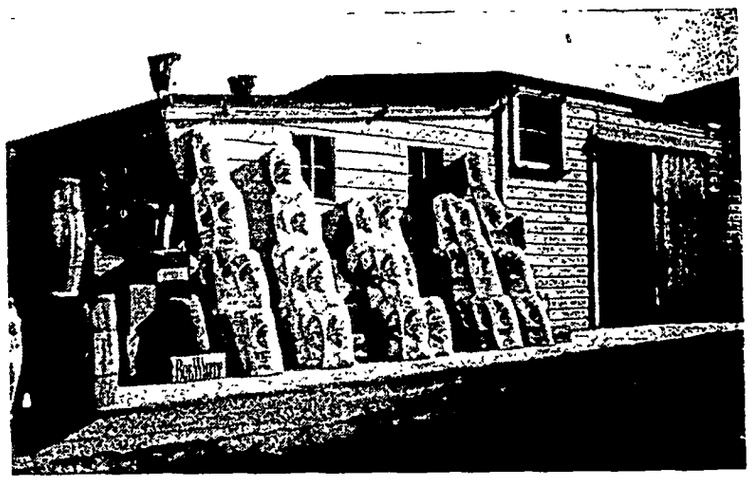
After eating dried fruits such as peaches, apricots, and raisins all summer (no refrigerator service on trains in the early days) our customers craved fresh apples. In October and November 1910, we shipped in 3 carloads of New York apples, 160 barrels to the car, they were piled up out side the store and some were delivered direct from cars. They were "Baldwins." "Northrn Spy" "Grimes Golden," and etc., retail price was $3 00 to 3 50 per barrel of 4 bushel Arthur Wellemeyer is the tall man in the picture above and Joe Miller in shirt sleeves.

ONE OF THE FINEST STORES IN THE COUNTY



The new store building, size 51 x 100, was built in 1918, and we thought building costs were high at that time, but we could never have built it for less even to this day. We have been in the new store 28 years.

LARGE ORDERS PILED UP AT BACK DOOR



In horse and Buggy days with dirt roads our customers baked their own bread. They bought flour in 5 or 10 sack lots, when they thought the price was right, which was usually in the late fall. The picture shows our back door loading platform on a Saturday afternoon with orders of flour, soap, coffee and salt piled out for customers to load onto their wagons.

Ideologies Clash in Occupation Zone

Korea a House Divided Between U. S. and Russia

By BAUKHAGE
News Analyst and Commentator.

WNU Service, 1616 Eye Street, N. W. Washington, D. C.

WASHINGTON — A couple of months ago I wrote a piece about Korea for this column.

It was largely a factual report and when I wrote it I realized how little I, and perhaps some of you, know about Korea. I have been realizing that for many years but not too many. I think that the first time Korea meant anything more to me than a smear on the map was when I was quartered with a young fellow in a barrack in France in World War I. He talked in his sleep. That was bad enough, but I couldn't understand what he said. So I asked him. He said:

Baukhage

"My father was a missionary in Korea. I was born there. When I have a nightmare I talk Korean."

Korea est omnis divisa in partes duo, unam incolunt the Red army et unam (south of a dividing line drawn by Stalin and Roosevelt) by the American army.

The agreement was that the two nations would set up a unified provisional government and lure the Koreans back into democratic life.

Then things began to eventuate. Roosevelt died and he couldn't tell Stalin that "democracy" meant one thing to Americans and something quite different to Marxian schooled Russians. Oh, quite different.

But regardless of academic definitions this has happened, according to General Hodge's own statements. The Russians have drafted Koreans in their zone into an army. They have set up a Communist regime in their sector.

We haven't done so well with our brand of democracy in our sector. Not because of lack of good intentions nor of the efforts of General Hodge (so his enemies admit) but due to a lot of things including the spectre of the past which has harassed the Koreans. They like America. But all they have got from us in the past is vague promises. Other nations beginning with Japan took them and tore them. They have faced a historical array of broken promises from the great nations. Koreans thought they were promised independence "in a few days" after American occupation. That misunderstanding was due to the fact that the Moscow agreement was translated by a Korean who was possessed of more native optimism than knowledge of the English language. From then on, the Americans attempting to abide by their understanding of the Moscow decisions have tried in vain to get an agreement out of the Russians which would be the basis of a unified Korea behind a unified provisional Korean government.

Today Korea has become one of those explosive areas where two ideologies meet; where the two great empires left in the world (the U. S. and the U.S.S.R.) face each other for better or for worse. Neither thinks it should retire and allow Korea to erect a government which would take its pattern from the other.

What's going to happen now? We are going to get a little tougher with the Russians, and if we can be released from that ambiguous agreement we'll let the Koreans in our zone set up their own provisional government. They already have a parliament of their own, but General Hodge has a veto and he will keep it until we see some kind of a coalition, free from Communist pressure—or any other kind of pressure, of which there are a lot.

It will cost money.

★ ★ ★ ★

Blast Teacher Pay Proposal

My folks came originally from New England. We followed the various migrations west in jerks. But my New England ancestry is the only reason I've always been proud of American schools. As a school boy I had a tough time because I wasn't tough enough. There were a lot of fights that had to be negotiated. But I came out with the idea that I'd take the public schools of America because they taught democracy whatever else they didn't teach. Later, I studied abroad and didn't change my mind.

Then I joined the army and discovered from my buddies (I got five francs for writing letters for them), that parts of America I hadn't grown up in were as illiterate as parts of Europe which I'd held my nose going through, and that some of Europe was more literate than the United States, although at our worst we had a better school for the poor man, proportionately, than Great Britain.

Years passed and finally I began hearing complaints about our schools—including the high-literacy areas. I realized what teachers were being paid compared to dog catchers and garbage collectors and bartenders (not as much). I mentioned it on the radio. Most people complimented my stand for higher remuneration for education. (Of course we couldn't expect to pay as much as we pay for liquor to redden our noses or the women pay for cosmetics to redden their lips.)

But what shocked my New England soul was some of the letters on the "other side":

From a teacher of "long and varied experience":

"The most important teachers in the world are the mothers and fathers, who are now earning wages less than the teachers in a great many cases. Lack of adequate pay for them is the greatest cause of education failure—and failure it is—because it does not aid properly those who need it worst."

From a California teacher who is "almost in despair over the situation":

"The school cannot substitute for the home; it can only supplement it. You can't teach children who have had no home training; you can't even teach those who have if your whole time and strength are consumed by those who haven't. Most parents will pay whatever they have to pay for a parking station for their children and will ask no further questions. More and more of the parking attendants are unwilling to deal with such children at any price."

From a Pennsylvania mother:

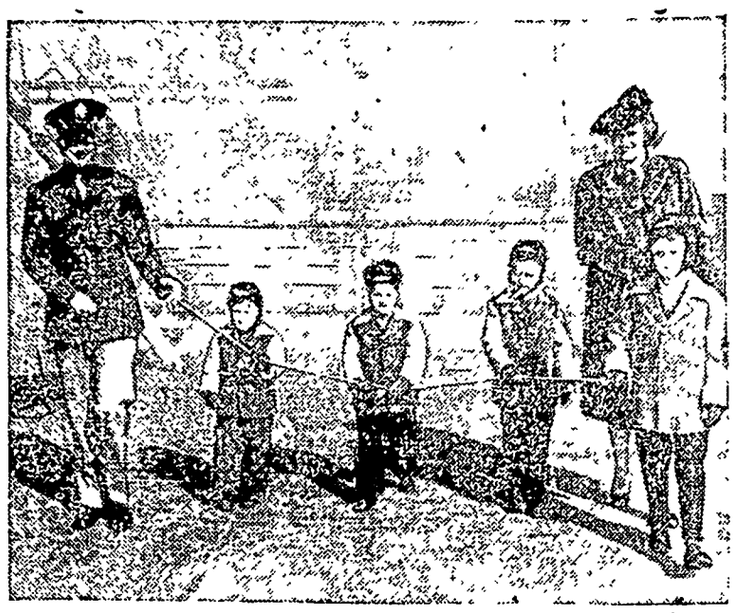
"If monetary remuneration were the only consideration for our services in this life—would there be nurses, doctors, welfare workers and ministers? Yet they abound in love and kindness and tolerance."

From a Virginia man:

"There is an adage to the effect, 'you get just about what you pay for.' The point is, when the school teacher does his job as well as the street cleaner or garbage collector, he will be paid accordingly, but as long as the educators are content to have the street cleaners do their job better, the educators should not complain that the street cleaner is better paid."

Gets Wasps Straight

Sixteen-year-old David Shappirio of Washington, D. C., one of 40 finalists in the sixth annual Westinghouse science talent search, cleared up an entomological "triangle" by mating "Mrs." Wasp with her proper spouse. The books had been wronging this couple for years.



DAD IS AN ARMY MAN . . . The story of the extensive traveling done by an army man and his wife is graphically told in the varied birthplaces of the four children of Lt. Col. and Mrs. Robbin B. Durbin, pictured strolling on the deck of an army transport. Donald, 8, was born in Lindsborg, Kan.; Thomas, 4, at West Point, N. Y.; Edward, 6, in Honolulu, and William, 8, in San Antonio, Tex.

NEWS REVIEW

Greek, Turk Aid Proposal Keynotes Shift in Policy

D (DIPLOMACY) DAY: *Back Truman*

Despite its radical departure from traditional American foreign policy and inherent threat of conflict with Russia, President Truman's program for aiding Greek and Turkish resistance to Soviet pressure in the strategic Middle East gained strong support in congress.

Many Republican senators and representatives crossed party lines to back Mr. Truman's proposal to lend Greece and Turkey 400 million dollars within the next year to bolster their economies and buy arms and provide military experts to train key personnel. Senator Bridges (Rep., N. H.) summed up congressional sentiment: "If we are ever going to try to stop the spread of Communism, now is the time."

Critics of the program did not so much oppose the forthright action proposed to check the Red tidal wave in eastern Europe as they inveighed against past state department practices in aiding the Soviets and their puppet states in strengthening their hold on oppressed people. With the entire nation sensitive to growing Russian dominance, critics were expected to lend their support for maximum safeguards against precipitating hostile action.

Mr. Truman made no bones about administration intentions of resisting Russian expansionism, declaring that U. S. foreign policy remained dedicated to the principle of freedom for all people. After lambasting Communist interference in Greece and imposition of totalitarian regimes in Poland, Romania and Bulgaria, he asserted that all nations faced the choice of dictatorship or democracy.

Significantly, the Middle Eastern trouble spot lies at the crossroads of the East and West. Whoever controls this strategic area controls the gateway to two worlds plus the huge oil deposits of Iran, Iraq and Arabia, in which the U. S. and Britain have heavy interests.

Strengthening of the U. S. attitude toward Russia came as the Reds crimped opening of the Big Four conference in Moscow on the German and Austrian treaties. Defeated on a proposal to discuss the Chinese situation at the outset, Russian Foreign Minister Molotov came right back with the charge that the U. S. and Britain have retarded demilitarization of western Germany.

LABOR: *End Long Strike*

Beaten in their attempts to obtain "union security," Local 180 of the CIO-United Automobile Workers ended its 14½-months-old strike at the J. I. Case tractor and harvesting equipment plants in Racine, Wis. Previously, union members had returned to work in Case's Rock Island, Ill., Burlington, Ia., and Rockford, Ill., factories after prolonged walkouts.

Asst. Sec. of Labor John W. Gibson was successful in bringing the company and the Racine local together. Abandoning efforts to obtain a union shop, maintenance of membership and a compulsory dues checkoff, the local settled for an average 25 cents an hour wage raise, new grievance machinery and improved vacation provisions.

Settlement of the strike posed a labor problem for Racine since many of the 3,500 strikers had taken other jobs during the course of the walkout. Their action eased the strain on the union treasury although other workers received strike benefits. The plants were completely shut down during the dispute, with the union maintaining effective picket lines.

ASKS BAN ON REDS

Questioned about a bill outlawing Communists from official positions in labor unions, Secretary of Labor Schwellenbach rasped: "It does not go far enough. Why should we recognize the Communist party in the U. S.? Why should they be eligible to run for office when their purpose is to destroy the government? Why should they be theoretically able to get elected to congress? I just can't see any reason why we should have that."

RAIL MURDER: *FBI Enters Case*

Congressional concern over the shotgun slaying of Pres. George P. McNear of the embattled Toledo, Peoria and Western railroad brought the FBI into the case in an effort to track down the killers of the millionaire rail executive.

The justice department authorized the FBI investigation on the grounds that the federal government was interested in what otherwise might have been a local incident because of McNear's recent testimony before the house labor committee.

Committee Chairman Hartley (Rep., N. J.) revealed that McNear had charged the Railroad Brotherhoods with inciting violence on the T. P. & W. to prompt government seizure of the line during the war. Brotherhood officials replied by accusing McNear of a lack of knowledge of railroading, Hartley said.

BIG BUSINESS: *Growing Bigger*

Pointing out that 1,800 companies have been absorbed by purchase or merger since 1940, the Federal Trade commission urged adoption of a bill sponsored by Representative Kefauver (Dem., Tenn.) that would prevent such practices where they tended to create a monopoly.

Under present provisions of the Clayton anti-trust act, only stock purchases forming a monopoly are prohibited. Operators have been able to get around this provision, however, by outright purchase of a company's assets or exchanging stocks through a merger. Kefauver's bill would plug the present loop-hole and empower the FTC to rule on mergers.

COMPETITION COMING

Lower Costs and Prices Advised

WASHINGTON. — Warning that business faces a period of intense competition for consumer dollars, the department of commerce advised business men to begin now to cut costs and lower prices.

"Business is on the verge of a period of intense competition; there are more retailers than before the war and the implication is that competition for the consumers' dollar will be greater than ever," the department declared in a study of pricing problems by Frederick M. Bernfield of the marketing division.

The department forecast that "unless business men start reviewing their pricing policies now with a view towards meeting this competition, they may find themselves faced with making drastic price changes."

The old wartime formula of price of goods plus operating costs plus desired profit is no longer sufficient, the department said. In general, markup policies must be directed toward a reasonable net profit. Business men in considering revisions must be sure to include in their costs such items as markdowns, damage and theft.

If a business man cannot meet competition, maintain quality of his merchandise, pay all costs and make a reasonable profit, "then he must either lower his costs, or stock or manufacture something else."

A generally lower price level may be beneficial to all, if demand is sufficient, but it could result in a series of price cuts harmful to all, the survey noted.

In considering price policy the department said retailers might do well to classify wares as luxury goods, competitive goods and convenience goods. In luxury lines markup may be larger than the store average. At the other extreme, convenience goods sell rapidly and a low markup might be the most satisfactory policy.

THE WASHINGTON SCENE

House Committee Leaders Average 17 Years' Service

(Editor's Note: This is the fifth in a series of articles dealing with new congressional committees and their chairmen.)

By WALTER A. SHEAD
WNU Washington Correspondent.

WASHINGTON — Although Republican legislators were relegated to the background during the past 15 years of Democratic ascendency, the 17 G O P. representatives who now head the house committees under the reorganization act have a long record of service in congress.

The 17 committee chairmen, a survey reveals, have served in congress for an average of 17 years. Veteran legislator of the group is Cong. Harold Knutson of Minnesota, who has served in the lower house for 30 years. His service has embraced two wars as he was first elected to congress in 1917. Committee chairman with the least tenure is Cong. Fred Bradley of Michigan, whose service has been limited to eight years.

The list of house committee chairmen continues:

Agriculture

CLIFFORD R. HOPE (KAS.), new chairman of the agriculture committee promises a bipartisan approach to farm problems on an economic rather than a political basis. He advocates an agricultural program for soil conservation, marketing research, rural electrification, farm-to-market roads, reduction of farm tenancy and revision of the farm parity price formula to bring it up to date and to include labor costs. In addition to the more traditional supports for farm prices and markets, Hope emphasizes higher dietary standards brought about by better nutrition education and continuing high industrial employment.

Hope

Hope, a 53-year-old lawyer, was born in Iowa but has lived in Finney County, Kas., since 1906. He is a member of a Garden City, Kas., law firm. After army service in World War I, Hope was elected to the Kansas house of representatives in 1920 and was made speaker in 1925. He was elected to congress in 1926 and has been re-elected regularly.

The fifth Kansas district which Hope represents spreads over 33 counties in the southwestern part of the state. Its 1940 population was 296,118. In the heart of the country's breadbasket, the fifth district is overwhelmingly rural and agricultural.

On non-agricultural matters Hope generally votes with the majority of his Republican colleagues. On agricultural bills, he voted against the agricultural adjustment act in 1933, for the soil conservation act in 1936, for wheat crop insurance in 1938 and for including farm costs in parity prices in 1942.

Executive Department Expenditures

CLARE F. HOFFMAN (MICH.), new chairman of the committee on expenditures in the executive departments, is one of six Republicans in the house who voted with the majority of their party 100 per cent of the time on controversial roll calls in closing months of the 79th congress.

Not normally important, the committee which he now takes over sometimes comes into the limelight, as when it handled the full employment bill in 1945-46. Hoffman vigorously opposed this bill, even in the compromise version which finally passed the house by a vote of 320 to 84. The expenditures committee also has been given jurisdiction over surplus property legislation. Otherwise, the committee's most important jurisdiction is over government reorganization. In this field, Hoffman voted to recommit the government reorganization bill in 1938 and to recommend the later reorganization bill in 1945.

Hoffman

Hoffman was born 71 years ago in Pennsylvania, went to law school at Northwestern university and later moved to Michigan, where he now lives in the town of Allegan. He has been in the house since 1935.

Hoffman's district is made up of six counties in the southwestern part of the state. Its 1940 population was 242,339. The district is predominantly rural and agricultural. Small industrial enterprises exist in quarrying, glass, pottery and machinery. Labor organizations, especially the CIO, have increased their membership there in the last few years but are not a significant power politically. Hoffman has introduced a number of labor bills which are strongly opposed by organized labor.

Foreign Affairs

CHARLES A. EATON (N. J.), new chairman of the foreign affairs committee, usually follows Republican party policy on domestic matters and the Vandenberg line on foreign affairs.

Eaton was a delegate to the United Nations conference in San Francisco and an alternate delegate to the general assembly in London. He voted for the United Nations implementation bill in 1945, and for the loan to Britain in 1946. He also voted for the amendment to the UNRRA appropriation in 1945 prohibiting use of the funds in countries denying freedom to American press correspondents.

Eaton, who has been in congress since 1925, was born in Nova Scotia 79 years ago and spent most of his early life in Canada. He is an ordained Baptist minister and has held pastorates in Toronto, Cleveland and New York. Concurrently he worked as a newspaper man, serving as Canadian correspondent of the old New York Tribune and Boston Transcript and as special correspondent of the London Times. He also has specialized in industrial relations and for a time was head of the industrial relations department of the National Lamp Works, General Electric company.

Eaton

The fifth New Jersey district, which Eaton represents, is in the north central part of the state and is predominantly industrial and residential. A considerable part of its population (329,305 in 1940) commutes to work in New York City. Both the CIO and AFL are well organized in the district, and National Association of Manufacturers and chamber of commerce also have substantial membership.

Veterans' Affairs

EDITH NOURSE ROGERS (MASS.), chairman of the new committee on veterans' affairs, is especially interested in disabled veterans, but in general she is sympathetic with most of the aims of major veterans' organizations.

The new committee takes over functions of the old committees on pensions, invalid pensions and World war veterans' legislation. Mrs. Rogers' primary purpose in the new committee, she said recently, is to rework the entire body of existing law on veterans' pensions, disability compensation and life insurance so as to remove the inequities which have arisen under it as a result of its piecemeal growth.

Rogers

Mrs. Rogers, 65 years old, is a former social service administrator who served in Europe in the Red Cross in World War I. She was first elected to congress in 1925 to fill the vacancy caused by the death of her husband. During the 1920s also she served as the personal representative of Presidents Harding, Coolidge and Hoover in the care of disabled veterans.

On controversial matters, Mrs. Rogers votes with the majority of her Republican colleagues about two-thirds of the time and deserts them to side with the Democrats about one-third of the time. On almost the only controversial veterans' matter to come before congress in 20 years, Mrs. Rogers voted against overriding the soldiers bonus veto in 1936.

The fifth Massachusetts district, which Mrs. Rogers represents, includes parts of Essex and Middlesex counties bordering the Boston metropolitan area. It has some small farms, but is primarily residential. There is little industry except in the city of Lowell which has a concentration of textile mills. Organized labor has little strength in the district outside of Lowell. The district's population in 1940 was 336,642. It has long been considered safely Republican.

Polio Victim Runs House Alone at 78

PETERSBURG, VA. — Although she lost almost all use of her legs as a result of an infantile paralysis attack when she was an infant 78-year-old Miss Della Sermons manages to run her own house without assistance. In her second floor rooms of a neat gray house Miss Sermons enjoys the feeling of independence realized from doing all of her own housework.

One of the most difficult jobs is getting coal from a downstairs bin for her second floor rooms. Propelling herself with her arms, in a sitting position, Miss Sermons loads the fuel in small buckets, which are hooked onto ropes tied to upstairs banisters. Then she returns to the second floor and hauls up the buckets.

By bracing herself on crutches, Miss Sermons manages to make up her feather bed.

PREPARE FOR INVASION . . . These rugged ex-servicemen again are preparing for an invasion—but this time of the bleach-heads instead of the beach-heads—as they study intricacies of coiffure design technique at the Post-Graduate Hair Styling School of William in Chicago. Eighty-five per cent of the students are ex-G.I.s.

OVER THE TOP

Ex-G.I.s Set for Invasion— of Bleach (Not Beach) Heads

WNU Features.

CHICAGO.—Curling irons and hair nets are supplanting guns and bayonets as peacetime equipment for a group of early, rugged veterans of World War II. Taking unusual advantage of the G.I. Bill of Rights, these ex-G.I.s have enlisted for peacetime training in the ultra-pacific field of coiffure design at the Post-Graduate Hair Styling School of William.

William, internationally - known hair stylist, lecturer and author, is chief instructor of what has been termed "America's most advanced and unusual school" for the teaching of master coiffure design technique.

Since establishment of the school two months ago, 85 per cent of the classes have been comprised of ex-servicemen eager to re-enter the beauty field they deserted for the battlefield, William reveals.

Following army precedent, the training course has been streamlined for completion in only four weeks. In the basic courses of wet hair shaping, dry hair shaping, pin curling methods and artistic hair coloring, however, the ex-servicemen find slight resemblance to.rifle practice, grenade launching or 15-mile hikes.

One of the distinctive features of William's school is the use of live models on which the ex-G.I.s practice coiffure design artistry—altogether dissimilar to the straw-filled dummies on which they practiced movements of bayonet artistry.

In fact, any similarity between the basic training course at the hair dressing school and the basic training course at any army post is purely accidental. But the tough ex-G.I.s don't seem to mind. They remember how their army training prepared them for beachhead invasions. Now they don't want to be training in preparation for bleach-head invasions.

Blind People Ask to Be Considered as Human Beings

WASHINGTON.—"The blind ask more than to be treated like human beings," insists Herbert Yant... in a booklet, "What Do You Know About Blindness?"

Contending that would-be benefactors often do more harm than good, the author lists 10 rules for aiding sightless persons:

1. Speak in a normal tone of voice; the blind man is not deaf.
2. Don't express sympathy for a blind person within his hearing.
3. Use the word "blind" without hesitation, it won't offend him.
4. Don't be over indulgent in helping a sightless person find a seat in a vehicle or to climb stairs. Place his hand on a leading object is enough.
5. In lending assistance when walking or crossing an intersection, offer your arm instead of grabbing it. Proceed in a straight line if possible.
6. When entering a room where there is a blind person, say something to herald your arrival. The same when you depart.
7. Address a blind person directly, not through another individual.
8. Avoid gushing over the usual things which a blind person can do.
9. Refrain from talking about an "extra sense" or "providential compensation."
10. Be natural and kind, but never patronizing.

Tall Corn Grows

SAN LUIS OBISPO, CALIF.—Not only the tall corn grows in Iowa, California Polytechnic college students have proved by growing stalks 17 feet high.

Honest' Man Returns Lost Money in Spurts

JACKSON, MICH. — An honest finder found Curtis Roe's billfold containing $70—but his integrity came in spurts. When Roe picked up the billfold at a hotel desk after he was informed it had been found and turned in, it contained only $11. Since then, however, Roe has received two envelopes from the unidentified finder. One of the envelopes held $25 and the second $34.

"Off We Go" AVIATION NOTES

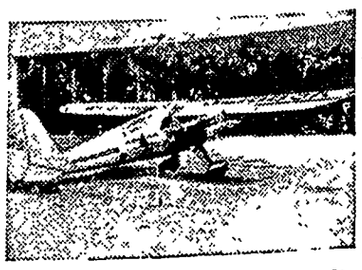
AIRPORT CHATTER

Aviation committees of the Minnesota state senate and house made a good will trip on two navy R4Ds with stops at Duluth and Bemidji and a flight over the Iron Range to demonstrate "how quickly an airplane can show a visitor northern Minnesota." Chairman A. R. Johnason of the senate committee reported the group has voted $2,500,000 for airport development in the next biennium. . Members of the Denver ski patrol conducted a week-long drive seeking financial support for their rescue facilities and services at Colorado ski sites. The patrol has 68 trained members who cooperate with the Red Cross and the air search and rescue arm at the army's Lowry field in rescue activities. . . Michigan's G I. flight training, commenced in February, 1946, has gained momentum until it now is an accredited course in seven of the state's colleges. The state now has 7,800 veterans in training at 200 flight schools and another 12,000 booked for spring. With costs underwritten by the government, school operators have bought new planes, built new airports and installed the latest training aids. . . Thousands of miles of Arizona's scenic grandeur are covered in a series of five all-expense, personally-escorted "Airtours" inaugurated by Arizona Airways, Inc. Flights cover such picturesque views of the Arizona wonderland as Oak Creek canyon, San Francisco peaks, Painted desert, Grand canyon, Marble canyon, Lake Mead, Las Vegas, Boulder dam, Navajo Indian reserve and Brahma temple

* * *

Equipped with a bundle of knitting and a newspaper "to entertain myself on the way down," Mrs. Lavada Ava Sneed, 42-year-old Denver grandmother, stepped out of an airplane 4,000 feet above Denver's Ruston field on her first parachute jump. Mrs. Sneed, who had rigged 3,600 and changed harness on 11,000 parachutes while engaged in wartime work for the army, wanted "to see if they really do work." Her reaction: "I was as thrilled as any little old country girl on a picnic."

* * *



NEW MODEL . . . The new de luxe Silvaire model 8-E, which has a cruising speed of 112 miles per hour and a maximum speed of more than 125 miles per hour, is now in production at the Luscombe plant in Dallas, Tex. It is a two-place, high wing, all-metal monoplane.

SET SHOW DATES

The second annual National Aircraft Show sponsored by Aircraft Industries association will be held in November. Several eastern cities are under consideration as the location. Emphasis this year will be on personal aircraft and accessories, rather than an all-inclusive aircraft exposition such as was staged at Cleveland last November. Col. Tod Bates, wartime commanding officer of Luke field at Phoenix, Ariz., has been selected by Aircraft Industries association to head its show force.

Annual Army Day Observance To Emphasize Peacetime Role

Nation Will Honor Achievements at Programs April 7

WNU Features.

Dedicated to "The American Army in Peace," Army Day will be observed throughout the nation on April 7 with parades community celebrations and addresses by prominent army and civilian leaders

The observance has been proclaimed by President Truman and by governors and mayors The army's role in the observance, on orders of Gen Dwight D Eisenhower will be keynoted to securing and maintaining the peace

In addition to the traditional Army Day the war department this year will observe Army Week during the period April 6 to 12.

Army day customarily is observed on April 6, anniversary of the declaration of war in 1917 The observance was postponed for a day this year because Easter Sunday occurs on April 6

Started in 1928.

Originally proposed by the Military Order of World Wars in 1928, Army Day at that time had no governmental inspiration From its beginning however the observance received full and active support of other veterans' organizations as well as civic groups In 1937 the house of representatives and senate, by joint resolution, designated April 6 of each year as Army Day Since then it has expanded to a national project and is observed on a major scale annually

As in the past, Army Day and Army Week this year will call upon the nation to honor the wartime army in peacetime for a job well done and to pay tribute to all servicemen, those who survived as well as those who fell on the battlefields of all wars.

HATS OFF! . . . The flag is passing by in an Army Day parade in the nation's capital. Scenes like this will be reenacted throughout the nation April 7 on the annual observance of Army Day.

Parades Scheduled.

Throughout the nation, Army Day will be marked by community celebrations and parades In communities where army units are located, uniformed troops will participate in the parades and new army equipment will be displayed.

On the second observance of Army Day since conclusion of the greatest war the world has ever known, the nation has come to recognize the army as an instrument of national security both in war and peace. Army achievements, both military and scientific, have played an instrumental role in America's advances ever since its early days as a small federation of newly independent states

In the fields of medicine, construction, transportation, communication and allied endeavors, army research and developments have aided the nation's growth and welfare

At Army Day celebrations added recognition will be given the nation's armed forces as peacetime instruments as well as wartime necessities.

FBI SCORES AGAIN

Science Proves Aid to Crime Detection

WNU Features.

Science has established itself as one of the strong allies of crime detection. Equipped with more than a million dollars' worth of scientific apparatus and staffed with specialists in various scientific fields, the Federal Bureau of Investigation crime detection laboratory in Washington has proven an increasingly potent factor in detection and apprehension of criminals throughout the nation

Facilities of the modern scientific crime detection laboratory are at the command of every duly authorized law enforcement agency throughout the nation, both in large cities and in small communities During the last fiscal year the volume of work received from state and municipal law enforcement agencies increased 73 7 per cent over the previous fiscal year

Services of the FBI laboratory have been expanded phenomenally since its modest beginning in 1932. In the early 1930s it became apparent to John Edgar Hoover, FBI director, that his organization as well as all local law enforcement agencies needed the assistance of a crime detection laboratory This need was given concrete expression on November 24, 1932, by founding of the FBI laboratory

Solve Sheep-Theft.

Indicative of the widespread use being made of the laboratory's facilities is a recent case involving theft of 270 sheep in Big Horn county, Montana

Investigation had disclosed that a suspect was selling a large number of sheep whose wool bore evidence of efforts to obliterate brand markings Specimens of the brand paint remaining on the sheep wool and samples of the brand paint, used by the true owner of the sheep in marking his animals, were forwarded to the laboratory

A spectrographic examination conducted by FBI technicians revealed the presence in all the samples of Prussian blue paint, identical in both color and texture. In addition, it was found by checking with the manufacturer that only one shipment of this particular lot had been made to Montana After being tried and found guilty, the accused was fined and sentenced to serve three years and four months for the theft.

Another case in which findings of the FBI laboratory aided local officers in their investigation involved a mule-riding thief in a southern state who had pilfered a number of articles from a private home. Packing his stolen goods on a mule belonging to the victim's next door neighbor, James Henry Brown nonchalantly rode off. But when the mule later was found abandoned, someone remembered seeing an individual who looked like Brown riding it down the railroad tracks.

Picked up by local officers, Brown was held as a suspect while his trousers, together with a sample of hair from the side of the mule, were submitted to the FBI laboratory. There, the mule gave Brown away Hair, bearing characteristics of the equine family, was found on his trousers and in his trousers cuffs When this hair and the hair from the side of the stolen mule were compared under the microscope, it was determined that the two specimens strongly resembled each other When Brown was faced with this evidence he confessed and later was sentenced to a term in the state penitentiary.

Adopt War Methods.

The knowledge acquired and techniques developed and perfected by FBI laboratory technicians through the war years in defeating espionage, sabotage and related wartime cases are being adapted to postwar crime problems. Kidnaping, bank robbery, hijacking, murder, auto theft, robbery and many other types of crimes handled in prewar years now are being afforded the latest and most comprehensive attention in the laboratory.

Many times findings of the laboratory experts will clear the name of innocent individuals suspected of involvement in a case. A woman in Wilmington, Ohio, when arrested for issuing a worthless check, protested that the store manager to whom she had given the check agreed to hold it. She stated she had written the words, "Hold this till I pay." on the face of the check. Submitted to the FBI laboratory, the questioned check was examined under ultraviolet light and found to contain this message The case against her was dismissed.

Whether it is a request for identification of suspected bloodstains, matching of hairs and bits of fibers, classification of various body fluids, handwriting, paint and soil comparisons, bullet identifications, restoration of obliterated serial numbers or any other type of examination, technicians of the FBI laboratory stand ready to offer reliable, scientific analysis.

NO CLUES OVERLOOKED . . . Science engages in painstaking and exhaustive effort to aid crime detection, as indicated in this photo showing experts at the FBI crime detection laboratory collecting dust and debris from clothing for microscopic study.

Perfect Cure for Insomnia—Eating Crackers in Bed

CHICAGO. — Eating crackers in bed is the "perfect cure" for insomnia That unconventional advice emanates from J P Fanning sleep expert for National Association of Bedding Manufacturers.

Your wife won't like it, Fanning admits in discussing his proposed cure, but you'll be too sleepy to hear her angry words. He also prescribes four or five "good hot cups" of black coffee to wash the crackers down.

Some other methods Fanning has found effective in his years of trying to put the nation to sleep comfortably include:

Watch goldfish swimming about in their bowls for a few minutes before retiring. They'll bore you so thoroughly you'll fall asleep the minute you hit the bed.

Run several miles every night. If that's too much for you, just go around the block at a slow trot.

Eat a head of lettuce to quiet your nerves. Don't try celery as a substitute. It's too noisy.

Drink a quart of beer. Or, if you don't like your malt mixed with alcohol, try munching malted milk tablets.

Sip a cup of hot milk with a lump of butter in it. If that doesn't work, add black pepper.

Put an extra pillow under your feet or stomach

HOUSEHOLD HINTS

Pull your card tables, folding chairs and games out of cupboards or sliding racks built into waste space under the stairs.

—•—

A little wax applied to furniture caster sockets keeps them turning easily in damp weather.

—•—

If you will place citrus fruits to be used in salad in hot water for a few minutes before peeling, the under skin will come off easily.

—•—

Coat the inside of lids on mustard or horseradish jars with a thin layer of paraffin and they'll not turn green.

—•—

Brushing once a day will double the life of a felt hat.

—•—

If your neckline is long and thin, wear high necklines, sometimes softened with ruffles.

—•—

To send coins through mail, cut a square from the corner of an old envelope. Slip coin in square and turn back the opening to hold it in.

—•—

Glue pieces of felt on the bottom of your vases and they will not mar the surfaces of the tables on which they are placed.

—•—

Keep an old tooth brush in your sewing box. The next time you have to rip out seams with a razor blade, use the tooth brush to brush off little threads along seams.

When Your "Innards" are Crying the Blues

WHEN CONSTIPATION makes you feel punk as the dickens, brings on stomach upset, sour taste, gassy discomfort, take Dr. Caldwell's famous medicine to quickly pull the trigger on lazy "innards", and help you feel bright and chipper again.

DR. CALDWELL'S is the wonderful senna laxative contained in good old Syrup Pepsin to make it so easy to take.

MANY DOCTORS use pepsin preparations in prescriptions to make the medicine more palatable and agreeable to take. So be sure your laxative is contained in Syrup Pepsin.

INSIST ON DR. CALDWELL'S—the favorite of millions for 50 years, and feel that wholesome relief from constipation. Even finicky children love it.

CAUTION: Use only as directed.

ON ARMY DAY, APRIL 7TH, ASK YOURSELF:

"WHAT AM I DOING FOR PERMANENT PEACE?"

What will you do for your country? You can take a full-time job at good pay in the Regular Army. Or, you can join other young men in your community in your local National Guard unit. If you are in college, you can get your training and Reserve Officer commission in the R.O.T.C. Or, if you have served in the Army, you can resume your military training and have your former grade or rank in the Organized Reserve Corps.

• If you believe in America, you'll believe in your new Regular Army and its civilian components. You'll feel a certain tingle of pride—to know that others depend so much upon you, and envy you the inspiring fellowship you enjoy.

• In the Regular Army you can have excellent training in valuable skills or trades. All your necessary expenses are cared for. You get travel, adventure. And after 20 years you can retire at half pay for the rest of your life and on up to three-quarters pay after 30 years of service! Get full details about all the advantages of Regular Army enlistment at your U. S. Army Recruiting Station.

KLEMME SCHOOL NEWS

KLEMME HIGH SCHOOL News

—By Elizabeth Goll

The Seniors have chosen their class play at last "Just Ducky" seems to be the final decision. The first cast of characters has been chosen but the first few practices are to decide whether or not this cast is final.

The different work of great poets is our topic in English Literature.

With our last practice set coming up the bookkeeping class has decided to settle down to business. We are now on the chapter entitled, "Partnership."

Now school is back to normal. The boys that made the trip to Iowa City are finally getting over their hangover. But I guess they had a good time and that's what they went for.

Morning schedules have been switched for the convience of the Senior class play practice. With Literature as the third period, I think Mrs. Harvey has found that we are more wide awake by then. Not as far as literature is concerned but as far as noise, am I right?

Areas, perimeters, circumference! ! Oh! yes, that's our Business Arithmetic with square roots coming up.

How about some help from those Freshmen, Sophomore and Junior reporters? Really, I would appreciate it!

Fifth And Sixth Grade News

—Mrs. H. G. Voetberg, Teacher

Friday afternoon there was a basketball game between the 5th and 7th grade and the 6th and 8th grade. The final score was 14 to 11 in favor or the 6th and 8th grade. We invited the kindergarten, first, second, third and fourth grades to watch the game.

Wednesday was Tommy Waddingham's birthday. We all enjoyed treats that he brought.

The following in the fifth grade had a perfect score in spelling:

Dennis Ridder
Roger Terhufen
Janice Swanson

The following had a perfect score in spelling in the sixth grade:

Galen Gruis
Lu Verne Heginger
Billy Waddingham
Eunice Helps
Kay Jacobs
Elaine Neuberger
Beverly Sabek

Seventh and Eighth Grade News

—Clara Smith, Teacher

In Civics we have been studying about the government of our state.

We are finding out about volumes in eighth arithmetic while the seventh grade is thinking about electric and gas meters.

Maxine Barz, Sandra Bridges, and LuVerne Schmidt have been absent part of this week.

Farm Bureau Officers Attended District Meeting At Mason City Last Tuesday

The following Farm Bureau officers from Hancock County were in attendance at the District Farm Bureau meeting which was held at the Hanford Hotel in Mason City last Tuesday, March 25th. Jack Dethmers, Mr and Mrs Harold Oxley, Mr and Mrs. Frank Bredlow, Mrs John Chambers, Mrs Clarence Greiman, Rudy Urich, Fred Korte, and Chas. F. Jackson.

The meeting was conducted by Pat Van Wert, District Committeeman from Hampton. Reports and observations were given by various persons who had the privilege of making the trip over into Illinois on the special train the early part of the month.

Ways and means were discussed on how to conduct a successful membership campaign and much discussion on how to maintain and hold that membership and how to give a better service to its membership of something over 120,000 in the state of Iowa.

Study Group Will Meet

The Study Group of the Klemme Methodist Church will meet next Thursday afternoon, April 10th at the home of Mrs. Geo. Schoenwetter.

AROUND IOWA

ALBINO COLT

Mr and Mrs. Chet Crawford of near Keosauqua are the proud possessors of a new albino mare colt, born last week to their bay mare Thunder. Arrival of the valuable acquisition was complicated by the fact that the mother accidentally stepped on the colt's foreleg, breaking it. The colt was rushed to animal clinic at Ames and is now back home, with a pliable cast, and is expected to recover fully.

HURT IN CRASH

Taking off from the Greenfield airport recently, Merlin Newbury of Fontanelle failed to gain enough flying speed to clear a fence at the end of the field. His Aerona hit the top wires, being thrown across the road, and ran into a road bank. Newbury received a fractured jaw, a broken nose and a broken arm.

GROWING UP

At Dunlap, master Glen McCord, 11, now knows all about kerosene and fires. He tossed some of the fluid into a furnace which apparently contained live coals and learned the hard way. His condition is not serious, although he received first degree burns on his face, chest and arm.

TOTS DROWN

Staying to see a western movie "a second time" cost the lives at Charles City recently of Judy Lee and Bobby Baldwin, 6 and 4. Their mother left them at the theatre and on the way home the children stopped to play on a raft anchored on a stream bank, fell into the water and drowned. The bodies were recovered.

LONG TIME NO MOVE

At Odebolt, Jacob Anderson has somewhat of a record. He lived in Odebolt 70 years, 62 on a farm, and now, at 94, is the City's oldest resident.

COVER GIRL

Ossian folks are justly proud of the fact that the March 8 issue of Collier's carried a picture of Mrs Frank Marron, Jr., of Hollywood. Mrs. Marron is the daughter-in-law of Mr and Mrs. Frank Marron, Sr of Ossian.

WE DON'T BELIEVE THIS

At Panora, A. E. Mills of Guthrie Center was awarded the "champion liar's certificate" at an Isaak Walton party. Mr Mills told how his granddad ran out of shells on a hunting trip, so he loaded one barrel of his shotgun with carpet tacks and the other with his open jack nige. When a rabbit came by, Grandpa fired both barrels, with the first shot he slit open the rabbit's hide with the jack-knife and with the second, he tacked it onto the side of the sugarhouse.

Next to the mirror, the hardest thing on earth for a woman to pass is her thirty-ninth birthday.

MUCH OF CRIBBED CORN IS TOO WET

Must Take Prompt Action If Sizable Loss It To Be Avoided In Iowa

Much of the corn which was cribbed too wet last fall is in danger of spoiling this spring unless something is done with it in the immediate future, say Iowa State College agricultural engineers

While not nearly so serious as last spring, and apparently worst in the northern half of the state, the situation is bad enough to involve the loss of thousands of bushels of corn, the engineers point out.

Movement Hampered

Because limited transportation and storage facilities are hampering movement of any great volume of corn from one section of the state to another, much of the problem will have to be taken care of on the farm

The engineers suggest a number of things which can be done. Corn which is spoiled outside, and cannot be disposed of right away, should be moved into a permanent or temporary crib where adequate ventilation is available Temporary cribbs should have both floor and roof even if only tar paper is available Cribbed corn, high in moisture, should be moved and ventilation installed Plans for building and using crib ventilators are available at the county extension director's office

Ensiling

Another possibility for the livestock feeder is to ensile the high moisture corn. Temporary silos, which are small enough so several inches can be fed off the top each day, may be most economical In filling the silo, the moisture content should be raised to 50 or 60 percent.

Feeding trials with calves show that ear corn silage gives almost as good results as shelled corn The silage also can be fed to fattening hogs but should not ed Wholesale prices for the 100 pounds

FARMERS WARNED OF PRICE TROUBLE

In For Hard Jolt If Prices Keep On Rising, Says Iowa Economist

Iowa farmers are warned this week that price troubles are brewing. Francis Kutish, Iowa State College farm economist, says that while no one knows just when the trouble will break the signs are becoming obvious.

The number one danger signal is the continuing price rise Kutish points out that unless this inflationary pressure is stopped soon, the nation is in for some rough bumps. The rising prices are eating away at the buying power of salary and wage earners This buying power makes up the largest chunk of total consumer demand

Highest Since 1920

According to Kutish, the country did a pretty good job of holding the line against inflation during the war He says wholesale prices rose but 21 percent during the entire 4½ years from Pearl Harbor to June, 1946. But since the first of July, 1946, wholesale prices have skyrocketed Wholesal e prices for the week ending March 8, this year, were up 36 percent from last June This was the highest level since late 1920 and only 11 percent below the May 1920 peak.

Kutish points out that it's not difficult to list the reasons for the sharp price advances Backed-up war savings, pent-up business demands and foreign purchases all added together created a terrific demand Production meanwhile was growing, but was not large enough to satisfy the free market without additional price rises.

Year May Be High

Sharpest wholesale price rise since last June has been in foods. For the week ending March 8th this year, food prices were 50 percent higher than at the end of June

Farmers can expect some drop in farm prices even if there is no serious recession, Kutish believes If a recession does develop during the last half of this year when farm marketings are heavy, economists of the United States Department of Agriculture say farm prices could decline as much as 25 percent below Jan. This would leave cash receipts for the entire year of 1947 about the same as in 1946

The government economists believe that some timely downward adjustment in prices would improve the farm outlook But there is considerable doubt that such a downward adjustment can be brought about

Spray Service Available Free To Orchardists

If you have trouble remembering when and what sprays your fruit trees should have during the spring and summer and don't like to spend your evenings pouring over a spray schedule, you can forget such worries this summer

All you have to do, says Paul Henderson, Hancock County extension director, is to leave your name and address at his office indicating you'd like to be put on the spray service list.

From then on you'll automatically receive a notice by mail every time a spray should be applied Each notice will explain what pest or disease is likely to be doing damage at that particular time, what spray to use and how it should be applied

Henderson says the service is free The notices are prepared by horticulturists, entomologists and plant pathologists at Iowa State College who are constantly checking throughout the state for prospective damage from the various insects and diseases.

This insures that those receiving the orchard spray service will automatically be kept in touch with the existing situation and will be informed should some outbreak of a new pest or disease occur.

Henderson's office is located at the Farm Bureau office in Garner. Anyone with fruit trees, whether living in town or country, may obtain the service upon request. But all requests should be made as soon as possable

Co-ops And Taxes To Be Discussed In April

Local township organization and other discussion groups are being urged to talk over the question "Do cooperatives pay their fair share of taxes?" during their April meetings, according to W. H. Stacy, Iowa State College sociologist.

Stacy says the April Program Service, which is made available to all rural leaders in the state, contains an outline of suggested discussion statements on the question of cooperatives taxes.

Farmer cooperatives in the state have been increasing during recent years, and there has been criticism that they are being given a competitive advantage because of certain tax exemptions

Local leaders and program chairman who do not receive the Program Service will be put on the mailing list if they send their request to the Agricultural Extension Service, Iowa State College, in Ames

Phillis Kirkwood Injured In Fall From Car

Monday morning Phllis Kirkwood was riding to school with Mr and Mrs. Henry Jost, when the car door came open and Phyllis fell out, bruising her legs and getting badly scratched on the gravel.

Entertained Basket Ball Team

Dr. and Mrs. A. H. Dulmes entertained the first six boys of the Shamrock team and Coach Patterson at dinner Friday evening. After enjoying a big meal the evening was spent informally. All the boys say they had a grand time.

LIKE MY DAD SAYS...

"Cool milk and cream quickly for top quality"

IF THERE'S one thing Dad is cranky about it's getting the milk and cream in the cooling tank in a hurry. He won't stand for letting the milk stand around in the barn where it stays warm and picks up barn odors.

No, sir! We've spent the last week getting the cooling tank in shape. We separate the milk in a hurry and the cream goes into the tank where there's cold running water. It stays sweet that way . . . quality cream and quality butter.

STEP LADDERS

THAT ARE HANDY AROUND THE HOME AND FARM

We have just received a nice shipment of Step Ladders. You will always find a handy use for a step ladder, so why not get a couple today?

FOR THE KITCHEN:

We have a small step ladder especially made for use around the kitchen for reaching high shelves in the cupboard and can be used for a stool. Gaily painted in white with red or blue steps. Strongly re-inforced.

FOR GENERAL USE:

We have re-inforced Step Ladders in 5 and 6 foot. Just the thing for general use around the house and on the farm.

DO YOU NEED POSTS?

We have CEDAR posts in stock, all sizes. We have a carload of Creosoted Posts in transit due to arrive soon. Better leave your order today.

ROOF NEED FIXING?

We can now supply you with good Asphalt Shingles and Roll Roofing.

CEMENT WILL BE SCARCE AGAIN!

Right now we have CEMENT in stock so you better come in and haul out what cement you will be needing this summer. Cement is going to be hard to get during the next 30 to 60 days, so we advise you to get it NOW for the job you expect to do later!

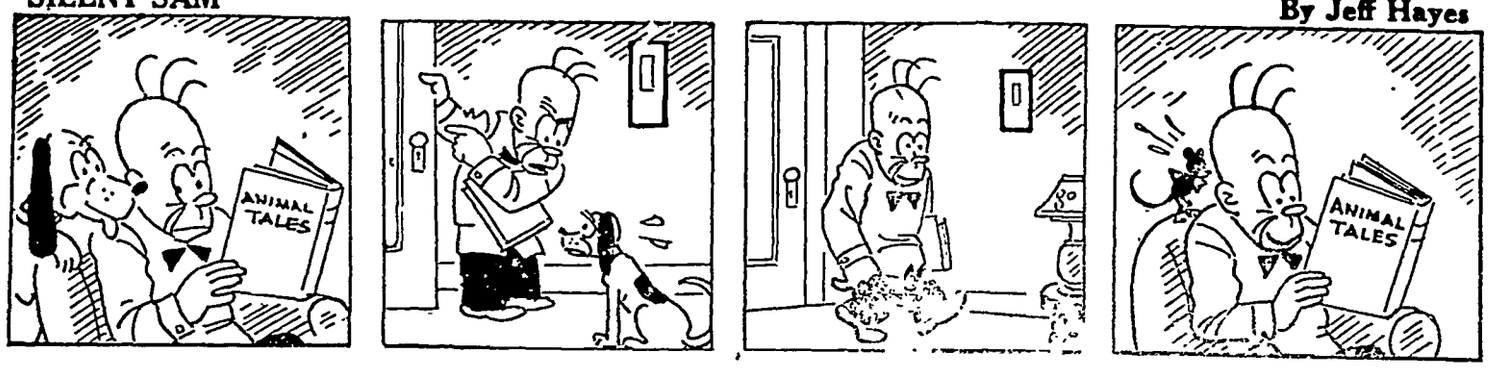
SILENT SAM

By Jeff Hayes



What a Chance!

The discharged sergeant walked into the barber shop, draped himself into the barber chair and without a second glance said to the barber:

"Shave and a haircut."

The barber picked up the brush and started to lather the face. He stopped in the middle of the operation, a smile of enormous proportions spreading over his face as he reached for the razor:

"Well," he said heartily, "If it isn't my old sergeant!"

Reminder

Man (describing his experience in an earthquake): The earth shook; cups and saucers flew all over the place!

One of his hearers: Great Scott! That reminds me! I forgot to mail my wife's letter!

FLATTENED OUT

"So you've just got back from your holiday. Feel any change?"

"Not a penny".

On the Side

An author bought a farm in upper New York State because he thought it would be a good place to write. When an inquiring neighbor asked, between spurts of tobacco juice, what crops the stranger intended to raise, the author was momentarily stumped. Then he happened to recall what his wife had said about the city being no place to bring up children.

"I'm going to raise children," he said brightly.

The farmer spat meditatively. "Around here," he said, "we look on that as a sideline."

A School of Fish

Walking down the street with a friend one day a professor passed a large fish store where a fine catch of codfish, with mouths open and eyes staring, were arranged in a row. The professor stopped, looked at them, and, clutching his friend by the arm, exclaimed: "Heavens, that reminds me . . . I should be teaching a class."

Milestone

Two soldiers lost their way. Said one: "We must be in a cemetery. Here's a gravestone."

The other lit a match and replied, "Yeah, he lived to the ripe old age of 108."

"What's his name?"

"Some guy named Miles from Fresno."

Even Trade

A young Negro woman was accusing another young woman of her race of stealing her cage and canary. The accused vehemenantly denied the accusation, but the evidence was quite clear, and she was adjudged guilty.

"Now, tell me, honestly," insisted the Judge, "why did you steal that girl's cage and canary?"

"Well, Your Honor," explained the prisoner, "it was this way. That girl stole my husband, and I thought it would be a fair exchange to take her cage and canary."

Perfect Remedy

He: "I wish I had sore eyes."

She: "Why?"

He: "You'd sure be a sight for them."

A Tough Choice

Dorothy—"Mamma, if I get married when I grow up, will I have a husband like Daddy?"

Mother—"Yes, dear."

Dorothy—"And if I don't get married, will I be an old maid, like Aunt Agatha?"

Mother—"That's right, dear."

Dorothy—"Gee, Mamma, it sure is a hard world for us women, isn't it?"

It Had One Benefit

Sandy got a position in downtown New York and immediately moved from his apartment on 11th street to a rooming house on 242nd street.

"Why did you do that?" asked a friend. "It's a bad location, you have no friends there, the house isn't comfortable and the food isn't good."

"I know all that," said Sandy. "But man, just think of the ride I get for a nickel!"

New Model in Demand

Little Alice, on being told that Auntie Mary had a new little baby, said:

"Why, what's the matter with the old one?"

Should Be Elected

Voter—"I suppose it is your great ambition to leave deathless footprints on the sands of time."

Candidate—"Well, no, not exactly—all I want now is to cover my tracks until after the election."

Walter Winchell

(WNU Service)

The New York Express:

New York Novelette: She used to walk with a preoccupied air through the downtown East Side streets in Manhattan. . . Not disdainfully or proudly, but with the fierce determination of the very young. . . She knew these streets and the people, and she hungered to know more. . . After studying dancing many years she became expert at the art, and when a big B'way show was being organized she applied for the job of putting on the routines . . The producers took her on, and the notices singled out "the wonderful dance" which highlights the hit's theme. . The hit is the musical version of Elmer Rice's "Street Scene". . . The dance? The trilling number of two street kids The choreographer? Little Anna Sokolow, who had all the critics asking: "How could she have so truly captured the flavor of squalid city streets?" . "It's simple," says Anna, "when you've been part of them"

Manhattan Murals: The Broadway dance hall which advertises, "Most Exclusive Place in Town—Everbody Welcome" . . . Francois, a waiter at the Soho cafe, who comes to work in immaculate attire plus spats, diamond stickpin, cane, boutonniere. . . The window-long sign on the canopy of a shuttered, boarded-up fruit market at 46th and 6th. It reads: "Never closed!". . . The bootblack on 49th street who keeps a copy of Variety available for struggling actors who can afford a shine but not the two-bit show-bible.

Lament of a Broadway Press Agent (By Art Franklin): How tense he scans the papers nights and days An adult mind he "presstitutes" for pelf How often does he swear to coin a phrase. . That's good enough to credit to himself Investing ebbing ingenuity To build some small-time crooner, club or band. . . How pitiful the sum gratuity. . . That keeps some inept act from being panned .He camouflages talent "mediocre" . With touches of a genius at his game. . . And if he strains enough—some third-rate "joke"—will cash his clippings in for movie fame . The simple fact is this—for he alone Can lick his client's "flops"—except his own!

Talk about tough breaks: The cinema, "Nora Prentiss," was filmed before the OTDR rage afflicted the nation. One character in the movie is named Richard. During one episode another begs him to open a door. . . It's supposed to be serious sequence—but you can't blame the audience for howling.

Bigtown Smalltalk: Paul Mantz broke the coast-to-coast record with his plane, "Blaze of Noon," a stunt to put the film (same name) on the front pages But "Betty-Jo" got the headlines Ladies first, y'know . . Broadway show gels sizzling (nice weather for it, ladies) at the story quoting director John Murray Anderson as grousing "I'd rather work with elephants than show girls" . . . The very old song, "Last Night on the Back Porch" (a Johnny Long platter) has been banned on all networks because of its naughty wordage . . Danny Kaye (who got close to three million in four years of film making) took four weeks of personal apps to raise tax coin. . At least 10 of the nation's youthful political white hopes happened to match notes the other day They found that Mayor O'Dwyer had told each "confidentially" that he was grooming him to be his successor. Such a letdown.

B'way Confucius: Real Love Do Not Have Happy Ending. It Do Not Have Any Ending.

The Intelligentsia: John Steinbeck's new novel, "The Wayward Bus," was dictated onto records, which a typist then transcribed. Nice best-selling work, if you can get it. John Hersey, father of "Bell for Adano" and "Hiroshima," is incommunicado in Florida, working on a new best-seller. . . Some of Edna Ferber's most glittering literary nuggets have been put between covers in "One Basket". . . Mary Martin, the star, gives "bath parties" nearly every night for London friends (there) who have no tub or water . "The Yearling," after a five-week stand, will be pulled out of Radio City Music hall. "Too sad." Hit films at that theater usually run twice as long.

Sallies in Our Alley: Did Horace Stoneham (boss of the Giants) tell midtowners Babe Ruth would be offered a big job in baseball? . . . Herbert Hoover says a billion dollars is needed to feed the Germans, who have "sunk to the lowest level known in 100 years of western history" Overlooking, of course, the level maintained by the Germans in their concentration camps and crematories. . . Wanna know why swank spot waiters are so uppity? A survey revealed that they average $85 40 weekly in tips.

MINUTE FICTION

Young Diplomat

By D. J. Leonard

WNU Features.

"AW GEE, ma! I don't want to do the dishes. I'm goin' fishin' with Sam. He's waitin'—"

"Now get right ahead—they're stacked in the pan." Mrs. Morton's busy fingers were stemming strawberries into a preserving kettle.

Frankie stood on one foot and rubbed the other against the calf of his leg. He twisted his freckled face into a woebegone pout and gazed out the doorway. On the doorstep a spotted terrier sat guarding a birch limb fishing pole and a can of worms.

Mrs. Morton, smiling tenderly, glanced sideways at him. "Now son—remember dad and I are giving you a bicycle for your birthday, so cheer up. Better wash your hands too, before starting."

At mention of the bicycle Frankie sprang into action, washed his hands and tackled the dishes. Only once in a long while, he had to admit, was he required to do anything outside of running a message or cutting the grass.

Only a few plates remained to be wiped when a shadow fell across the doorway. He didn't notice the golden-haired child until she took her finger out of her mouth and said. "H'lo, Frankie!"

"H'lo, Eunice." It was an all-time low in enthusiasm.

The child, finger in mouth, advanced and stood beside Frankie. Her head just reached his shoulder. Frankie's dish-drying activity had slowed down almost to the vanishing point. Mighty embarrassing,

His mother called him back to do the dishes. "Aw, gee, Ma! I'm going fishing with Sam."

he thought, for a fellow to be caught doing this kind of work.

"Whatcha doin', Frankie?" inquired Eunice, not disdaining the obvious for the sake of starting the conversational ball rolling. "Want t'know somethin'?" countered Frankie, brusquely.

The curly golden head nodded assent. "Well, I'm gonna be a juggler in a circus when I grow up." "Are ya, Frankie?" Eunice's big blue eyes shone with admiration. "Sure I am. Didja ever see a juggler?" "Oh, yes—he throws up balls and plates and—"

Eunice clapped her hands, jumped up and down yelling. "Let me see you do it—let me see you do it."

Frankie glanced quickly around. His mother was still in the pantry. He looked at Eunice. The admiration shining out of her blue eyes warned him he could not disappoint a lady.

He took the last plate and applied the dish towel thoroughly. Finally the plate gleamed and glistened and he could pretend no longer that any damp spot remained.

Suddenly he took the bull by the horns and tossed the plate upwards. Eunice shrieked as the plate whirled in her direction. Mrs. Morton bobbed her head out of the pantry just in time to see Frankie fall forward and clutch the plate before it hit the floor.

"My stars, Frankie — what on earth are you doing?" said Mrs. Morton.

Frankie got to his feet, brandishing the plate to show it wasn't broken.

"Gee, ma — I was just showin' Eunice how I can juggle and I slipped. But it's all right — I'm through showin' her now."

"Well, I should hope so," sighed Mrs. Morton as she packed the dishes in the kitchen cupboard, safe from further experiment.

"Oh Frankie — I just remembered something," declared Eunice. "Mama made some ice cream for lunch and there's a lot left. She told me to ask if you'd come over and eat it."

"Will I?" shouted the recent exponent of the art of juggling. "Why, I'll even help your mother dry the dishes."

"Dishes, Frankie?" teased his mother.

Frankie thought fast. That mention of ice cream had made him talk too much. "Certainly, ma," he laughed and commenced to make juggling motions with his hands, "I just love doin' dishes — now that I'm practisin' to be a juggler. I can hardly wait to get my hands on those plates—"

"Get out of here — you, you potential diplomat!" commanded Mrs. Morton. And couldn't help smiling, proudly, as she watched him racing across the back lawn headed for ice cream.

Improved Uniform International SUNDAY SCHOOL

LESSON

By HAROLD L. LUNDQUIST, D.D. Of The Moody Bible Institute of Chicago. Released by Western Newspaper Union

Lesson for April 6

Lesson subjects and Scripture texts selected and copyrighted by International Council of Religious Education, used by permission.

THE RISEN LORD AND HIS DISCIPLES

LESSON TEXT—John 20:19-23, 26-29; 21:15-17.

MEMORY SELECTION—But now is Christ risen from the dead, and become the first fruits of them that slept.—I Corinthians 15:20.

Ever new and blessed in its touch upon our souls is the message of Easter. To be assured once more that the grave could not hold our blessed Lord and Saviour, and that he arose in victory over sin and death, is our delightful portion in today's lesson.

It is a very appropriate conclusion to our three month study of the Gospel of John and comes in the new quarter because of Easter Sunday.

Three helpful incidents make up our lesson.

I. A Risen Lord and Glad Disciples (20:19-23).

The appearance of our Lord to his disciples after he arose from the grave emphasizes the close relationship between the resurrection and the life and ministry of his followers.

Those who live for and serve the risen Christ have a triumphant faith, an inward peace, and an outward authority and power. Their convictions are based on the Lord's own words which came to assure the disciples as they secretly assembled for fear of the Jews.

He stood in their midst and spoke the words of peace (vv. 19-21) and authority (vv. 22, 23).

Peace of soul is absolutely essential to useful and satisfied living. Only as we are "steadfast, immovable," can we be "abounding in the work of the Lord" (I Cor. 15:58). Steady at the center, active at the circumference.

Commissioned and sent by the Son of God, clothed with Holy Spirit power, the Church of God has his authority. While some have read too much into verse 23, others have read out of it the real authority that God has given.

Little wonder that we read (v. 20) "Then were the disciples glad when they saw the Lord." They had reason for real joy!

II. A Convinced Doubter and Glad Testimony (20:26-29).

Thomas made the serious error of being absent from the gathering of the disciples when the Lord Jesus stood in their midst. Let those who commonly absent themselves from the place and hour of worship take heed lest they miss a blessing, and coming later add nothing to the spiritual life of the church, but rather become troublers and doubters.

But God graciously turns the doubt of Thomas into a means of blessing to all of us who since then have read of his experience. Thomas was an honest doubter. God is always ready to meet such with satisfactory proof. The trouble is that there are so many in the world who use professed doubts to cover a life of sin.

Doubt may come to any man. In itself it is no sin. But to cherish it and hold to it in unbelief—that is a different matter. One wise spiritual leader rightly counseled his people, "Believe your beliefs and doubt your doubts. Never make the mistake of doubting your beliefs or believing your doubts."

When doubting Thomas saw the Lord, his questions changed at once to strong convictions and assured personal testimony to his blessed Lord.

III. A Restored Disciple and Glad Service (21:15-17).

After meeting Jesus on the first Easter morning, Peter had been assured of forgiveness for his denial of the Lord and had been taken back into fellowship and service with him.

But then something seemed to have gone astray, for we find that Peter and the others had returned to their old life as fishermen. They seem to have lost their vision, or had become discouraged.

But the Lord had not forgotten them. He appeared and told them where to catch fish, and then we have the lovely scene around the fire as they breakfasted together.

There it was that the Lord met Peter, and as he had denied Christ thrice he is asked to thrice declare his devotion to him.

The man who thus declared his readiness to serve Christ to the end had many an opportunity to prove the sincerity of that profession. He met persecution and imprisonment but to every effort of man to close his mouth or to change his witness he had the simple reply of absolute obedience to the Lord.

Tradition tells us that this faithfulness finally led Peter to a martyr's death. So we see a life made over, made powerful, made glorious for God through the matchless grace of our Lord Jesus Christ. He can do it for you, too. Will you let him?

There could be no better time to meet the risen Lord face to face than on this day when we remember his resurrection. Let him come into your heart, dissolve your doubts, forgive your sins—and make you glad!

NEEDLEWORK PATTERNS

Pretty Apron Is Easy to Make Crocheted Doily for Centerpiece

Hostess Apron

THIS handsome hostess apron is delightfully simple to make—it's cut in one piece, with a huge lavender and purple pansy forming a handy pocket. You'll want to make several as gifts for special friends.

* * *

To obtain complete cutting pattern, pansy applique pattern, finishing instructions for the Pansy-Pocket Apron (Pattern No. 5387) sizes 14, 16, 18 included send 20 cents in coin, your name, address and pattern number.

Cross and Crown Crochet

CROCHETED in either white or ecru, this exquisite doily can be used as a dining table centerpiece or on an occasional table. It measures 22 inches—is called the "Cross and Crown" because of the tiny crosses in the center diamond shaped sections and the half crowns which form the border edge.

* * *

To obtain complete crocheting instructions for the Cross and Crown Doily (Pattern No. 5221) send 20 cents in coin, your name, address and pattern number.

ASK ME ANOTHER?

A General Quiz

The Questions

1. What is the shortest air mail route in the United States?
2. What is the difference between mendacity and mendicity?
3. What does the letter C before a date mean?
4. What are the smallest postage stamps in the world?
5. How long have the Carlsbad caverns been in existence?
6. What is a sea drum?
7. How old must one be to be eligible for the presidency of the U. S.?
8. How many Rhodes scholarships were awarded to outstanding U. S. students last year?
9. What is a lemur?
10. What country ranks next to India in the export of tea to the world?

The Answers

1. Route No. 2001, between Camden and Philadelphia, a distance of only 6 miles.
2. Mendacity means lying, deceiving; mendicity means the practice of begging.
3. Circa (about).
4. Those issued in 1863 by Bolivar, now part of Colombia. They are one-fifth of a square inch in size.
5. An estimated 60 million years.
6. A fish which makes a drumming noise.
7. Thirty-five years or older.
8. Forty-eight, the highest in history; 32 was the previous high.
9. The lemur is a monkey about the size of a house cat. It has a long, sharp nose like a fox and howls like a dog.
10. Ceylon.

Walks of Holy City of Iran Paved With Tombstones

Meshed is the holy city of Iran where all objects with any sacred significance are revered by the inhabitants and the 100,000 Moslem pilgrims who visit it annually. Yet for a generation, its sidewalks have been paved with old tombstones—from a reconverted cemetery—placed with their inscriptions upward.

END LAXATIVE HABIT THIS EASY WAY!

Millions Now Take Healthful Fresh Fruit Drink—Find Harsh Laxatives Unnecessary

It's lemon and water. Yes—just the juice of 1 Sunkist Lemon in a glass of water—first thing on arising.

Taken first thing in the morning, this wholesome drink stimulates bowel action in a *natural* way—assures most people of prompt, *normal* elimination.

Why not change to this *healthful* habit? Lemon and water is *good* for you. Lemons are among the richest sources of vitamin C, which combats fatigue, helps you resist colds and infections. They also supply B_1 and P. They alkalinize, aid appetite and digestion. Lemon and water has a fresh tang, too—clears the mouth, wakes you up!

Try this grand wake-up drink 10 mornings. See if it doesn't help you! Use California Sunkist Lemons.

Miss Ruth Bell, who has been telephone operator here for some time, resigned her position to work at the Montgomery Ward store in Mason City. Miss Nellie Sherwood, who has been a telephone operator at Mason City for nearly a year, is now employed at the Klemme exchange

Hancock County Soil Conservation District Meeting

The Hancock Soil Conservation district commissioners held their meeting at the Farm Bureau office on March 26th A program for information meetings with farmers having requests on file was discussed All farmers now having requests on file will be cantacted through a meeting with their group by Vernon Moss, the county S. C S technician and one commissioner The county was divided for attending these meetings by the commissioners, S A. Barber, attending meetings in the south half, Ben Riemer, the northeast quarter, and Wm J Rasmusson, the northwest quarter of the county The purpose of these meetings is to outline to farmers the long-time objective of soil and water conservation by complete farm plan

The commissioners agreed that future requests for assistance would be received only after farmers attended a group information meeting. Such meetings can be arranged for by interested parties contacting the local S C S office or the district commissioners.

In the ninth grade English class the teacher was discussing etiquette When she finished, she asked Bobby how would he ask a girl to dance Bobbie replied "Come on, worm, let's wiggle!"

Washing Udders Of Dairy Cows Is Profitable

Washing the udders and teats of dairy cows with a hot towel before milking is good business whether you hand or machine milk, says Paul Henderson, the county extension director. Such washing stimulates the milk flow and means less dirt in the milk

The latter is particularly important thses days. Henderson points out. Creameries must now undergo rigid United States Government inspection in order to ship their products out of the state Consequently, many of Iowa creameries and milk plants are sending sediment pads back to producers to show them the condition of their milk and cream

Often the producers wonders how the amount of dirt shown on his pad could possibly get into the milk or cream can

Henderson says in many cases the farmer relies too much on the strainer pad to give him clean milk which can only come from careful handling He says dairy specialists at Iowa State College remind dairymen that the strainer pad was never meant as a substitute for careful handling of milk The strainer pads job is to insure removal of any accidental dust or straw falling into the milk while it's being handled in the barn

The specialists say a good way to check the amount of sediment in your milk is to remove the strainer pad from the strainer carefully after it has been used and put it on a board where it will dry quickly Near the kitchen stove is a good place After it dries, look at the material on the pad You can thus determine for yourself whether the sediment is due to carelessness at milking time or whether it is unavoidable to have such material on the strainer pad

BROTHER OF MRS. ED JACOBS DIED AT ROCHESTER HOSPITAL

Funeral Services Held Sunday From Clear Lake Church

Funeral services for Lloyd Wistey, 42, who died at a Rochester, Minn., hospital Thursday evening following a long illness, contacted while serving in the Navy in the Pacific, were held at the Zion Lutheran Church Sunday afternoon at 3 00 o'clock The Rev Ruben Mostrom, pastor, conducted the rites with burial in the Clear Lake cemetery The American Legion Post of Clear Lake rendered military honors

Mr Wistey is well known in the Klemme community and is a brother of Mrs. Ed F Jacobs.

Klemme Folks On Radio Program

Klemme people who were listening to the Tom Brenneman program from Hollywood last Tuesday morning heard our townsman, Emil Patet on the air Mrs. Patet tried to break in on the conversation but Tom spoke up. "You be quiet, I'm talking to Pop!" Of course Emil put in a good "plug" for Iowa and Klemme

During the 16th century, Poland extended from the Baltic to the Black sea.

Perkins' Hens Lay 100% Says Fred Bell, Poultry Dealer

This might smack of free publicity but it's a good story Fred Bell, local poultry and egg buyer told a Times reporter that Louis Perkins, North Iowa's greatest gladiolus raiser, had 12 hens that did not lay a single egg. Fred bargained with Perkins to try out the feed Bell was selling with the result that the hens began to lay . and how!

After being on Fred's feed the hens started to lay and last week they hit 100 per cent . . . every hen laid an egg!

The writer has a sneaking hunch that there is a "nigger in the wood pile" and there is "fowl" play afoot. Maybe Louie is out for another trophy, this time for egg production. He has already a house-ful of trophies he has won showing his gladiolus.

Good Luck, Kids!

To our son, Ray Jorgenson, Jr. and our daughter-in-law, Juanita, Mother and Dad extend to you our best wishes on the opening of your fine new store in Klemme and we hope that both of you will find happiness and success in a wonderful town and a community full of the best people on earth, as we have done.

HANCOCK AGAIN OVER THE TOP

As of April 1st, 1450 members paid in the office, the highest on record, with still more coming in

High township to date in Concord, with 163 paid Ten townships have reached or exceeded their quota.

I personally want to thank all the good workers that had a part in this grand achievement; without you fellows it never could have been accomplished Now the secret, hold your hats!

The Victory Party will be held April 25th in Britt with plenty of entertainment for all and our good Friend T C Peterson from Wisconsin will be there as the guest speaker.

Hold all dates open for that night This is your party Again I say thanks for a swell job.

Chas F Jackson, Organization Director

Court Whist Party

Mr and Mrs Wesley Patterson entertained a group of young people at a Court Whist party at their home Friday evening A nice lunch was served after the games.

High scores were won by Mrs. Ray Jorgenson, Jr., and Raymond Wille; while low scores were awarded Mrs. Raymond Wille and Eugene Kluckhohn.

ETHEL TAYLOR BECOMES BRIDE OF ALBERT SCHMIDT

Ethel Taylor of Charleston, Mo., became the bride of Calvin Schmidt, son of Mr and Mrs Albert Schmidt, on Sunday, March 30th at 4:30 p. m. in the Baptist Church in St. Louis, Mo The Rev. Oscar Johnson officiated at the double ring ceremony

The couple was attended by close friends.

The bride was attired in a gray suit and wore a gardenia corsage. The bridegroom wore a brown suit with a white rose boutonniere.

The bridegroom is serving, at the present time, in the Air Corps at Scott Field, Ill. They will live at 5112 Maple Street, St. Louis, 13, Mo.

Please send or phone your news to The Times before Wednesday if possible. Thank you.

155 IOWA DEER HERDS

Conservation officers, in a survey of deer populations in Iowa taken in February and March, report 155 herds with an average of 11 animals per herd Tabulations of the survey data reveal that 58 counties have one or more herds present, and in 22 counties scattered individuals were reported. In eight counties only occasional sight records were reported, and in 11 counties no deer were reported during the two-month survey.

The largest herd found was at Ledges Park, containing more than 100 individuals. Other large herds were 80 southwest of Avoca in Pottawattamie County, 80 southeast of Fort Dodge in Webster County, 60 in the Josh Higgins Parkway vicinity in Black Hawk County and 42 east of Avoca in Pottawattamie County For the most part deer herds were located in the rough river bottoms In some instances herds, as well as individual animals, moved up and down the valleys considerably during the check Officers report that there is considerable possibility of some of the herds overlapping, but they are also of the opinion that scattered individual animals exist that were not located during the census period.

CATFISH SEASONS OPENS APRIL 15TH

The channel catfish season opens April 15th and continues through November 30. Prior to 1943 the catfish season was closed during the month of June. There is no closed season on catfish during that month this year

There is a continuous open season on bullheads with a daily catch limit of 25 and possession limit of 50. The daily catch limit on channel catfish is 15, possession limit 30, and minimum length 12 inches

The trout season opens at 5:00 a m, May 1, and is open until 9 00 p m, September 30. Trout may be fished from one hour before sunrise to 9 00 p. m Daily catch limit is eight, possession limit 16, and minmum length 7 inches.

HANCOCK D. H. I. A. MARCH REPORT

John Ward, Supervisor of the Hancock Dairy Herd Improvement Association, reports that he has 26 herds on test with 339 cows in milk and 60 dry cows The total of 399 cows averaged 789 lbs and 28 6 lbs. of butterfat New members are Estell Tannahill, Forest Ctiy; Bill Lemke, Garner, Martin Kroeze, of Britt, Ruoss Bros., Forest Ctiy Willie Earles, Britt.

The following 305 day records were reported. A registered Gurnsey owned by C. J Wille of Klemme, produced 7,011 lbs. of milk and 393 8 lbs of butterfat. Three registered Holstein cows owned by Hulin Bros. of Britt, with the following records: 11,493 lbs of milk and 381.7 lbs. of butterfat; 13727 lbs. of milk and 479.2 lbs. of butterfat and 12, 291 lbs. of milk and 438.6 lbs. of butterfat A registered Holstein owned by Jack Dethmers of Garner, produced 11332 lbs. of milk and 393 7 lbs. of butterfat. A grade Holstein, owned by Mitchell Bock of Klemme, produced 10,046 lbs. of milk and 375.8 lbs of butterfat. A registered Jersey owned by Carl Ruger of Britt, produced 9,108 lbs. of milk and 465.7 lbs. of butterfat. A grade Guernsey owned by Jack Ostercamp of Britt, produced 6,176 lbs. of milk and 326 lbs of butterfat. A registered Holstein owned by V. A. Cook of Klemme, produced 13696 lbs. of milk and 462.8 lbs. of butterfat.

HI, FELLOWS!

Another Legion Stag party at the hall on Tuesday evening, April 15th at 8:00 o'clock. We'll be lookin' for you!

Cheer Up Folks!

(By Mrs. Roy Schaefer)

April 21, 1927:

There was 2 inches of snowfall during the night but disappeared the following day. This was also the Easter season that year, poor bunny.

April 6, 1928:

It started out with a rain and ended with a blizzard blocking east and west highways with banks several feet high.

The supervisors had got hold of a bum almanac as guide and had removed the snow fences along the highways To date they haven't used the same almanac, therefore the fences are taken down later.

April 13, 1928:

A Friday at that. The sun had been trying its hardest to get rid of the snow of a week ago but a drizzling rain set in again today which developed into a hard rain just before noon and after several hours of this kind it turned to snow, and with a 40 mile an hour wind swirled about in a beautiful sight but terrible to be out in.

Traffic was practically at a standstill Saturday forenoon.

There was a minus quanity of Saturday afternoon and evening shoppers in town:

The snow was general over the middlewest, Storm Lake reported 12 inches, heaviest of the season. But spring came as usual only a little late:

Our neighbor had put in 40 acres of oats and had to reseed.

We had perfect spring weather before all this and it came as a sudden surprise.:

Roy keeps records of these things by clippings from papers

SPRING FIELD WORK DELAYED

Cold and Wet Weather Puts Farmers Behind

Spring field work in Hancock county has been delayed at least 10 days by the wet, foggy weather of the past week and no field work of any kind has been done At least a week of favorable weather will be needed before spring seeding can get under way

Farmers are planning about the usual acres of small grain Bad weather has reduced the spring pig crop and many losses have been reported the past week.

Hatcheries report about the usual demand for spring chickens. Many farmers are disappointed in the curtailment of Triple A appropriations. Farm yards are a quagmire and hignways are becoming impassable

Scrap Price Rise Makes Selling Now Highly Profitable

The jump in the price of scrap steel from $19 75 to $33.75 a ton wholesale, during the past year, should give Hancock County farmers an added incentive to clean up and sell their scrap piles, says Paul Henderson, county extension director

Henderson points out that farmers may never again have an opportunity to turn their waste steel into so many dollars. And by getting it in the hands of industry, now hard pressed for steel, farmers will speed up the process of getting badly needed, new farm machinery

There are other reasons, too, for getting rid of scrap piles this spring, Henderson says. It's the first step in getting rid of rats, which are estimated to cost the farmer $2.00 apiece in terms of feed consumed. It improves the appearance of the farmstead. And a general cleanup is essential to getting rid of flies on the farm.

Work Circle Meets April 17

The Work Circle of the Methodist Church will meet Thursday afternoon, April 17th with Mrs. E. G. Beier, leader of devotions. Mrs. J. A. Chambers and Mrs. R. A. Jorgenson will serve

College Specialist Predicts Farm Prices To Lower

DIXIE LOU JOHNSON BECOMES BRIDE OF LEO BLUMER MARCH 8

Trinity Lutheran church in Ellsworth, was the setting on March 8, for the candlelight wedding of Miss Dixie Lou Johnson, daughter of Mr and Mrs. Willard Johnson of Ellsworth, and Leo Blumer, son of Mr and Mrs. Walter Blumer of Klemme The Rev. C J. Naglestad, performed the double ring ceremony at 8 o'clock in the presence of about 135 relatives and friends

A candlelight service was performed Potted plants and large baskets of white snapdragons and pink carnations were used, and a white carpet was placed on the center isle

Miss Martha Anderson, organist, played nuptial music as the guests assembled and also played softly during the ceremony

The ushers, Duane Hansen, Jewell, cousin of the bride and Glenn Wille, Klemme, lighted the candles and Miss Patricia Mae Olsen sang "I Love You Truly" and "The Lord's Prayer." Miss Anderson played "The Bridal Chorus" from Lohengrin and Mendelssohn's Wedding March.

The bride was given in marriage by her father She wore a gown of white rayon chiffon, over sharkskin, with a short train and with a fitted bodice of embroidered organdy and sweetheart neckline with long pointed sleeves. Her only ornament was an antique Norwegian gold cross She carried a white Bible overlaid with deep pink cameleas. She also wore the corsage on her traveling dress of green crepe

The maid of honor was the bride's only sister, Miss Bonnie Lee Johnson. She wore a gown of blue net over satin with high neck and fitted bodice of lace.

Miss Irene Hanson, Ellsworth, cousin of the bride, was the bridesmaid and she wore a gown of pink lace and chiffon over satin, with long lace gloves. The flower girl was Sherrill Lynn Newton of Iowa Falls, cousin of the bride, was ring bearer.

The groom wore a navy blue pinstripe suit with white carnation boutonniere The groom's brother, Ivan Blumer, was best man The groomsman was Johns Osnes of Forest City.

The bride's mother wore an aqua dress with black accessories and the bridegroom's mother wore a navy blue dress with black accessories. Both wore corsages of white carnations and red roses.

A reception was held in the church parlors. The tea table was centered with a four-tier bridal cake decorated in pink and white and topped with miniature bride and groom.

The bride attended school in Ellsworth and graduated from the Jewell high school with the class of 1944 and attended Waldorf college in Forest City. She has been employed at Iowa State college at Ames and will continue her work The bridegroom is a graduate of Klemme high school and attended Waldorf until he entered the navy where he served for 20 months. He is now attending Iowa State college, where the couple will be at home after April 1.

W. S. C. S. Ladies Remember Those Who Had Birthdays

At the W. S. C. S. meeting on Thursday the group sang birthday greetings to Joan Jacobs, daughter of Mr. and Mrs. Roy Jacobs and to Daisy Lemke, both having birthdays on that date, April 3rd.

The ladies also extended greetings to Mrs. Wm. Ax, who on that date had been married 45 years.

FARM PRICES MAY BE DUE FOR DROP

If So Better Price Support Means Will Be Needed, Shepherd Says

Farmers and agricultural leaders need to begin now to think about what can be done if present price supports fail, believes Geoffrey Shepherd, Iowa State College farm economist.

Shepherd says we might as well face it—prices of many farm products probably will drop as low as the price support levels before the Steagall supports expire at the end of 1948. He thinks farmers should be prepared to offer substitute means of keeping prices from dropping too far below parity.

Already we are seeing the effects of the shift to peacetime conditions. Eggs stood at only 90 percent of parity on Feb. 15. Corn was only 87 percent of parity and potatoes were only 80 percent, he reveals.

Potato Support Failed

As a warning to anyone who thinks the present system will continue to do the trick, Shepherd points to the recent potato crisis. First the government bought potatoes. Then it made loans at about parity prices. It diverted as many potatoes as possible to the school lunch program, to export and to alcohol production. Yet millions of potatoes froze and rotted after they had been dug and piled on the ground.

All this happened during the biggest boom in United States history If business conditions should ease off or slump, Shepherd warns, trouble will really begin.

Shepherd suggests several alternatives to the present price support system. One would be to follow the plan that will be used in potato production this year. Potato price supports will be limited to those potatoes grown under acreage goals established for each state, county and farm. If there are unusually heavy yields, a market quota system can be set up if farmers marketings the specific crop approve by a 2 to 1 vote, Shepherd says.

More Consumption

Another alternative is to expand consumption rather than limit production. Since almost a quarter of our population fails to get enough of the right kinds of food even in prosperous times, Shepherd says we might have a nation-wide food stamp plan to increase the use of nutritious food by low-income groups. Then, too, the school lunch program might also be expanded, but Shepherd thinks we still fail to maintain prices at Steagall levels.

A third alternative would be to revise parity. This plan has been suggested by officers of the three major farm organizations, but they feel that nothing should be done until after the price support period of the Steagall amendment.

Differential Payment

Still another means of maintaining the farm economy would be direct payment differentials. Under this system we would let prices set their own level in a free market, then make up the difference between 90 percent of parity and the actual price received.

This plan sounds easy, Shepherd says, but there are several difficulties. For one thing, there would be a strong incentive for farmers to inflate their sales bases by selling corn to each other. Then too, this plan would favor the livestock feeder who normally buys grain in the open market at the expense of the grower who feeds his crop.

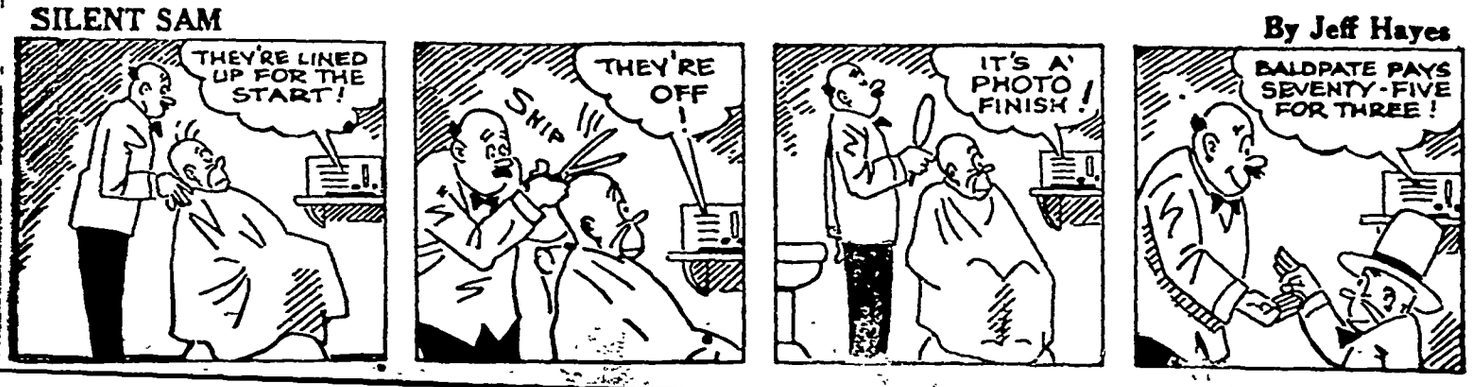
SILENT SAM

By Jeff Hayes



Dog Baiting

"Hello, hello, is this the Society for the Prevention of Cruelty to Animals?" shrilled a spinsterish voice over the phone.

"Yes, what's the trouble?"

"I want you to send someone over right away. There's a horrid magazine salesman sitting in a tree, teasing my dog!"

Unfinished Course

"Where did you learn to sing?"

"I graduated from a correspondence school of music."

"Boy, you must have missed getting a lot of your mail!"

Special Mention

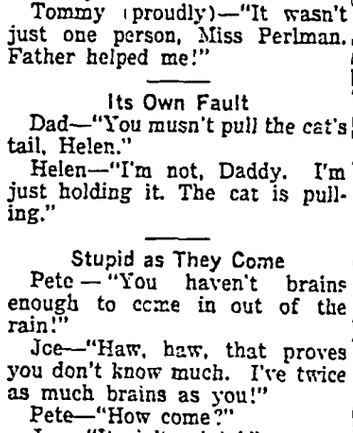
When Raymond, aged six, returned from Sunday school his face was beaming.

"The minister said something awfully nice about me this morning in his prayer."

"What was that, son?" smiled his mother.

He said, "Oh Lord, we thank Thee for our food and Raymond."

COULDN'T HURT HIM



Dugald had just purchased a gallon of cheap liquor and with characteristic canniness took the stuff to be analyzed. The chemist reported the liquor poisonous — not deadly, but bad enough to cause certain blindness On receiving the report Dugald put the bottle under his arm and started out

"You're not going to drink that stuff, are you?" asked the chemist, in some alarm.

"No," replied Dugald. "But I know a blind man I can sell it to."

Assisted

Teacher (looking over Tommy's homework)—"I don't see how it is possible for one person to make so many mistakes!"

Tommy (proudly)—"It wasn't just one person, Miss Perlman. Father helped me!"

Its Own Fault

Dad—"You musn't pull the cat's tail, Helen."

Helen—"I'm not, Daddy. I'm just holding it. The cat is pulling."

Stupid as They Come

Pete — "You haven't brains enough to come in out of the rain!"

Joe—"Haw, haw, that proves you don't know much. I've twice as much brains as you!"

Pete—"How come?"

Joe—"It ain't rainin'."

Not Too Holy

Northerner (to Kentuckian)—"Is it true that the Kentuckians are very bibulous?"

Kentuckian — "No, sah. Ah don't reckon they's moah than a hundred Bibles in the state."

Following Orders

Employer — "I wish you wouldn't whistle at your work."

Office Boy—"That's all right, sir. I wasn't working."

Hard Luck

Lem McGee was sitting on the porch with his wife when a funeral procession came along. Mrs. McGee said, "That's the longest funeral ever seen in this county. Squire Johnston sure had a lot of friends."

Lem answered—"I sure would like to see it, but my chair's facin' the wrong way."

Ticket for Milwaukee

While on a long train journey a little old lady confided to a chance acquaintance that she had lost her ticket. He was much worried about it.

"Where are you going?" asked the acquaintance.

"Milwaukee," was the reply.

"Don't you worry, then. I'll fix you." And left the lady alone for a short time.

Then he returned with a ticket which he smilingly handed to the lady. Sure enough, it was a ticket to Milwaukee.

"How on earth did you get it?" asked the lady.

"Easy. Just walked through the train, shouted 'Any tickets for Milwaukee?' and a feller gave me this one."

Throwing That Dollar

As a young man Abraham Lincoln earned his living for a time by running a ferry across the Ohio river at the mouth of Anderson creek.

One day a garrulous customer related to young Lincoln the story about George Washington throwing a silver dollar across the Rappahannock.

Lincoln had not been making much money, the ferry business was very slow. "Washington could never have thrown a dollar across the Ohio at the mouth of Anderson," remarked Lincoln, "unless he was doing more business than I am, or unless he stole it!"

Czar for the Airwaves

Radio is to have a czar. A sort of Judge Landis with time signals. And maybe cash prizes.

—•—

Broadcasters, advertisers and industry have formed a *joint committee* to eliminate radio evils. It has been decided to name a head man to clean things up. *His first test will* be to prove he can start functioning without a commercial.

—•—

"Radio today is far from perfect," says one committeeman. This is the understatement of the generation.

—•—

Any and every industry has some faults But *radio* is the only one that has subsidized and glamorized them The things that annoyed the public in 1925 are still annoying it, but over more networks and with more cash prizes between exasperating moments

—•—

It seems to have been the idea of the sponsor and the advertising agent that a commercial isn't adequate unless it makes the ultimate consumer writhe.

—•—

Study the commercial of 1925 and of 1947 and you will come to the conclusion that it has merely grown longer And worst of all, developed a particularly annoying technique through which the fellow spouting the commercial leaps into the act before the entertainer has fully finished

—•—

The radio man crashes in to praise a washing powder so swiftly he telescopes the news broadcaster. The soloist doesn't finish her final note before the guy with the tooth paste spiel whams in from a running start.

—•—

How about some listeners on that board including some top showmen, a couple of family people and the guy who just split his radio into pieces with a hatchet?

• • •

Your America and Mine

Squddyhunk Creek — The Boz Wintergreens have separated Mrs. Wintergreen was chosen queen on the Queen for a Day radio program recently and never got back to earth, says Boz

—•—

"Dopey" Clinghammer, who has always been a town problem, even more so since he got married, is laughing at folks who had said he would never get anywhere. He won a 10-room house completely furnished and $5,000 cash the other night by giving Napoleon's first name and telling why he preferred Tizzie-Wizzie Toasties.

—•—

Bing Boggs had a windfall this week. His pa died and left him a hog

• • •

CAN YOU REMEMBER—

Away back when the major automobile companies saw to it that the customers could get an essential spare part when needed?

—•—

When you could scare the landlord into painting the house and fixing the roof by threatening to move?

• • •

EPITAPH

Here lies Joe Zilch
On grassy slopes.
He's through with taxes
Now . he hopes!

• • •

United Nations expects to have the first unit of its New York home erected by November of next year. We hope the world will last that long

• • •

We hear that when "Babs" Hutton hears the question "What is the name please?" she now has to consult the record.

• • •

"Ge: E senhower is in fine fettle. He played nine holes of golf Sunday in 46. —News item

—•—

Well, that score for nine means close to 100 for 18 holes, and we refuse to think this is Ike's game. Anybody who saw him go from the Brittany coast to Berlin in par or better, knows he must be playing the Chevy Chase course with a niblick and putter.

• • •

It looks more and more as if the next atomic war could come in the midst of the arguments over the use of atomic bombs in the next war.

• • •

HORSES AND HOLLYWOOD

Even race horses go to Hollywood now to get into the big money. The other day Louis B Mayer, famous movie mogul, put his skinners up at public auction and they brought over a million and a half dollars. And that, even in Hollywood, is hay.

THE KINGDOM ESTABLISHED

LESSON TEXT—I Samuel 9:1, 2; 11. 12, 13 15 1 22-26, 34, 35.

MEMORY SELECTION—Blessed is the nation whose God is the Lord.—Psalm 33: 12

A major crisis had come in the history of Israel when we left them in our study of January-March, '47. They were ready to change their form of government. They no longer wanted God to rule them directly through his representatives but wanted a king like other nations round about them.

God acceded to their request and instructed his servant Samuel to anoint Saul as king, and they began that period in their history which led to their ultimate captivity and disgrace. We shall study together during the next three months the facts and factors involved in the rise and fall of the nation of Israel.

Our lesson concerns their first king, Saul, the son of Kish, who promised to be a great and good king but who failed through disobedience.

I. Saul—a Choice Man and God-Chosen King (9 1, 2; 15 1)

To begin well is to be far on the road to success. Here was a man of excellent quality, "a choice young man and a goodly"—in fact, there was not among his people one who surpassed him. What a splendid recommendation for the prospective ruler!

His physical appearance was also attractive. That is not as great a factor in success as some think, but it does have a bearing on a man's influence over others.

Most important of all, this man Saul was the one whom not only the people but also the Lord had chosen. The Lord sent Samuel (15 1) to anoint Saul as king, and to give him the key to success as ruler—obedience to the voice of God.

II. Saul—an Obedient and God-Blessed King (11:12, 13).

The attitude of a man toward his enemies is often the test of his character. Bitterness, hatred, revenge, or veiled hostility with a purpose of ultimate destruction—these are the common reactions of men toward them who oppose them.

Saul, who was not essentially different in his own spirit (as we shall see later), was a man after God's own heart in his early reign, for he was obedient to the Lord.

Some "worthless fellows" despised Saul and refused to recognize him as king. The urge of the flesh to destroy them was aggravated by their own unworthiness. Some wanted to put them to death for their disloyalty to the king, but Saul in true kingly spirit, and recognizing that he reigned by the good grace of the Lord, decreed that there was to be no revenge, but rejoicing.

The story which we touch on so briefly here is one that teaches the eternal truth that the way of blessing and power is the way of obedience to the laws and the will of God.

Saul began well, but before long his pride and self-will began to assert itself and he thus brought to ruin and personal disaster that which had begun with such promise and blessing. There were many such incidents, but we consider only one.

III. Saul—a Disobedient and God-Rejected King (15 22-26, 34, 35).

God had commanded that there must be utter destruction of the Amalekites and their possessions—something like the burning of a disease infested house—a wiping out of a king and people who were condemned of God. We may not fully understand this act of God, but if we know him we will not doubt that it was in accordance with his infinite wisdom and love.

Saul chose to disobey, later contending that it was done because of the people, that sheep and oxen had been spared for a sacrifice to the Lord. Samuel cut through his hypocrisy and declared that God wants obedience rather than sacrifice. This is a lesson that many who profess to follow the Lord have not learned.

The church or the individual who denies or disregards the teaching of God's Word and attempts to make up for it by sacrifices and ceremonies declares to the world that there has been a departure from true faith in God. Obedience is a virtue all too rare.

Too late! What sad words—and never sadder than when they speak of spiritual failure. Saul talked of repentance and prayer, but the Lord had already rejected him as king.

There comes a time when God's patience with man's disobedience is exhausted, and the door to further service is closed. It is a long, long way to the boundary line of God's patience; but mark it well, there is a boundary line!

Sportlight by Grantland Rice

THE citrus crop took quite a shellacking from the rather rough winter that assaulted Florida this season. This was practically the same winter that almost wrecked England and Europe and was none too soft on the South, the Southwest and the Middle West in the U. S. A. But for all of that, the pennant crop in Florida is looking to one of its biggest years.

If you recall the facts, the Cardinals, who trained at St. Petersburg, and the Red Sox, who trained at Sarasota, won the two major pennants a year ago. In the American league, Florida - trained teams, the Red Sox, Tigers and Yankees ran 1-2-3. In the National league they ran 1-2. According to Al Lang, who was bringing teams to Florida when Connie Mack was a rookie, it will be the same this season.

Grantland Rice

"Red Sox, Tigers and Yankees will run 1-2-3 again," Al tells you. "The Cardinals will prove once more that St. Petersburg is the best training spot on what is left of this globe. Florida stands pat. This state will dominate the two leagues, and we'll still have a few oranges, grapefruit, tangerines, strawberries and what not left over."

Lang still figures the Yankees would have done much better if they had come direct to St. Petersburg in place of using up their early training days in Puerto Rico and other Latin-American countries. I agree with him. The main reason for a big league team coming south or heading westward is condition—not exhibition games. The main idea is to build up legs and arms, to develop wind, to get ready for the 154 games that wait on beyond the middle of April. You get that on turf and sod, not in the air or traveling on trains. The Yankees were far ahead of the Cardinals this time last spring.

In Shape Too Early

"They are a full month past us," Eddie Dyer told me.

But the Cardinals were 20 games ahead of the Yankees in late September. Ball players I meet around here don't figure the Yankees can come close to the Red Sox, who are picked again to get another killing jump, due to saner training methods. At least partly. Not entirely. The Red Sox also have much the better ball club, no matter where the training site.

"How can anyone tell about the Yankees?" one veteran said. "Who could have told you 10 or 11 of their best hitters would fall off 30, 40 or 50 points? Who can say how many of these will bound back to where they used to be? Who can tell you how good Joe DiMaggio, the big man on the club, will be? Their pitching was pretty good last year. It was their weak hitting that wrecked them. DiMaggio, a great ball player, could be a big lift if he is the ball player he was before the war. Maybe he will be. I wouldn't know. But having DiMaggio in a slump is like having Bob Feller with an off year or Ted Williams batting .280 or Hal Newhouser trying to win 15 or 18 games. Look how Babe Ruth carried the Yankees so many years. Sure, he had a lot of help, but it was the Babe that supplied the spark.

"DiMaggio makes a much greater difference to the Yankees than the hits he makes or the runs he drives in or the great catches he can handle. Joe can lift or let down the entire club on the mental or hustling side.

Plenty of Possibilities

"The Yankees are still packed with possibilities. Spud Chandler is still a great pitcher. Stirnweiss, Rizzuto, Lindell, Keller, Henrich, Johnson, Robinson and others have shown in the past how good they can be—when they are right. With the exception of Chandler and Robinson, most of the Yankees were not too hot last year.

"They have high-class handling from Harris, Dressen and Corriden. They couldn't ask for better. But it is the ball player and the spirit of the ball player that gives you the answer. The spirit of the Yankees, I happen to know, was bad last season. They were a long way from the Yankees I used to know. I'd like to see first how much fight and hustle they have left. I'd like to see them with more of the stuff the Cardinals and the Dodgers have."

• • •

The Hard Luck Breaker

It has been a long time since I saw Spud Chandler of Georgia running, blocking and kicking against Yale. After leaving Georgia, Spud spent most of his time fighting off hard luck. He was shifted here and there, finally landing with the Yankees. He started several weeks before the spring training season but broke an ankle while running.

A year later he fielded a short bunt with a quick snap that wrecked a ligament in his right arm.

WHY TAKE HARSH LAXATIVES?

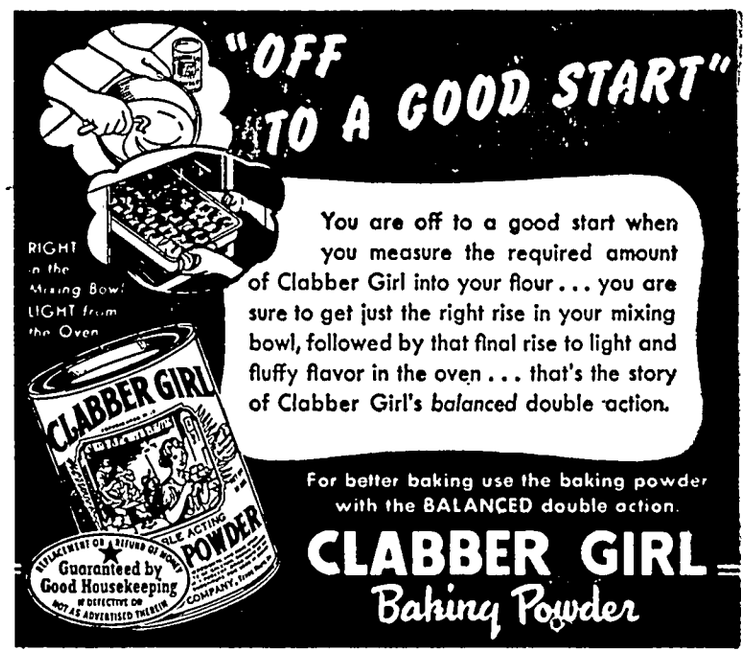
Healthful Fresh Fruit Drink Makes Purgatives Unnecessary for Most People

Here's a way to overcome constipation *without* harsh laxatives. Drink juice of 1 Sunkist Lemon in a glass of water first thing on arising.

Most people find this all they need—stimulates *normal* bowel action day after day!

Lemon and water is *good* for you. Lemons are among the richest sources of vitamin C, which combats fatigue, helps resist colds and infections. They supply valuable amounts of vitamins B_1 and P. They pep up appetite. They *alkalinize*, aid digestion. Lemon and water has a fresh tang too—clears the mouth, wakes you up, starts you going.

Try this grand wake-up drink 10 mornings. See if it doesn't help you! Use California Sunkist Lemons.



"OFF TO A GOOD START"
You are off to a good start when you measure the required amount of Clabber Girl into your flour . . . you are sure to get just the right rise in your mixing bowl, followed by that final rise to light and fluffy flavor in the oven . . . that's the story of Clabber Girl's *balanced* double action.

Nation's Farmers Will Observe Pan American Week

"Cooperation, Keynote of the Americas" is the slogan this year for Pan American Week which starts Sunday, April 13 The week is aimed at promoting mutual undrstanding and comutual understanding and co- the Western Hemisphere

County Extension Director, Paul Henderson, says "most of us tend to forget that real cooperation and understanding between nations must start with understanding and cooperation between peoples."

During the week we can expect much material to be printed in our newspapers and magazines and quoted over the radio, Henderson says It will be worthwhile to read and listen to as much information as possible about the neighboring countries to the south

Of interest to farmers is the fact that much of the economy of the Pan American group is dependent upon argiculture Some of the products produced are competitive For these products, representatives of all the nations are continually attempting to work out methods to expand markets.

For products which are not competitive, this country is giving aid in scientific improvement of production which will help insure the people of the U S of adequate supplies.

NOT ENOUGE CORN PLANTED TO ACRE

Adding Extra Stalks On Well Fertilized Soil Will Increase Yield

Two years of trials by the Iowa Agricultural Experiment Station indicate that many Iowa farmers aren't planting enough corn per acre to get the best yields from their fertilizer.

L B Nelson and Lloyd Dumenil, Station arronomists reporting on the tests, point out that more and more farmers are using commercial fertilizer To get the most from that fertilizer, good stands are essential. Moreover, on some of Iowa's fertile soils, better yields can be obtained with thicker stands even when fertilizer is not used

The agronomists report that adding an extra stalk per 40- by 40-inch hill on well fertilized soil boosted yields from 8 to 16 bushels per acre Heavier than normal applications of fertilizer were made

Greatest Yields

If both moisture and fertility are high, it appears that greatest yields will come from stands with 4 and 5 stalks per hill, or 15,000 to 19,000 stalks per acre

Although using fertilizer helps keep ear sizes larger, ears do tend to become smaller as the number of stalks is increased But the trails show that small as large ears, and it's the amount of shelled corn per acre that counts Shelling percentage from any field was about the same in the trials whether the stand was thick or thin.

No Fast Rule

The agronomists point out that it's hard to lay down any fast rule on rate of planting that will work for all soils There's some danger of getting too many stalks in the stand during a dry season or of getting more stalks than the land's fertility will support So the agronomists advise the farmer to do a little experimenting what stand will make the full use of available plant food In most cases he's likely to find that his stands haven't been heavy enough

CORN LOANS NEXT FALL AS HIGH AS LAST YEAR

Iowa farmers have the assurance that corn loans next fall will be at least as high as last year and probably higher

Farm economists at Iowa College point out that both corn and soybeans are protected by price supports By law the loans must be set at 90 percent of parity at the beginning of the crop marketing year—after Oct 1 for corn Parity is now higher than a year ago when the present corn loan was set

Although soybean prices may drop next fall, government prices support prices of $2.04 per bushel assure good returns

Larger Bean Acreage Seen For Iowa In '47

The hign price prevailing for beans and the doubtful profits from oats because of the new blight disease may mean a considerably increased Iowa bean acreage for 1947 if sufficient seed can be found, say Iowa State College agronomists

The average yield of beans in Iowa last year was 23 bushels per acre, the highest on record Total production for the state was 35 million bushels which was about the same as 1945 but from a considerably smaller number of acres. A still further increase in soybeans has been requested this year because of th critical shortage of fats.

ODD TEAM

Frankie Walters of Nora Springs needed two teams last fall, but he had only two horses and one mule Not a man to be easily discouraged, he broke a two-year-old full blooded Red Poll bull to harness, working him alongside one of the mares. Mr. Walters reports the bull "broke quicker and easier than a horse." The oddly-matched team was used to pick corn, thresh beans and haul stove wood.

Human Nature: That which makes you swear at the pedestrian when you are driving, and at the driver when you are a pedestrian.

Gardening Time

IS CLOSE AT HAND

Right now the weather is a bit unfavorable, but when you get ready to start you garden .. call on us for supplies:

- Row-Hoe Plows
- Garden Rakes and Hoes
- Lawn Brooms
- Garden Hose and Nozzles
- Vigoro Fertilizer
- Lawn Seed
- Garden Seed

We now have a nice assortment of tools for the farm — including Power Drills, etc.

International Announces Details of $20,000,000 Price Reductions

Details of the recently announced International Harvester policy of making price reductions to save users of our products approximately $20,000,000 a year have now been worked out.

We have reduced prices on 163 models. These cover 12 basic models of farm tractors, 123 basic models of farm machines, 16 basic models of industrial tractors and engines, and 12 models of motor trucks, as well as certain motor truck attachments. The new lower prices are effective as of March 10, 1947.

• These reductions were made not because of any decline in demand, but because we believe nothing is more important to this country than to lower the prices of the goods people buy.

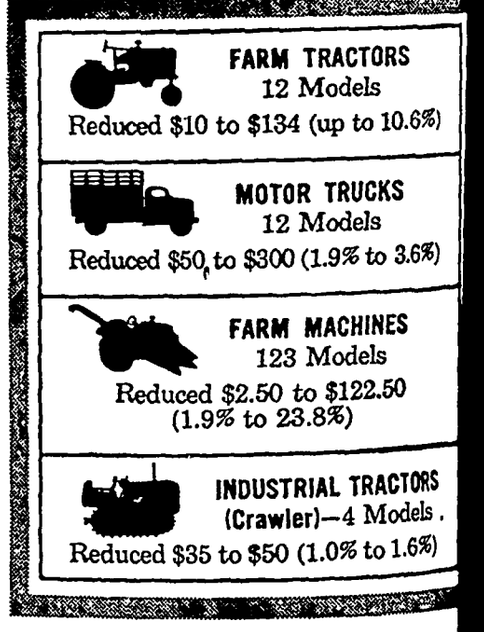
While prices have not been changed on all products, we have made reductions wherever possible, in the amounts possible. Prices of many of our most popular products have been substantially lowered.

Altogether, more than half of the company's customers will be benefited by the reductions, which range from 1% to 23.8% and from $2.50 to $300 per item, based on list prices, F.O.B. Chicago.

Since the people have demanded that the government withdraw from price control in peacetime, the responsibility to keep prices in check is back where it should be—in the hands of business and industry. The business outlook makes it possible for us to move toward the goal of lower prices, and we have felt a duty to act as promptly as possible.

Our ability to maintain these lower prices will depend on the supply and price of materials we buy from others and on uninterrupted production at reasonable wage levels.

The prices listed here carry out our announced policy that *"Any price is too high if it can be reduced."*



25 More Types of Products

Plows—52 models reduced from $9.00 to $20.00 (3% to 10.7%).
Cultivators—13 basic models reduced $5.00 to $10.00 (4.5% to 7.4%).
Listers and Middlebusters—7 models reduced $5.00 in each case (2.8% to 4%).
Corn Planters—4 basic models reduced $5.00 in each case (3% to 4.8%).
Grain Drills—11 models reduced $14.25 to $20.00 (4.4% to 6.3%).
Mowers—2 basic models reduced $4.00 and $11.50 (2.5% and 5%).
Sweep Rake—1 model reduced $5.00 (5.5%).
Pickup Hay Baler—1 model reduced $75.00 (4.1%).
Self-Propelled Combine—1 basic model reduced $122.50 (3.4%).
Ensilage Cutters—3 models reduced $22.75 in case (4.8% to 7.1%).
Ensilage Harvester—1 model reduced $33.75 (3.9%).
Hammer Mills—2 models reduced $5.00 in each (1.9% and 3%).
Lime Spreader—1 basic model reduced $2.50 (4.9%).
Power Loader—1 model reduced $25.50 (8.9%).
Manure Spreader—1 model reduced $13.00 (3.5%).
Milker Units—2 models reduced $12.00 and $ (14.4% and 18.4%).
Milker Vacuum Pumps—2 models reduced $17.00 in case (11.5% and 19.6%).
Portable Milker Vacuum Pumps—2 models reduced $ in each case (11.3% and 11.7%).
Stainless Steel Milker Pails—2 models reduced $5.0 $10.00 (18.5% and 23.8%).
Cream Separators—4 models reduced $13.25 in case (8% to 10.4%).
Tractor Trailer—1 basic model reduced $12.75 (5.
Milk Coolers—5 models reduced $8.00 to $18.00 to 4.3%).
Industrial Tractors (Wheel)—4 basic models re $19.00 to $56.00 (1% to 3.4%).
Industrial Power Units—8 models reduced from to $150.00 (2.3% to 11.4%).
Motor Truck Attachments—7 items reduced from to $268.00, including a change in specificatio two items.

Any price is too high if it can be reduced — Louis McEnroe

AT LAST
Help For The Hard Of Hearing

Officers of the ROCHESTER HEARING AID CO., one of the largest distributors of hearing devices, announce the introduction of the most amazing discovery in a way to hear ever developed.

At long last THE NEW INVISIBLE TYPE can be almost completely concealed.

Never before such clear undistorted sound, no noisy scratchy head splitting static, nothing but what you want to listen to.

Whether you now own an old hearing aid, a comparatively new one, or none at all, you owe it to yourself to know about this great new development

In any case, write at once for the surprising facts and how to obtain a demonstration in your own home with out riskig one cent

From where I sit ... *by* Joe Marsh

And That Ain't Hay —Or Is It?

...guess all of us secretly hanker, ...time to time, for the good ...days and the good old-...ioned pleasures. Leastways, ...dy Richards done a thriving ...iness reviving the old-time ...ride.

With a team of horses, and a ...t straw-bedded rack, Buddy ...take as many as thirty adults ...t fifty cents a head!

...Two or three times a week they ...rt from Town Hall, and go out ...ng the river, stop for a friendly ...ss of beer at Shoreside Tavern; and come home by way of Pound Ridge . . . nine miles in all.

Not very exciting, you might say. But from where I sit it's not excitement that we need these days—but those simple country pleasures that are part and parcel of America—the old-fashioned hayride, with its song and jollity; the horseshoe games; the friendly glass of beer; and the good companionship that they engender.

Joe Marsh

Copyright, 1947, United States Brewers Foundation

WISE MOTHERS encourage children to want and to *have* more milk and milk foods! It's one of Nature's surest ways of providing bone and tooth-building *minerals*, to work with Vitamin D . . . the sunshine Vitamin . . . in building strong, sturdy bodies!

But even *wiser* is the mother who sees that *all* her family gets plenty of milk . . . grown-ups as well as children. Doctors say . . . "at least a quart a day for every child, and at least a pint a day for every adult."

And best of all—there's *nothing* more refreshing, more delicious, more satisfying, than a glass of cool, flavor-rich, delicious *Milk!* Try it—right now!

New Doctrine To Realign World

Truman Draws Battle-Lines Against Red Expansionism

By BAUKHAGE
News Analyst and Commentator.

WNU Service, 1616 Eye Street, N. W., Washington, D. C.

WASHINGTON. — When Harry Truman enunciated what the Wall Street Journal, a periodical not given to poetic licentiousness, called "Democracy's Monroe Doctrine," he probably didn't realize the multifarious effects thereof

Baukhage

At this writing neither congress nor the country has quite recovered from the impact of those words read with the matter-of-fact, undramatic, unoratorical, cracker-barrel diction of a matter-of-fact, undramatic, unoratorical, cracker-barrel man. When I heard the President read them, standing there, calm and confident, at the lectern of the reading clerk on the house rostrum, looking up from the text only occasionally with that bird-like tilt of his head, as the television cameras purred gently from the opposite gallery, I felt a little worried The cabinet members seated in the well, the senators in the first rows of seats, the house members crowded into rows behind them—all seemed almost glum. I didn't realize the solemnity of the message which held them in a restrained silence Only thrice was there applause after he began to speak. Before and after there was plenty and it was evenly balanced, it was bi-partisan, not weighted heavily on the side of the administration party as it usually is when a President speaks.

When the speech was over it was the same The senators left in silence, there was little or no comment. As Senator Lodge said when a radio man plucked at his sleeve and asked if he would submit to an interview· "I can't think THAT fast." Even the fast and sound thinkers wanted time to think leisurely and deeply.

Since that day thousands of words have been spoken and printed in thousands of cities all over the world, about that message which covers a little more than four and a half pages, typewritten (on both sides of the sheet since wartime economy still is practiced at the White House) In many odd corners of the bazaars and market places those words crackled like tiny electric sparks.

And everywhere thoughtful, intelligent people in foreign countries—those who had always looked upon America as a nation whose political and cultural outlook was most sympathetic to their political and cultural outlook, but whose economic theories pointed further to the right than their own socialistic leanings—pondered. These were people to whom Soviet Russia was primitive, harsh, cruel in its methods. Nevertheless Russia's economic theories differed less from their own than did the economic theories of the United States, whose civilized, friendly and humane characteristics attracted them They found that they must choose. They must say to Russia or America: "Whither thou goest, I will go; and where thou lodgest, I will lodge; thy people shall be my people; and thy ways shall be mine"

Perhaps never before in history had a great nation so certainly divided the sheep from the goats, the friends from the enemies. The President's plan is more than a moral question. It involves more than abstract principles of political economy or social philosophy. It sets forth with shuddering simplicity to the wavering nations of the world the warning that they must run with the hare or ride with the hounds; they must have no other political god before Demos—the spirit of the people. Either majority rules in your house or your house is ruled out of bounds.

In other words, cabinets and cabinet makers, premiers and pro-consuls will no longer dance to the Kremlin's tune if they expect Uncle Sam to pay the piper—or the butcher or the baker.

Commies Aim at Revolution

Recently when Secretary of Labor Schwellenbach urged that the Communist party in America be banned by law it brought forth an emphatic protest from the secretary-general of the party, Eugene Dennis.

What are the Communists after? The new Kiplinger magazine, published in Washington, says in its March issue·

"As spelled out in their own words, American Communists have three major aims in the United States: The revolutionary overthrow of capitalism and the capitalist state, a Soviet form of government under a 'dictatorship of the proletariat,' and finally, the Communist heaven-on-earth, a collectivist economy leading to a classless society.

"Of the three aims, their first is revolution. Not merely change, but full-fledged revolution, planned, led and controlled by the disciplined Communist minority. 'The liberation of the working class from the yoke of capitalism cannot be effected by slow changes, by reforms, but only by revolution.'"

(Editor Kiplinger says if you want chapter and verse for his authority for the above statement, write to him at 1729 G Street, N. W., Washington 6, D. C., and he will send them to you.)

It is not likely, however, that the party will be banned by law Not because congress loves the Communists. But even that ardently anti-red group, the committee on un-American activities, doesn't approve of wiping out the party An anonymous member of the committee recently pointed out that if the party was broken up, it would simply go underground, where its devious ways would be harder to follow.

A worm on the surface is worth two dozen underneath the soil, as any early FBI bird will testify.

Life Insurance Increases in U. S.

On the average, there were over 4 life insurance policies per family in the United States at the end of 1945, it is revealed in a survey by life insurance companies. In amount of life insurance owned, the average per family was $4,000 at mid-year 1945. The average 1945 protection per family was more than 20 per cent larger than that of 1940 and was 2½ times the 1920 protection average. The 1945 average per family of life insurance owned was nearly equal to the 1945 average income per family, the average per family of national income in 1945 being $4,800. In 1920, the average protection per family was nearly 50 per cent below the average of national income per family. This gap was narrowed in the ensuing years, until in 1927 the protection average exceeded the income average. In the years of depression that followed, the protection average went as high as 2½ times the income average. In 1943, as wartime incomes expanded, the income average again topped the protection average.

Vanishing Crane

WHOOPING CRANE

This illustration of a Whooping Crane was supposed to accompany some remarks on that fast-disappearing species of American bird life that appeared in this column recently. Unfortunately the picture, like most of the originals, went astray. Since that article appeared, two national magazines published stories about this magnificent bird, whose whoop is becoming fainter and fainter every day. One article estimated that only a hundred specimens were still alive and whooping. The other article placed the number at 29. Says the Fish and Wildlife service of the department of the interior, which is conducting a survey of these, the tallest (man-size) and most beautiful of American birds; "fewer than 40" have been counted. They are in the coast region of southern Louisiana and Texas.

YOUNG IN YEARS ONLY . . . Tragic experiences, born of hunger and privation, have left their mark on the faces of these children of southern Bohemia. Barely a trace of childhood remains in their stark expressions. These torn and tattered boys are among those being helped by American Red Cross in its distribution of three million dollars in supplies to Czechoslovakia.

NEWS ANALYSIS

Floods Ravage England; Guard A-Bomb Materials

BRITAIN:

Floods New Peril

Melting of the thick blanket of snow that brought great hardship to Britain has swollen streams to flood stage. Many thousands of people in southern England are being forced out of their homes by rising waters. Some rivers already have passed the record high marks of 1894. Community kitchens are being set up to feed refugees. Troops, German war prisoners and volunteers are struggling to save water purifying stations, gas and electric plants, and other essential services. Others are sandbagging dikes and river walls.

"It is our worst disaster in 300 years," declares Miss Phoebe Custen, mayor of the Thames river town of Caversham.

Snow still is hampering transportation in five counties of northern England. These regions will have to cope with floods later.

Agricultural losses are already immense and prospects are for even more staggering damage. Tens of thousands of sheep and cattle are drowning in the Midlands regions. It is estimated that three million farm animals died over the winter, killed by snow and cold. Most of the spring wheat crop is ruined. The potato crop in the fenlands is considered destroyed. Planting of early crops is far behind schedule In a country that has been on short rations for seven years, this further blow is extremely serious.

ATOMIC ORE:

Rigid Regulations

In a move to safeguard the nation's supply of uranium and thorium ores, the raw materials for atom bombs, the Atomic Energy commission has issued a new and very strict code. Death is the penalty for major violations of the rigid regulations, which affect everyone handling the radio-active ores.

The code sets up a licensing system specifying that no one, unless licensed by the commission, can "transfer or export from the United States" any material that contains as much as 1-20th of one per cent of uranium or thorium.

After April 1, anyone not licensed who obtains 10 pounds or more of raw uranium or thorium must report it to the commission within 30 days. Use of uranium in ceramics, photographic supplies and other industrial products is practically forbidden, since no further supply of the metal will be allowed after April 1.

PARAGUAY:

Civil War

So serious is the rebellion in Paraguay that President Morinigo has issued a war decree to mobilize the full powers of the government. Rebels now are holding large sections of the little South American country. Government officials state that the revolt is Communist-inspired. They further charge that Communists in neighboring Uruguay and Bolivia are giving every assistance to the rebels.

The war act gives the government power to draft men, property and money, and to suspend any laws. The preamble declares that it was issued in accordance with "international agreement signed by this country for defense of the continent against subversive movements of a totalitarian character."

According to news from Brazil, the insurgents have won control of all the Paraguayan side of the Paraguayan-Brazil border by capturing the towns of Bela Vista, Pedro Juan Caballero and Captan Bado.

Paraguayan government reports say that some of the rebel forces have deserted and surrendered to government troops. There were other stories, denied by the government, that some infantry, artillery and naval units had refused orders to fight the rebels.

GEORGIA:

Talmadge Ousted

Melvin E. Thompson, elected lieutenant governor, is rightful governor of Georgia, the state supreme court has ruled, 5 to 2. Herman Talmadge, son of Gene, who has been acting as governor since his appointment by the legislature, was declared a usurper

M. E. Thompson

Atty. Gen. Eugene Cook has invalidated all bills signed by Talmadge during his brief and troubled term. The most important of this legislation is the white primary bill, but 150 other measures also were declared void by Cook.

The 33-year-old son of the famous "Old Gene" accepted the verdict of the state's highest tribunal and immediately made preparations to leave the executive mansion.

H. Talmadge

"We'll be back," he told well wishers. "The court of last resort is the people of Georgia. This case will be taken to the court of last resort." This was interpreted as indicating that Talmadge intends to run again in 1948, when a special election will be held. Under the law a lieutenant governor can serve only two years as governor.

The supreme court's majority decision took the view that the legislature erred when it appointed Herman Talmadge governor on January 14. The legislature, after a canvass of votes cast, acted on the theory that since Eugene Talmadge had died before inauguration, that there was no one elected to the office. Herman Talmadge was chosen on the basis of a few write-in votes. Thompson, duly elected lieutenant governor, was ignored.

HIGHEST ON RECORD

Livestock Value Soars to Peak

WASHINGTON. — Although the number of livestock on farms declined during 1946, the farm inventory value of all livestock soared to $11,252,000, a gain of 25 per cent over the previous year and the highest total on record, according to a bureau of agricultural economics report. The drop in livestock numbers was the third successive decline since a high was reached January 1, 1944.

The report listed 81,500,000 head of cattle, 26,100,000 milk cows, 56,901,000 hogs, 475,442,000 chickens, and 38,571,000 stock sheep as of the first of this year. In addition, there were 7,251,000 horses, 2,773,000 mules and 6,632,000 turkeys.

The value per head of cattle, hogs, sheep, chickens and turkeys at the beginning of 1947 reached new heights. The value per head of horses and mules was somewhat above a year earlier.

Supplies of feed grains on farms on January 1 were 10 per cent larger than on the same date a year earlier. With exception of 1942, they were the largest January stocks on record.

With livestock numbers down, the supply of feed grains in relation to livestock was more favorable than a year ago. The supply per unit of livestock reached record levels, 17 per cent larger than at the beginning of 1946, and 8 per cent above January 1, 1942, the previous high.

THE WASHINGTON SCENE

Ages of House Committee Heads Vary from 44 to 79

(Editor's Note. This is the sixth in a series of articles dealing with new congressional committees and their chairmen.)

By WALTER A. SHEAD
WNU Washington Correspondent.

WASHINGTON — Chairmen of house of representative committees, revamped under terms of the reorganization act, range in age from 44 to 79 years, it is disclosed in a survey of the new committee heads.

Eldest of the group is the veteran congressman, Rep. Charles A Eaton of New Jersey, who is 79. Two other committee chairmen are in their 70s Rep Clare E Hoffman of Michigan, 72 and Rep Earl C Michener, also of Michigan 71 Youngest house committee chairman is Rep. Fred A Hartley Jr., also of New Jersey, who is 44 Also under the half century mark are Rep. Lee E. Allen of Illinois and Rep Fred Bradley of Michigan both of whom are 49

The list of committee chairmen in the house continues.

Interstate and Foreign Commerce

CHARLES A WOLVERTON (N. J.), new chairman of the interstate and foreign commerce committee, supported the Democratic administration in the 79th congress more frequently than the outgoing Democratic chairman, Clarence F Lea (Calif.)

Wolverton, a 66-year-old lawyer and banker, has been in congress since 1927 The first New Jersey district, which he represents is composed of three counties along the Delaware river in the southwestern part of the state, and had a population of 370,220 in 1940 Most important city is Camden, where Wolverton has long been prominent in local affairs He also has served as special assistant attorney general of New Jersey and from 1915 to 1918 was a member of the New Jersey house of assembly of which he was speaker in 1918. He is a director and associate counsel of the First Camden National Bank and Trust company

Wolverton

Wolverton's district is predominantly industrial. Largest industries are electrical supplies, automobiles, shipbuilding, machinery and chemicals. CIO ship and electrical workers unions are well organized and politically active, as are the AFL construction trades and the railroad brotherhoods. The only agriculture is small truck farming in the southern part of the district. Wolverton has had labor support in recent campaigns.

The committee's jurisdiction includes civil aeronautics, the weather bureau, oil and gas except that on public lands, securities and exchanges, public health and the bureau of standards, besides the regulation of interstate commerce generally.

Post Office, Civil Service

EDWARD H REES (KAS.) heads the post office and civil service committee, which combines jurisdiction of the former civil service committee with personnel functions of the old post office and post roads committee.

As ranking Republican on the civil service committee, Rees has been concerned with the loyalty of federal employees In 1946 he introduced a resolution to authorize his committee to investigate civil service commission checks of employees' loyalty, which had been virtually discontinued for lack of funds Rees was appointed chairman of the investigating committee, which did not make a public report.

Rees

Rees also has been concerned with alleged failure of the civil service commission to give proper attention to veterans' rights in hiring and firing federal employees He has opposed the amount and distribution of salary raises given to federal employees in 1945 and 1946. He tried to cut personnel of the agriculture department more severely than was provided by the 1947 appropriation.

Born on a Kansas farm 60 years ago, Rees owns and operates a farm and practices law in Emporia Before being admitted to the bar, he taught school. He is a veteran of World War I. He served in the Kansas legislature from 1925 to 1935, and has been a member of congress since 1937.

Rees' district (the 4th Kansas) includes 15 counties in the east central part of the state. Some are completely rural-agricultural, but in others there are oil wells and some coal mines. The cities of Abilene, Emporia and Wichita are railroad centers and Wichita, which is one of the two Kansas cities of over 100,000 population, processes meat and other food products.

Judiciary

EARL C. MICHENER (MICH.), who has practiced law for 43 years in a small town in southern Michigan, is new chairman of the judiciary committee.

Judiciary, known as the lawyers' committee, combines the functions of the old committees on judiciary, patents, revision of laws, and immigration and naturalization. Its jurisdiction includes constitutional amendments, anti-trust laws and presidential succession Michener usually, but not always, follows Republican party policy In the last three months of the 79th congress he voted with the majority of Republicans on 78 per cent of the controversial roll calls.

Michener

Michener has been in congress since 1919 with exception of the two-year period from 1933 to 1935. He voted for overriding the Volstead act veto in 1919, for the child labor amendment in 1924, for repeal of prohibition in 1933, for the compromise soldier vote bill in 1944 and for the anti-poll tax bill in 1945.

A native of Ohio, Michener is 70 years old, and has practiced law in Adrian, Mich., since 1903. He served in the army during the Spanish-American war

The second Michigan district, which Michener represents, is composed of four counties in the southeastern part of the state adjoining Detroit and extending to the Ohio state line. Its population in 1940 was 285,648. Michener's home county is mainly agricultural, but the others contain automobile and parts plants, including Willow Run. CIO United Auto Workers are gaining considerable strength in the district.

Merchant Marine, Fisheries

FRED BRADLEY (MICH.), is chairman of the merchant marine and fisheries committee, which has jurisdiction over the merchant marine, other common carriers by water (except in their interstate commerce aspects), the coast guard, Panama canal, fisheries and wildlife.

Bradley, who has been active in Great Lakes shipping for 20 years, was active in support of the 1945 bill to provide for sale of surplus ships Fundamental object of the bill, he declared, was to "maintain the American merchant marine paramount on the high seas" In the 79th congress he introduced bills relating to Great Lakes transportation and fishing.

Bradley

Bradley is a regular Republican On controversial roll calls of 1946, he voted with the majority of his party 96 per cent of the time

His district (the 11th) is the largest in Michigan, with seven counties in the upper peninsula and nine in the lower The area is sparsely populated, with only four cities over 10,000 population. The largest, Sault Ste Marie, is about 16,000. Principal industries are agriculture (potatoes, hay, fruit) and logging. Largest open pit limestone quarry in the world is near Bradley's home town of Rogers City. Part of the area is summer resort country.

Born in 1898 in Chicago, Bradley grew up in Rogers City. After graduation from Cornell university in 1921, he was connected with the Michigan Limestone and Chemical company, a subsidiary of U S. Steel, and subsequently with Bradley Transportation company which operates six freighters owned by Michigan Limestone. Bradley makes a weekly report to his constituents through speeches transcribed for broadcasting over the district's four radio stations. He has been in congress eight years.

Only One Passenger but Railroad Pays

GALESBURG, ILL. — Only one passenger was carried by the Galesburg and Great Eastern Railroad company during the past year, realizing a revenue of 36 cents for the passenger department.

However, the little road, which is a common carrier operating about 18 miles of track between Wataga and Victoria, Ill., expects to be in business for a long time Although it may carry passengers, its principal business is derived from hauling coal. Last year the road's three locomotives hauled 600,000 tons of coal from a mine near Victoria to connect with the Burlington railroad's main line at Wataga.

Confident that their road will continue as a paying venture, the directors have asked the Illinois Commerce commission for a 50-year extension of their present franchise, which expires in 1948.

"Off We Go" AVIATION NOTES

AIRPORT CHATTER

"You're only as old as you feel," insists Mrs. Eva Barlow of Denver. Mrs. Barlow, who is a "mere 90," is practically a veteran in the "kid's game" of flying, having chalked up more than 5,000 miles of air travel in recent years . . . A new national guard air squadron has been organized at Gore field, Great Falls, Mont. . . . Robert Beckman of Mobridge, S. D., commutes 120 miles to high school. He received his pilot's license on his 17th birthday anniversary and is using the plane his rancher-father bought him. . . . La Crosse, Wis., dedicated its new million dollar Class 4 airport, which covers 1,100 acres. It has three runways, each 150 by 5,300 feet, with 1,000 foot safety zones at the end. Highlight of the dedication program was an air show staged by 19 army and 25 navy planes. The field will be a stopover on Northwest Airlines flights from Minneapolis to Chicago.

* * *

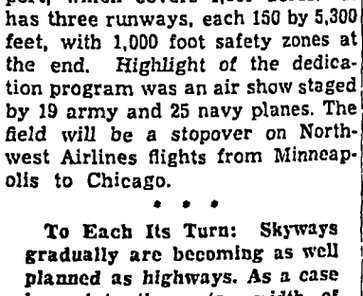
To Each Its Turn: Skyways gradually are becoming as well planned as highways. As a case in point, the extra width of pavement at the end of each taxiway, making a "hard-stand" or parking place for three planes waiting their turns on the runway, is reported as having speeded up traffic at a busy airport.

* * *

STILL'N' ALL

Add new uses for airplanes: In South Carolina, the state constabulary finds planes an ideal method of raiding moonshiners' stills. The planes are used to buzz the suspected still location as officers raid from the ground, so the motor noise will cover up the crackle of dried leaves under the feet of the raiders. It works, too. Surprised in this manner, one still proprietor gave up without a fight because, he explained to officers, "I just can't figure out how you fellows got out of that airplane. If you can work a trick like that, there ain't no use in my runnin' away."

* * *

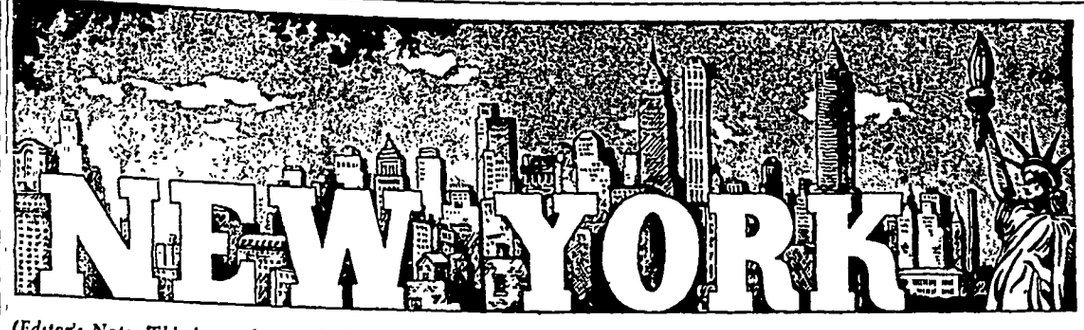


FRIEND TO BIRDS . . . When snow and cold made it tough pecking for hungry birds in New York, the State Fish and Game association employed three planes to drop a half ton of bird seed in isolated areas.

* * *

SAFETY SURVEY

Plane owners have been called to the aid of Civil Aeronautics administration in its search for reliable statistics on personal flying. A postal card questionnaire is being sent by CAA to 25,000 of the 85,000 plane owners asking them the type and amount of flying they do. On the basis of this information, CAA will determine the relative safety of personal flying. Questions seek information on personal, business and instruction flying, on transportation for hire and other flights.



(Editor's Note: This is another in the "Stories of the States" series.)

By EDWARD EMERINE
WNU Features

Let's think of 2,000,000 cattle and 350,000 head of sheep. Just imagine pastures so lush that each section of land cares for 40 head of cattle. Picture a state where farms average 112 acres each. No, it's not some western state. It's New York!

After all, Manhattan island is a small part of the area of New York, which is 49,576 square miles of farms, orchards, mountains, valleys, streams, lakes, forests and other rural, beautiful and natural things. Times square, Greenwich village, Fifth avenue and Wall street are rivaled by Niagara falls, the Adirondacks, the Catskills, Lake Placid and Mount Marcy The subways are no match for ski runs and toboggan slides It's a long step from the Bowery to country lanes and old farmsteads

Champlain Came First.

New York has so many firsts they can't be counted. Samuel de Champlain was the first white man to set his foot in New York as well as the first to teach religion to the Iroquois Within a year Hendrik Hudson anchored his little ship off Coney island, finally sailing up the river which bears his name to the present site of Albany

Two years later some Amsterdam merchants were given a trading charter for New Netherland, as New York was to be known. The first post was set up in 1613 on Manhattan; the second in 1614 at Fort Nassau on Castle Island, south of the present Albany. Ten years later all Manhattan island was purchased from the Indians for $23 worth of trinkets.

Forty years later, in 1664, a British fleet demanded surrender of New Amsterdam, and Director-General Peter Stuyvesant found himself with little support. He capitulated, and the duke of York was granted the conquered land. "New York" became the new — and lasting — name

As years passed, more and more people flocked to the New World, many of them finding the rich lands of New York state to their liking Hamlets, villages and cities sprang up, knit together with a network of aboriginal trails that eventually became roads and highways Albany's geographic position, at the crossroads of the state, made it a key frontier settlement in the 17th century

Leads in Population.

The battleground of Saratoga, Champlain valley, Fort Montgomery, Valley of the Mohawk, the Niagara frontier—from these grew New York, a state which has mushroomed from scattered colonies to the most populous state in the union with 13,479,142 inhabitants!

CHIEF EXECUTIVE . . . Thomas E. Dewey, who was born in Owosso, Mich., March 24, 1902, began his meteoric rise as a national figure in 1931 when he was appointed United States attorney for the southern district of New York state. As prosecuting attorney for New York county, he gained fame in prosecution of gangsters. Defeated for governor in 1938, he ran again in 1942 and was elected by a wide margin. He was reelected in 1946 after losing the presidential contest in 1944 to the late Franklin D. Roosevelt.

Through the years, the centuries and many wars, the great industrial commonwealth of New York has emerged. During World War II, of all the war contracts awarded by the federal government in the 48 states, 11 per cent went to industrial plants in New York state. Of the 100 largest industrial corporations in the nation, 91 are represented in New York City.

New York's variety of products range from heavy metals and machinery to exquisitely polished diamonds. Shoes, paper, books, magazines, furniture, carpets, business machines, locomotives, cameras, photographic films, precision instruments, electrical equipment — and the list grows on and on—all these are produced in the factories of New York. Its apparel industry produces 48 per cent of the nation's clothing, and 45 per cent of rugs and carpets comes from there.

Still, there are 153,238 farms in New York state, the appraised value of which is more than a billion dollars. The average growing season is often as high as 210 days, particularly in the Long island section. New York's own fruits and vegetables supply the state's large canning industries. Wines, champagnes, oysters, seafoods, poultry, eggs and other products go to nearby markets. The last prewar year placed a total value of more than 300 million dollars on New York's agricultural products, with milk the largest farm revenue producer.

Today the port of New York City is the nation's foremost center of foreign trade, and yet its people like to recall that it was there that George Washington was sworn in as first president of the United States. Buffalo is the nation's largest freshwater port, yet when white men first came they found a basswood forest and Erie Indians fishing and hunting along the creeks and lake. And there are Binghamton, Rochester, Syracuse, Utica, Yonkers and others —all playing an important part in commerce and trade today

Those who live in New York —anywhere in the state—have playgrounds close at hand. There are mountains, seashores, lakes, rivers, waterfalls, farm lands and more than 70 state parks. Niagara falls, the Thousand Islands, Ausable chasm, the Palisades, Howes caverns, Lake George and many others are points of interest for natives and visitors alike.

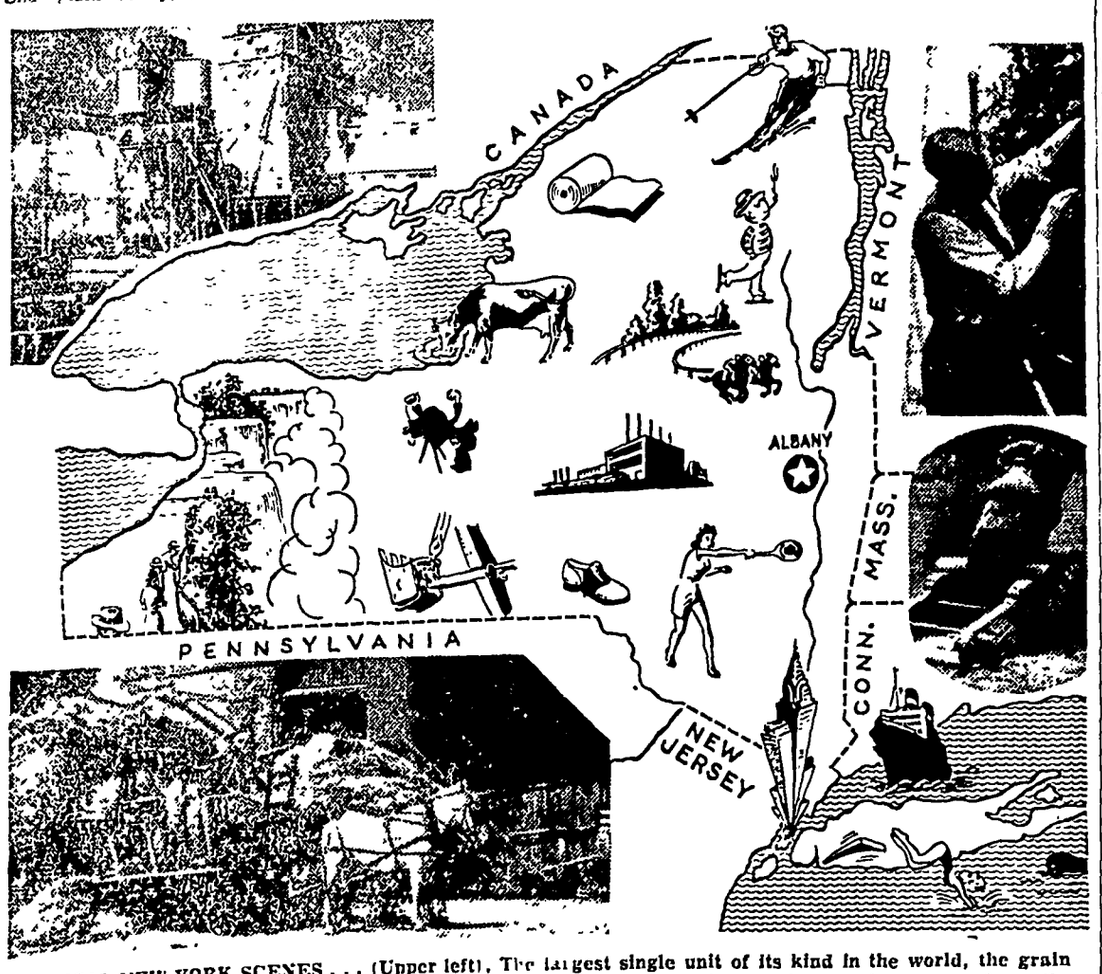
Lake Placid is internationally known as a summer and winter resort, with toboggan slides, ski runs, skating rinks, stables for skijoring horses and kennels for sled dogs. There are literally hundreds of other places in the state for winter sports Saranac lake is famed as a health resort as well as a winter and summer sports center

Lures Vacationists.

Coney island, Brighton and Manhattan beaches, and Long island, with its Riis park, Rockaway, Long beach and Jones beach, provide a playground for the great metropolitan areas Southampton is the scene of a noted society colony, and Staten island has a number of resorts

And there's still New York City, with its universities, its cathedrals, museums, libraries, subways, bridges, parks and driveways—one of the great wonders of the modern world!

Yes, New York state has so many firsts they can't be counted. It is rural; it is metropolitan. And always it is refreshing in its variety of pursuits, pleasures, recreational advantages and unusual natural beauty.



TYPICAL NEW YORK SCENES . . . (Upper left), The largest single unit of its kind in the world, the grain elevator at Albany, with a storage capacity of 13,500,000 bushels, handles precious grain cargoes from the Great Lakes and the West via the Barge canal. (Upper right), Modern, scientific methods are applied to agriculture, as indicated by this scene showing care of tomatoes in a greenhouse. (Center right), Historic spots stud the New York landscape. A far cry from atomic warfare are the ancient 18th century mortars and cannons at Fort Ticonderoga, defiantly poised to stop the Redcoats as they came northward on Lake George in stately procession of death. (Lower left), Farming is big business in New York. This large farm in the upstate region is one of the 153,238 farms throughout the state which are assessed at more than a billion dollars.

New York Rates as Glamour City of Nation and World

"New York City!" The words are magic. New York City means finer jewelry, better places to eat, more entertainment, glamorous personalities, artists, writers, songs, the stage. Broadway and Fifth avenue, Times square, Wall street, Greenwich village—those names have charm and lure to dreaming youths in Kansas, Michigan, Missouri, even California.

New York City does not belong to New York state alone. It is the metropolis of all the states, the chief city of a nation. It is the largest, the richest, of all. Moreover, New York holds the same proud position relatively in the entire world. No other city has so large a population within equivalent boundaries. No other city in the world controls such great monetary wealth or buys and sells such quantities of commodities. No other city handles as large a volume of foreign trade. No other city on this earth manufactures an equal volume or value of commercial articles.

The park area in New York City covers nearly 8,000 acres. Largest is Central park, covering 843 acres in the heart of the city. World-famed monuments and sculptures include the Statue of Liberty, Grant's tomb, the Egyptian obelisk, the Washington arch and many others.

SEWING CIRCLE PATTERNS

Warm Weather Togs for Tots

Button-Trimmed Daytime Frock

Practical Outfit

A DAINTY little trio for sunny weather playtime. Your young daughter will look adorable in this wing sleeved dress trimmed with colorful ric rac. A pert bonnet shades her face prettily — brief panties complete this practical outfit.

Household Hints

Wallpaper, to take a water base paint, must be completely dry, so it is best not to tackle the job in damp weather. Wait for a warm day. Apply with wide brush or roller for the very best results.

—o—

Protect your scissors from rust in damp weather by wrapping them in waxed paper.

—•—

Brass is meant to be shiny. Keep yours bright by cleaning with a mixture of equal parts of flour and salt and enough vinegar to make a smooth paste.

—•—

It takes a lot of paint to cover bricks because they are porous and soak up the linseed oil. The first coat should be permitted to dry for a week or ten days before the second one is applied.

—•—

Choose colored thread slightly darker than the fabric on which it will be used. Then, when stitched in place, it will appear to match the fabric.

—•—

A rip-saw should be held at an angle of 60 degrees for best results.

—•—

The next time you want your small son or daughter to remember something, paint a dot of red nail polish on a thumbnail. This is better than the time-tested method of "tying a string."

Fresh Apple in Bran Muffins! Wonderful!

MAKE THEM UP IN NO TIME!

Crunchy, toasted Kellogg's All-Bran and fresh apple taste just dreamy!

2 tablespoons shortening	1 cup Kellogg's All-Bran
¼ cup sugar	½ cup milk
1 egg	1 cup sifted flour
¾ cup grated raw apple	2½ teaspoons baking powder
	¾ teaspoon salt

Blend shortening and sugar. Add egg; beat well. Stir in apple, Kellogg's All-Bran, and milk. *Let soak until most of moisture is taken up.* Add sifted dry ingredients to first mixture. Stir only until flour disappears. Fill greased muffin pan two-thirds full. Bake in moderate oven (400° F.) about 30 minutes. Makes 12 muffins. You'll want to make them often.

Good Nutrition, Too! All-Bran is made from the VITAL OUTER LAYERS of finest wheat — serve daily as a cereal.

Kellogg's ALL-BRAN

U. S. Savings Bonds

SHEAR SHEEP EARLY FOR BEST RESULTS

April is the month for sheep shearing in Iowa says County Extension Director Paul Henderson. He urges farmers to get the sheep shearing job done early for best results.

Henderson says a report from C. W McDonald, Iowa State College sheep specialist, points out that early shearing is the most profitable The ewes with lambs milk better and the lambs gain faster. In addition, early shearing saves the wool that might be lost from rubbing and scratching by the ewes during warm weather

In doing the shearing job, shearers should avoid second cuts as much as possible. The wool should be kept clean, free from chaff and dirt. And it should be tied with paper twine, leaving the flesh side out.

Many sheep raisers follow the practice of confining the sheep the night before they are to be sheared This will make sure the fleeces are dry at shearing time.

One word of warning also comes from Dr K. W Stouder, extension veterinarian at the college, who says sheep should not be dipped until all shearing cuts have been healed There is danger of serious irritation and infection of the cuts if the dipping is done too soon.

EXPECT HOG PRICES TO STAY GOOD UNTIL FALL

Hogs continue to offer one of the most profitable ways of marketing corn, say Iowa State College farm economists.

The outlook is for hog prices to remain good until next fall, partly because the pig crop last fall was down 11 percent There is a possibility that there will be a greater than normal seasonal drop in hog prices next fall and winter, but unless business collapses, hog prices should stay above support level during the marketing season.

Happy Birthday!

Grandma Caroline Schlawin will observe her 96th birthday on April 24th She is staying at the home of her son, Otto, at Garner. Happy birthday, Grandma, from all of your old Klemme friends.

Harvey Barz Has New Truck

Harvey Barz, Standard Oil Dealer here, began work Monday in a new modern type truck. His new truck is fully streamlined and has a capacity of 800 gallons which can be placed in 5 different cells. Space is also provided to carry grease and other products.

The Bee Rock Tunnel, 30 feet long, near Appalachia, Va., is the shortest railway tunnel in the nation and reputed to be the shortest in the world.

KLEMME SCHOOL NEWS

Kindergarten News

—Miss Seim, Teacher

Miss Corrine Merkel visited us on Monday. We have been working in our workbooks and we made Gingerbread Men.

We all enjoyed our trip Thursday afternoon to see the show "Pinocchio" in Kanawha.

—Miss Halfwassen, Teacher

The Second Grade have started to read in their new Reader, "Have You Read."

Those in First Grade receiving 100 in Spelling for the week are:

Jeanne Barz
Diana Masterson
Gordon Johnson
Marcella Nuehring
Rosalie Rosendahl
Connie Jo Bisom
Lind Swalve
George Smith

Those in Second Grade receiving 100 in Spelling for the week are:

Robert Larson
Eva Thiemann
Beverly Christiance
Janice Stokesbary
Sharleen Swanson
Gary Baack
Martin Brinkman

Fifth And Sixth Grade News

—Mrs. H. G. Voetberg, Teacher.

The following people in the fifth grade had perfect scores this week in Spelling:

Richard Baack
Dennis Ridder
Roger Terhufen
Janice Swanson

The following people in the sixth grade had perfect scores this week in Spelling:

John Bisom
Galen Gruis
Margaret Boland
Eunice Helps
Beverly Sabek

Thursday afternoon was filled with lots of excitment for us. We went by bus to Kanawha to see the show "Pinoccio." After the show each of us were given a bag of popcorn All of us enjoyed ourselves very much

Seventh and Eighth Grade News

—Clara Smith, Teacher

We all enjoyed the movie "Pinocchio" at Kanawha Thursday afternoon.

In eighth Arithmetic we have been working problems in volume These problems have included prisms, cylinders, cones, and pyramids.

Wednesday we wrote stories during our health period. We planned our stories to show how someone's quick thinking saved a life We read our stories in class.

Each of us planned a poster of our own in Art Friday. During the last six weeks each of us may complete some project. The most popular ones planned to date will be, magazine racks, bird houses, sewing, embroidery and glass paintings.

KLEMME HIGH SCHOOL News

Reported by Elizabeth Goll

The Juniors have been busy planning for the Junior-Senior Banquet. They have picked the theme and the appropriate committes needed.

All the Seniors are hard at work on "Just Ducky" and it really is just ducky! We are now practicing act two.

The students of Mrs. Leith have all had to suffer six weeks tests this week. Did anybody pass? The rest of the six weeks tests are to be given next week so we will all have to wipe the dust off our books once more and open them to try reviewing.

"The Tradegy of Macbeth" is now our tradegy in English Literature. Many of the students claim that it is far too deep for us but we are trying to understand it as best we can.

The typing class is typing business letters and finding it rather difficult to get them typed witnout any errors.

Business Arithmetic during the past week has included square roots, volume, and board feet problems. Metric systems of measures is now our assignment.

All of the Juniors have been sitting on pins and needles waiting for the chance to pick out their class rings. The representative from Jostens was to come Wednesday but failed to appear so we the still waiting.
